
CONTENTS

Preface	xix
Preface to the First Edition	xxi
Introduction	1

DIODES I: RECTIFIERS

1. <i>p-n</i> Junction Diode	11
1.1 History	11
1.2 Structure	11
1.3 Characteristics	12
1.4 Applications	18
1.5 Related Devices	
1.5.1 Zener Diode	20
1.5.2 Step-Recovery Diode. Fast-Recovery Diode. Snap-Off Diode. Snap-Back Diode	20
1.5.3 Anisotype Heterojunction	20
1.5.4 Varactor. Varactor Diode. Varicap Diode	22
2. <i>p-i-n</i> Diode	24
3. Schottky-Barrier Diode	31
Metal-Semiconductor Junction. Point Contact. Surface-Barrier Diode. Hot-Carrier Diode. Hot-Electron Diode	
3.5.1 Mott Barrier	40
3.5.2 Metal-Insulator-Semiconductor (MIS) Tunnel Diode	40

Note: Since the standard sections of (.1) History, (.2) Structure, (.3) Characteristics, and (.4) Applications appear in every chapter, they are omitted from the Contents except for Chapter 1 as an example.

4. Planar-Doped-Barrier (PDB) Diode	42
δ -Doped-Barrier Diode. Triangular-Barrier Diode. Bulk-Barrier Diode. Bulk Unipolar Diode	
4.5.1 Camel Diode	46
4.5.2 Planar-Doped-Barrier Field-Effect Transistor (PDBFET)	47
5. Isotype Heterojunction	49
5.5.1 Graded-Composition Barrier	54
<u>DIODES II: NEGATIVE RESISTANCE. N-SHAPED</u>	
6. Tunnel Diode	57
Esaki Diode	
6.5.1 Backward Diode. Back Diode	63
7. Transferred-Electron Device (TED)	64
Gunn Diode. Transferred-Electron Oscillator (TEO). Transferred-Electron Amplifier (TEA)	
8. Resonant-Tunneling Diode	75
Double-Barrier Diode	
8.5.1 Resonant-Tunneling Field-Effect Transistor (RTFET)	81
9. Resonant-Interband-Tunneling (RIT) Diode	84
10. Single-Barrier Tunnel Diode	90
11. Single-Barrier Interband-Tunneling Diode	95
12. Real-Space-Transfer (RST) Diode	98
<u>DIODES III: NEGATIVE RESISTANCE. S-SHAPED</u>	
13. Metal-Insulator-Semiconductor Switch (MISS)	103
MIS Switch. MIS Thyristor (MIST)	
13.5.1 Metal-Insulator-Semiconductor-Metal (MISM) Switch	108
13.5.2 Metal-Insulator-Semiconductor-Insulator-Metal (MISIM) Switch	109
14. Planar-Doped-Barrier (PDB) Switch	111
Triangular-Barrier Switch	
14.5.1 Polysilicon- <i>n-p</i> Switch	115
14.5.2 Double-Heterostructure Optoelectronic Switch (DOES). Ledistor. Lasistor	115

15. Amorphous Threshold Switch	118
Ovonic Threshold Switch	
15.5.1 Amorphous Memory Switch. Ovonic Memory Switch	121
16. Heterostructure Hot-Electron Diode (HHED)	123

DIODES IV: NEGATIVE RESISTANCE. TRANSIT-TIME

17. Impact-Ionization-Avalanche Transit-Time (IMPATT) Diode	127
Read Diode. Misawa Diode	
17.5.1 Trapped-Plasma Avalanche-Triggered Transit (TRAPATT) Diode	134
17.5.2 Double-Velocity Avalanche Transit-Time (DOVATT) Diode	136
17.5.3 Mixed-Tunnel-Avalanche Transit-Time (MITATT) Diode	136
18. Barrier-Injection Transit-Time (BARITT) Diode	137
Punch-Through Diode	
18.5.1 Double-Velocity Transit-Time (DOVETT) Diode	142
18.5.2 Tunnel-Injection Transit-Time (TUNNETT) Diode	143
18.5.3 Quantum-Well-Injection Transit-Time (QWITT) Diode	144

