

Contents at a Glance

<i>Introduction</i>	1
<i>Book I: AutoCAD Basics</i>	7
Chapter 1: Drawing on (and in) AutoCAD	9
Chapter 2: Navigating the AutoCAD Interface	15
Chapter 3: All about Files	35
Chapter 4: Basic Tools	55
Chapter 5: Setting Up Drawings	67
Chapter 6: Precision Tools	93
<i>Book II: 2D Drafting</i>	115
Chapter 1: Drawing Objects	117
Chapter 2: Modifying Objects	143
Chapter 3: Managing Views	171
<i>Book III: Annotating Drawings</i>	185
Chapter 1: Text: When Pictures Just Won't Do	187
Chapter 2: Dimensioning	213
Chapter 3: Hatching Your Drawings	241
<i>Book IV: LT Differences</i>	251
Chapter 1: The LT Difference	253
Chapter 2: Extending AutoCAD LT	261
Chapter 3: Mixed Environments	269
<i>Book V: 3D Modeling</i>	275
Chapter 1: Introducing the Third Dimension	277
Chapter 2: Using the 3D Environment	285
Chapter 3: Viewing in 3D	297
Chapter 4: Moving from 2D to 3D	307
Chapter 5: Working with Solids	321
Chapter 6: Working with Surfaces	329
Chapter 7: Rendering: Lights, Cameras, AutoCAD!	337

<i>Book VI: Advanced Drafting</i>	347
Chapter 1: Playing with Blocks	349
Chapter 2: Dynamic Blocks	365
Chapter 3: External References	381
Chapter 4: Organizing Your Drawings	405
Chapter 5: AutoCAD Utilities.....	415
<i>Book VII: Publishing Drawings</i>	427
Chapter 1: Page Setup.....	429
Chapter 2: Sheet Sets without Regret	449
Chapter 3: Print, Plot, Publish	477
<i>Book VIII: Collaboration</i>	497
Chapter 1: CAD Management: The Necessary Evil.....	499
Chapter 2: CAD Standards	509
Chapter 3: Working with Drawing Files.....	527
Chapter 4: Sharing Electronic Files	547
<i>Book IX: Customizing AutoCAD</i>	567
Chapter 1: The Basics of Customizing AutoCAD	569
Chapter 2: Customizing the Interface	587
Chapter 3: Customizing the Tools	607
Chapter 4: Delving Deeper into Customization	629
<i>Book X: Programming AutoCAD</i>	651
Chapter 1: The AutoCAD Programming Interfaces	653
Chapter 2: Using Custom Programs	663
Chapter 3: Introducing AutoLISP	681
Chapter 4: Visual Basic for AutoCAD	719
<i>Index</i>	741

Table of Contents

<i>Introduction</i>	1
About This Book.....	1
Foolish Assumptions	2
Conventions Used in This Book	2
How This Book Is Organized.....	2
Book I: AutoCAD Basics	2
Book II: 2D Drafting	3
Book III: Annotating Drawings	3
Book IV: LT Differences	3
Book V: 3D Modeling	3
Book VI: Advanced Drafting	3
Book VII: Publishing Drawings.....	4
Book VIII: Collaboration.....	4
Book IX: Customizing AutoCAD	4
Book X: Programming AutoCAD	4
Icons Used in This Book.....	4
<i>Book 1: AutoCAD Basics</i>	7
Chapter 1: Drawing on (and in) AutoCAD	9
Using CAD in the Drawing Office.....	9
Understanding AutoCAD Files and Formats	10
Seeing the LT.....	12
Using AutoCAD's Latest-and-Greatest Feature Set.....	12
Chapter 2: Navigating the AutoCAD Interface	15
Starting the Application	15
Creating Start menu shortcuts	16
Using desktop shortcuts	17
Accessing files from Windows Explorer	18
Touring the AutoCAD Interface	19
Title bars	19
AutoCAD menus.....	20
AutoCAD toolbars	21
Palettes	23
Drawing area	25
The floating command window	26
The status bar.....	27
Communicating with Your Software	28
The command line.....	28
Dynamic input.....	29
Dialog boxes.....	29

