*Introduction* xxv

## **Part 1 Getting Started With Windows Powershell Basics 1**

Chapter 1	Windows PowerShell 101	3
	Prepare for Your Journey .....	4
	Automate SharePoint: A Historical Perspective .....	5
	From STSADM to Windows PowerShell .....	7
	Understand the Components .....	8
	The SharePoint 2010 Management Shell .....	8
	Understand Required Permissions .....	11
	Windows PowerShell: An Object-Based Scripting Language .....	12
	Discover Cmdlets and Objects .....	14
	Understand Variables and Types .....	21
	Declare and Use Variables .....	21
	Understand Object Types .....	22
	Declare and Use Arrays and Hash Tables .....	28
	Work with Output .....	31
	Understand the Object Pipeline and PipeBind Objects .....	31
	Format Your Results .....	35
Chapter 2	Filtering and Iterating Your Data	39
	Add Conditional Logic .....	40
	Use Comparison and Logic Operators .....	40
	Use the <i>If/Else/Else</i> Statements .....	45
	Use the <i>Switch</i> Statement .....	47
	Filter Your Data .....	49
	Use the <i>Where-Object</i> Cmdlet .....	49
	Use the <i>Sort-Object</i> Cmdlet .....	51
	Use the <i>Select-Object</i> Cmdlet .....	53
	Iterate Through Your Data .....	57
	Use <i>While</i> Loops .....	57
	Use <i>Do While</i> Loops .....	58
	Use <i>Do Until</i> Loops .....	59
	Use <i>For</i> Loops .....	59
	Use <i>Foreach</i> Loops .....	61
	Use the <i>ForEach-Object</i> Cmdlet .....	61

---

Chapter 3	Making Your PowerShell Reusable	65
	Script Your Solutions . . . . .	66
	Create and Execute Scripts . . . . .	66
	Execute Script Blocks . . . . .	70
	Define Script Parameters . . . . .	71
	Comment Your Scripts . . . . .	74
	Understand the Use of Functions . . . . .	75
	Create Functions . . . . .	76
	Define Function Parameters . . . . .	79
	Process Pipeline Data . . . . .	81
	Understand Scopes . . . . .	82
	Compartmentalize with Modules . . . . .	85
	Create and Load Script Modules . . . . .	86
	Create Module Manifests . . . . .	88
	Add Error Handling to Scripts . . . . .	92
	Throw Errors . . . . .	92
	Use Trap Blocks . . . . .	93
	Use <i>Try/Catch/Finally</i> Blocks . . . . .	97
	Understand Object Disposal Issues . . . . .	100
<b>Part 2</b>	<b>Installing and Configuring a</b>	
	<b>SharePoint 2010 Environment</b>	<b>107</b>
Chapter 4	Deploying New Installations and Upgrades	109
	Install SharePoint 2010 . . . . .	110
	Review Helper Functions . . . . .	110
	Define XML Settings File . . . . .	113
	Run the SharePoint 2010 Server Installation Files . . . . .	114
	Run the Script . . . . .	122
	Build a SharePoint 2010 Farm . . . . .	123
	Create and Configure Required Accounts . . . . .	124
	Verify SQL Connectivity . . . . .	125
	Create XML Settings File . . . . .	126
	Review the Farm Build Cmdlets . . . . .	127
	Review the Central Administration Site Cmdlets . . . . .	132
	Run the Script . . . . .	136
	Upgrade to SharePoint 2010 . . . . .	137
	SharePoint Upgrade Approaches . . . . .	137
	Perform Pre-upgrade Scan . . . . .	139
	Upgrade Content Database . . . . .	141
	Upgrade the SharePoint Look and Feel . . . . .	143