RESISTIVE AND CAPACITIVE DEVICES

19. Resistor	145
19.5.1 Varistor	149
19.5.2 Potentiometer. Pot. Rheostat	150
19.5.3 <i>n-i-n</i> Diode. <i>p-i-p</i> Diode. Double-Junction Diode	151
20. Metal-Oxide-Semiconductor (MOS) Capacitor	153
20.5.1 Metal-Insulator-Semiconductor (MIS) Capacitor	160
20.5.2 Parallel-Plate Capacitor	161
21. Charge-Coupled Device (CCD)	164
Charge-Transfer Device (CTD)	
21.5.1 Buried-Channel Charge-Coupled Device (BCCD)	172
21.5.2 Peristaltic Charge-Coupled Device (PCCD)	172
21.5.3 Profiled-Peristaltic Charge-Coupled Device (P ² CCD)	172
21.5.4 Bucket-Brigade Device (BBD)	174

TRANSISTORS I: FIELD-EFFECT

22. Metal-Oxide-Semiconductor Field-Effect Transistor (MOSFET)	175
Insulated-Gate Field-Effect Transistor (IGFET). Metal-Oxide-Silicon Field-Effect Transistor (MOSFET). Metal-Oxide-Semiconductor Transistor (MOST)	
22.5.1 Double-Diffused Metal-Oxide-Semiconductor (DMOS) Transistor	186
22.5.2 Laterally Diffused Metal-Oxide-Semiconductor (LDMOS) Transistor. Laterally Diffused MOSFET (LDMOSFET)	186
22.5.3 Hexagonal Field-Effect Transistor (HEXFET)	187
22.5.4 V-Groove (or Vertical) Metal-Oxide-Semiconductor (VMOS) Transistor	188
22.5.5 U-Groove Metal-Oxide-Semiconductor (UMOS) Transistor	188
22.5.6 Thin-Film Transistor (TFT)	188
22.5.7 Metal-Insulator-Semiconductor Field-Effect Transistor (MISFET)	188
22.5.8 Pressure-Sensitive Field-Effect Transistor (PRESSFET)	189
23. Junction Field-Effect Transistor (JFET)	191
Junction-Gate Field-Effect Transistor	
23.5.1 V-Groove Field-Effect Transistor (VFET)	198
24. Metal-Semiconductor Field-Effect Transistor (MESFET)	200
25. Modulation-Doped Field-Effect Transistor (MODFET)	209
High-Electron-Mobility Transistor (HEMT). Two-Dimensional Electron-Gas Field-Effect Transistor (TEGFET). Selectively Doped Heterojunction Transistor (SDHT). Heterojunction Field-Effect Transistor (HFET)	
25.5.1 Inverted Heterojunction Field-Effect Transistor. Inverted MODFET	215
25.5.2 Planar-Doped (Delta-Doped, Pulse-Doped) Heterojunction Field-Effect Transistor	215
25.5.3 Single-Quantum-Well Heterojunction Field-Effect Transistor. Double-Heterojunction Field-Effect Transistor (DHFET)	215
25.5.4 Superlattice Heterojunction Field-Effect Transistor	215
25.5.5 Pseudomorphic Heterojunction Field-Effect Transistor	217
25.5.6 Heterojunction Insulated-Gate Field-Effect Transistor (HIGFET)	217
25.5.7 Semiconductor-Insulator-Semiconductor Field-Effect Transistor (SISFET)	217
25.5.8 Doped-Channel Heterojunction Field-Effect Transistor	217

26. Permeable-Base Transistor	219
Metal-Gate Transistor	
27. Static-Induction Transistor (SIT)	225
Analog Transistor. Multichannel Field-Effect Transistor. Gridistor.	
Bipolar-Mode Static-Induction Transistor. Depleted-Base Transistor	
28. Real-Space-Transfer (RST) Transistor	234
Negative-Resistance Field-Effect Transistor (NERFET).	
Charge-Injection Transistor (CHINT)	
29. Planar-Doped Field-Effect Transistor	242
Delta-Doped (δ -Doped) Field-Effect Transistor. Pulse-Doped Field-Effect Transistor	
30. Surface-Tunnel Transistor	247
Gate-Controlled Diode. Gated Diode	
30.5.1 Schottky-Tunnel Transistor	250
31. Lateral Resonant-Tunneling Field-Effect Transistor (LRTFET)	252
32. Stark-Effect Transistor	256
33. Velocity-Modulation Transistor (VMT)	261