Running AutoCAD Commands.....	30
Grasping the AutoCAD Difference.....	30
Repeating a command	30
Canceling a running command	31
Invoking transparent commands	31
Reaching for AutoCAD Help.....	32
Using built-in Help	32
Using the Info Palette.....	33
Finding online resources	33
Chapter 3: All about Files	35
File Types in AutoCAD.....	35
Starting a New Drawing.....	38
Starting from scratch	40
Using a Wizard	40
Using a template.....	42
Saving a Drawing.....	43
Save	44
Save As.....	44
QSAVE	44
Opening an Existing Drawing.....	46
Open command	46
Using Windows Explorer	48
The Multiple-Drawing Environment.....	50
Closing Windows	50
File Management for AutoCAD	51
Naming drawing files.....	52
Storing your files	52
Backing Up Is Hard to Do . . .	53
Chapter 4: Basic Tools	55
Drawing Lines	55
Creating Circles	58
Taking a Closer Look.....	60
Checking out Zoom Realtime.....	60
Using Pan Realtime.....	61
Editing Objects	63
Erasing and Unerasing Stuff.....	63
Using the digital eraser.....	63
Unerasing objects.....	64
Undo. Redo. Undo. Redo . . .	65
Chapter 5: Setting Up Drawings	67
Choosing Units of Measurement	67
AutoCAD units	69
Imperial or metric	70
System variables.....	70
Setting units in your drawing.....	71

Setting Limits for Your Drawings	72
Understanding Drawing Scale.....	74
Scaling on the drawing board	74
Scaling in AutoCAD	75
Scale factors	75
Using scale factors to establish drawing settings	76
Lost in Space: Model or Paper?	77
A Layered Approach	78
Creating layers	79
Defining layer properties.....	80
Setting layer modes.....	81
Modifying layer settings	82
The Layer Control drop-down list	88
Object Properties	89
Using AutoCAD's color systems	89
Using linetypes	90
Setting Up Standards	91

Chapter 6: Precision Tools 93

Understanding Accuracy and Precision.....	93
Understanding Coordinate Systems	94
The World Coordinate System.....	96
Entering coordinates.....	97
Direct Distance Entry.....	101
Dynamic input and coordinate entry.....	102
Setting Grid and Snap	102
Understanding Ortho and Polar Tracking.....	105
Using ortho mode.....	105
Using polar tracking.....	105
Working with Object Snaps	108
Using Point Filters	110
Working with Object Snap Tracking Mode.....	112

Book 11: 2D Drafting..... 115

Chapter 1: Drawing Objects 117

Locating and Using the Drawing Tools.....	117
Let's Get Primitive.....	120
Keeping to the straight and narrow	120
Going around in circles.....	121
Arcs of triumph.....	123
The point of the exercise.....	124
Creating Construction Geometry.....	126
Xlines for X-men	126
A little ray of sunshine.....	127

Without a Trace	128
A Bit Sketchy	129
Drawing Parallel Lines	130
Making multilines	131
Complex Curves	133
Lucy, you got some splining to do!	133
Solar Ellipses	135
Complex Objects and Shapes	137
2D Solids	137
Rectang, Polygon, Donut	138
Polylines	139
Chapter 2: Modifying Objects	143
Setting Selection Options	143
Selecting Objects	145
Selecting multiple objects	146
Object selection modes	147
Object groups	149
AutoCAD's Editing Commands	150
Removing stuff	153
Relocating and replicating	154
Rotating and resizing	162
Breaking, mending, and blowing up real good	163
Double-barrel commands	164
Specialized commands	166
Changing properties	167
Changing your mind	168
Coming to Grips with Grips	168
Chapter 3: Managing Views	171
A Zoom of One's Own	173
Wheeling through your drawing	175
Realtime zooming	176
Pan in a Flash	178
Realtime panning	179
Name That View	180
Creating views	180
Other view options	182
<i>Book III: Annotating Drawings</i>	<i>185</i>
Chapter 1: Text: When Pictures Just Won't Do	187
Text in AutoCAD	187
Getting familiar with text terminology	188
Will that be one line or two?	189
Justification	190
Where should text go?	192

Fonts	195
Types used by AutoCAD	195
Using fonts in drawings	195
Working with Text Styles	196
Creating Single Line Text	199
Working with Multiline Text	201
Creating Multiline Text	203
Formatting options	203
Numbered and bulleted lists	204
Fields, masks, and other multiline text delights	205
Editing Text	207
Editing single-line text	207
Editing multiline text	207
Turning the Tables	208
Setting the table with styles	208
Creating and editing tables	210