Chapter 5	Configuring Server Communications	145
	Configure Intra-Farm Communications	147
	Network	147
	Windows Firewall	151
	SQL Server and the Databases	156
	Windows Services	161
	Configure Inter-Server Communications	164
	Active Directory	164
Chapter 6	Configuring Farm Application Settings	171
	Configure IPFS	172
	Configure InfoPath Forms Services Options	174
	Configure Administrator-Approved Form Templates	181
	Manage Form Templates	184
	Manage Data Connection Files	186
	Configure Web Service Proxies	187
	Configure Content Deployment	188
	Prepare the Environment	189
	Manage Content Deployment Jobs	193
	Configure Incoming and Outgoing Email	199
	Configure Outgoing Email	200
	Configure Incoming Email	201
<b>Part 3</b>	<b>Deploying and Managing Applications</b>	<b>207</b>
Chapter 7	Managing Web Applications	209
	Configure Application Pools	210
	Distinguish Types of Application Pools	210
	List and Control Application Pool State	213
	Create Application Pools	217
	Create and Extend Web Applications	220
	Create a New Web Application	221
	Extend a Web Application	223
	Use XML Files for Scripting Web Applications	224
	Understand Alternate Access Mapping	226
	Create a New IIS Binding	229
	Add a New Alternate Access Mapping	229
	Edit IIS Bindings	230
	Edit Alternate Access Mappings	231
	Remove a Binding from IIS	232
	Remove an Alternate Access Mapping	233

- Configure Web Applications . . . . . 234
  - Modify the General Settings of a Web Application . . . . . 234
  - Work with Managed Paths. . . . . 243
- Implement Security. . . . . 246
  - Manage Blocked File Types . . . . . 246
  - Manage User Permissions . . . . . 247
  - Manage Web Application Policies . . . . . 250
- Access Web Applications from the Server . . . . . 253
  - Configure the *DisableLoopbackCheck* Setting. . . . . 254
  - Configure the *BackConnectionHostNames* Setting. . . . . 254

**Chapter 8 Managing Site Collections and Sites 257**

- Understand Site Collections and Sites . . . . . 258
- Manage Site Collections. . . . . 260
  - Create a Site Collection . . . . . 261
  - Retrieve a Site Collection. . . . . 265
  - Modify a Site Collection. . . . . 267
  - Delete a Site Collection . . . . . 269
  - Move a Site Collection . . . . . 269
  - Manage Site Collections as a Farm Administrator . . . . . 270
- Manage Sites . . . . . 271
  - Create a Site . . . . . 272
  - Retrieve a Site. . . . . 273
  - Modify a Site. . . . . 275
  - Delete a Site . . . . . 278
- Configure Auditing . . . . . 278
  - Configure Audit Log Trimming. . . . . 279
  - Configure Audit Settings for Documents and Items . . . . . 280
  - Configure Audit Settings for Lists, Libraries, and Sites . . . . . 281
- Manage Quotas and Locks. . . . . 282
  - Create a New Quota Template . . . . . 283
  - Retrieve Quota Templates . . . . . 283
  - Apply a Quota Template to a Site Collection. . . . . 284
  - Configure Locks. . . . . 285
- Manage Security . . . . . 287
  - Manage SharePoint Groups. . . . . 290
  - Manage SharePoint Users . . . . . 294
  - Create Permission Levels . . . . . 301

**Chapter 9 Understanding Authentication 303**

- Understand the Various Forms of Authentication . . . . . 304
- Configure Classic Mode Authentication. . . . . 310

Configure Classic Mode Web Applications .....	310
Configure Secure Sockets Layer .....	311
Configure Kerberos .....	312
Configure Claims Mode Authentication .....	315
Create a Web Application Using Claims Mode Authentication .....	315
Configure Forms-Based Authentication .....	317
Retrieve an Authentication Provider .....	320
Configure SharePoint to Use a Claim .....	321
<b>Chapter 10 Managing Features and Solutions 329</b>	
Deploy and Manage Features .....	330
Understand the Components of a Feature .....	331
Retrieve Features .....	335
Install Features .....	339
Uninstall Features .....	341
Activate Features .....	342
Deactivate Features .....	343
Deploy and Manage Farm Solutions .....	345
Add a Farm Solution .....	346
Deploy a Farm Solution .....	347
Retrieve Farm Solutions .....	349
Retract a Farm Solution .....	350
Remove a Farm Solution .....	352
Update a Farm Solution .....	352
Start Administration Jobs .....	354
Remove a Farm Solution Deployment Lock .....	355
Deploy and Manage Sandboxed Solutions .....	356
The Solution Gallery .....	357
Add a Sandboxed Solution .....	358
Deploy a Sandboxed Solution .....	359
Retrieve Sandboxed Solutions .....	360
Retract a Sandboxed Solution .....	362
Remove a Sandboxed Solution .....	362
Update a Sandboxed Solution .....	363
<b>Part 4 Services and Service Applications 367</b>	
<b>Chapter 11 Managing Service Applications 369</b>	
Manage Service Instances .....	371
Retrieve Service Instances .....	371
Start Service Instances .....	373
Stop Service Instances .....	375
Manage Service Applications .....	376

