

## Contents

	<b>Preface</b>	XI
	<b>List of Contributors</b>	XV
<b>1</b>	<b>The MALDI Process and Method</b>	<b>1</b>
	<i>Franz Hillenkamp and Michael Karas</i>	
1.1	Introduction	1
1.2	Analyte Incorporation	3
1.3	Absorption of the Laser Radiation	5
1.4	The Ablation/Desorption Process	7
1.5	Ionization	11
1.6	Fragmentation of MALDI Ions	14
1.7	MALDI of Non-Covalent Complexes	16
1.8	The Correct Choice of Matrix: Sample Preparation	18
1.8.1	Surface Preparation	20
1.8.2	Anchor Sample Plates	21
	References	23
<b>2</b>	<b>MALDI Mass Spectrometry Instrumentation</b>	<b>29</b>
	<i>Peter B. O'Connor and Franz Hillenkamp</i>	
2.1	Introduction	29
2.2	Lasers for MALDI-MS	30
2.3	Fragmentation of MALDI Ions	35
2.3.1	MALDI at Elevated Pressure	36
2.3.2	Tandem Mass Spectrometry of MALDI Ions	37
2.4	Mass Analyzers	39
2.4.1	Axial TOF Mass Spectrometers	41
2.4.2	Reflectron TOF Mass Spectrometers	43
2.4.3	Tandem TOF Mass Spectrometers	44
2.4.4	Orthogonal TOF Mass Analyzers	48
2.4.5	Tandem Mass Spectrometry in oTOF Mass Analyzers	49
2.4.6	Ion Detectors and Data Processing in MALDI TOF analyzers	49
2.5	Fourier Transform Ion Cyclotron Resonance Mass Spectrometers	52

2.5.1	Tandem Mass Spectrometry on FTICR mass Spectrometers	58
2.6	Quadrupole Ion Trap Mass Spectrometers	60
2.6.1	RF-Only Ion Guides and LIT Mass Spectrometers	64
2.6.2	Tandem Mass Spectrometry on QIT Mass Spectrometers	65
2.7	Hybrid Mass Spectrometers	66
2.7.1	Quadrupole TOF Mass Spectrometers	66
2.7.2	Quadrupole FT Mass Spectrometers	68
2.7.3	QIT-TOF Mass Spectrometers	69
2.7.4	Orbitrap	71
2.8	Future Directions	72
	References	75
<b>3</b>	<b>MALDI-MS in Protein Chemistry and Proteomics</b>	<b>83</b>
	<i>Karin Hjerno and Ole N. Jensen</i>	
3.1	Introduction	83
3.2	Sample Preparation for Protein and Peptide Analysis by MALDI-MS	86
3.3	Strategies for Using MALDI-MS in Protein Biochemistry	89
3.3.1	Peptide Mass Mapping of Purified Proteins	91
3.3.2	Peptide Sequencing by MALDI-MS/MS	92
3.3.3	Analysis of Post-Translational Modifications	94
3.4	Applications of MALDI-MS in Proteomics	97
3.4.1	Protein Identification by MALDI-MS Peptide Mass Mapping	97
3.4.2	Quantitation of Proteins by MALDI-MS	100
3.5	Computational Tools for Protein Analysis by MALDI-MS	101
3.6	Clinical Applications of MALDI-MS	102
3.7	Conclusions	103
	References	104
<b>4</b>	<b>Microprobing and Imaging MALDI for Biomarker Detection</b>	<b>109</b>
	<i>Bernhard Spengler</i>	
4.1	Introduction	109
4.2	History of Mass Spectrometry Imaging and Microprobing Techniques	112
4.3	Visualization of Mass Spectrometric Information	113
4.4	MALDI in Micro Dimensions: Instruments and Mechanistic Differences	116
4.5	The Matrix Deposition Problem in High-Resolution Imaging	118
4.6	Organisms, Organs, Tissues and Cells: Imaging MALDI at Various Lateral Resolutions	120
4.7	Whole-Cell and Single-Cell Analysis: Prospects and Limitations	122
4.7.1	Cellular Analysis	123
4.7.2	Individually Isolated Cells	124
4.7.3	Direct Cellular and Subcellular Imaging	124
4.8	Cell Sorting and Capturing	124
4.9	Future Areas of Application	125

- 4.10 Identification and Characterization: Limitations Due to Mass Resolution and Accuracy 126
- 4.11 Conclusions 127
- References 127