Chapter 2: Dimensioning 213

Understanding What a Dimension Is Made Of	213
Types of Dimensions	215
Associative dimensions	215
Non-associative dimensions	215
Exploded dimensions	215
Specifying the Type of Dimension to Create	216
Using and Creating Dimension Styles	217
Working with the Dimension Style Manager	217
Creating a dimension style	218
The New Dimension Style dialog box	219
Dimension variables	223
Setting a dimension style current	224
Modifying a dimension style	224
Renaming a dimension style	226
Deleting a dimension style	226
Importing a dimension style	226
Creating Dimensions	227
Linear and aligned dimensions	227
Baseline and continued dimensions	229
Angular dimensions	230
Arc length dimensions	231
Radius, diameter, and jogged dimensions	232
Ordinate dimensions	234
The Quick Dimension command	234
Trans-spatial dimensions	235
Editing Dimensions	235
Adding overrides to a dimension	235
Editing the dimension text	236
Using grips to edit dimensions	236
Associating dimensions	236
Leaders	237
Working with Geometric Tolerances	238

Chapter 3: Hatching Your Drawings241

Adding Hatch Patterns and Fills.....	242
Adding hatch to a drawing.....	243
Hatching and tool palettes.....	245
Hatching and DesignCenter.....	245
Advanced settings for additional control.....	245
Working with Hatch Patterns and Solid Fills.....	247
Predefined patterns.....	247
User-defined patterns.....	247
Custom hatch patterns.....	247
Using Gradient Fills.....	248
Editing Hatch Patterns and Fills.....	249

Book IV: LT Differences251**Chapter 1: The LT Difference253**

Understanding the Boundaries and Limitations of AutoCAD LT.....	253
Determining Whether AutoCAD or AutoCAD LT Is Best for You.....	258

Chapter 2: Extending AutoCAD LT261

Customizing AutoCAD LT.....	261
It's in the script.....	261
Linetype and hatch patterns.....	262
Blocks and DesignCenter.....	262
Tool palettes.....	263
Changing the user interface with CUI.....	263
Diesel.....	264
Command aliases.....	264
Desktop icons.....	264
Object Enabler Technology.....	264
Additional Utilities Available from Autodesk.....	265
DWG TrueConvert.....	265
Viewers.....	265
Companion Products from Autodesk.....	266
Autodesk Symbols 2000.....	266
Autodesk VIZ 2007.....	266
Third-Party Custom Solutions.....	266
Block utilities/libraries.....	267
Viewers.....	267

Chapter 3: Mixed Environments269

Using AutoCAD LT and AutoCAD in the Same Office.....	269
Budgeting.....	269
Training.....	270
Communication.....	270
Environment.....	270

Customization	270
Deployment/installation	271
Making the Trip from AutoCAD to AutoCAD LT	271
2D drafting	271
3D modeling	272
Annotation	273
Viewing	273
Visualization	273
CAD Standards	274
Collaboration/sharing	274

***Book V: 3D Modeling*.....275**

Chapter 1: Introducing the Third Dimension 277

Understanding the Different Types of 3D Models	278
Entering Coordinates above the x,y Plane	279
Manually inputting coordinates	279
Point filters	282
Object snaps	282
Object snap tracking	282
Elevation . . . going up	283

Chapter 2: Using the 3D Environment 285

Setting Up AutoCAD for 3D	285
Orienting yourself in the drawing window	286
Customizing crosshairs and dynamic input	287
Using workspaces to switch between 2D and 3D drafting	288
Introducing toolbars and palettes for 3D	288
Accelerating your hardware	289
Understanding What the UCS Icon Is Telling You	290
Orientating yourself with the UCS icon	290
Controlling the display of the UCS icon	291
Using the Coordinate System for 3D Drawing	292
Understanding the coordinate system	293
Adjusting the UCS	294

Chapter 3: Viewing in 3D 297

Establishing a Different Point of View	297
Using preset views	297
Finding your way with the compass and tripod	298
Cameras	299
Perspective versus parallel	300
Orbiting around a 3D Model	300
Navigating a 3D Model	302
Adding Some Color and Style to a 3D Model	304
Visual styles in AutoCAD	304
Shademode in AutoCAD LT	305

