Contents

Introduction xix

Part 1 • Building a Foundation 1

Chapter 1 • Introducing Exchange 2003 and Exchange Administration 3

What's New in Windows and Exchange 2003?	5
Major Exchange 2003 Components	6
An Overview of Exchange Components	7
The System Attendant	7
The Information Store	8
The Message Transport System	11
Exchange Management	15
Internet Information Server	17
Microsoft Search	18
Exchange 2003 Service Dependencies	18
Getting the Right Edition	21
Upgrading between Editions	22
Should I Do a Fresh Install or an Upgrade?	23
Going Native	24
Read Receipt	27

Chapter 2 • Windows Dependencies and Platform 31

Preinstallation Data Gathering, Analysis, and Planning	32
Using Windows 2000 Server	32
Network Infrastructure	33
Hardware	35
Windows Software	35
Managing Exchange 2003	36
Focusing Exchange System Manager	39
Using Only the Mailbox Management Tools	39
Time Synchronization	40
Assigning Administrative Rights	41
Built-In Administrative Permissions	41
Administrator Roles	42
Segmenting and Customizing Administrative Roles	45
Accessing Mailboxes	50
What Permissions Do You Need?	54
Setting Up Recommend Groups for Administration	56
NTFS Permissions and Exchange 2003	58
Troubleshooting with Exchange Deployment Tools	59
Read Receipt	61

Chapter 3 • Active Directory and Exchange 2003	63
Active Directory 101	64
Active Directory's Dependence on the Domain Name Service	64
Domain Controllers	65
Active Directory Sites	69
Kerberos	69
Exchange and the Active Directory Database	71
Active Directory: The Tools of the Trade	75
ADSIEDIT	76
LDP	76
<i>NetDiag</i>	76
<i>DCDiag</i>	77
<i>NLTEST</i>	77
Active Directory Schema Manager	77
Replication Monitor	78
<i>DupSMTP.vbs</i>	78
The Recipient Update Service	78
The Recipient Update Service and Address Lists	79
Configuring the Recipient Update Service	79
Problems Changing Permissions Inheritance	81
Exchange 2003's Effect on Active Directory Performance	81
Exchange Needs DCs and GCs	82
MAPI Clients and Global Catalogs	82
Preparing Active Directory for Exchange 2003	84
The Exchange Deployment Tools	84
Preinstallation Checks	84
Forest Prep	85
Domain Prep	87
Active Directory Groups	88
Query-Based Distribution Groups	89
Choosing a Group and Scope	90
The Mail-Enabled Group Expansion Quandary	91
Other Group-Related Issues	93
Active Directory Customization	96
Creating Administrative Groups before Exchange Installation	96
Customizing Automatic Display Name Generation	97
Adding Exchange Mailbox Management Extensions	99
Global Address Lists and Address Lists	99
Recipient Policies	106
Letting Users Manage Their Own Directory Attributes	107
Where Does the Outlook GAL Display Name Come From?	108
Read Receipt	108
Chapter 4 • Understanding Exchange 2003 Data Storage	111
Extensible Storage Engine Database Technology	111
Transaction Processing 101	112
ESE Database Operations	113

What You Need to Know about Exchange Databases	127
Viewing Advanced Database Information	129
Content Conversion	132
Transaction Log Files	133
Too Many Log Files?	134
Viewing Advanced Log File Information	135
The TMP File	137
The Reserved Logs	137
Checkpoint Files	138
Other Files	138
ESEUTIL Tricks and the Database Files	139
Database Compaction	140
Database Integrity Check	141
Checksum Checks	142
Large File Copies	143
Optimizing Database Performance	143
Optimizing Transaction Logs	144
Optimizing Database Access	145
Reversing Exchange 2000 Optimization Tweaks	145
Reducing Database File Fragmentation	147
Correctly Managing Storage Groups	148
Creating Storage Groups	149
Moving Storage Group Files	150
Stores: More Storage Than You Can Possibly Back Up!	150
Creating a Store	151
Managing and Moving Stores	156
Examining User Mail Storage	157
Improving Search Response Times Using Full-Text Indexing	160
Is Full-Text Indexing for You?	161
Indexing Architecture	161
Creating Full-Text Indexes	162
Customizing Full-Text Indexing	165
Planning Storage Capacity	168
Estimating Mailbox Store Usage	168
Getting Enough Disk Space	173
Server-Based Storage versus Local Storage	173
Outlook Automatic Message Archiving	175
ExMerge	176
Mailbox Store Message Archiving	179
Archival Systems—an Idea Whose Time Has Come	180
The Changing State of Messaging	181
Read Receipt	182
Chapter 5 • Best Practices and Disaster Prevention	183
Common Disaster Causes	185
How to Lose Your Job with Exchange	189
Administrators: Grounds for Termination	189
Exchange Server—Worst Practices	191

