*Introduction*

*xv*

<b>Chapter 1</b>	<b>Customization and MEL Scripting</b> .....	<b>1</b>
	■ Resetting to Factory/Swapping <i>Prefs</i> Files .....	2
	■ Creating Custom Shelf Icons .....	4
	■ Building a Simple MEL Window .....	5
	■ Building an Intermediate MEL Window .....	7
	Retrieving Values from Fields .....	8
	■ Creating an Autosave MEL Script .....	9
	Timing with <i>timerX</i> and Killing with <i>scriptJob</i> .....	10
	■ Creating Your Own Paint Effects Brushes .....	11
	Customizing a Tube Brush .....	13
	■ Creating Notes for Your Fellow Animators .....	14
	■ Passing Information to Files .....	16
	Reading Text Files .....	17
	■ Industry Tip: Creating an “Expert Mode” MEL Script .....	18
<b>Chapter 2</b>	<b>Modeling</b> .....	<b>23</b>
	■ Breaking Up NURBS Surfaces .....	24
	Important Rules for NURBS Modeling .....	27
	■ Cleaning Up NURBS Surfaces with Attach and Detach .....	27
	■ Closing Holes in NURBS Objects .....	30
	■ Building a NURBS Gear .....	33
	■ Building a NURBS Eye .....	35
	Mapping the Iris .....	38
	■ Cleaning Up Imported Polygons .....	38
	■ Industry Tip: Building a Polygon Head by Extruding Edges .....	41
	■ Industry Tip: Adjusting the Maya Grid for Linear Units .....	44

<b>Chapter 3</b>	<b>History, Scripting, and Animation</b> . . . . .	<b>47</b>
	■ Deleting Select History in the Hypergraph . . . . .	48
	■ Using Variables within Expressions or MEL Scripts . . . . .	52
	■ Choosing between Local and Global Variables . . . . .	54
	■ Driving Vehicle Wheels and Bike Pedals . . . . .	56
	■ Massaging Curves in the Graph Editor . . . . .	59
	Removing Pops . . . . .	59
	Introducing Float . . . . .	59
	Mimicking Motion with Curves . . . . .	61
	■ Wilting a Paint Effects Flower . . . . .	62
	■ Creating Realistic Eye Movement . . . . .	64
	■ Animating Realistic Camera Moves . . . . .	65
	Limiting Camera Motion . . . . .	66
	Fine-Tuning Camera Stops . . . . .	67
	Matching the Camera to the Subject Matter . . . . .	67
<b>Chapter 4</b>	<b>Dynamics, Particles, and the Ocean System</b> . . . . .	<b>69</b>
	■ Driving a Boat through an Ocean . . . . .	70
	■ Creating an Ocean Wake . . . . .	72
	■ Building a Dynamic Chain . . . . .	74
	■ Filling a Water Glass with Particles . . . . .	76
	Swapping Solid Geometry for Particles . . . . .	77
	■ Animating Gelatin with a Soft Body . . . . .	78
	■ Generating Swarms with Goals . . . . .	80
	■ Industry Tip: Scattering Geometry with Instanced Particles and Expressions . . . . .	82
	■ Adding Additional Variation to Instanced Geometry . . . . .	84
	■ Offsetting Animation within an Instancer . . . . .	85
<b>Chapter 5</b>	<b>Character Rigging</b> . . . . .	<b>87</b>
	■ Resetting Bind Poses with <i>dagPose</i> . . . . .	88
	■ Creating a Poor Man's Foot and Leg Rig . . . . .	89
	Controlling the Leg and Foot Rig . . . . .	92
	■ Setting Up an Easy Spine Controller . . . . .	93
	■ Picking Up a Prop with a Constraint . . . . .	95
	■ Using Blended Wire Deformers for Facial Rigging . . . . .	97

