

CONTENTS

Boxes, Exhibits, Figures, and Tables	ix
Preface	xix
Acknowledgments	xxiii
The Authors	xxv
1 Introduction to Educational Research	1
Chapter Objectives	1
Educational Accountability and Educational Research	2
Conducting Educational Research	9
Philosophical Frameworks for Educational Research	13
Research Ethics	16
2 Types of Educational Research Designs and Related Major Concepts	23
Chapter Objectives	23
Types of Approaches Used in Educational Research	24
3 Descriptive Statistics	45
Chapter Objectives	45
Characteristics of Data	46
Summarizing Data Using Descriptive Statistics	48

- 4 Educational Measurement: Archival Data and Standardized Instruments 79**
 - Chapter Objectives 79
 - Measurement in Education 80
 - Evaluating the Quality of Standardized Instruments: Reliability and Validity 93
 - Issues in Finding and Using Standardized Instruments 101

- 5 Qualitative Measures and Procedures 111**
 - Chapter Objectives 111
 - Characteristics of Qualitative Measurement 112
 - Sampling in Qualitative Research 134

- 6 Qualitative Research 141**
 - Chapter Objectives 141
 - Research Vignette 142
 - Understanding Qualitative Research 142
 - Steps in Designing Qualitative Research 160
 - Evaluating Narrative Inquiry and Phenomenological Research 169

- 7 Organization and Analysis of Qualitative Data 179**
 - Chapter Objectives 179
 - Analysis of Qualitative Data 180
 - Steps in Analyzing Qualitative Data 180

- 8 Descriptive Survey Research: Quantitative Research 197**
 - Chapter Objectives 197
 - Research Vignette 198
 - Characteristics of Descriptive Survey Research 198
 - Steps in Conducting Descriptive Survey Research 201
 - Evaluating Descriptive Survey Research 222

- 9 Experimental Research 227**
 - Chapter Objectives 227
 - Research Vignette 228

Understanding Experimental Research	228
Steps in Planning and Conducting Experimental Research	230
Threats to Experimental Validity	241
Single-Subject Research Designs	253

10 Nonexperimental Approaches: Causal-Comparative and Correlational Research 265

Chapter Objectives	265
Research Vignette	266
Causal-Comparative Research	266
Correlational Research	271
Multiple Regression Studies	288

11 Inferential Statistics 293

Chapter Objectives	293
Beyond Descriptive Statistics: Inferential Statistics	294
Steps in Analyzing Data Using Inferential Tests	302
Designs with More than One Independent or Dependent Variable	306

12 Action Research 311

Chapter Objectives	311
Research Vignette	312
Understanding Action Research	313
Steps in Conducting Action Research	321
Data Sources for Action Research	330
Evaluation of Action Research	346

13 Program Evaluation in Education 361

Chapter Objectives	361
Research Vignette	362
What Is Program Evaluation?	363
Types, Approaches, and Models of Program Evaluation	371
Steps in Designing Program Evaluation	375
Program Evaluation Data and Critiquing Evaluation Reports	376
Training and Careers in Program Evaluation	378

14 Identifying and Researching a Topic	383
Chapter Objectives	383
Getting Started	384
Identify a Research Topic	384
Refine Your Topic as You Search	387
Search the Literature	391
Identify and Summarize Key Information from Articles	404
When Do I Have Enough?	406
15 The Research Proposal	409
Chapter Objectives	409
Preparing a Research Proposal	410
References	427
Appendix A	435
Appendix B	469
Index	499

BOXES, EXHIBITS, FIGURES, AND TABLES

Boxes

- 1.1 Educational Reform and the No Child Left Behind Act 2**
- 1.2 Action Research Example 6**
- 4.1 What Is the Real Graduation Rate for U.S. Students? 82**
- 4.2 High-Stakes State-Mandated Tests 86**
- 4.3 Web Sites with Information on Standardized Tests 106**
- 7.1 Sample Interview Transcript from a Narrative Inquiry Study 184**
- 7.2 Thick Description of a Latino Youth 188**
- 7.3 Contrasting Perspectives in a Case Study 190**
- 8.1 Ethical Issues in Descriptive Survey Research 207**
- 8.2 Samples of Ideal and Realistic Populations 213**
- 9.1 Internal and External Validity in Action! What Works in the Lab Might Not Work in the Classroom 242**
- 9.2 The Four Rules of Single-Subject Research 260**

