

Contents at a Glance

<i>Introduction</i>	1
<i>Part I: Programming a Computer</i>	7
Chapter 1: Learning Computer Programming for the First Time	9
Chapter 2: All about Programming Languages	19
Chapter 3: How to Write a Program	37
Chapter 4: The Tools of a Computer Programmer	49
<i>Part II: The Building Blocks of Programming</i>	63
Chapter 5: Getting Started.....	65
Chapter 6: The Structure of a Computer Program.....	75
Chapter 7: Variables, Constants, and Comments	91
Chapter 8: Crunching Numbers and Playing with Strings.....	103
Chapter 9: Making Decisions with Branching Statements	119
Chapter 10: Repeating Yourself with Loops	143
Chapter 11: Dividing a Program into Subprograms	157
Chapter 12: Storing Stuff in Arrays.....	175
Chapter 13: Playing with Object-Oriented Programming.....	195
<i>Part III: Advanced Programming Topics</i>	213
Chapter 14: Sorting and Searching Algorithms	215
Chapter 15: Debugging Programs	239
Chapter 16: Optimizing Your Code.....	249
Chapter 17: Creating a User Interface.....	259
<i>Part IV: Internet Programming</i>	279
Chapter 18: Playing with HTML	281
Chapter 19: Making Interactive Web Pages with JavaScript	309
Chapter 20: Using Java Applets on Web Pages	321

<i>Part V: The Part of Tens</i>	327
Chapter 21: Ten Additional Programming Resources.....	329
Chapter 22: Ten Cool Programming Careers.....	341
<i>Appendix A: Common Loop and Branching Structures</i>	351
<i>Appendix B: Free Language Compilers and Interpreters</i>	355
<i>Appendix C: Common Programming Terms</i>	357
<i>Appendix D: Installing the CD Compilers</i>	365
<i>Index</i>	369
<i>Wiley Publishing, Inc. End-User License Agreement</i>	389

Table of Contents

<i>Introduction</i>	1
Who Should Buy This Book	1
How This Book Is Organized	3
Part I: Programming a Computer	3
Part II: The Building Blocks of Programming	3
Part III: Advanced Programming Topics	3
Part IV: Internet Programming	4
Part V: The Part of Tens	4
How to Use This Book	4
Foolish assumptions	4
Icons used in this book	5
<i>Part 1: Programming a Computer</i>	7
Chapter 1: Learning Computer Programming for the First Time	9
Why Learn Computer Programming?	9
How Does a Computer Program Work?	13
Programming is problem-solving	14
Programming isn't difficult; it's just time-consuming	15
What Do I Need to Know to Program a Computer?	17
Chapter 2: All about Programming Languages	19
Why So Many Different Programming Languages?	19
The joy of assembly language	20
C: The portable assembler	22
High-level programming languages	24
Rapid application development (RAD) programming languages	26
Database programming languages	29
Scripting programming languages	30
Web page programming languages	32
So What's the Best Programming Language to Learn?	34
Chapter 3: How to Write a Program	37
Before You Write Your Program	37
The problem	38
The program's users	38

The target computer	39
Your programming skill	39
The Technical Details of Writing a Program	40
Prototyping	40
Choosing a programming language.....	41
Defining how the program should work.....	42
The Life Cycle of a Typical Program.....	44
The development cycle	45
The maintenance cycle.....	46
The upgrade cycle.....	46

Chapter 4: The Tools of a Computer Programmer 49

Writing Programs in an Editor	50
Using a Compiler or an Interpreter.....	51
Compilers	52
Interpreters	53
P-code: A combination compiler and interpreter	54
So what do I use?	56
Squashing Bugs with a Debugger	56
Writing a Help File.....	59
Creating an Installation Program	60

Part II: The Building Blocks of Programming.....63**Chapter 5: Getting Started 65**

Learning BASIC	66
Getting to know Liberty BASIC	66
Getting to know REALbasic	67
Learning C++	69
Learning Revolution.....	71

