Foreword xii

Maree Bellamy

The Editors xv

The Contributors xvii

1 Patient Safety: Crossing the Chasm from Legal and Regulatory Compliance 1

Fay A. Rozovsky

Terms That Define Patient Safety • The Legal and Regulatory Influences Constraining Patient Safety: Evidentiary Protection • The Legal Concepts of Standards of Care and Patient Safety

2 Patient Safety Laws and Regulations 16

Ronni P. Solomon

Mandatory Reporting Systems • Anatomy of a Patient Safety Law: Compliance Tips • Federal Patient Safety Legislation Initiatives • Medical Device Reporting • Clinical Trials and Adverse-Event Reporting • Patient Safety Goals and Standards • The Quality Assessment and Performance Improvement Rule • Smallpox Vaccine Adverse-Event Reporting • Conclusion

- 3 Medical Error Reduction Initiatives Among Accreditation and Standard-Setting Organizations 34**
- Fay A. Rozovsky
- JCAHO Patient Safety Initiatives • Patient Safety in Other Accreditation Standards • The Leapfrog Group and the NQF as Standard-Setting Organizations • Environment of Care Safety • ISO and Six Sigma • Clinical Practice Guidelines • The Legal and Regulatory Consequences of Private Sector Patient Safety Initiatives • Conclusion
- 4 Failure Modes and Effects Analysis: The Risks and the Rewards in Health Care 45**
- Robert J. Latino
- Traditional FMEA Roots • Applying Traditional FMEA to Health Care • FMEA and Consequential Thinking • Conclusion
- 5 Medication Error Reduction: Voluntary and Regulatory Oversight 64**
- David M. Benjamin, John P. Santell
- Medication Error Reduction in the Institutional Setting • Medication Error Reduction in the Outpatient Setting • Conclusion: The Imperative for Federal Legislation
- 6 Benchmarking: Evidence-Based Outcome Information and Standards of Care 96**
- Peter J. Pronovost, Fay A. Rozovsky
- Benchmarking for Patient Safety: The Use of Evidence-Based Outcome Data • How Payors Use Benchmark Data • How Benchmark Data Become the Standard of Care • How Consumers Use Benchmark Data • Conclusion: Using Benchmark Data to Achieve Patient Safety Compliance
- 7 Creation and Preservation of Reports, Data, and Device Evidence in Medical Error Situations 104**
- Jane C. McConnell, Susan Durbin Kinter
- Incident Reporting Process Overview • Proactive Steps to Identify Risk Areas • Proactive Steps to Manage an Adverse Event • Reporting Incidents, Adverse Events, and Medical Errors • Conclusion
- 8 Claims Management Risks in Patient Safety Events 124**
- Pamela L. Popp
- The Ripple Effect of a Patient Safety Event: Malpractice, Regulatory Scrutiny, and Potential Fraud and Abuse Litigation • Managing Legal Counsel with Different Needs and Types of Expertise • Managing the Needs of Internal Information Users • Dealing with Whistle-Blower Situations in Patient Safety Events • Dealing with Complex Legal Risk Exposure and Coordinated Defense Strategies • Effects of Disclosure on Claims Strategies and Litigation • Conclusion

9 Full Disclosure 140

James R. Woods Jr.

Where Does the Education Begin? • The Art of Describing Risk • Applying These Lessons About Risk to Obtaining Informed Consent • Rules About Disclosure
• Does Full Disclosure Work? • Disclosure Strategies • Dealing with Fear
• Conclusion

10 Patient Safety in Human Research 160

Rodney K. Adams

Creating a Patient Safety Environment for Clinical Trials • Responding to Adverse Events • Using Data and Safety Monitoring Boards • Conclusion

11 Medical Error Reporting: Maintaining Confidentiality in the Face of Litigation 183

Frederick Robinson, Lara E. Parkin

Evidentiary Protections at the State Level • Evidentiary Protections at the Federal Level • Conclusion

12 Managing Patient Safety Compliance with Health Professionals 219

Mark A. Kadzielski, Christina W. Giles

Employment and Disciplinary Issues • The Credentialing Process as a Patient Safety Tool • The Difference Between Corrective Action and Blame • Conclusion

13 Planning for the Future 235

Fay A. Rozovsky, James R. Woods Jr.

Lessons from the Field • Conclusion: The Future Depends on Leadership

Index 243

FIGURES, TABLES, AND EXHIBITS

Figures

- 4.1 Aircraft Subsystem Diagram 47
- 4.2 Typical FMEA Hazard Scoring Matrix 50
- 4.3 Significant Few Chart 51
- 4.4 LEAP New Analysis Wizard 54
- 4.5 New Analysis Wizard (Step 3) 55
- 4.6 New Analysis Wizard (Step 4) 55
- 4.7 Process Flow Diagram 57
- 4.8 Opportunity Analysis Worksheet 57
- 4.9 Significant Few Events 58
- 4.10 Significant Few Chart 59
- 4.11 LEAP Report 59
- 5.1 USP Medication Safety Initiative Model 69
- 5.2 Schematic of Medication Use Process in the Institutional Setting 70
- 5.3 Top Ten Causes of Error 77

Tables

- 4.1 Traditional FMEA Sample 47
- 4.2 FMEA Line Item Sample 49
- 5.1 Potentially Dangerous Abbreviations 72
- 5.2 Types of Error Associated with Computer Entry 78
- 5.3 Product Groups Causing Patient Harm Most Commonly Reported to MEDMARX 83
- 5.4 Types of Medication Errors Triggering Claims in 1998 84
- 8.1 Managing Patient Safety Event Issues: Sample Chart 126
- 9.1 Risk Quantified in Relation to an Individual Living in a Community 144
- 9.2 Obstetric and Gynecologic Risks Compared with General Life Risks 146
- 11.1 States with a Freedom of Information (or Equivalent) Act 192
- 11.2 Physician-Patient Privilege by State, November 30, 2001 198
- 11.3 Areas to Analyze in State Peer Review Statutes 202

Exhibits

- 5.1 2004 JCAHO National Patient Safety Goals 66
- 5.2 NCC MERP Error Category Index for Severity Levels and Outcomes 68
