

Chapter 6 Errata and Corrections

In order to reproduce the results shown in chapter 6, one correction and additional step is necessary:

Page 141 – Group the details on the SalesTerritoryRegion field

After adding the CalendarYear and SalesTerritoryRegion groups shown on page 140, it is necessary to add a detail row group expression for the SalesTerritoryRegion field. To do this, click the down arrow on the (DetailsGroup) in the Row Groups list and choose Group Properties. In the Group Properties dialog, click the Add button under Group expressions. Choose the [SalesTerritoryRegion] from the field list and then click OK to close the dialog.

After making this modification to the detail group, hover over the SalesAmount field and click the field list icon. Reselect the SalesAmount field from the drop-down list. This will apply the SUM aggregate function.

Page 144 correction – Add total row for CalendarYear

Instead of inserting the total row for the SalesTerritoryRegion field (shown in Figure 6-19,) right-click the CalendarYear textbox and then follow the same instructions to insert a new row for the total.