Chapter 6: The Structure of a Computer Program 75

Designing a Program.....	76
Spaghetti programming	77
The three parts of every program.....	79
The building blocks of programming.....	83
Dividing and Conquering with Subprograms	85
Creating libraries of subprograms	87
Dividing programs into objects	88

Chapter 7: Variables, Constants, and Comments	91
Creating Variables	92
Naming variables	93
Defining the data type of a variable	94
Assigning a value to a variable	97
Using Constants.....	99
Commenting Your Code	100
Chapter 8: Crunching Numbers and Playing with Strings	103
Adding, Subtracting, Dividing, and Multiplying	103
Working with precedence.....	105
Using parentheses	107
Using Built-In Math Functions	108
Manipulating Strings.....	111
Declaring variables as strings.....	111
Smashing strings together	112
Converting Strings into Numbers (And Vice Versa)	113
Converting strings into numbers	114
Converting a number into a string.....	117
Chapter 9: Making Decisions with Branching Statements	119
Using Boolean Expressions	119
Storing Boolean expressions in variables	121
Using variables in Boolean expressions	122
Using Boolean operators	123
Exploring IF-THEN Statements	128
Using IF-THEN-ELSE Statements	129
Working with SELECT CASE Statements	132
Checking a range of values.....	138
Checking a relational operator	140
Chapter 10: Repeating Yourself with Loops	143
Creating Loops	143
Looping a Fixed Number of Times	144
Counting with different numbers	147
Counting in increments	147
Counting backward	149
Using a WHILE Loop.....	150
The UNTIL Loop Variation	152
Watching Out for Endless Loops.....	154
Endless loops #1: Failing to modify the Boolean expression inside the loop	154
Endless loops #2: Failing to initialize a Boolean expression outside the loop.....	155

Chapter 11: Dividing a Program into Subprograms	157
Creating a Subprogram	158
Creating a Liberty BASIC subprogram	158
Creating a REALbasic subprogram	160
Creating a C++ subprogram	163
Creating a Revolution subprogram	164
Running Subprograms	165
Passing parameters in Liberty BASIC	165
Passing parameters in REALbasic	168
Passing parameters in C++	169
Passing parameters in Revolution	170
Using Functions	170
Creating a Liberty BASIC function	171
Creating a REALbasic function	172
Creating a C++ function	173
Creating a Revolution function	174
Chapter 12: Storing Stuff in Arrays	175
Creating an Array	175
Using arrays in Liberty BASIC	176
Using arrays in REALbasic	178
Using arrays in C++	179
Using arrays in Revolution	181
Creating Dynamic Arrays	182
Using dynamic arrays in Liberty BASIC	182
Using dynamic arrays in REALbasic	184
Using dynamic arrays in C++	187
Using dynamic arrays in Revolution	188
Creating a Multi-Dimensional Array	189
Using two-dimensional arrays in Liberty BASIC	190
Using two-dimensional arrays in REALbasic	191
Using two-dimensional arrays in C++	192
Using two-dimensional arrays in Revolution	193
Chapter 13: Playing with Object-Oriented Programming	195
Encapsulation: Isolating Data	196
Creating a class	198
Writing an object's methods	199
Creating an object from a class	200
Inheritance: Reusing Code	204
Polymorphism: Rewriting Code	208