TRANSISTORS II: POTENTIAL-EFFECT

34. Bipolar Transistor	266
Junction Transistor. Point-Contact Transistor	
34.5.1 Heterojunction Bipolar Transistor (HBT). Double-Heterojunction Bipolar Transistor (DHBT)	279
34.5.2 Darlington Amplifier	280
34.5.3 Tunneling-Emitter Bipolar Transistor	280
35. Tunneling Hot-Electron-Transfer Amplifier (THETA)	282
Metal-Oxide-Metal-Oxide-Metal (MOMOM). Metal-Insulator-Metal-Insulator-Metal (MIMIM). Metal-Oxide-Metal-Semiconductor (MOMS). Metal-Insulator-Metal-Semiconductor (MIMS). Metal-Oxide- <i>p-n</i> (MOP- <i>n</i>). Metal-Insulator- <i>p-n</i> (MIP- <i>n</i>)	
36. Metal-Base Transistor	289
Semiconductor-Metal-Semiconductor (SMS) Transistor	

37. Bipolar Inversion-Channel Field-Effect Transistor (BICFET)	294
37.5.1 Bulk-Barrier Transistor. Bulk Unipolar Transistor	299
38. Tunnel-Emitter Transistor (TETRAN)	302
Inversion-Base Bipolar Transistor	
38.5.1 Surface-Oxide Transistor	307
39. Planar-Doped-Barrier (PDB) Transistor	309
39.5.1 Camel Transistor	313
40. Heterojunction Hot-Electron Transistor (HHET)	314
41. Induced-Base Transistor	318
42. Resonant-Tunneling Bipolar Transistor (RTBT/RBT)	323
43. Resonant-Tunneling Hot-Electron Transistor (RHET)	329
44. Quantum-Well-Base Resonant-Tunneling Transistor (QWBRTT)	334
45. Spin-Valve Transistor	339

NONVOLATILE MEMORIES

46. Floating-Gate Avalanche-Injection Metal-Oxide-Semiconductor (FAMOS) Transistor	346
46.5.1 Floating-Gate Tunnel-Oxide (FLOTOX) Transistor	351
47. Metal-Nitride-Oxide-Semiconductor (MNOS) Transistor	353
Metal-Nitride-Oxide-Silicon (MNOS) Transistor. Metal-Insulator-Oxide-Semiconductor (MIOS) Transistor	
47.5.1 Metal-Oxide-Nitride-Oxide-Semiconductor (MONOS) Transistor. Silicon-Oxide-Nitride-Oxide-Semiconductor (SONOS) Transistor	358
47.5.2 Ferroelectric Field-Effect Transistor (FEFET)	358

THYRISTORS AND POWER DEVICES

48. Silicon-Controlled Rectifier (SCR)	361
Thyristor. Semiconductor-Controlled Rectifier	
48.5.1 Gate-Assisted-Turn-Off Thyristor (GATT)	370
48.5.2 Gate-Turn-Off (GTO) Thyristor	370
48.5.3 Asymmetric Thyristor. Asymmetric SCR (ASCR)	370
48.5.4 Reverse-Conducting Thyristor (RCT)	371
48.5.5 Breakover Diode. Shockley Diode. Four-Layer Diode. <i>p-n-p-n</i> Diode	371
48.5.6 Diode AC Switch (DIAC)	372
48.5.7 Triode AC Switch (TRIAC)	372
48.5.8 Light-Activated Thyristor. Light-Triggered Thyristor. Light-Activated SCR (LASCR)	373
48.5.9 Programmable Unijunction Transistor (PUT)	374
48.5.10 Silicon-Controlled Switch (SCS)	375
48.5.11 Silicon Unilateral Switch (SUS)	376
48.5.12 Silicon Bilateral Switch (SBS)	377
48.5.13 MOS-Controlled Thyristor	377
49. Insulated-Gate Bipolar Transistor (IGBT)	379
Insulated-Gate Transistor (IGT). Insulated-Gate Rectifier (IGR). Conductivity-Modulated Field-Effect Transistor (COMFET). Gain- Enhanced Metal-Oxide-Semiconductor Field-Effect Transistor (GEMFET). Bipolar Field-Effect Transistor (BiFET). Injector Field- Effect Transistor. Lateral Insulated-Gate Transistor (LIGT)	
50. Static-Induction Thyristor (SIThy)	385
Field-Controlled Thyristor	
51. Unijunction Transistor	391
Filamentary Transistor. Double-Base Diode	