## **5 MALDI-MS of Nucleic Acids and Practical Implementations in Genomics and Genetics 131**

*Dirk van den Boom and Stefan Berkenkamp*

- 5.1 Challenges in Nucleic Acid Analysis by MALDI-MS 131
- 5.2 Genetic Markers 136
  - 5.2.1 Restriction Fragment Length Polymorphisms (RFLPs) 137
  - 5.2.2 Microsatellites/Short Tandem Repeats (STRs) 138
  - 5.2.3 Single Nucleotide Polymorphisms (SNPs) 139
    - 5.2.3.1 The HapMap 140
- 5.3 Assay Formats for Nucleic Acid Analysis by MALDI-MS 140
- 5.4 Applications in Genotyping 142
  - 5.4.1 MALDI-TOF MS SNP and Mutation Analysis 142
    - 5.4.1.1 The PinPoint Assay 143
    - 5.4.1.2 The PROBE Assay 145
    - 5.4.1.3 The MassEXTEND, hME Assay 146
    - 5.4.1.4 The GOOD Assay 148
    - 5.4.1.5 The Invader Assay 150
    - 5.4.1.6 Incorporation and Complete Chemical Cleavage Assay 150
    - 5.4.1.7 The Restriction Fragment Mass Polymorphism Assay 152
  - 5.4.2 MALDI-TOF MS for Haplotyping 153
- 5.5 Applications of Comparative Sequence Analysis 155
  - 5.5.1 Base-Specific Cleavage of Amplification Products 158
    - 5.5.1.1 DNA-Based Methods 159
    - 5.5.1.2 RNA-Based Methods 160
    - 5.5.1.3 Analysis of Base-Specific Cleavage Patterns 161
- 5.6 Applications in Quantitation of Nucleic Acids for Analysis of Gene Expression and Gene Amplification 165
  - 5.6.1 Analysis of DNA Mixtures and Allele Frequency Determinations in DNA Pools 165
  - 5.6.2 Analysis of Gene Expression 169
  - References 172

## **6 MALDI-MS of Glycans 181**

*Dijana Šagi and Jasna Peter-Katalinić*

- 6.1 Introduction 181
- 6.2 *N*-Glycosylation 182
  - 6.2.1 Release of *N*-Glycans 184
    - 6.2.1.1 Chemical Release 184
    - 6.2.1.2 Enzymatic Release 184
  - 6.2.2 Sample Preparation for MALDI-MS 187

- 6.2.2.1 Contaminant Removal 187
- 6.2.2.2 Derivatization 187
- 6.2.3 Matrices 189
  - 6.2.3.1 Matrices for Neutral *N*-Glycans 189
  - 6.2.3.2 Matrices for Acidic *N*-Glycans 191
- 6.2.4 Structural Analysis 191
  - 6.2.4.1 Fragmentation of *N*-Glycans 191
  - 6.2.4.2 Post-Source Decay 194
  - 6.2.4.3 Collision-Induced Decomposition 195
  - 6.2.4.4 Use of Exoglycosidase Sequencing 199
- 6.2.5 MALDI-MS of Intact Glycoproteins 199
- 6.2.6 Determination of *N*-Glycosylation Site Occupancy 201
- 6.3 O-Glycosylation 203
  - 6.3.1 Release of *O*-Glycans from the Parent Protein 204
  - 6.3.2 MALDI-TOF MS of Released *O*-Glycans 205
  - 6.3.3 Determination of *O*-Glycosylation Sites by PSD-MALDI-TOF MS 205
  - 6.3.4 Determination of *O*-Glycosylation Status by MALDI-TOF MS 206
  - 6.3.5 Identification of *O*-Glycosylation in Proteins by In-Gel Alkylamination 206
  - 6.3.6 *O*-Glycoforms in Urine: Identification of *O*-Glycosylated Amino Acids in Mixtures by MALDI-MS and Computer Assignment 207
  - 6.3.7 Identification of the Non-Covalent *O*-Glycoprotein Dimer by Blot IR-MALDI-MS 209
  - 6.3.8 Determination of Overall *O*-Glycosylation of a Glycoprotein by Permethylation 209
- References 210

