Acknowledgments	ix
Introduction	xix
Chapter 1: Overview of Windows Presentation Foundation	1
A Brief History of the Windows API	2
Platform Evolution	2
Introducing .NET Framework 3.0	3
Meet Windows Presentation Foundation	3
Guiding Design Principles	3
Architecture	5
XAML	15
Declarative vs. Imperative	15
Visual Design Tools	18
XamlPad	18
Microsoft Expression Blend	19
Visual Designer for Windows Presentation Foundation	20
Electric Rain ZAM 3D	21
Mobiform Aurora	22
Summary	23
Chapter 2: WPF and .NET Programming	25
Getting Started	26
Required Installations	26
Types of WPF Applications	26
My First WPF Application	27
WPF Development Concepts	29
XAML	29
The Application Object	30
Creating the User Interface	32
Handling Events	35
Working with Controls	41
Triggers	51
Language Support	58
Deployment	61
Summary	61

Contents

Chapter 3: Anatomy of a WPF-Enabled Application	63
Project Composition	63
App.Manifest	66
AssemblyInfo.cs	66
Resources.resx	68
Settings.settings	68
MyApp.xaml	70
.NET Framework 3.0 Windows Application	71
Window1.xaml	72
XAML Browser Application	73
Page1.xaml	73
WCF Service Library	75
Class1.cs	75
WPF Custom Control Library	78
UserControl1.xaml	79
Summary	82
Chapter 4: Building a Rich UI with Microsoft Expression Blend — Part I	83
Overview	84
The Design Environment	85
Workspace Panels	86
The Artboard	87
Configuring the Environment	88
Project Structure	90
Adding a New Project File	90
Building and Deploying a Project	91
Creating Vector Objects	91
Shapes	92
Paths	93
Manipulating Objects with the Properties Panel	94
The Transform Panel	94
The Brushes Panel	95
Opacity, Transparency, and Visibility	97
Manipulating Text	98
Managing Layouts	99
UI Layout Panels	100
Other Layout Controls	103
Nesting Layout Panels	103

Animation	104
Timeline Sub-Panel	104
Keyframes	105
Animate an Object's Property	106
Motion Paths	106
Triggers	107
Creating Controls	108
Templates	110
Styles	111
States	112
Importing Audio/Video Media	113
Summary	113
Chapter 5: Building a Rich UI with Microsoft Expression Blend — Part II	115
Expression Blend Workflow	116
Code Editing with Visual Studio 2005	117
Handling User Input	118
Keyboard and Mouse Classes	118
Events and Event Handling	118
Positioning	120
Hit Testing	124
The WPF Animation API	135
Animation Classes	135
Creating a Dynamic Animation Procedurally with Code	135
Programmatic Animation	139
Interacting with Storyboards	143
WPF Drawing API	145
Geometry	145
Shapes	146
Brushes	149
Summary	153
Chapter 6: Special Effects	155
Brushes	156
SolidColorBrush	156
GradientBrush	162
ImageBrush	165
DrawingBrush	167
VisualBrush	169

Contents

Bitmap Effects	171
Transformations	175
TranslateTransform	178
ScaleTransform	180
SkewTransform	183
RotateTransform	186
Opacity Masks	188
Putting It All Together — Combining Effects	191
Bouncing Ball with Reflection Example	191
Animated Image Viewer Example	197
Summary	203
Chapter 7: Custom Controls	205
Overview	206
Control Base Classes	207
The UserControl Class	207
Creating a User Control	207
Data Binding in WPF	217
Binding Markup Extensions	217
Binding Modes	217
Data Templates	219
Data Conversions	221
Creating and Editing Styles	222
Specifying a Style's Target Type	223
Inheriting and Overriding Styles	224
Style Triggers	226
Customizing Existing Controls with Templates	228
Summary	231
Chapter 8: Using WPF in the Enterprise	233
WPF Application Models	234
Standalone Applications	235
Browser-Based Applications	238
Security Considerations	247
State Management	248
Application Object	248
Isolated Storage	250
State Management Example	252

Navigation	258
Elements of Navigation	258
Structured Navigation	259
Navigation Topologies	269
Application Localization	286
Automatic Layout Guidelines	287
Using Grids for Flexibility	289
Localization Attributes and Comments	290
WPF Deployment Models	291
Building Applications	292
Deploying Standalone Windows Applications	294
Deploying XAML Browser Applications	295
Deploying the .NET Framework 3.0 Runtime	296
Summary	298
Chapter 9: Security	299
WPF Security Model	299
Trusted Versus Express Applications	300
Core OS Security	300
LUA	301
Virtualization	301
Sandboxing	301
Cryptography Next Generation	302
CLR Security	302
Code Access Security	303
The Critical Code Methodology	311
Verification	313
Microsoft Internet Explorer Security	313
Zone Restrictions	313
XBAP Sandbox Workarounds	314
XAML Browser Application Security	315
ClickOnce Security	323
Trusted Publishers	323
Personal Certificate File	324
.NET 3.0 Security Utilities	327
Summary	328

Chapter 10: WPF and Win32 Interop	329
Win32 User Interface Overview	330
How WPF and HWNDs Interoperate	330
Using Win32 HWNDs Inside of WPF	331
Hosting a Win32 Button in WPF	332
Using WPF in Win32 Applications	335
Adding Windows Forms Controls to WPF	337
Adding Your WindowsFormsHost in Code	337
Adding Your HwndHost in XAML	339
Adding ActiveX Controls to WPF	339
Adding the ActiveX Control in XAML	344
Adding WPF Controls to Windows Forms	345
Affecting Control Properties	349
Summary	351
Chapter 11: Advanced Development Concepts	353
WPF Architecture	354
Core Subsystems	356
WPF Threading Model	359
Desktop Window Manager	360
The WPF Framework	361
Dispatcher Object	362
DependencyObject/DependencyProperty	362
Application	363
Freezable	364
Visual	364
UIElement	370
FrameworkElement	371
Control	371
A Deeper Look at XAML	373
XAML Under the Hood	373
Manipulating XAML On-the-Fly	378
Deconstructing Window1.xaml	382
x:Class	383
XAML Markup Extensions	385
XAML and Custom Types	386

WPF Multithreading	388
Single-Threaded Application Model	388
Thread Affinity and DispatcherObject	389
WPF Dispatcher	390
Working with Single-Threaded Applications	391
Asynchronous Threading	393
Windows Communication Foundation	397
Service Orientation	397
WCF Architecture	398
WCF Fundamentals	399
Building a WCF Service	402
Windows Workflow Foundation	409
Workflow Defined	410
WF Architecture	411
WF Fundamentals	411
Summary	427
Index	429