Chapter 4: Moving from 2D to 3D	307
Working with Regions	307
Creating regions.....	308
Modifying regions.....	308
Getting more information about regions.....	309
3D Polylines and Helixes	310
3D polyline	310
Helix	310
Creating 3D Objects from 2D Objects.....	311
Thickness	311
Extrude	311
Loft	312
Sweep.....	312
Revolve	313
Tabulated Mesh	313
Revolved Mesh	314
Ruled Mesh.....	314
Edge Mesh	315
Creating 2D Objects from 3D Objects.....	315
Flatshot.....	316
Section Plane.....	316
Solid Draw, Solid View, and Solid Profile	317
3D Modify Commands	317
3D Move.....	318
3D Rotate.....	318
Align	319
3D Align.....	319
Mirror 3D	319
3D Array.....	319
Chapter 5: Working with Solids	321
Creating Solid Primitives.....	321
Polysolid.....	321
Box.....	322
Wedge.....	322
Cone	323
Sphere.....	323
Cylinder	324
Torus	324
Pyramid.....	324
Editing Solids	325
Solid editing	325
Using grips to edit solids.....	327
Booleans	327
Filleting and chamfering.....	327
Slice	328

Chapter 6: Working with Surfaces	329
Creating Surfaces	329
3D face	329
3D mesh	330
Planar surface	330
Box.....	331
Wedge.....	332
Cone	332
Sphere.....	333
Dish and dome	333
Torus	334
Pyramid.....	334
Editing Surfaces.....	335
Controlling the visibility of edges	335
Using grips to edit surfaces	336
Working with convert to surface	336
Thicken	336
 Chapter 7: Rendering: Lights, Cameras, AutoCAD!	 337
Lighting a Scene	337
Default lights	338
User lights	338
Sunlight.....	340
Getting the Right Look with Materials.....	341
Setting Up a Backdrop	343
Rendering the Final Scene.....	343

Book VI: Advanced Drafting

Chapter 1: Playing with Blocks	349
Working with Reusable Content	349
Creating Blocks.....	350
Accessing the Block Definition dialog box.....	351
Exploring some advanced options.....	353
Inserting Blocks.....	354
Managing Blocks	356
Renaming a block definition	356
Redefining a block definition	357
Purging a block definition from a drawing	357
Exporting a block definition.....	358
Enhancing Blocks with Attributes.....	359
Adding an attribute to a block definition	359
Inserting a block with attributes	362
Changing an attribute's value in a block	363
Managing attributes in blocks	363
Extracting attribute data from blocks	363

Chapter 2: Dynamic Blocks	365
What Makes a Block Dynamic?	365
Block Editor Environment	366
Components of the Block Editor	367
Editing a block definition	369
Going Dynamic	371
Adding parameters	373
Adding actions	374
Using parameter sets	376
Visibility states	376
Using Dynamic Blocks	378
Inserting a dynamic block	379
Modifying a dynamic block	379
Dynamic Blocks in Older Releases	380
Chapter 3: External References	381
Blocks versus External References	381
Working with External References	382
DWG References	383
Attaching an xref	384
External reference notification	386
Editing an xref	387
Clipping an xref	389
Increasing the performance of xrefs	391
Binding an xref	392
Raster Images	393
Attaching a raster image	393
Clipping a raster image	395
Controlling the appearance of a raster image	396
DWF Underlays	397
Attaching a DWF underlay	397
Clipping a DWF underlay	399
Controlling the appearance of DWF underlay	400
Draw Order	400
Object Linking and Embedding (OLE)	401
Managing External References Outside of AutoCAD	402
Chapter 4: Organizing Your Drawings	405
Why Bother to Organize Drawings?	405
It's all in the name	405
Using the Windows Clipboard	406
Copying objects from a drawing	406
Cutting objects from a drawing	406
Pasting objects into a drawing	407
AutoCAD DesignCenter	407
Locating resources in drawings	409
Adding resources to drawings	411
Inserting hatches and loading linetypes	412

Using the Tool Palettes Window	412
Blocks, xrefs, images, tables, and hatches	413
Command and flyouts tools	413
Modifying tools on a tool palette	413
Chapter 5: AutoCAD Utilities	415
Filtering Objects during Selection.....	415
Quick Select.....	415
Filter	417
AutoCAD Calculator	419
Using QuickCalc with the Properties palette.....	422
Using QuickCalc with a command.....	422
Auditing and Recovering Drawings.....	423
Auditing a drawing	423
Recovering a drawing	424
Using the Drawing Recovery Manager	425

