About the Authors	v
Acknowledgments	ix
Introduction	xxiii
Chapter 1: Primer in Excel VBA	1
Using the Macro Recorder	2
Recording Macros	2
Running Macros	5
The Visual Basic Editor	8
Other Ways to Run Macros	11
User Defined Functions	18
Creating a UDF	18
What UDFs Cannot Do	22
The Excel Object Model	22
Objects	23
Getting Help	29
Experimenting in the Immediate Window	30
The VBA Language	32
Basic Input and Output	32
Calling Functions and Subroutines	37
Variable Declaration	38
Scope and Lifetime of Variables	40
Variable Type	42
Object Variables	45
Making Decisions	47
Looping	50
Arrays	55
Runtime Error Handling	58
Summary	62
Chapter 2: Programming in the VBE	63
Writing Code	63
Programming for People	63
Writing Code	64
Where Does My Code Go?	65

Contents

Managing a Project	65
Adding Classes	67
Modifying Properties	68
Importing and Exporting Visual Basic Code	69
Editing	70
Managing Editor Options	70
Running and Debugging Code	71
Using Watches	71
Using the Object Browser	72
Summary	73
Chapter 3: The Application Object	75
Globals	75
The Active Properties	76
Display Alerts	77
Screen Updating	77
Evaluate	78
InputBox	80
StatusBar	81
SendKeys	82
OnTime	83
OnKey	84
Worksheet Functions	85
Caller	87
Summary	88
Chapter 4: Object-Oriented Theory and VBA	89
Comparing Classes and Interfaces	89
Defining an Interface	90
Implementing an Interface	91
Defining Methods	92
Parameters	93
Implementing Recursive Methods	94
Eliminating Recursion with Loops	94
Defining Fields	95
Defining Properties	95
Read-Only Properties	96
Write-Only Properties	97
Defining Events	97
Defining Events in Classes	97

Contents

Raising Events	98
Handling Events	99
Information Hiding and Access Modifiers	100
Encapsulation, Aggregation, and References	100
Summary	101
Chapter 5: Event Procedures	103
Worksheet Events	103
Enable Events	104
Worksheet Calculate	105
Chart Events	106
Before Double Click	106
Workbook Events	108
Save Changes	110
Headers and Footers	111
Summary	112
Chapter 6: Class Modules	113
Creating Your Own Objects	113
Using Collections	115
Class Module Collection	116
Trapping Application Events	118
Embedded Chart Events	120
A Collection of UserForm Controls	122
Referencing Classes Across Projects	124
Summary	125
Chapter 7: Writing Bulletproof Code	127
Using Debug.Print	127
Using Debug.Assert	128
A Brief Exemplar of PC Debugging	129
Creating Reusable Tools with the Debug Object	133
Tracing Code Execution	133
Trapping Code Execution Paths	135
Asserting Application Invariants	137
Raising Errors	140
Writing Error Handlers	142
On Error Goto Line Number	142
On Error Resume Next	143

Contents

On Error GoTo 0	145
Using the Err Object	145
Scaffolding	145
Writing to the EventLog	147
Summary	149
Chapter 8: Debugging and Testing	151
Stepping Through Code	151
Running Your Code	152
Stepping into Your Code	153
Step Over	153
Step Out	153
Run to Cursor	154
Set Next Statement	154
Show Next Statement	155
Using Breakpoints	155
Using Watches	155
Add Watch	156
Edit Watch	158
Quick Watch	158
Locals Windows	158
Testing an Expression in the Immediate Window	159
Resources for Finding Definitions	160
Edit ⇄ Quick Info	160
Edit ⇄ Parameter Info	161
Edit ⇄ Complete Word	161
Edit ⇄ List Properties/Methods	161
Edit ⇄ List Constants	162
Edit ⇄ Bookmarks	162
View ⇄ Definition	162
View ⇄ Object Browser	163
Viewing the Call Stack	163
Asserting Application Invariants	164
Summary	165
Chapter 9: UserForms	167
Displaying a UserForm	167
Creating a UserForm	169
Directly Accessing Controls in UserForms	171
Stopping the Close Button	174