PHOTONICS I: LIGHT SOURCES

52. Light-Emitting Diode (LED)	396
52.5.1 Superluminescent Diode. Superradiant Light-Emitting Diode (LED)	404
52.5.2 Quantum-Well Light-Emitting Diode (LED)	405
52.5.3 Superlattice Light-Emitting Diode (LED)	405
52.5.4 Resonant-Tunneling Light-Emitting Diode (LED)	405
52.5.5 Quantum-Dot Light-Emitting Diode (LED)	406

53. Injection Laser	408
Junction Laser. Laser Diode	
53.5.1 Heterojunction Laser. Double-Heterojunction (DH) Laser. Channeled-Substrate Planar Laser. Buried-Heterojunction Laser	416
53.5.2 Large-Optical-Cavity (LOC) Laser	416
53.5.3 Separate-Confinement Heterojunction (SCH) Laser. Graded-Index Separate-Confinement Heterojunction (GRIN-SCH) Laser	416
53.5.4 Quantum-Well Laser. Multiple-Quantum-Well Laser	416
53.5.5 Superlattice Laser	418
53.5.6 Cleaved-Coupled-Cavity (C ³) Laser	418
53.5.7 Distributed-Feedback Laser. Distributed-Bragg-Reflector Laser	418
53.5.8 Vertical-Cavity Surface-Emitting Laser (VCSEL)	418
53.5.9 Quantum Cascade Laser	419
53.5.10 Quantum-Dot Laser	420
53.5.11 Semiconductor Optical Amplifier (SOA)	420

PHOTONICS II: PHOTODETECTORS

54. Photoconductor	423
Photoresistor. Photoconductive Cell. Photocell	
54.5.1 Photoelectromagnetic (PEM) Detector	428
54.5.2 Free-Carrier Photoconductor. Hot-Electron Photoconductor. Hot-Electron Bolometer	428
54.5.3 Putley Detector	429
54.5.4 Dember-Effect Detector	429
55. <i>p-i-n</i> Photodiode	431
55.5.1 <i>p-n</i> Photodiode	435
55.5.2 Nuclear-Radiation Detector. Radiation Detector. Particle Detector. Nuclear Detector. Lithium-Drifted Detector	436
56. Schottky-Barrier Photodiode	438
Metal-Semiconductor Photodiode. Point-Contact Photodiode	
56.5.1 Heterojunction Internal-Photoemission (HIP) Detector	443
57. Charge-Coupled Image Sensor (CCIS)	446
Charge-Transfer Image Sensor (CTIS). Metal-Oxide-Semiconductor (MOS) Photodetector. Metal-Insulator-Semiconductor (MIS) Photodetector	
57.5.1 Charge-Injection Device (CID)	452

58. Avalanche Photodiode (APD)	454
58.5.1 Separate-Absorption-Multiplication Avalanche Photodiode (SAM-APD). Separate-Absorption-Graded-Multiplication Avalanche Photodiode (SAGM-APD)	459
58.5.2 Superlattice Avalanche Photodiode	460
58.5.3 Staircase Avalanche Photodiode	460
59. Phototransistor	462
59.5.1 Darlington Phototransistor. Photo-Darlington	465
59.5.2 Avalanche Phototransistor	466
59.5.3 Photosensitive Field-Effect Transistor. Photo-FET	466
59.5.4 Bulk-Barrier Phototransistor. Planar-Doped-Barrier Photodiode. Triangular-Barrier Photodiode. Modulated-Barrier Photodiode	467
59.5.5 Static-Induction Phototransistor	467
59.5.6 Tunnel-Emitter Phototransistor	468
60. Metal-Semiconductor-Metal (MSM) Photodetector	470
61. Quantum-Well Infrared Photodetector (QWIP)	475
62. Quantum-Dot Infrared Photodetector (QDIP)	481
63. Blocked-Impurity-Band (BIB) Photodetector	486
Impurity-Band-Conduction Photodetector	
64. Negative-Electron-Affinity (NEA) Photocathode	491
NEA Photoemitter. Photocathode Tube. Photoemissive Tube. Vacuum Photodiode	
64.5.1 Photomultiplier	496
64.5.2 Transferred-Electron Photocathode	498
65. Photon-Drag Detector	500
<u>PHOTONICS III: BISTABLE OPTICAL DEVICES</u>	
66. Self-Electrooptic-Effect Device (SEED)	503
67. Bistable Etalon	507
Nonlinear (or Bistable) Fabry-Perot Resonator (or Interferometer)	
67.5.1 Interference Filter	511
<u>PHOTONICS IV: OTHER DEVICES</u>	
68. Solar Cell	513