***Book VII: Publishing Drawings*** **427**

Chapter 1: Page Setup	429
Preparing for Output with Page Setups.....	430
Options of a page setup.....	430
Working with page setups	432
Organizing a Drawing with Layouts	435
Working with layouts	436
Looking at a Model through Viewports.....	441
Defining a viewport's shape.....	442
Controlling scale.....	446
Controlling the display within a viewport.....	446
Modifying a viewport	448
Chapter 2: Sheet Sets without Regret	449
Overview of a Sheet Set.....	449
Sheet Set Manager	451
Creating a Sheet Set	451
Starting from scratch	452
Starting from an existing sheet set.....	455
Managing Drawings with a Sheet Set.....	456
Opening a sheet set.....	456
Importing existing drawings as sheets	457
Organizing with subsets	459
Setting up a sheet set and subset for adding new sheets	460
Adding a new sheet	463
Opening a sheet	464
Removing, renaming, and renumbering a sheet.....	464

Sheet set and sheet properties	465
Setting up callouts and label blocks	468
Adding resource drawings	472
Adding model views to a sheet.....	473
Publishing, eTransmitting, and Archiving a Sheet Set	476

Chapter 3: Print, Plot, Publish477

You Say Printing, We Say Plotting, They Say Publishing.....	477
Working with drivers.....	478
Configuring a printer or plotter.....	479
Putting style in your plots.....	484
Outputting Made Easy	488
Plotting the Model tab	489
Plotting a paper space layout	491
Scaling your drawing	492
More plotting options	492
Publishing Drawings	494

Book VIII: Collaboration497**Chapter 1: CAD Management: The Necessary Evil499**

Getting a Handle on the Basics of CAD Management	499
Managing the Drafting Environment.....	502
Creating a Good Foundation.....	503
Creating a drawing template file.....	504
Using a drawing template file	505
Specifying a drawing template file for use with QNEW	506
Specifying the location of drawing template files	508

Chapter 2: CAD Standards509

CAD Standards Overview	509
Using AutoCAD's CAD Standards Tools.....	511
Drawing standards (.DWS) files.....	512
Managing standards.....	513
Translating layers.....	518
Batch checking drawings	522

Chapter 3: Working with Drawing Files527

It's All in the Name: Creating Naming Conventions	527
Part of a Drawing Can Be a Good Thing: Working with Partial Open	528
Controlling What Happens during a Save	532
Getting a handle on drawing file formats	532
Indexing the content of a drawing.....	533
Protecting Your Drawings	535
Password-protecting	535
Digital signatures.....	539

Chapter 4: Sharing Electronic Files **547**

- Sharing Drawings with Non-AutoCAD–based Products 547
- Taking Drawings to the Internet 548
 - Using an FTP site 549
 - Publishing drawings to the Web 551
 - Using Web-based project sites 556
- Emulating Paper Digitally 558
 - Design Web Format (DWF) 559
 - Portable Document File (PDF) 560
 - Head-to-head comparison 560
- Working with DWFs 561
 - Creating a DWF file 562
 - Viewing a DWF file 563
 - Electronically marking up a DWF file 564

Book IX: Customizing AutoCAD **567**

Chapter 1: The Basics of Customizing AutoCAD **569**

- Why Customize AutoCAD? 569
- Customizing the AutoCAD Startup Process 571
 - Startup options 571
 - Using command line switches 572
- Changing Options and Working with User Profiles 577
 - Launching the Options dialog box 578
 - Overview of AutoCAD options 578
 - Working with user profiles 579
- Creating and Managing Command Aliases 582
 - Editing the PGP file 582
 - Working with the AutoCAD Alias Editor 584

Chapter 2: Customizing the Interface **587**

- Getting Familiar with the Status Bar 587
 - Getting to know the Icon Tray 589
 - Powering the status bar with DIESEL 592
- Training Your Toolbars and Dockable Windows to Stay 593
 - Locking UI toolbars and dockable windows 593
 - Locking and unlocking toolbars and dockable windows 594
- Controlling the Appearance and Displays of AutoCAD 595
 - Window elements 595
 - Layout elements 597
 - Crosshair size 598
 - Display resolution 598
 - Display performance 599
 - Reference Edit fading intensity 600
- Organizing Your Space 600
 - Using the Workspace toolbar 600
 - Using the Customize User Interface editor 602
 - Maximizing the drawing space 605

