Preface	6
Guide to anatomical terminology	7
<b>Section 1 Introduction</b>	
1 Musculoskeletal structure and function	8
2 Calcium homeostasis and bone metabolism	10
3 History and examination – an overview	12
4 Imaging	14
<b>Section 2 The arm</b>	
5 Anatomy of the arm	16
6 History and examination of the arm	19
7 Problems presenting in the arm	22
8 Upper arm trauma	24
9 Lower arm trauma	26
<b>Section 3 The spine</b>	
10 Anatomy of the spine	28
11 History and examination of the spine	30
12 Problems presenting in the spine	32
13 Trauma of the spine	34
<b>Section 4 The leg</b>	
14 Anatomy of the leg	36
15 History and examination of the leg	38
16 Problems presenting in the hip	40
17 Joint replacement	42
18 Problems presenting in the lower leg	44
19 Upper leg trauma	46
20 Lower leg trauma	48
<b>Section 5 Rheumatology</b>	
21 Rheumatological history and examination	50
22 Pathogenesis of rheumatoid arthritis	52
23 Rheumatoid arthritis	54
24 Systemic lupus erythematosus	57
25 Ankylosing spondylitis	60
26 The spondyloarthropathies	62
27 Acute joint disease	64
28 Infection and malignancy	66
29 Fibromyalgia	68
30 Osteoporosis	70
31 Disorders of bone metabolism	72
32 Vasculitis 1: Giant cell arteritis	74
33 Vasculitis 2: Medium and small vessel vasculitis	76
34 Scleroderma	78
35 Inflammatory muscle diseases	80
36 The medical management of inflammatory disease	82
37 Rehabilitation	84
<b>Section 6 Orthopaedics</b>	
38 Orthopaedics in children	86
39 Sports medicine	88
40 Neurological disorders and orthotics	90
41 Orthopaedics in the elderly	92
<b>Section 7 Trauma</b>	
42 Initial management of the polytraumatised patient	94
43 Wound management	96
44 Plastic surgery	97
45 Burns	98
46 Peripheral and spinal nerve injuries	100
47 Head injuries	102
48 Fractures and dislocations	104
49 Compartment syndrome	106
Self-assessment case studies: questions	108
Self-assessment case studies: answers	110
Index	113