End User Faux Pas	193
Stability versus Continuity of Service	194
Building a Solid Platform	195
Server Platform	195
Strengthening Your Infrastructure	197
Establish Operational Policies	198
Establish Change and Configuration Control	200
Active Directory—Best Practices	201
Define a Service Level Agreement	202
Microsoft Exchange, Esq.	204
Protect Your Company—Define Acceptable Use	204
Disclaimers	208
Archiving	209
How <i>Did</i> We Do That? The Case for Documentation	210
What Should Be Documented?	210
Tools That Can Help	211
Exchange 2003 Organization—Best Practices	213
Establish Global Limits	213
Establish Mailbox Limits	214
Automatically Purge Deleted Items	215
Public Folders	217
Configure Message Tracking	217
Monitor Your Servers	218
Define Specific Exchange Server Roles	218
Keep Security in Mind	219
Does Anyone Know Where the Exchange Server CD-ROM Is?	220
Scientia Est Potentia (Knowledge Is Power)	221
Systems Administration Training	221
User Education	222
And a Little Bit of Therapy on the Side....	226
Read Receipt	226
Part 2 • Operations	229
Chapter 6 • Daily and Long-Term Operations	231
What Should You Do Daily?	231
Daily Reports	232
Events to Watch Out For	233
Weekly, Monthly, Long-Term, and Ongoing Health Checks	243
Long-Term Maintenance	244
Performing Good Backups	244
Making Good Backups	245
Backup Hardware and Software	260
Approaches to Exchange Backup	261
Exchange 2003 Backup FAQ	269
Dealing with the Recently Departed	270
Don't Delete That Mailbox!	271

Sending Everything to One Place	275
Stop Calling Here!	275
Moving Mailboxes	277
The Move Mailbox Wizard	277
Using Outlook to Move Mailbox Data	282
Moving Mailboxes to a New Organization	283
Read Receipt	288

Chapter 7 • Tweaking Operations 289

Customizing Client Features	289
Restricting MAPI Client Versions	289
Restricting Access to Specific Users Only	292
Customizing System Messages	293
Customizing the Details Templates	297
Organizing System Mailboxes	302
Enhancing Ambiguous Name Resolution	308
Using Mailbox Manager	309
Configuring Mailbox Manager	309
Applying Exchange Policies	315
Permissions to Assign Policies	316
Server Policies	317
Mailbox Store Policies	319
Public Folder Store Policies	322
System Policies FAQ	323
Read Receipt	324

Chapter 8 • Keeping an Eye on

Exchange 2003 Usage 325

Status Monitoring and Notifications	326
Configuring Resource Status Monitors	327
Configuring Notifications	331
Using Message Tracking Logs	333
Using the Message Tracking Center	334
Bargain Basement Reporting Tools	340
Creating Mailbox Location Reports	341
Generating a Notice When Users Exceed Their Mailbox Limits	342
Statistical Information from Performance Monitor	342
Rolling Your Own Tools	350
Exchange 2003 Event Sinks	356
Types of Store Events	357
Transport and Protocol Events	358
Sample Event Sinks	361
Determining What Event Sinks Are Installed	363
Reporting and Monitoring Tools	363
Basic Reporting	363
Reporting, Monitoring, and Beyond	365
Read Receipt	369