Chapter 3: Customizing the Tools	607
How Customizing the User Interface Has Changed	607
Getting to Know the Customize User Interface Editor	608
The Customizations In pane	608
The Command List pane.....	609
The Dynamic pane.....	610
Launching the Customize User Interface (CUI) editor	611
Commands in the CUI editor	612
Customizing Toolbars and Pull-Down and Shortcut Menus	615
Toolbars.....	615
Pull-down menus	617
Shortcut menus	619
Separator bars	622
Creating a New Shortcut Key.....	622
Customizing Double-Click Actions	623
Migrating and Transferring Customization.....	624
Working with Partial and Enterprise Customization Files	626
Loading an enterprise customization file.....	626
Loading a partial customization file	627
Chapter 4: Delving Deeper into Customization	629
Working from a Script.....	629
What is a script file?.....	630
Creating a script file.....	632
Loading and running a script file	632
Running a script file at startup.....	633
It's All in the Linetype.....	633
Simple linetypes	634
Complex linetypes.....	637
Getting Familiar with Shapes.....	638
Creating Custom Patterns	639
The structure of a hatch pattern	639
Creating a hatch pattern.....	642
Using a custom hatch pattern file	643
Working with Express Tools	643
Installing Express Tools.....	644
Layer tools.....	644
Block tools.....	645
Text tools.....	646
Layout tools	647
Dimension tools.....	647
Modify tools	647
Draw tools	648
File tools	648
Tools.....	648
Command line only tools.....	649

***Book X: Programming AutoCAD*651**

Chapter 1: The AutoCAD Programming Interfaces653

- Discovering What You Can Do by Programming AutoCAD654
 - The advantages of using APIs654
 - The other side of the story655
- Getting to Know the Available Programming Interfaces655
 - AutoLISP656
 - ActiveX automation.....657
 - VBA.....658
 - ObjectARX and ObjectDBX658
 - .NET659
- Comparing Strengths and Weaknesses
 - of the Programming Interfaces659
- Deciding Which Programming Interface Is Best for You661

Chapter 2: Using Custom Programs663

- Identifying Application Files663
- Loading and Unloading Applications.....664
 - The Load/Unload Applications dialog box.....664
 - Loading an AutoLISP file.....668
 - Loading and unloading a VBA file669
 - Loading and unloading an ObjectARX file.....672
- Automatically Loading Application Files674
 - Using the Startup Suite674
 - Getting AutoCAD to do some of the work676
- Running a Program in an Application File.....678

Chapter 3: Introducing AutoLISP681

- Accessing the AutoLISP Development Environment681
 - Launching the Visual LISP IDE682
 - Loading an existing AutoLISP application file682
- Using the VLIDE.....683
 - Controlling color coding in the Text window685
 - Controlling text size and font style in the Text window686
 - Navigating the Text window.....687
- Creating a Basic Program688
 - Creating a new AutoLISP file688
 - Anatomy of an AutoLISP expression689
 - Adding comments690
 - To command or just to function.....691
 - Creating your first AutoLISP program692
- More Than Just the Essentials of AutoLISP694
 - Supported data types694
 - Math functions695
 - String functions696
 - List functions696

Data conversion functions	697
Saving and accessing values for later	698
Exchanging information with AutoCAD	699
Getting Information to and from the User	701
Giving feedback to the user	701
Other functions to note	702
Using the Debug Tools in the Visual LISP IDE	705
Breakpoints	705
Watch what is happening	705
Setting up breakpoints and using watch	706
AutoLISP error messages	708
Going GUI with DCL	709
Basics of DCL	709
Adding comments	711
Using AutoLISP to add interaction to DCL	711
Using ActiveX Automation with AutoLISP	715
Referencing the AutoCAD Application	715
Using methods of an object	715
Setting and retrieving a property of an object	716
Revising the BCIRC command	717

Chapter 4: Visual Basic for AutoCAD 719

AutoCAD Commands for VBA	720
VBAIDE	720
VBALOAD	720
VBAUNLOAD	722
VBARUN	723
VBAMAN	724
Other commands	725
Working with the IDE	726
Exploring the IDE	726
Project Explorer	726