- 10.1 Ethical Issues in Correlational Prediction Studies 279**
- 10.2 Inferences About Causation 287**
- 12.1 Ethical Issues in Action Research 328**
- 12.2 Action Research Journals 356**
- 12.3 Action Research Centers or Institutes 357**
- 13.1 Train Them and They Will Come. . . Well, Maybe:
The Role of the Program Evaluator to Deliver Bad
News 370**
- 13.2 Examples of Evaluation Objective and Benchmark 371**
- 14.1 Sample Topics for Research Proposals 387**
- 14.2 Useful Web Sites for Finding Information and Sources
for Reviewing the Literature 394**

Exhibits

- 3.1 Sample Pearson r Correlation 73**
- 5.1 Sample Observational Protocol and Recording
Sheet 117**
- 5.2 Sample Field Notes Using an Observational
Protocol 120**
- 5.3 Sample Interview Protocol for Feasibility Study 126**
- 8.1 Student Perception Survey 205**
- 8.2 Sample Demographics Form 208**
- 8.3 Student Perceptions of the Impact of School
Uniforms on the School Community 210**
- 8.4 Database for 10 Students from Alysia's Study
on School Uniforms 220**
- 11.1 Type I and Type II Errors 302**
- 11.2 A 2×2 Factorial Design 306**
- 11.3 A 2×2 Design Showing Mean Scores of Boys and Girls
on a Math Achievement Test 307**

- 12.1 Sample of Two Educators Using Critical Reflection to Define a Research Problem 324**
- 12.2 Questions for Planning an Action Research Study 327**
- 12.3 Classroom Log for Special Education Teacher 331**
- 12.4 Structured Student Log 333**
- 12.5 Field Notes from Action Research Study 334**
- 12.6 Checklist to Record Student Writing Strategies 336**
- 12.7 Checklist with Open-Ended Categories 337**
- 12.8 Teacher Survey on Use of Technology 340**
- 12.9 Grading Rubric for Student Photography Project 343**
- 12.10 Sample Planning Table for an Action Research Study 345**
- 12.11 Summary of Frequency of Responses to Technology Survey 355**
- 13.1 Math Outcomes for State Annual Report 378**
- 14.1 Distinguishing Among Types of Research: Experiential Report Versus Empirical Study 393**
- 14.2 Article Summary Sheet for Primary, Research-Based Sources 404**
- 15.1 Writing Tips: Title Page 413**
- 15.2 Writing Tips: Introduction 414**
- 15.3 Writing Tips: Statement of Purpose 415**
- 15.4 Writing Tips: The Review of Literature 417**
- 15.5 Writing Tips: Hypotheses or Subquestions 419**
- 15.6 Writing Tips: Method Section 423**

Figures

- 3.1 Sample Frequency Polygon 51**
- 3.2 Sample Histogram 51**

- 3.3 Examples of Positively Skewed and Negatively Skewed Distributions 52**
- 3.4 Grades in Distance Education Classes 52**
- 3.5 Distributions of Test Scores for Two School Districts 57**
- 3.6 Normal Curve 63**
- 3.7 “Box-and-Whisker” Graphs 65**
- 3.8 Relationship Between High-Jump and Long-Jump Scores 67**
- 3.9 Scatterplot of Children’s Weight and Amount of Physical Exercise 68**
- 3.10 Scatterplot with Prediction Line 69**
- 3.11 Scatterplot Representations of Correlation Coefficients of Different Sizes 70**
- 3.12 Scatterplot of Relationship Between Achievement Test Scores and Test Anxiety 71**
- 3.13 Relationship Between Achievement and Self-Esteem 74**
- 4.1 Normal Curve with Test Scores 90**
- 4.2 Overview of the Process in Developing Standardized Instruments 94**
- 7.1 Steps Involved in Analyzing Qualitative Data 193**
- 9.1 Random Selection and Random Assignment 234**
- 9.2 Number of Words Spoken by a Child with Autism During Baseline Period 254**
- 9.3 Sample A-B-A Design 256**
- 9.4 A-B-A-B Design 257**
- 9.5 Sample Multiple-Baseline Design 259**
- 9.6 Group Experimental and Single-Subject Research Add to Professional Knowledge and Decision Making 261**
- 10.1 Television Watching and Body Weight 272**