Contents

Maintaining a Data List	175
Modeless UserForms	181
Summary	181
Chapter 10: Adding Controls	183
The Toolbars	183
ActiveX Controls	184
Scrollbar Control	185
Spin Button Control	186
CheckBox Control	186
Option Button Controls	187
Forms Toolbar Controls	188
Dynamic ActiveX Controls	191
Controls on Charts	194
Summary	195
Chapter 11: Data Access with ADO	197
An Introduction to Structured Query Language (SQL)	197
The SELECT Statement	198
The INSERT Statement	200
The UPDATE Statement	201
The CREATE TABLE Statement	202
The DROP TABLE Statement	203
An Overview of ADO	203
The Connection Object	204
The Recordset Object	212
The Command Class	218
Using ADO in Microsoft Excel Applications	222
Using ADO with Microsoft Access	223
Using ADO with Microsoft SQL Server	230
Using ADO with Non-Standard Data Sources	239
Summary	244
Chapter 12: Creating and Using Add-ins	245
Hiding the Code	245
Converting the Workbook to an Add-in	247
Closing Add-ins	247
Code Changes	248
Saving Changes	249

Contents

Installing an Add-in	250
Add-in Install Event	251
Removing an Add-in from the Add-ins List	252
Summary	252
Chapter 13: Automation Addins and COM Addins	253
Automation Addins	253
Creating a Simple Addin	254
Registering Automation Addins with Excel	255
Using Automation Addins	257
An Introduction to the IDTExtensibility2 Interface	259
A Complex Addin—Generating a Unique Random Number	262
COM Addins	268
IDTExtensibility2 Interface Continued	268
Summary	279
Chapter 14: Customizing the VBE	281
Identifying VBE Objects in Code	281
The VBE Object	282
The VBProject Object	283
The VBComponent Object	283
The CodeModule Object	284
The CodePane Object	285
The Designer Object	285
Starting Up	285
Adding Menu Items to the VBE	286
Table-Driven Menu Creation	288
Displaying Built-In Dialogs, UserForms, and Messages	296
Working with Code	301
Working with UserForms	305
Working with References	310
Summary	311
Chapter 15: Interacting with Other Office Applications	313
Establishing the Connection	314
Late Binding	314
Early Binding	315
Opening a Document in Word	317
Accessing an Active Word Document	318
Creating a New Word Document	319

Contents

Access and DAO	320
Access, Excel and, Outlook	321
When Is a Virus not a Virus?	323
Summary	324
Chapter 16: Programming with the Windows API	327
Anatomy of an API Call	328
Interpreting C-Style Declarations	329
Constants, Structures, Handles, and Classes	332
What if Something Goes Wrong?	335
Wrapping API Calls in Class Modules	336
Some Example Classes	341
A High-Resolution Timer Class	341
Freeze a UserForm	342
A System Info Class	344
Modifying UserForm Styles	346
Resizable Userforms	350
Other Examples	356
Summary	358
Chapter 17: International Issues	359
Changing Windows Regional Settings and the Office XP UI Language	359
Responding to Regional Settings and the Windows Language	360
Identifying the User's Regional Settings and Windows Language	360
VBA Conversion Functions from an International Perspective	361
Interacting with Excel	366
Sending Data to Excel	367
Reading Data from Excel	369
Rules for Working with Excel	370
Interacting with Users	370
The Rules for Working with Your Users	373
Excel 2003's International Options	373
Features That Don't Play by the Rules	375
Responding to Office XP Language Settings	382
Where Does the Text Come From?	382
Identifying the Office UI Language Settings	383
Creating a Multilingual Application	384
Working in a Multilingual Environment	386
The Rules for Developing a Multilingual Application	388

Contents

Some Helpful Functions	388
Implementing WinToNum Function	388
Implementing WinToDate Function	389
Implementing FormatDate Function	390
Implementing ReplaceHolders Function	390
Summary	391
Chapter 18: Workbooks and Worksheets	393
Using the Workbooks Collection	393
Creating a New Workbook	393
Saving the ActiveWorkbook	394
Activating a Workbook	394
Getting a FileName from a Path	395
Files in the Same Directory	397
Overwriting an Existing Workbook	398
Saving Changes	399
The Sheets Collection	400
Worksheets	400
Copy and Move	402
Grouping Worksheets	403
The Window Object	405
Synchronizing Worksheets	406
Summary	407
Chapter 19: Using Ranges	409
Activate and Select	409
Range Property	411
Shortcut Range References	412
Ranges on Inactive Worksheets	412
Range Property of a Range Object	413
Cells Property	413
Cells used in Range	414
Ranges of Inactive Worksheets	414
More on the Cells Property of the Range Object	415
Single-Parameter Range Reference	417
Offset Property	418
Resize Property	420
SpecialCells Method	420
CurrentRegion Property	424

