Introduction	xiii
Chapter 1: Introducing Shells	1
What Is a Shell?	2
Why Use Shells?	3
What Kind of Shells Are There?	4
The Bourne Shell	4
The C Shell	4
The Korn Shell	5
Bash, the Bourne Again Shell	6
tcsh, the T C Shell	6
Other Shells	7
Graphical Shells	7
The Official POSIX Shell	8
Default Shells	8
Choosing a Shell	9
Changing Your Default Shell	9
Running a Shell from Within Another Shell	12
Finding Out More About the Shell	13
How Do Shells Fit into a Graphical Environment?	13
Running Shells on Linux	15
Running Shells on Mac OS X	17
Running Shells on Unix Systems	18
Running Shells on Windows — Isn't command.com Enough?	18
Running Shells on PDAs and Other Systems	19
Entering Commands	20
Determining Which Shell You Are Running	21
Command-Line Options	23
Command Editing	27
Command Substitution	27
Viewing the Command History	31
Calling Up an Editor	33
Using File-Name Completion	34
Working with Wildcards	35
The * Wildcard	35
The ? Wildcard	37
Running Commands in the Background	37
Summary	38

Chapter 2: Introducing Shell Scripts	39
What Are Shell Scripts?	40
Alternatives to Shells: Other Scripting Languages	42
Perl	43
Python	45
Tcl	46
MS-DOS Batch Files	47
Tools to Edit Shell Scripts	47
Using Legacy Editors	47
Moving to Graphical Text Editors	59
Writing Scripts	65
Remembering Commands So You Don't Have To	66
Outputting Text	67
Variables	71
Gathering Input	76
Commenting Your Scripts	78
Continuing Lines	81
Summary	82
Exercises	83
Chapter 3: Controlling How Scripts Run	85
Referencing Variables	85
Looping and Iteration	89
Looping over Files	90
Looping for a Fixed Number of Iterations	93
Looping Like a C Program—the bash Shell	96
Looping in the C Shell	98
Nested Loops	99
Checking Conditions with if	100
Or Else, What?	101
What Is Truth?	102
Redirecting Output	106
Using elif (Short for else if)	111
Nesting if Statements	113
Testing with the test Command	114
Comparing Numbers	114
Comparing Text Strings	117
Testing Files	120
Using the Binary and Not Operators	121
Creating Shorthand Tests with [123
Making Complex Decisions with case	125
Handling Problematic Input	127
Using case with the C Shell	129

Looping While a Condition Is True	131
Looping Until a Condition Is True	132
Summary	134
Exercises	134
Chapter 4: Interacting with the Environment	135
<hr/>	
Examining Environment Variables	135
Reading Environment Variables	136
Setting Environment Variables	150
Customizing Your Account	153
How the Bourne Shell Starts Up	153
How the Korn Shell Starts Up	153
How the C Shell Starts Up	154
How the T C Shell Starts Up	154
How Bash Starts Up	154
Handling Command-Line Arguments	155
Reading Command-Line Arguments with the Bourne Shell	156
Reading Command-Line Arguments with the C Shell	160
Making Scripts Executable	160
Marking Files Executable	160
Setting the #! Magic Line	161
Summary	164
Exercises	165
Chapter 5: Scripting with Files	167
<hr/>	
Combining Files into Archives	168
Working with File Modes	169
Testing Files with the test Command	171
Dealing with Mac OS X Files	172
The Legacies of NeXT	172
Mobile File Systems and Mac OS X	173
Naming Issues	175
HFS+ Versus UFS: The Mac OS X Holy War	175
The Terror of the Resource Fork	176
Working with Here Files and Interactive Programs	177
Displaying Messages with Here Files	178
Customizing Here Files	179
Driving Interactive Programs with Here Files	183
Turning Off Variable Substitution	186
Summary	187
Exercises	187

Chapter 6: Processing Text with sed	189
Introducing sed	190
sed Versions	190
Installing sed	191
Bootstrap Installation	192
Configuring and Installing sed	193
How sed Works	193
Invoking sed	194
Editing Commands	195
Invoking sed with the -e Flag	196
The -n, --quiet, and --silent Flags	197
sed Errors	199
Selecting Lines to Operate On	199
Address Ranges	200
Address Negation	201
Address Steps	202
Substitution	203
Substitution Flags	204
Using an Alternative String Separator	205
Address Substitution	206
Advanced sed Invocation	207
The comment Command	209
The insert, append, and change Commands	210
Advanced Addressing	211
Regular Expression Addresses	212
Character Class Keywords	215
Regular Expression Address Ranges	216
Combining Line Addresses with regexps	217
Advanced Substitution	217
Referencing Matched regexps with &	218
Back References	219
Hold Space	220
More sed Resources	222
Common One-Line sed Scripts	222
Common sed Commands	224
Less Common sed Commands	224
GNU sed-Specific sed Extensions	225
Summary	226
Exercises	227
Chapter 7: Processing Text with awk	229
What Is awk (Gawk/Mawk/Nawk/Oawk)?	230
Gawk, the GNU awk	230