Retrieve Service Applications . . . . .	377
Create Service Application Pools . . . . .	378
Create Service Applications . . . . .	381
Manage Service Application Proxies . . . . .	382
Retrieve Service Application Proxies . . . . .	382
Create Service Application Proxies . . . . .	383
Manage Proxy Groups . . . . .	384
Secure Service Applications . . . . .	388
Retrieve Service Application Administrators and Permissions . . . . .	389
Set Service Application Administrators and Permissions . . . . .	391
Publish and Consume Service Applications Across Farms . . . . .	394
Export Certificates . . . . .	396
Establish the Trust Relationship . . . . .	396
Grant Permissions . . . . .	397
Publish a Service Application . . . . .	400
Connect to a Service Application . . . . .	401
Chapter 12 Provisioning Support Services . . . . .	403
Provision Web Analytics Services . . . . .	404
Provision the Web Analytics Services Service Application . . . . .	405
Test the Service Application . . . . .	412
Provision State Services . . . . .	412
Provision the State Services Service Application . . . . .	413
Test the State Services Service Application . . . . .	417
Provision Secure Store Services . . . . .	417
Provision the Secure Store Services Service Application . . . . .	418
Generate a Secure Key . . . . .	422
Test the Secure Store Services Service Application . . . . .	423
Provision User Code Services . . . . .	423
Start the User Code Service . . . . .	423
Set the User Code Service Identity . . . . .	424
Test the User Code Service . . . . .	426
Provision Claims to Windows Token Services . . . . .	426
Start the c2wts Service Instance . . . . .	427
Set the c2wts Identity . . . . .	428
Reset the c2wts Identity . . . . .	428
Test the Claims to Windows Token Service . . . . .	429
Provision Usage and Health Data Collection Services . . . . .	430
Provision the Service Application . . . . .	430
Provision the Service Application Proxy . . . . .	431
Configure the Service Instance . . . . .	432
Configure Usage Definitions . . . . .	434

Chapter 13	Provisioning Business Intelligence, Business Connectivity, and Word Automation Services	437
	Provision Excel Services	438
	Provision the Excel Services Service Application	439
	Create the Secure Store Target Application	442
	Test the Service Application	446
	Provision Access Services	448
	Enable the Session State Service	449
	Provision the Access Services Service Application	451
	Test the Service Application	454
	Provision Visio Graphics Services	456
	Provision the Visio Services Service Application	457
	Create the Secure Store Target Application	460
	Test the Service Application	461
	Provision PerformancePoint Services	462
	Provision the PerformancePoint Service Application	464
	Set the Unattended Service Account	467
	Test the Service Application	468
	Provision Business Connectivity Services	470
	Provision the BCS Service Application	471
	Test the Service Application	474
	Provision Word Automation Services	476
	Provision the Word Automation Services Service Application	476
	Test the Service Application	479
Chapter 14	Provisioning Search Services	481
	Understand Enterprise Search Concepts	482
	Understand Administration Topology Components	482
	Understand Query Topology Components	483
	Understand Crawl Topology Components	485
	Understand Query Processor Components	486
	Understand Service Placement	487
	Understand the Crawling Process	488
	Retrieve Enterprise Search Services	491
	Retrieve the Service Application	492
	Retrieve the Crawl Components	492
	Retrieve the Query Components	493
	Retrieve the Crawl Database	494
	Retrieve the Property Database	495
	Provision Enterprise Search Services	496
	Define Service Accounts	496

