

Contents at a Glance

Introduction	1
Part I: Getting Started	7
Chapter 1: Introducing Geometry and Geometry Proofs!	9
Chapter 2: Points, Segments, Lines, Rays, and Angles	19
Part II: Triangles	49
Chapter 3: Triangle Fundamentals and Other Cool Stuff	51
Chapter 4: Congruent Triangles	83
Part III: Polygons	113
Chapter 5: Quadrilaterals: Your Fine, Four-Sided Friends	115
Chapter 6: Area, Angles, and the Many Sides of Polygon Geometry	151
Chapter 7: Similarity: Size Doesn't Matter	165
Part IV: Circles	193
Chapter 8: Circular Reasoning	195
Chapter 9: Scintillating Circle Formulas	211
Part V: 3-D Geometry and Coordinate Geometry	227
Chapter 10: 2-D Stuff Standing Up	229
Chapter 11: Solid Geometry: Digging into Volume and Surface Area	243
Chapter 12: Coordinate Geometry, Courtesy of Descartes	257
Chapter 13: Transforming the (Geometric) World: Reflections, Rotations, and Translations	271
Part VI: The Part of Tens	285
Chapter 14: Ten (Plus) Incredibly Fantastic Strategies for Doing Proofs	287
Chapter 15: Ten Things You Better Know (for Geometry), or Your Name Is Mudd	291
Index	295

Table of Contents

Introduction **1**

About This Book	1
Conventions Used in This Book	2
How to Use This Book	2
Foolish Assumptions	2
How This Book Is Organized	3
Part I: Getting Started	3
Part II: Triangles	3
Part III: Polygons	3
Part IV: Circles	4
Part V: 3-D Geometry and Coordinate Geometry	4
Part VI: The Part of Tens	4
Icons Used in This Book	4
Where to Go from Here	5

Part I: Getting Started **7**

Chapter 1: Introducing Geometry and Geometry Proofs! **9**

Making the Right Assumptions: What Is Geometry?	9
If-Then Logic: If You Bought This Book, Then You Must Love Geometry!	12
Discovering Geometry Proofs	14
Solutions for Introducing Geometry and Geometry Proofs!	17

Chapter 2: Points, Segments, Lines, Rays, and Angles **19**

Basic Definitions	19
Union and Intersection Problems	20
Division in the Ranks: Bisection and Trisection	22
Perfect Hilarity for Perpendicularity	24
You Complete Me: Complementary and Supplementary Angles	26
Adding and Subtracting Segments and Angles	30
Multiplying and Dividing Angles and Segments	33
X Marks the Spot: Using Vertical Angles	37
Switching It Up with the Transitive and Substitution Properties	39
Solutions for Points, Segments, Lines, Rays, and Angles	42

Part II: Triangles **49**

Chapter 3: Triangle Fundamentals and Other Cool Stuff **51**

Triangle Types and Triangle Basics	51
Altitudes, Area, and the Super Hero Formula	55
Balancing Things Out with Medians and Centroids	58
Three More “Centers” of a Triangle	59
The Pythagorean Theorem	64
Pythagorean Triple Triangles	67
Unique Degrees: Two Special Right Triangles	70
Solutions for Triangle Fundamentals and Other Cool Stuff	74