What Version Do I Have Installed?	231
Installing gawk	232
How awk Works	234
Invoking awk	234
The print Command	237
Using Field Separators	240
Using the printf Command	241
Using printf Format Modifiers	243
Using the sprintf Command	244
Using Variables in awk	244
User-Defined Variables	245
Built-in Variables	245
Control Statements	248
if Statements	249
Comparison Operators	250
Arithmetic Functions	251
Output Redirection	252
While Loops	253
For Loops	253
Functions	254
Resources	255
Summary	256
Exercises	256
Chapter 8: Creating Command Pipelines	257

Working with Standard Input and Output	257
Redirecting Standard Input and Output	258
Redirecting Standard Error	259
Redirecting Both Standard Output and Standard Error	260
Appending to Files	261
Truncating Files	262
Sending Output to Nowhere Fast	263
Piping Commands	263
Piping with Unix Commands	264
Creating Pipelines	266
Using tee to Send the Output to More Than One Process	271
Summary	272
Exercises	273
Chapter 9: Controlling Processes	275

Exploring Processes	275
Checking Process IDs	276
Reading the /proc File System	279
Killing Processes	284

Contents

Launching Processes	285
Running Commands in the Foreground	285
Running Commands in the Background	285
Running Commands in Subshells	286
Running Commands with the exec Command	286
Capturing the Output of Processes	287
Using Backticks for Command Substitution	287
Capturing Program Return Codes	295
Summary	296
Exercises	297
Chapter 10: Shell Scripting Functions	299
Defining Functions	299
Adding Names to Blocks of Code	300
Function Declaration Errors	302
Using Functions	303
Declaring before Use	303
Function Files	306
Common Usage Errors	307
Undeclaring Functions	307
Using Arguments with Functions	308
Using Return Codes with Functions	309
Variable Scope: Think Globally, Act Locally	311
Understanding Recursion	314
Summary	316
Exercises	316
Chapter 11: Debugging Shell Scripts	317
Deciphering Error Messages	318
Finding Missing Syntax	319
Finding Syntax Errors	321
Tracking Down Problems with Debugging Techniques	323
Look Backward	323
Look for Obvious Mistakes	324
Look for Weird Things	324
Look for Hidden Assumptions	325
Divide and Conquer	326
Break the Script into Pieces	326
Trace the Execution	327
Get Another Set of Eyes	327
Running Scripts in Debugging Mode	327
Disabling the Shell	328
Displaying the Script Commands	328

Combining the -n and -v Options	329
Tracing Script Execution	329
Avoiding Errors with Good Scripting	333
Tidy Up Your Scripts	333
Comment Your Scripts	334
Create Informative Error Messages	334
Simplify Yourself Out of the Box	335
Test, Test, and Test Again	335
Summary	335
Exercises	336
<hr/> Chapter 12: Graphing Data with MRTG	<hr/> 339
Working with MRTG	339
Monitoring Other Data with MRTG	341
Installing MRTG	341
Writing Scripts for MRTG	342
Configuring MRTG	345
Configuring the Global Values	345
Configuring MRTG Targets for Your Scripts	346
Customizing MRTG Output	347
Running MRTG	350
Viewing Your First MRTG Output	351
Configuring cron	352
Maximizing MRTG Performance	353
Monitoring Your Computer with MRTG	353
Graphing Memory Usage	354
Graphing CPU Usage	358
Graphing Disk Usage	361
Monitoring Networks with MRTG	363
Monitoring Applications with MRTG	366
Summary	372
Exercises	373
<hr/> Chapter 13: Scripting for Administrators	<hr/> 375
Why Write Scripts?	375
Scripting Complicated Commands	376
Troubleshooting Your Systems	379
Removing Minor Annoyances	385
Cleaning Up Data	387
Automating Daily Work	392
Summary	392
Exercises	392

Contents

Chapter 14: Scripting for the Desktop	395
Scripting Office Applications	395
Scripting the OpenOffice.org Suite	396
Scripting AbiWord	410
Scripting NEdit	411
Scripting for the Desktop on Mac OS X	411
Open Scripting Architecture	413
AppleScript Basics	414
Mac OS X Terminal Window Settings	425
Scripting Multimedia	432
Scripting the XMMS Music Player	432
Scripting Rhythmbox	433
Scripting the Totem Movie Player	435
Scripting Other Desktop Applications	435
Where to Go from Here	436
Summary	436
Exercises	436
Appendix A: Answers to Exercises	439
Appendix B: Useful Commands	461
Index	493