<i>Part III: Advanced Programming Topics</i>	213
Chapter 14: Sorting and Searching Algorithms	215
Insertion Sort	216
Bubble Sort	220
Shell Sort	223
Quicksort.....	227
Choosing a Sorting Algorithm	231
Using a Built-In Sorting Algorithm	231
Searching Algorithms	232
Searching sequentially.....	233
Performing a binary search.....	235
Picking a Searching Algorithm.....	238
Chapter 15: Debugging Programs	239
Anatomy of a Computer Bug.....	240
Syntax Errors	240
Run-Time Errors	242
Fun with Logic Errors	243
Stepping line by line.....	244
Tracing through your program.....	245
Watching your variables.....	246
Chapter 16: Optimizing Your Code	249
Choosing the Right Data Structure	249
Choosing the Right Algorithm	251
Fine-Tuning the Source Code.....	252
Putting the condition most likely to be false first	252
Putting the condition most likely to be true first.....	252
Don't run a FOR-NEXT loop needlessly	254
Cleaning out your loops	254
Using the correct data types.....	256
Using built-in commands whenever possible	256
Using a Faster Language.....	257
Optimizing Your Compiler	258
Chapter 17: Creating a User Interface	259
Designing a Window.....	261
Putting Pull-Down Menus in a Window	263
Displaying Controls.....	264
Command buttons.....	266
Check boxes and radio buttons.....	268
List boxes and combo boxes	270
Text boxes and labels	276

Part IV: Internet Programming279**Chapter 18: Playing with HTML281**

Grasping the Basics of HTML	282
Grasping the most important HTML tags.....	283
Creating a header and title.....	283
Defining the bulk of your Web page	284
Adding comments	284
Defining Text with Tags	285
Making a heading.....	285
Defining a paragraph.....	286
Highlighting a quote.....	287
Adding emphasis to text.....	288
Using Tag Attributes	289
Aligning text	289
Playing with colors.....	289
Coloring your hyperlinks.....	290
Making a List.....	291
Unordered lists	291
Ordered lists	292
Definition lists	293
Creating Hyperlinks	295
Making external hyperlinks.....	295
Making internal hyperlinks	296
Linking to a specific spot on a Web page	296
Displaying Graphics	297
Putting a picture on a Web page.....	298
Adding a background picture	299
Creating a User Interface on a Form	299
Handling events	300
Creating a text box	301
Creating a command button	302
Creating a check box.....	303
Creating a radio button.....	306

Chapter 19: Making Interactive Web Pages with JavaScript309

Understanding the Basics of JavaScript.....	310
Displaying text	311
Creating variables.....	312
Making dialog boxes	313
Playing with Functions	315
Opening and Closing a Window.....	318
Opening a window	318
Defining a window's appearance	318
Closing a window.....	319

Chapter 20: Using Java Applets on Web Pages	321
How Java Applets Work.....	321
Adding a Java Applet to a Web Page.....	323
Defining the size of a Java applet window	323
Aligning the location of a Java applet window	324
Defining space around a Java applet	325
<i>Part V: The Part of Tens</i>	<i>327</i>
Chapter 21: Ten Additional Programming Resources	329
Developing Windows Programs	330
Developing Macintosh Programs	331
Developing Linux Programs.....	332
Using a Database Language	333
Clarion.....	333
PowerBuilder	334
FileMaker	334
SQL	334
Shopping by Mail Order	335
Getting Your Hands on Source Code	335
Joining a Local User Group	336
Frequenting Usenet Newsgroups	337
Playing Core Wars	337
Programming a Battling Robot	338
Toying with Lego Mindstorms	339
Chapter 22: Ten Cool Programming Careers	341
Programming Computer Games for Fun and Profit	341
Creating Computer Animation.....	343
Making (And Breaking) Encryption	344
Internet Programming	345
Fighting Malware.....	346
Hacking for Hire.....	346
Participating in an Open-Source Project	347
Niche-Market Programming.....	348
Teaching Others about Computers.....	349
Selling Your Own Software	349
<i>Appendix A: Common Loop and Branching Structures...351</i>	
Common Loop Structures	351
Common Branching Structures	352

<i>Appendix B: Free Language Compilers and Interpreters</i>	<i>355</i>
<i>Appendix C: Common Programming Terms</i>	<i>357</i>
<i>Appendix D: Installing the CD Compilers</i>	<i>365</i>
System Requirements	365
Using the CD	366
If You Have Problems (Of the CD Kind).....	367
<i>Index.....</i>	<i>369</i>
<i>Wiley Publishing, Inc. End-User License Agreement.....</i>	<i>389</i>