Contents

End Property	426
Referring to Ranges with End	426
Summing a Range	427
Columns and Rows Properties	428
Areas	429
Union and Intersect Methods	431
Empty Cells	432
Transferring Values between Arrays and Ranges	434
Deleting Rows	436
Summary	438
Chapter 20: Using Names	441
Naming Ranges	442
Using the Name Property of the Range Object	443
Special Names	443
Storing Values in Names	444
Storing Arrays	445
Hiding Names	446
Working with Named Ranges	446
Searching for a Name	447
Searching for the Name of a Range	449
Determining which Names Overlap a Range	450
Summary	452
Chapter 21: Working with Lists	453
Creating a List	453
Shortcut Options for Lists	454
Sorting and Filtering a List	454
Creating a UserForm from a List	455
Resizing Lists	456
Dragging the resize handle in the bottom corner of the list	456
Totaling Rows	456
Converting Lists to a Range	456
Publishing Lists	457
Publishing Your List	459
Updating Changes to Your List	459
View a List on a SharePoint Server	460
Unlinking the List	461
Summary	461

Contents

Chapter 22: PivotTables	463
Creating a PivotTable Report	464
PivotCaches	467
PivotTables Collection	467
PivotFields	467
CalculatedFields	470
PivotItems	473
Grouping	473
Visible Property	476
CalculatedItems	477
PivotCharts	478
External Data Sources	479
Summary	481
Chapter 23: Filtered Lists	483
Structuring the Data	483
Data Form	483
AutoFilter	485
Custom AutoFilter	485
Adding Combo Boxes	486
Copying the Visible Rows	490
Finding the Visible Rows	491
Advanced Filter	493
Summary	495
Chapter 24: Generating Charts	497
Chart Sheets	497
Embedded Charts	500
Editing Data Series	503
Defining Chart Series with Arrays	506
Converting a Chart to use Arrays	509
Determining the Ranges used in a Chart	509
Chart Labels	511
Summary	512
Chapter 25: Office Files and Folders	515
FileSearch	516
FoundFiles	518
PropertyTests	519

Contents

FileTypes	520
SearchScopes	521
ScopeFolder	522
SearchFolders	523
FileDialog	525
FileDialogFilters	527
FileDialogSelectedItems	527
Dialog Types	527
Execute Method	528
MultiSelect	528
Summary	529
Chapter 26: Command Bars	531
 Toolbars, Menu Bars, and Popups	531
 Excel's Built-In Commandbars	534
 Controls at All Levels	537
Facelds	540
 Creating New Menus	542
The OnAction Macros	544
 Passing Parameter Values	545
 Deleting a Menu	545
 Creating a Toolbar	546
 Pop-Up Menus	551
 Showing Pop-Up Command Bars	554
 Disabling Commandbars	556
 Disabling Shortcut Access to Customize	558
Table-Driven Command Bar Creation	559
 Summary	569
Chapter 27: SmartTags	571
 SmartTag Enhancements	572
Microsoft SmartTags 2.0 Type Library	573
 The FileName SmartTag	574
Anatomy of a SmartTag	574
The SmartTag Unique Identifier	575
The SmartTag Recognizer Class	576
The SmartTag Actions Class	580
Implementing Office 2003 SmartTag Features	586
Registering SmartTags	589
Using the FileName SmartTag	591
 Controlling SmartTags with VBA	592

Contents

The Problems with SmartTags	595
Summary	596
Chapter 28: Excel and the Internet	597
So What's all the Hype About?	598
Using the Internet for Storing Workbooks	598
Using the Internet as a Data Source	599
Opening Web Pages as Workbooks	599
Using Web Queries	600
Parsing Web Pages for Specific Information	603
Using the Internet to Publish Results	605
Setting Up a Web Server	605
Saving Worksheets as Web Pages	605
Adding Interactivity with the Web Components	607
Using the Internet as a Communication Channel	608
Communicating with a Web Server	609
XML	618
The XML-SS Schema	620
Using XSLT to Transform XML	624
Summary	628
Chapter 29: XML and Excel	629
What Is XML?	629
What Is XSD?	630
What Is XMLSS?	631
Importing XML Data	633
BlackJack: Data Versatility	633
Importing an XML File	635
Exporting a Worksheet to an XML File	637
Summary	638
Appendix A: Excel 2003 Object Model	641
Appendix B: VBE Object Model	961
Appendix C: VBE Object Model	991
Index	1081