69. Electroabsorption Modulator	521
69.5.1 Optical Waveguide	525
69.5.2 Electrooptic Modulator	525
69.5.3 Mach-Zehnder Modulator	526
69.5.4 Directional Coupler Modulator	526
<u>SENSORS</u>	
70. Thermistor	528
Thermally-Sensitive Resistor	
70.5.1 Resistance Temperature Detector (RTD)	532
70.5.2 Thermistor Bolometer	532
70.5.3 Pyroelectric Detector	533
71. Hall Plate	536
Hall Generator. Magnetometer. Gaussmeter	
71.5.1 Magnetoresistor	539
71.5.2 Magnetodiode	540
71.5.3 Magnetotransistor. Magnistor	540
71.5.4 Magnetic-Field-Sensitive Field-Effect Transistor (MAGFET)	542
71.5.5 Carrier-Domain Magnetic-Field Sensor	542
71.5.6 Magnetostrictive Transducer	543
72. Strain Gauge (Gage)	544
72.5.1 Piezoelectric Strain Gauge	549
73. Interdigital Transducer (IDT)	551
Surface-Acoustic-Wave (SAW) Transducer	
74. Ion-Sensitive Field-Effect Transistor (ISFET)	557
Chemically Sensitive Field-Effect Transistor (CHEMFET)	
74.5.1 Enzyme Field-Effect Transistor (ENFET)	560
74.5.2 Ion-Controlled Diode	560
74.5.3 Semiconducting-Oxide Sensors	561
74.5.4 Catalytic-Metal Sensors	562
74.5.5 Open-Gate Field-Effect Transistor (OGFET)	562
74.5.6 Adsorption Field-Effect Transistor (ADFET). Surface-Accessible Field-Effect Transistor (SAFET). Suspended-Gate Field-Effect Transistor (SGFET)	562
74.5.7 Charge-Flow Transistor	563

Appendix A: Selected Nonsemiconductor Devices	565
A1. Vacuum Tubes	566
A2. Superconducting Devices	569
A3. Inductor and Transformer	575
A4. Liquid-Crystal Display (LCD)	578
A5. Thermocouple and Thermopile	581
A6. Metal-Insulator-Metal (MIM) Diode	585
A7. Single-Electron Transistor (SET)	587
Appendix B: Physical Phenomena	595
B1. Drift Velocity and Mobility	596
B2. Diffusion	600
B3. Thermionic Emission	605
B4. Image-Force Lowering	608
B5. Recombination and Generation	612
B6. Impact Ionization and Avalanche	619
B7. Space-Charge Effect and Space-Charge-Limited Current	623
B8. Tunneling	625
B9. Ohmic Contact	628
B10. Hall Effect	636
B11. Heterojunction, Quantum Well, Superlattice, and Quantum Dot	642
Appendix C: General Applications of Device Groups	647
C1. Applications of Rectifiers	648
C2. Applications of Negative Differential Resistance	654
C3. Applications of Transistors	656
C4. Applications of Photodetectors	660
C5. Applications of Bistable Optical Devices	663
C6. Semiconductor Memories	666
Appendix D: Physical Properties	671
D1. Properties of Semiconductors	672
D2. Properties of Ge, Si, and GaAs	674
D3. Properties of SiO_2 and Si_3N_4	675
D4. Resistivity and Mobility	676
D5. Intrinsic Concentrations and Fermi Levels	679
D6. Depletion Nomograph	681
D7. Absorption Coefficients	682
D8. Silicon Oxidation Rates	683
D9. Ion-Implantation Ranges and Standard Deviations	685
D10. Impurity Diffusion Coefficients	688
D11. Impurity Energy Levels	690
D12. Solid Solubilities	692
D13. Properties of Metals and Silicides	694
D14. Energy gap vs. lattice constant	696

Appendix E: Background Information	697
E1. Commonly Used Equations	698
E2. Acronyms	701
E3. Electromagnetic Spectrum	706
E4. Periodic Table	707
E5. Symbols for Elements	709
E6. International System of Units (SI Units)	710
E7. Unit Prefixes	711
E8. Greek Alphabet	712
E9. Fundamental Constants	713
E10. List of Symbols	714
Index	723