■ Weighting a Head with the Component Editor . . . . .	99
Using the Paint Skin Weights Tool . . . . .	101
■ Preventing Cluster Drift . . . . .	102
Creating a Spline IK Spine . . . . .	103
■ Industry Tip: Creating an Advanced Arm Rig. . . . .	104
<b>Chapter 6 Texturing . . . . .</b>	<b>109</b>
■ Building a Texture Library . . . . .	110
Choosing Texture Bitmaps. . . . .	111
Exporting Maya Shaders. . . . .	115
■ Fractals and Noise in Math, Nature, and Maya . . . . .	115
■ Combining Generic Bitmaps in Maya. . . . .	118
■ Coloring Particles Individually . . . . .	119
Coloring Software-Rendered Particles. . . . .	122
■ Texturing Paint Effects Tubes . . . . .	123
Controlling the Paint Effects Texture. . . . .	123
■ Industry Tip: Rendering ZBrush Displacement Maps in Maya. . . . .	126
<b>Chapter 7 Lighting . . . . .</b>	<b>131</b>
■ Mastering 1-, 2-, and 3-point Lighting . . . . .	132
Adding the Second Light . . . . .	134
Adding the Third Light. . . . .	136
■ Mastering Naturalistic Lighting. . . . .	137
■ Setting the Mood with Light Color and Position . . . . .	139
Creating Stylistic Lighting . . . . .	143
■ Setting Up Believable Lamplight . . . . .	144
■ Forcing Decay on Directional and Ambient Lights. . . . .	147
■ Industry Tip: Unusual Lighting Techniques. . . . .	149
■ Producing Quality Depth Map Shadows . . . . .	150
<b>Chapter 8 Rendering . . . . .</b>	<b>153</b>
■ Splitting Up Renders per Object. . . . .	154
■ Rendering Interlocking Characters in Separate Passes . . . . .	155
■ Splitting Up Renders per Shading Component . . . . .	157
■ Rendering Lone Shadows . . . . .	159
■ Rendering Multiple Passes with the Render Layer Editor . . . . .	160
■ Mastering Render Layer Editor Intricacies. . . . .	164

■	Avoiding Raytraced “Black Pits” . . . . .	166
■	Rendering a Wireframe for Your Reel. . . . .	168
	Rendering a Wireframe with the Hardware Render Buffer . . . . .	169
	Rendering a Wireframe with a Custom Shader. . . . .	170
■	General Rendering Tips for Your Reel. . . . .	172
<b>Chapter 9</b>	<b>Advanced Rendering Techniques . . . . .</b>	<b>173</b>
■	Rendering OpenEXR and .hdr Images with mental ray . . . . .	174
	Viewing HDR Images . . . . .	175
■	Texturing with HDR Images . . . . .	177
	Previewing HDR Images in the Render View Window . . . . .	179
■	Rendering Super-White Values with mental ray . . . . .	179
■	Choosing Between 16-Bit and HDR Formats . . . . .	181
	Compositing 16-Bit and HDR Images . . . . .	181
■	Lighting with LDR and HDR Images . . . . .	182
■	Importing ZBrush Normal Maps. . . . .	184
■	Normal Mapping in Maya . . . . .	187
	Normal Mapping with the Transfer Maps Window. . . . .	188
■	Linking and Unlinking Shadows. . . . .	191
<b>Chapter 10</b>	<b>Demo Reels and Project Work Flow . . . . .</b>	<b>193</b>
■	Adding to Your Demo Reel. . . . .	194
	Rendering Models for Your Reel . . . . .	195
	Preparing Animation for Your Reel . . . . .	196
	Editing and Outputting Your Demo Reel . . . . .	196
■	Calibrating Your Monitor. . . . .	197
■	Creating 3D on Multiple Machines . . . . .	200
	Setting Up a Render Farm . . . . .	201
	Sharing Texture Libraries. . . . .	202
■	Estimating Project Requirements . . . . .	205
■	Industry Tip: Animation Project Management . . . . .	206
■	Prepping Animation for Video. . . . .	208
■	Prepping Animation for 35mm Film. . . . .	209
■	Finding an Audience for a 3D Short Film. . . . .	210
	Distributing on the Internet . . . . .	210
	Screening at Film Festivals. . . . .	211
