What We're Reading

This month Jeni Nichols of Sonoma Learning Systems weighed in on [The World is Flat](#) by Thomas Friedman. "It's a fascinating read on the powerful technological forces that have been shaping the 21st century. If you love to Google, wonder who the person is that answered your technical questions in Bangalore, or want to know the latest standard in Web delivered services. . . .this is your book! Friedman contends that the world is flat (figuratively, of course), reinforcing the critical need for good leaders—leaders who can educate people, explain the world in which they live, and thrive within it. Leaders who can explain and inspire. . . .sounds like a Leadership Challenge to me!