- 10.2 Predicted Correlations Among Four Variables** 275
- 10.3 Scatterplot Showing Restriction of Range in Amount of Physical Exercise** 282
- 10.4 Correlation Matrix for Study of Bullying** 283
- 10.5 Example of Intervening Variable** 286
- 11.1 A Distribution of 100 Scores** 297
- 11.2 Normal Curve** 298
- 11.3 Graph Showing Interaction of Gender and Computer Use** 308
- 12.1 Action Research Process** 322
- 12.2 Rating Scale Using Nonverbal Responses** 338
- 12.3 Photographs as Data Sources in Action Research** 342
- 12.4 Use of Concept Map to Depict Relationships Among Themes** 354
- 12.5 Use of a Histogram to Display Results from a Parent Survey** 356
- 13.1 The Summative and Formative Process in Program Evaluation** 366
- 13.2 Overview of a Logic Model** 373
- 14.1 Ways to Generate a Research Topic** 385
- 14.2 Development of a Research Question** 390
- 15.1 How Research Proposals Aid the Development of Research** 412

Tables

- 1.1 Sample Value-Added Data for Two School Districts** 9
- 1.2 Qualitative and Quantitative Approaches: The Scientific Process** 12
- 1.3 Frameworks and Assumptions Underlying Educational Research** 17

- 3.1 Scales of Measurement 46**
- 3.2 Frequency Table of Number of Books Read by 30 Students 50**
- 3.3 Sample Grouped Frequency Table 50**
- 3.4 Calculation of Mean from a Frequency Table 54**
- 3.5 Means and Standard Deviations for the Number of Words Written 64**
- 3.6 Sample Table Showing Relationship Between Two Variables 66**
- 3.7 Student Math and ELA Scores 76**
- 3.8 Correlations Among Five Variables 77**
- 5.1 Characteristics of Qualitative Measurement 112**
- 5.2 Advantages and Disadvantages of Surveys Versus Interviews 122**
- 5.3 Types of Interview Questions and Probes 128**
- 5.4 Summary of Purposeful Sampling Strategies 135**
- 6.1 Types of Narrative Inquiry 145**
- 6.2 Theoretical Assumptions Underlying Narrative Inquiry 148**
- 6.3 Theoretical Assumptions Underlying Phenomenological Research 150**
- 6.4 Types of Ethnographic Studies 153**
- 6.5 Steps in Conducting Qualitative Research 166**
- 6.6 Criteria for Evaluating Qualitative Research Studies 174**
- 7.1 Common Code Categories and Examples of Code Names from a Life Story of a Latino Youth 183**
- 7.2 Report Formats for Presenting Findings from Qualitative Research 194**
- 8.1 Types of Descriptive Survey Designs 202**

8.2	Simple Random Selection	215
8.3	Criteria for Evaluating Descriptive Survey Research	222
9.1	Experimental Research	229
9.2	Hypotheses in Experimental Research	233
9.3	Factorial Design	237
9.4	Math Scores from Johanna’s Research Study	240
9.5	Threats to Internal Validity	244
9.6	Threats to External Validity	245
10.1	Common Statistical Tests for Examining Relationships Between Variables	280
10.2	Practical Interpretations of Correlation Coefficients	284
10.3	Multiple Regression Analysis for Study of Reading	289
11.1	Commonly Used Inferential Statistical Tests	304
12.1	Action Research Pioneers	316
12.2	Benefits of Action Research to Practitioners and the Field of Education	317
12.3	A Triangulation Matrix	351
12.4	Questions for Identifying Patterns in an Action Research Study	352
13.1	Components of a Logic Model	374
13.2	Example of an Evaluation Matrix	376
13.3	Data from School Records for Fifth-Grade Students in Math	377
14.1	Commonly Used Databases in Education	397
14.2	General and Academically Focused Search Engines and Their Web Sites	401
15.1	Sample Design	422

In loving memory of our colleagues Huey Bogan and Mark Ylvisaker. Huey inspired his students in Teacher Education to be reflective practitioners who continually strive to improve their practice. Mark exemplified the integration of research and clinical practice in his numerous publications and inspired his students in Communication Sciences and Disorders to become scholar practitioners. We miss them both dearly.