Chapter 4: Congruent Triangles	83
Sizing Up Three Ways to Prove Triangles Congruent	83
Corresponding Parts of Congruent Triangles Are Congruent (CPCTC)	89
Isosceles Rules: If Sides, Then Angles; If Angles, Then Sides	93
Two More Ways to Prove Triangles Congruent	96
The Two Equidistance Theorems	99
Solutions for Congruent Triangles	104
 Part III: Polygons	 113
Chapter 5: Quadrilaterals: Your Fine, Four-Sided Friends	115
Double-Crossers: Transversals and Their Parallel Lines	115
Quadrilaterals: It's a Family Affair	120
Properties of the Parallelogram and the Kite	123
Properties of Rhombuses, Rectangles, and Squares	127
Properties of Trapezoids and Isosceles Trapezoids	130
Proving That a Quadrilateral Is a Parallelogram or a Kite	132
Proving That a Quadrilateral Is a Rhombus, Rectangle, or Square	136
Solutions for Quadrilaterals: Your Fine, Four-Sided Friends	139
 Chapter 6: Area, Angles, and the Many Sides of Polygon Geometry	 151
Square Units: Finding the Area of Quadrilaterals	151
A Standard Formula for the Area of Regular Polygons	155
More Fantastically Fun Polygon Formulas	157
Solutions for Area, Angles, and the Many Sides of Polygon Geometry	160
 Chapter 7: Similarity: Size Doesn't Matter	 165
Defining Similarity: The Sincerest Flattery	165
Proving Triangles Similar	168
Corresponding Sides and CSSTP — Cats Stalk Silently Then Pounce	172
Similar Rights: The Altitude-on-Hypotenuse Theorem	175
Three More Theorems Involving Proportions	178
Solutions for Similarity: Size Doesn't Matter	183
 Part IV: Circles	 193
Chapter 8: Circular Reasoning	195
The Segments Within: Radii and Chords	195
Introducing Arcs, Chords, and Central Angles	199
Touching on Radii and Tangents	202
Solutions for Circular Reasoning	206
 Chapter 9: Scintillating Circle Formulas	 211
Not Quite Coming Full Circle: Area and "Perimeter" of Circles, Sectors, and Segments	211
Angles, Circles, and Their Connections: The Angle-Arc Theorems and Formulas	214
The Power Theorems That Be	217
Solutions for Scintillating Circle Formulas	221

Part V: 3-D Geometry and Coordinate Geometry 227
Chapter 10: 2-D Stuff Standing Up 229

Lines Perpendicular to Planes: They're All Right	229
Parallel, Perpendicular, and Intersecting Lines and Planes	233
Solutions for 2-D Stuff Standing Up	238

Chapter 11: Solid Geometry: Digging into Volume and Surface Area 243

Starting with Flat-Top Figures	243
Sharpening Your Skills with Pointy-Top Figures	246
Rounding Out Your Understanding with Spheres	249
Solutions for Solid Geometry	251

Chapter 12: Coordinate Geometry, Courtesy of Descartes 257

Formulas, Schmormulas: Slope, Distance, and Midpoint	257
Mastering Coordinate Proofs with Algebra	260
Using the Equations of Lines and Circles	261
Solutions for Coordinate Geometry, Courtesy of Descartes	264

Chapter 13: Transforming the (Geometric) World: Reflections, Rotations, and Translations 271

Reflections on Mirror Images	271
Les Transformations Géométriques	274
So You Say You Want a . . . Rotation?	276
Working with Glide Reflections	278
Solutions for Transforming the World	281

Part VI: The Part of Tens 285
Chapter 14: Ten (Plus) Incredibly Fantastic Strategies for Doing Proofs 287

Look for Congruent Triangles	287
Try to Find Isosceles Triangles	287
Look for Radii, and Draw More Radii	288
Look for Parallel Lines	288
Make a Game Plan	288
Use All the Givens	288
Check Your If-Then Logic	288
Work Backwards	289
Make Up Numbers for Segments and Angles	289
Think Like a Computer	289
Bonus! Number 11 (Like the Amp in Spinal Tap That Goes Up to 11): Do Something!	290

Chapter 15: Ten Things You Better Know (for Geometry), or Your Name Is Mudd 291

The Pythagorean Theorem (the Queen of All Geometry Theorems)	291
Special Right Triangles	291
Area Formulas	292
Sum of Angles	292
Circle Formulas	292

Geometry Workbook For Dummies

Angle-Arc Theorems	292
Power Theorems	293
Coordinate Geometry Formulas	293
Volume Formulas	293
Surface Area Formulas	294
<i>Index</i>	295
