

INDEX

- ADF-encoded feature detector, 113
- Affinity bit, 268, 269
- ASCII, 6, 8
- Aspect ratio, 36, 37, 39, 64, 108
- Attributed
 - graph matching, 174–176
 - string matching, 172–174
- Automatic Complexification, 118

- Background, 5, 8, 8–23, 40, 44, 46, 106, 108, 207–213, 207
 - Complex, 8, 11, 14, 15, 21
 - elimination, 8, 100–101
 - pixel, 9, 12
- Bayes, 179, 182, 187, 193, 215, 222, 243, 249
 - decision theory, 131, 197
 - error rate, 132, 141, 187
- Bellman principle, 173
- Bezier Curves, 76–77
- Bimodality, 11, 18
- Binary
 - image, 8–9, 11, 19–20, 61–62, 71, 109–110, 208–209, 255, 289–291, 295–297, 302
 - Morphological operators, 21
- Bloc location, 248
- Blurring, 30, 60, 285, 290
- Boolean function-based, 104
- Bootstrapping technique, 282
- Bounding box, 38, 40, 106, 218, 266, 286–287
- B-spline blending function, 78

- Camouflage function, 115, 265, 269, 280
- Canalize development, 265
- Capping mechanism, 115
- CellNet, 115, 117, 265–275, 272, 281
- Centroid distance, 74
- Chaincode, 59, 71, 76, 284, 289–292, 295–297, 299
 - decomposition, 59, 61, 289–292
 - direction, 61, 64, 285, 290
- Character
 - recognition, 1–3, 5, 8, 20, 32, 63, 85, 106, 129, 205, 212
 - segmentation, 205, 207, 208, 244, 257
 - separation, 208, 212, 228, 231–232
 - shape, 3, 21, 28, 36, 74, 78, 76, 171, 217–218, 281–286

- Character (*Continued*)
 - skeleton, 5, 45–46, 49, 76, 78, 212–214
- Character normalization, 36–41, 286–289
 - Aspect ratio adaptive, 37
 - Bi-moment, 287
 - Linear, 38
 - Modified CBA, 287
 - Moment-based, 38–40
 - Nonlinear, 40–41
- Character segmentation, 205, 207, 208, 243
 - Candidate lattice, 227, 228
 - Dissection, 207–210
 - Explicit, 206, 214, 238
 - Handwritten digits, 210–214
 - Implicit, 206, 238
 - Ligature analysis, 209
 - Over-segmentation, 206, 207, 220
 - Projection analysis, 208
- Character string recognition
 - Character-model-based, 214
 - Character-level training, 221–223
 - Classification-based, 214–237
 - Geometric context, 215–220
 - HMM-based, 237–250
 - Holistic, 250–256
 - Lexicon-driven, 204, 215, 227, 228, 231
 - Lexicon-free, 205, 215, 218, 227, 231
 - Linguistic context, 216, 220, 228, 235
 - Probabilistic model, 215–220
 - Segmentation-based, 205, 206, 256
 - String-level training, 223–227
- Chinese character recognition, 40, 162, 174, 178, 179, 282
- Class separability, 9–11, 18
- Classifier
 - Discriminant function-based, 162
 - Distance-based, 219
 - Gaussian, 132–134
 - Gaussian mixture, 137
 - Hyperplane, 163
 - K-nearest neighbor, 140
 - Maximal margin, 163
 - Nearest-neighbor, 140
 - Non-parametric, 138
 - One-versus-all, 170–171
 - One-versus-one, 170–171
 - Parametric, 132–138
 - Parzen window, 139
 - Semi-parametric, 136
- Clustering, 157, 158
 - k-means, 158
- Coarse scale, 23
- Co-evolution, 116, 264
- Complexity of a Hunter, 268
- Component analysis
 - Connected, 30, 208
 - Principal, 80–81, 155
