Acknowledgments	x
Foreword	xix
Introduction	xxi
Chapter 1: Introduction to Silverlight	1
What Is Silverlight?	1
What Does DOM Really Mean?	4
Silverlight Versions Explained	5
Getting the Silverlight Plug-In	6
Getting the Silverlight SDK	9
Building Silverlight Applications	13
Creating the Silverlight Object in HTML	17
Silverlight Object Attributes	18
Adding Multiple Silverlight Objects to a Page	20
Resizing a Silverlight Control	21
Displaying in Full Screen Mode	23
Understanding XAML	25
Summary	27
Chapter 2: Building Silverlight Applications Using XAML	29
Rendering Silverlight Content	29
Working with XAML in This Chapter	30
Layout of Silverlight Content	31
Positioning Objects Using ZIndex	34
Positioning Objects Using Transforms	38
Drawing with Text and Brushes	41
Using the TextBlock Object	41
Creating Hyperlinks	43
Silverlight Video	45
Adding Video to Web Pages	46
Supported Audio and Video Formats	46
Interacting with the MediaElement Object	47
Using Markers and Timelines in Video	49
Painting Video onto Objects	52
Creating Video Reflections	53
Animating Silverlight Elements	56
Summary	58

Contents

Chapter 3: Designing Silverlight Applications Using Expression Blend 2	59
Getting the Latest Blend 2 Preview	60
Creating a New Silverlight Project	60
The Silverlight Project Starter Template	61
Blend Workspace Overview	62
Layout and Design in Blend	74
Creating and Understanding Timelines	79
Understanding Storyboards in Silverlight	80
Creating a Timeline	80
Working with Artwork Created Outside of Blend	84
Designing with Blend/Silverlight in Mind	84
Exporting to XAML in Other Tools	86
Summary	89
Chapter 4: Coding Silverlight Applications with JavaScript and XAML	91
The JavaScript Programming Model	92
Creating the Player Using JavaScript	92
Refactoring the Silverlight Player Creation	95
Dissecting the Silverlight.js Helper Library	96
createObject and createObjectEx	96
isInstalled	103
Accessing the Silverlight Player Object	104
Accessing XAML Content	105
Locating XAML Content Elements	105
Getting and Setting XAML Properties	106
Instantiating and Inserting XAML Elements	108
Examining Events in Silverlight	113
Player Events	113
XAML Element Events	115
Accessing Storyboards Programmatically	125
Using the Downloader Object	128
Downloading Packages	131
Downloading Fonts	133
Using JavaScript and the MediaElement	134
Using DownloadProgressChanged and BufferingProgressChanged Events	136
Working with Markers	137
Summary	138

Chapter 5: Using Silverlight with ASP.NET	139
Creating Custom Controls	142
Setting Up the Project	142
Adding the Silverlight JavaScript Library	146
Adding Xaml Control Properties	150
Rendering the Xaml Control	154
Using ASP.NET AJAX with Silverlight	158
Refactor into a ScriptControl	158
Adding Client-Oriented Properties	160
Creating the Client-Side (JavaScript) Default Type	161
Embedding and Registering the New Client-Side Type	164
Implementing AJAX Extension Methods	164
Creating Dynamic Silverlight User Interfaces with ASP.NET	166
Creating the Button Template	166
Creating the ButtonBar Server-Side Code	170
Creating the ButtonBar Client-Side Code	178
Using the ButtonBar Control	184
Final Thoughts/Recommendations	187
Summary	187
Chapter 6: Silverlight 1.1 and the CLR	189
The CLR	191
The Framework	192
Base APIs	193
Data APIs	194
Communications APIs	195
Presentation APIs	196
Debugging	199
Dynamic Language Support	199
A Quick Silverlight 1.1 Example	199
Summary	200
Chapter 7: Video Player: Silverlight 1.0 Case Example	201
Getting Started	202
Designing the Application Architecture	202
Designing the User Interface	202
Managing the Developer/Designer Workflow	204
Preparing the Media for the Application	205
Creating the Data Layer	206

Contents

Creating the Host Web Page	207
Coding Lumos	208
Scene Class	209
Button Class	216
VideoArea Class	217
Summary	220
Appendix A: Silverlight Object Reference	221
ArcSegment	221
BeginStoryboard	221
BezierSegment	222
Canvas	222
ColorAnimation	222
ColorAnimationUsingKeyFrames	223
ColorKeyFrame	223
ColorKeyFrameCollection	223
DiscreteColorKeyFrame	224
DiscreteDoubleKeyFrame	224
DiscretePointKeyFrame	224
DoubleAnimation	224
DoubleAnimationUsingKeyFrames	225
DoubleCollection	225
DoubleKeyFrame	225
DoubleKeyFrameCollection	225
Downloader	226
DrawingAttributes	226
Duration	226
Ellipse	227
EllipseGeometry	227
FontFamily	227
GeometryCollection	228
GeometryGroup	228
Glyphs	228
GradientStop	229
GradientStopCollection	229
Image	229
ImageBrush	230
InkPresenter	230
KeyboardEventArgs	230
KeySpline	231
KeyTime	231

Contents

Line	231
LinearColorKeyFrame	232
LinearDoubleKeyFrame	232
LinearGradientBrush	232
LinearPointKeyFrame	232
LineBreak	233
LineGeometry	233
LineSegment	233
MatrixTransform	233
MediaAttributeCollection	234
MediaElement	234
MouseEventArgs	234
ParserErrorEventArgs	235
Path	235
PathFigure	235
PathFigureCollection	236
PathSegmentCollection	236
PointAnimation	236
PointAnimationUsingKeyFrames	236
PointCollection	237
PointKeyFrame	237
PointKeyFrameCollection	237
PolyBezierSegment	238
Polygon	238
Polyline	238
PolyLineSegment	239
PolyQuadraticBezierSegment	239
QuadraticBezierSegment	239
RadialGradientBrush	239
Rectangle	240
RectangleGeometry	240
RepeatBehavior	240
ResourceCollection	241
RotateTransform	241
Run	241
RuntimeErrorEventArgs	241
ScaleTransform	242
Silverlight Control	242
SkewTransform	242
SolidColorBrush	242
SplineColorKeyFrame	243
SplineDoubleKeyFrame	243

Contents

SplinePointKeyFrame	243
Storyboard	243
Stroke	244
StylusInfo	244
StylusPoint	244
StylusPointCollection	244
TextBlock	245
Timeline	245
TimelineCollection	245
TimelineGroup	246
TimelineMarker	246
TimelineMarkerCollection	246
TimelineMarkerEventArgs	246
TimeSpan	247
TransformCollection	247
TransformGroup	247
TranslateTransform	247
TriggerAction	248
TriggerActionCollection	248
TriggerCollection	248
UIElementCollection	248
VideoBrush	249
Appendix B: XAML Reference	251
Introducing XAML	251
Silverlight XAML Basics	253
Declaring Objects in XAML	255
Object or Content Element Syntax	255
Attribute Element Syntax	255
Property Element Syntax	256
Setting a Property Using Implicit Collection Syntax	256
Deciding When to Use Attribute or Property Element Syntax to Set a Property	258
XAML Hierarchy	258
Adding XAML Objects to the Silverlight Object Hierarchy	260
Events and the Silverlight Control	261
Code Behind and x:Name	262
Silverlight Player Events	264
Defining Event Handlers	266
Defining Events in JavaScript	268
Referencing the Silverlight Control	269
Summary	272