Chapter 9 • Improving Performance	371
Zen and the Art of Performance Monitoring	372
Performance Checks: Quick and Dirty	373
Performance Monitoring 101: Using System Monitor	376
Monitoring Windows 2003 Performance	382
Useful Windows 2003 Performance Monitor Counters	382
Monitoring Exchange 2003	385
Exchange 2003 Performance Monitor Objects	385
Useful Exchange 2003 Performance Monitor Counters	388
Optimizing Exchange 2003	393
Optimizing Memory for Exchange	395
Optimizing Active Directory Access	397
Optimizing an SMTP Bridgehead Server	400
Read Receipt	401
Chapter 10 • Recovering from Disasters	403
Disaster Recovery 101	404
One Man's Disaster Is Another Man's... ..	405
What Do You Want to Recover Today?	405
Practice Makes Perfect	406
Disaster Recovery Tips	407
Speeding Up Disaster Recovery	408
Testing Complete Server Failure	408
Don't Be Afraid to Call for Help	409
Disaster Recovery Scenarios	411
Dial-Tone Recovery (Service Now, Data Later)	411
Mailbox and Public Folder Accidents	412
Corrupted Messages	415
Cleaning Up a Virus Outbreak	416
Damaged or Corrupted Information Store	419
Wholesale Server Failure	419
Restoring Data	421
Restoring from an Online Backup	421
Restoring from an Offline Backup	426
Using the Recovery Storage Group	427
Repairing a Damaged Store	431
The <i>ESEUTIL</i> Program	432
The <i>ISINTEG</i> Program	435
Restoration and Disaster Recovery FAQ	439
Read Receipt	440
Chapter 11 • Clustering and Other Stories of High Availability	441
Clustering 101	442
Should You Cluster?	443
Understanding the Basics of Clustering	447
Exchange 2003 Cluster Basics	454
Failover and Failback	456

Hardware Requirements	457
Cluster Server Hardware Scalability	458
Clustering and Server Roles	459
Installing a Cluster	459
Prerequisites	461
Configuring Clustering on Windows 2003	464
Installing Exchange 2003 into a Cluster	467
Moving to an Exchange 2003 Cluster	474
Cluster Operations	475
Forced Failovers	475
Monitoring Cluster Performance	476
Clustering Best Practices	476
Read Receipt	477
Chapter 12 • Public Folders	479
Public Folders 101	480
Managing Public Folders Using Exchange System Manager	480
Creating Top-Level Public Folders	480
Changing a Mailbox Store's Default Public Folder Server	481
Managing Public Folders	481
Designing Public Folder Structure and Hierarchy	482
Public Folder Stores and Trees	485
Using the Propagate Settings Feature in Exchange System Manager	488
What's in the Default Public Folder Hierarchy?	489
Exchange 2003 System Folders	489
Creating Organizational Forms Libraries	490
Replication of Critical Systems Folders	490
Security and Public Folders	490
Security via Groups	491
Setting Permissions	492
Assigning Access Permissions	493
Public Folder Replication	496
Picking a Replication Design	497
Monitoring Modifications and Replication Conflicts	498
Creating a Public Folder Replica	500
Replicating Public Folder Content from Exchange 5.5	500
Forcing Public Folder Hierarchy and Content Replication	502
Replication and Routing Group Connector Settings	503
Monitoring Public Folder Replication	503
Client Connectivity	504
Diagnostic Logging for Public Folders	507
Out-of-Sync Public Folders and Backfill	508
Assigning a Public Folder a New Home	508
Offline Replication Capabilities	509
Removing a Replica	509
Read Receipt	509

