

## About the Authors

**Rich Tretola** is a Senior Software Developer at Herff Jones, Inc., specializing in Rich Internet Applications (RIAs). He is an award-winning Flex developer and self-proclaimed Flex evangelist. He entered the field of Web development in the late 1990s and has been building applications ever since. Other than Flex, he builds applications using ColdFusion, Flash, and Java (where he is a Sun-certified programmer). He is highly regarded within the Flex community as an expert in RIA and is also an Adobe Community Expert. He runs a popular Flex blog at <http://www.everythingFlex.com>, is a contributor to the Indianapolis Flex user group, and has appeared in the *Web Developer's and Designer's Journal*.

**Simon Barber** is the Founder and CTO of ThoughtFaqtory, a firm based in Cape Town, South Africa, that specializes in the development of Rich Internet Applications (RIAs). At ThoughtFaqtory, he manages, designs, architects, and develops cutting-edge applications for clients around the globe. He has been actively involved in the Flash community for many years, and has delivered presentations at numerous conferences. He also maintains a weblog at <http://spbarber.com>.

**Renaun Erickson** is a Rich Internet Application (RIA) developer specializing in Adobe products. He has a background in both computer science and archeology. He enjoys creating useful custom components for the RIA space. His main skills are in RIAs using Flex, Flash Media Server, Flash Video, ColdFusion, and PHP. He contributes to the Las Vegas user group and larger developer community through publishing articles on Adobe dev center and *Web Developer's and Designer's Journal*. You can reach him at <http://renaun.com>.