## 7 MALDI-MS of Lipids 215

*Jürgen Schiller*

- 7.1 Introduction 215
  - 7.1.1 Why are Lipids of Interest? 215
  - 7.1.2 Problems in Lipid Analysis: A Brief Comparison of Methods 217
  - 7.1.3 Analysis of Lipids by MS 217
  - 7.1.4 Capabilities and Limitations of MALDI-TOF MS in the Lipid Analysis 218
  - 7.1.5 Choosing an Appropriate Matrix 219
  - 7.1.6 Sample Preparation, Extraction and Purification 221
- 7.2 Analysis of Individual Lipid Classes and their Characteristics 222
  - 7.2.1 The Apolar Lipids: Diacylglycerols, Triacylglycerols, Cholesterol and Cholesteryl Esters 222
  - 7.2.2 Zwitterionic Phospholipids: Sphingomyelin, Phosphatidylcholine and Phosphatidylethanolamine 224
  - 7.2.3 Acidic Phospholipids: Phosphatidic Acid, Cardiolipin, Phosphatidylglycerol, Phosphatidylserine, Inositol and Higher Phosphoinositides and their Lysolipids 227

7.2.4	Free Fatty Acids	228
7.3	MALDI-TOF MS of Typical Lipid Mixtures	229
7.3.1	Vegetable Oils and Frying Fats	229
7.3.2	Plant and Tissue Extracts	229
7.3.2.1	Brain Phospholipids	230
7.3.2.2	Eye Lens Phospholipids	231
7.3.2.3	Other tissues	231
7.3.3	Important Body Fluids and Cells of the Human Body	231
7.3.3.1	Blood	232
7.3.3.2	Spermatozoa and Neutrophils	232
7.3.4	Characterization of Typical Oxidation Products of Lipids	235
7.4	Quantitative Aspects of MALDI-TOF MS of Lipids	236
7.4.1	Approaches Used To Date	236
7.5	Problems, and their Potential Solution	237
7.5.1	“Small” Molecules and Fragmentation Products	237
7.5.2	Auxiliary Reagents	238
7.6	Summary and Outlook	238
	References	240

## **8 MALDI-MS for Polymer Characterization 245**

*Liang Li*

8.1	Introduction	245
8.2	Technical Aspects of MALDI-MS	246
8.2.1	Sample Preparation Issues	246
8.2.1.1	Matrix	247
8.2.1.2	Cationization Reagent	249
8.2.1.3	Solvent	251
8.2.1.4	Solvent-Free Sample Preparation	257
8.2.2	Instrumental and Measurement Issues	258
8.2.2.1	Mass Resolution and Accuracy	258
8.2.2.2	Sensitivity and Dynamic Range	263
8.2.2.3	Mass Range	267
8.2.2.4	MS/MS Capability	270
8.2.3	Data Processing Issues	273
8.3	Attributes and Limitations of MALDI-MS	276
8.4	Conclusions and Perspectives	285
	References	286

## **9 Small-Molecule Desorption/Ionization Mass Analysis 299**

*Lucinda Cohen, Eden P. Go, and Gary Siuzdak*

9.1	Introduction	299
9.2	Matrix Choices for Small-Molecule MALDI	300
9.2.1	Organic Matrices	300
9.2.2	Inorganic Matrices	301
9.2.3	Liquid Matrices	303

9.2.4	Matrix-Free Approaches	304
9.3	Sample Preparation	307
9.3.1	Electrospray Sample Deposition	308
9.3.2	Analyte Derivatization	308
9.3.3	Analyte Pre-Concentration	309
9.3.3.1	Prestructured Sample Supports	309
9.3.3.2	DIOS with Solid Liquid Extraction	310
9.3.4	Matrix Suppression	312
9.4	Qualitative Characterization of LMM Molecules	315
9.5	Analyte Quantitation by MALDI	318
9.5.1	Selection of IS	318
9.5.2	Methods for Improving Quantitative Performance	319
9.5.3	Quantitation of Pharmaceutical Compounds	320
9.5.4	Enzyme Activity and Inhibition Studies	322
9.5.5	Quantitative Analysis of Samples from Complex Biological Matrices	323
9.5.6	Environmental Applications of Quantitative MALDI	324
9.6	Separation Methods Coupled with MALDI and DIOS	326
9.6.1	TLC-MALDI	326
9.6.2	Capillary and Frontal Affinity Liquid Chromatography	328
9.7	Conclusions	331
	References	333
	<b>Index</b>	<b>339</b>