Chapter 13 • Server Troubleshooting	511
Where Do You Start?	511
First Things First	512
Problems with Windows Servers	514
Problems with Mailbox and Public Folder Servers	516
Diagnostics Logging	518
Deciphering Problems with Active Directory	526
Testing Active Directory Connectivity	526
Problems with Mail Recipients	527
Confirming Connectivity and Name Resolution	530
Verifying Connectivity	530
DNS Name Resolution	534
Fixing Service Startup Problems	539
Some Common Problems	540
Solving Message Flow Problems	542
Monitoring Queues Using the Queue Viewer	542
Diagnosing Non-Delivery Reports	547
Garbled Messages	554
Read Receipt	556
Part 3 • Connectivity	557
Chapter 14 • SMTP and Message Routing	559
SMTP 101 (Understanding SMTP)	560
SMTP Extensions Supported	561
Establishing an SMTP Session	562
Exchange 2003 Message Routing Architecture	565
SMTP Virtual Servers	567
SMTP Virtual Server Configuration Recommendations	568
Applying Filters	570
Using the SMTP Virtual Server Pickup Directory	570
Customizing SMTP and SMTP Virtual Servers	571
Global Message Delivery Settings	571
Message Format	572
Resolving Inbound SMTP Addresses	574
Changing SMTP Default Folders	574
Reducing the Size of DSNs	575
Troubleshooting the SMTP Virtual Server	576
Flushing Queues	576
Non-Delivery Reports	576
Solving Name Resolution Problems	576
Solving Configuration and Software Problems	579
Using <i>Telnet</i> to Troubleshoot SMTP	586
SMTP and Diagnostics Logging	586
Help! Do I Have an Open Relay?	588
Using SMTP Protocol Logs	589

Tightening SMTP Security	590
Using Relay and Smart Hosts	590
Resolving Anonymous Mail	592
Allowing SMTP Relay	593
Enabling TLS/SSL for SMTP	593
Changing the SMTP Banner	594
Disabling Extended SMTP Command Verbs	596
The SMTP <i>VERFY</i> Verb	597
Defining SMTP Addresses	597
Local Recipients	598
Sharing an SMTP Address Space	600
Relay Domains	606
Read Receipt	607
Chapter 15 • Connectivity Within Your Organization	609
Introducing Routing Groups	610
Designing an Effective Routing Group	610
Administering Routing Groups	611
The Link State Table	613
Connecting Routing Groups	616
Routing Group Connectors	617
Configuring Routing Group Connectors	618
X.400 Connectivity	621
Configuring X.400 Connectors	622
Choosing the Right Connector	629
SMTP Has More Overhead?	629
Message Data Format between Exchange Servers	630
Which Connector is Right for You?	632
Building Message Routing Redundancy	632
Read Receipt	636
Chapter 16 • Internet Connectivity	637
Controlling Outbound SMTP Mail to the Internet	638
Configuring an SMTP Connector	639
Using an SMTP Smart Host for Outbound Mail	643
Adding Disclaimers to Outbound Mail	646
Controlling Inbound SMTP Mail	647
Before You Start	647
Defining an Inbound Mail Strategy	647
Defining Filters	650
Spam! Spam! Spam!	656
Is It Bad Karma?	657
Quarantine It, Tag It, or Delete It!	659
Detection and False Positives	660
Bayesian Methods	661
You Got Problems? We Got Solutions!	661

Understanding SMTP Headers	666
Who Owns an IP Address?	667
Read Receipt	668

Part 4 • Exchange 2003 Security Issues 669

Chapter 17 • Securing Exchange Server 2003 671

E-Mail Security and Best Practices	672
Exchange Security Checklist	672
Implementing Adequate Physical Security	675
Protecting Mail-Enabled Groups	675
Recruiting Security Evangelists	676
The Health Insurance Portability and Accountability Act	678
Preventing Excessive Administrator Permissions	679
Security Out of the Box	682
Securing Data Transmissions	683
Securing Server-to-Server Communications	683
Implementing Outlook Encryption on the Network	687
Disabling Unnecessary Services	688
Exchange 2003 Back-End Servers	688
Exchange 2003 Front-End Servers	690
Enabling Auditing and Logging	690
Windows Auditing	691
Exchange Server Diagnostics Logging	695
Logging Internet Client Activity	696
Shielding Exchange from Viruses	697
Just the Stats, Ma'am	698
Consider a Multilayer Approach	698
Implementing Client-Side Virus Protection	703
Read Receipt	707

