IT Professional Fact Sheet

Overview:

The MOAC IT Professional Series program covers courses on Microsoft software used by enterprise employees working to plan, design, implement, and administer the software infrastructure businesses use to run their network, websites, e-commerce sites, databases, email, intranet, and firewall.

- Job titles for these courses are: support technician, network administrator, network engineer, and database administrator.
- Software covered in the MOAC ITPro program is: Windows client, Windows Server, Exchange Server, and SQL Server, in the newest and previous version.
- Programs in schools may be called networking, network administration, desktop support, and sometimes help desk.
- All MOAC ITPro products map to the Microsoft Unified Skills Domain (USD) for each technology, the same market researched curriculum for planning the certification exams and the rest of Microsoft's training products.

Windows Server 2008 MOAC

MCTS 70-640	Windows Server 2008 Active Directory Configuration	978-0-470-13330-9	Avail
MCTS 70-642	Windows Server 2008 Network Infrastructure Configuration	978-0-470-13327-9	Avail
MCTS 70-643	Windows Server 2008 Applications Platform Configuration	978-0-470-13328-6	Avail
MCITP 70-646	Windows Server 2008 Server Administrator	978-0-470-13329-3	November
MCITP 70-647	Windows Server 2008 Enterprise Administrator	978-0-470-22490-8	TBD

Windows Vista MOAC

MCTS 70-620	Windows Vista Configuration	978-0-470-06958-5	Avail
MCITP 70-622	Supporting and Troubleshooting Applications on a Windows Vista™ Client for Enterprise Support Technicians	978-0-470-06959-2	Avail

SQL Server 2005 MOAC

MCTS 70-431	Microsoft SQL Server 2005 Implementation and Maintenance	978-0-470-11596-1	Avail
-------------	----------------------------------------------------------	-------------------	-------

Exchange Server 2007 MOAC

MCTS 70-236	Microsoft Exchange Server 2007 Configuration	978-0-470-31227-8	December
-------------	----------------------------------------------	-------------------	----------

FAQ's:

- Q: How does the new networking curriculum change from Windows Server 2003?
A: The curriculum changes entirely and dramatically. There is no one to one mapping with current exams. Microsoft has a new strategy behind certification positioning which divides the learning objectives between basic technology focused skills in the MCTS exams, and job role focused skills in the MCITP exams. Please see the attached diagrams for curriculum recommendations.
- Q: What will be in each MOAC course package?
A: The textbook and lab manual each comes in the MOAC course.
- Q: Will Microsoft continue to provide trial software with Server 2008 texts?
A: There will be Server 2008 Evaluation software available with the books. In addition, Wiley can provide MSDN AA free for the first three years with an adoption of the new MOAC program products. This gives the department free access to the full product.
- Q: Will the MOAC ITPro program include Virtual labs for Server 2008?
A: Yes. More details will follow as these labs are in development.
