

CONTENTS

Preface	xiii
Acknowledgments	xvii
List of Figures	xix
List of Tables	xxvii
Acronyms	xxix
1 Introduction: Character Recognition, Evolution, and Development	1
1.1 Generation and Recognition of Characters	1
1.2 History of OCR	2
1.3 Development of New Techniques	3
1.4 Recent Trends and Movements	3
1.5 Organization of the Remaining Chapters	3
References	4
2 Tools for Image Preprocessing	5
2.1 Generic Form-Processing System	5
2.2 A Stroke Model for Complex Background Elimination	8

vii

2.2.1	Global Gray Level Thresholding	9
2.2.2	Local Gray Level Thresholding	11
2.2.3	Local Feature Thresholding—Stroke-Based Model	12
2.2.4	Choosing the Most Efficient Character Extraction Method	15
2.2.5	Cleaning Up Form Items Using Stroke-Based Model	19
2.3	A Scale-Space Approach for Visual Data Extraction	21
2.3.1	Image Regularization	22
2.3.2	Data Extraction	24
2.3.3	Concluding Remarks	29
2.4	Data Preprocessing	30
2.4.1	Smoothing and Noise Removal	30
2.4.2	Skew Detection and Correction	32
2.4.3	Slant Correction	34
2.4.4	Character Normalization	36
2.4.5	Contour Tracing/Analysis	41
2.4.6	Thinning	45
2.5	Chapter Summary	50
	References	51
3	Feature Extraction, Selection, and Creation	54
3.1	Feature Extraction	54
3.1.1	Moments	55
3.1.2	Histogram	58
3.1.3	Direction Features	59
3.1.4	Image Registration	64
3.1.5	Hough Transform	68
3.1.6	Line-Based Representation	70
3.1.7	Fourier Descriptors	73
3.1.8	Shape Approximation	76
3.1.9	Topological Features	78
3.1.10	Linear Transforms	79
3.1.11	Kernels	86
3.2	Feature Selection for Pattern Classification	90
3.2.1	Review of Feature Selection Methods	90
3.3	Feature Creation for Pattern Classification	104
3.3.1	Categories of Feature Creation	104
3.3.2	Review of Feature Creation Methods	105
3.3.3	Future Trends	118

3.4	Chapter Summary	120
	References	120
4	Pattern Classification Methods	129
4.1	Overview of Classification Methods	129
4.2	Statistical Methods	131
4.2.1	Bayes Decision Theory	131
4.2.2	Parametric Methods	132
4.2.3	Nonparametric Methods	138
4.3	Artificial Neural Networks	142
4.3.1	Single-Layer Neural Network	144
4.3.2	Multilayer Perceptron	148
4.3.3	Radial Basis Function Network	152
4.3.4	Polynomial Network	155
4.3.5	Unsupervised Learning	156
4.3.6	Learning Vector Quantization	160
4.4	Support Vector Machines	162
4.4.1	Maximal Margin Classifier	163
4.4.2	Soft Margin and Kernels	165
4.4.3	Implementation Issues	166
4.5	Structural Pattern Recognition	171
4.5.1	Attributed String Matching	172
4.5.2	Attributed Graph Matching	174
4.6	Combining Multiple Classifiers	179
4.6.1	Problem Formulation	180
4.6.2	Combining Discrete Outputs	181
4.6.3	Combining Continuous Outputs	183
4.6.4	Dynamic Classifier Selection	190
4.6.5	Ensemble Generation	190
4.7	A Concrete Example	194
4.8	Chapter Summary	197
	References	197
5	Word and String Recognition	204
5.1	Introduction	204
5.2	Character Segmentation	206
5.2.1	Overview of Dissection Techniques	207
5.2.2	Segmentation of Handwritten Digits	210

5.3	Classification-Based String Recognition	214
5.3.1	String Classification Model	214
5.3.2	Classifier Design for String Recognition	220
5.3.3	Search Strategies	227
5.3.4	Strategies for Large Vocabulary	234
5.4	HMM-Based Recognition	237
5.4.1	Introduction to HMMs	237
5.4.2	Theory and Implementation	238
5.4.3	Application of HMMs to Text Recognition	243
5.4.4	Implementation Issues	244
5.4.5	Techniques for Improving HMMs' Performance	247
5.4.6	Summary to HMM-Based Recognition	250
5.5	Holistic Methods for Handwritten Word Recognition	250
5.5.1	Introduction to Holistic Methods	251
5.5.2	Overview of Holistic Methods	255
5.5.3	Summary to Holistic Methods	256
5.6	Chapter Summary	256
	References	257

6 Case Studies 263

6.1	Automatically Generating Pattern Recognizers with Evolutionary Computation	263
6.1.1	Motivation	264
6.1.2	Introduction	264
6.1.3	Hunters and Prey	266
6.1.4	Genetic Algorithm	271
6.1.5	Experiments	272
6.1.6	Analysis	280
6.1.7	Future Directions	281
6.2	Offline Handwritten Chinese Character Recognition	282
6.2.1	Related Works	283
6.2.2	System Overview	285
6.2.3	Character Normalization	286
6.2.4	Direction Feature Extraction	289
6.2.5	Classification Methods	293
6.2.6	Experiments	293
6.2.7	Concluding Remarks	301

6.3 Segmentation and Recognition of Handwritten Dates on Canadian Bank Cheques	301
6.3.1 Introduction	302
6.3.2 System Architecture	303
6.3.3 Date Image Segmentation	303
6.3.4 Date Image Recognition	308
6.3.5 Experimental Results	315
6.3.6 Concluding Remarks	317
References	317
Index	321