Chapter 18 • Securing Message Content 709

Message Vulnerability	709
Message Capture on the Wire	710
Secure Messaging Should Be...	713
Encryption Basics	714
Common Encryption Terms	714
The Key to Encryption	717
Certificates	719
Should I Use a Third-Party CA?	727
Is It the End of the World?	727
Implementing S/MIME for Outlook 2003	728
Obtaining a Certificate	728
Enabling Outlook S/MIME Security Settings	730
Importing Certificates to Active Directory	731
Using Outlook with S/MIME	732
Read Receipt	735

Chapter 19 • Exchange and Firewalls	737
It Came from Beyond	737
Trustworthy Computers, Not!	738
Exposing Your Internal Hosts and IP Addresses	738
Avoid Exposing Yourself in Public	739
Reducing Your Surface Area	740
Firewalls 101	741
Configuring a Firewall for Exchange 2003	743
Exchange 2003 TCP/UDP Port Usage	743
Communicating with Domain Controllers	745
Exchange Server and MAPI Clients	746
Which Ports Are Currently Open?	747
Read Receipt	748
 Part 5 • Exchange Clients	 749
 Chapter 20 • Supporting MAPI Clients	 751
Setting Up and Tweaking Outlook	753
MAPI or Outlook Profiles	753
Outlook Tweaks and Tips	757
Using RPC over HTTP	762
A Sample Configuration	762
Requirements for Using RPC over HTTP and Outlook 2003	764
Configuring RPC over HTTP	766
RPC over HTTP FAQs	774
Troubleshooting Outlook Connectivity	776
Common Errors and Problems	776
Messages Stuck in the Outbox	778
Cleaning Up Problems with Outlook	779
Command-Line Switches	779
Confusing Form Behavior in Outlook 2000	779
Delivery Locations and the Missing E-mail Dilemma	781
Troubleshooting Outlook Using Port Query	782
Outlook 2003 Troubleshooting	784
Troubleshooting HTTP over RPC	785
Read Receipt	786
 Chapter 21 • Deploying Outlook Web Access	 787
Understanding OWA 2003	787
OWA 2003 Features and Architecture	788
Versions, Versions, Versions	794
Successfully Deploying OWA 2003	795
Premium versus Basic Client	795
Manipulating OWA through URLs	797
Using Keyboard Shortcuts	799
Employing Forms-Based Authentication (OWA Login Page)	800
Redirecting Users to SSL pages	802
Understanding the OWA Spell Checker	804

Tweaking and Customizing OWA	805
Changing OWA Features through the Registry	805
Attachment Blocking	806
Blocking Attachment Types	806
Changing the Default Folder List	807
Changing Cookie Timeouts	807
Disabling the Premium OWA Interface	808
Stopping Web Beacons	808
Forcing S/MIME Signing or Encryption	809
Disabling the Change Password Button	809
Throttling Back Spell Checking	809
New Mail and Calendar Reminders	809
Enabling Freedoc Access	810
Increasing the Compression Factor	810
Enforcing Use of UNICODE Characters to Send Mail	811
Using Forms-Based Authentication and ISA Server	811
Troubleshooting Forms-Based Authentication	811
Customizing OWA Graphics	811
Changing Passwords through OWA	812
Removing the Forms-Based Authentication Domain Name Requirement	813
Creating Custom OWA Themes	814
Enabling OWA Segmentation (Using Only Specific Features)	816
Securing Outlook Web Access	819
Deploying Front-End and Back-End Servers	819
Reverse Proxies and Exchange 2003	823
Requiring Secure Sockets Layer	825
Enabling HTTP Protocol Logging	833
Troubleshooting OWA 2003	836
HTTP Error Codes	836
Connectivity Problems	838
Login Problems	838
Interface Problems	840
Finding Configuration Errors	840
Read Receipt	841
Chapter 22 • Going Wireless—Outlook Mobile Access	843
Exchange Server 2003 Wireless Service Basics	843
Outlook Mobile Access and Exchange ActiveSync	844
Outlook Mobile Access	844
Exchange ActiveSync	852
Devices that Support ActiveSync	859
Configuring ISA Server for Exchange Mobility	861
Install the Same Certificate on the ISA Server and on the Exchange Server	861
Troubleshooting OMA and ActiveSync	866
Read Receipt	870
<i>Index</i>	871