	Start the Service Instance . . . . .	497
	Configure the Search Service . . . . .	499
	Create the Service Application . . . . .	501
	Configure the Administration Component . . . . .	504
	Create the Crawl and Query Components . . . . .	506
	Create the Service Application Proxy . . . . .	518
	Perform a Full or Incremental Crawl . . . . .	519
	Provision Foundation Search Services . . . . .	520
	Start the Foundation Search Service . . . . .	521
	Examine Foundation Search Services Settings . . . . .	526
	Start and Stop Full Crawls . . . . .	526
<b>Chapter 15</b>	<b>Provisioning Metadata and User Profile Services</b>	<b>527</b>
	Provision Managed Metadata Services . . . . .	528
	Provision the Managed Metadata Services	
	Service Application . . . . .	528
	Test the Service Application . . . . .	535
	Provision User Profile Services . . . . .	536
	Provision the User Profile Services Service Application . . . . .	537
	Test the Service Application . . . . .	545
	Provision the User Profile Synchronization Service . . . . .	545
	Test the Synchronization Service . . . . .	548
	Address Common Issues . . . . .	551
<b>Part 5</b>	<b>Managing and Maintaining a SharePoint Environment</b>	<b>557</b>
<b>Chapter 16</b>	<b>Managing Operational Settings</b>	<b>559</b>
	Manage Logging . . . . .	560
	Review Diagnostic Configuration Settings . . . . .	562
	Modify Diagnostic Configuration Settings . . . . .	563
	Review Log Levels . . . . .	565
	Modify Log Levels . . . . .	567
	Reset Log Levels . . . . .	568
	Create New Log Files . . . . .	569
	Merge Existing Log Files . . . . .	569
	Review Log Events . . . . .	571
	Write Log Events . . . . .	573
	Examine the Health Analyzer . . . . .	577
	Review and Modify Rule Definitions . . . . .	578
	Review Failed Rules . . . . .	579
	Manage Timer Jobs . . . . .	581
	Review Timer Jobs . . . . .	581
	Execute a Timer Job . . . . .	583
	Modify Timer Jobs . . . . .	584

Understand the Developer Dashboard . . . . .	585
Overview of the Developer Dashboard . . . . .	585
Configure the Developer Dashboard . . . . .	587
<b>Chapter 17 Back Up and Restore a SharePoint Environment</b> . . . . .	<b>591</b>
Back Up and Restore a Farm . . . . .	592
Back Up a Farm . . . . .	593
Back Up an Inactive Farm Configuration . . . . .	597
Restore a Farm . . . . .	600
Retrieve Backup History . . . . .	603
Back Up and Restore a Site Collection . . . . .	605
Back Up a Site Collection . . . . .	605
Restore a Site Collection . . . . .	607
Export and Import Sites and Lists . . . . .	609
Export a Site or List . . . . .	610
Import a Site or List . . . . .	613
<b>Chapter 18 Optimizing the Performance of a SharePoint Environment</b> . . . . .	<b>617</b>
Configure Resource Throttling . . . . .	618
Configure Performance Counter Monitoring . . . . .	620
Monitor HTTP Throttling . . . . .	625
Configure Caching Options . . . . .	629
Configure Page Output Caching . . . . .	629
Configure Object Caching . . . . .	631
Configure BLOB Caching . . . . .	634
Configure Remote BLOB Storage . . . . .	636
Configure RBS in SQL Server . . . . .	638
Migrate Content to Another Provider . . . . .	641
Disable RBS . . . . .	642
<b>Part 6 Advanced Administration 643</b>	
<b>Chapter 19 Remote Administration</b> . . . . .	<b>645</b>
Use Classic Remoting . . . . .	646
Configure Windows PowerShell Remoting . . . . .	649
Enable Remoting . . . . .	650
Enable CredSSP . . . . .	652
Increase Memory for Remote Sessions . . . . .	654
Execute Remote Commands . . . . .	655
Use <i>Invoke-Command</i> . . . . .	656
Use <i>Enter-PSSession</i> . . . . .	661
Use <i>Import-PSSession</i> . . . . .	663
Understand Serialization . . . . .	668

Configure Sessions .....	.672
Create Session Configurations .....	.672
Secure Session Configurations .....	.676
<b>Chapter 20 Multi-Tenancy</b> .....	<b>679</b>
Create a Tenant Hosting Web Application .....	.681
Create the Web Application .....	683
Create the Managed Paths .....	684
Configure Service Applications .....	685
Provision the Subscription Settings Service .....	685
Configure Tenant Services .....	688
Manage Feature Packs and Site Subscriptions .....	.695
Manage Feature Packs .....	696
Manage Site Subscriptions .....	699
Provision Tenants .....	.701
Create Member Sites .....	.701
Create the Tenant Administration Site .....	.702
Configure User Profile and Managed Metadata	
Service Applications .....	.703
Store Tenant Information .....	.705
<i>Index</i> .....	<i>707</i>
