

Contents

<i>Introduction</i>	<i>xiii</i>
Chapter 1	The Origin of TCP/IP and the Internet
	1
What Is TCP/IP?	2
Features of TCP/IP	2
The Origins of the Internet: ARPAnet	3
ARPAnet's Requirements	4
Requests For Comments	5
The Birth of TCP/IP	6
Design Goals of TCP/IP	7
Moving Data across the Network	7
Moving Data on a Circuit-Switched Network	8
Moving Data on a Packet-Switched Network	8
Why Use TCP/IP?	10
Terms to Know	11
Review Questions	12
Chapter 2	Protocols
	13
What Are Protocols?	14
Protocols Move Packets of Data	15
Why We Need Protocols and Standards	17
The OSI Reference Model	18
The Seven Layers of the OSI Model	19
Responsibilities of Each Layer	19
How the OSI Model Is Used	23
TCP/IP and the DoD Model	24
Terms to Know	25
Review Questions	26
Chapter 3	The Network Interface and Internet Layers
	27
The Network Interface Layer	28
Hardware Address	29
The Internet Layer	30
Internet Protocol (IP)	32
Address Resolution Protocol (ARP)	35
Internet Control Message Protocol (ICMP)	38
Internet Group Management Protocol (IGMP)	40
Terms to Know	43
Review Questions	44

Chapter 4	The Transport Layer	45
	Understanding the Transport Layer	46
	Understanding Transmission Control Protocol	47
	Using a Three-Way Handshake	48
	Organizing Data and Guaranteeing Delivery	49
	Understanding User Datagram Protocol	49
	UDP Communication	50
	Terms to Know	52
	Review Questions	53
Chapter 5	The Application Layer	55
	Understanding the Application Layer	56
	Understanding Ports and Sockets	56
	Well-Known Ports	57
	File Transfer Protocol (FTP)	58
	How FTP Works	59
	Hypertext Transfer Protocol (HTTP)	60
	Ports and Firewalls	62
	Requesting a Service in the TCP/IP Stack	62
	The Firewall is Protecting the LAN	63
	Terms to Know	64
	Review Questions	65
Chapter 6	IP Addressing	67
	What Is IP Addressing?	68
	Numbering Systems	68
	Reviewing Binary and Decimal Numbering Systems	69
	Converting Binary Numbers to Decimal	70
	Converting Decimal Numbers to Binary	71
	IP Addresses	76
	IP Address Classes	78
	Class A Addresses	78
	Class B Addresses	79
	Class C Addresses	80
	Class D Addresses	81
	Class E Addresses	81
	IP Address Class Summary	82
	Terms to Know	83
	Review Questions	84
Chapter 7	Addressing IP Hosts	85
	Installing and Assigning IP Addresses	86
	Manual IP Address Configuration	86

- Installing TCP/IP on Windows XP and 2003 86
- Installing TCP/IP on Windows 2000 90
- Installing TCP/IP on Windows NT 93
- Installing TCP/IP on Windows 95/98 96
- Dynamic Host Configuration Protocol (DHCP) 99
- Obtaining an IP Address from a DHCP Server 100
 - DHCP Discover 100
 - DHCP Offer 101
 - DHCP Request 103
 - DHCP Acknowledgment 105
- DHCP Leases 107
 - DHCP IP Address Renewal 109
- Reserving DHCP IP Addresses 110
- Setting the Lease Duration 110
- Setting DHCP Scopes and Options 111
- Terms to Know 112
- Review Questions 113

Chapter 8 Introduction to Subnet Masks 115

- What Is a Subnet Mask? 116
 - Network and Host 118
 - Identifying a Local or Remote Network 119
- Standard Subnet Masks 122
 - Class A Addresses 122
 - Class B Addresses 122
 - Class C Addresses 122
- Terms to Know 123
- Review Questions 124

Chapter 9 Using Custom Subnet Masks 127

- Custom Subnet Masks 128
 - Creating Additional Networks 130
 - Subnetting Rules 130
 - Creating a Custom Subnet Mask 131
- Class A Subnet Masks 149
- Class B Subnet Masks 150
- Class C Subnet Masks 151
- Terms to Know 152
- Review Questions 153

Chapter 10 Supernetting and CIDR 155

- IP Address Allocation 156
 - Limitations of the Classful System 156
 - The Trouble with Class B 156

Supernetting	158
Classless Inter-Domain Routing (CIDR)	161
Terms to Know	162
Review Questions	163

Chapter 11 Name Resolution 165

Understanding Name Resolution	166
What Is Host Name Resolution?	167
What Is NetBIOS Name Resolution?	167
NetBIOS Name Resolution vs. Host Name Resolution	168
Understanding Host Name Resolution	169
Local Host (HOSTNAME)	170
The <i>HOSTS</i> file	172
Domain Name System (DNS)	174
NetBIOS Name Cache	174
Windows Internet Naming Service (WINS)	177
Broadcast	178
The <i>LMHOSTS</i> file	179
The Host Name Resolution Cycle	182
Understanding NetBIOS Name Resolution	183
The NetBIOS Name Resolution Cycle	184
Terms to Know	186
Review Questions	187

Chapter 12 Domain Name System (DNS) 189

What Is DNS?	190
DNS on the Internet	190
Name Resolution Using DNS	191
Querying a DNS Server	192
Querying Name Servers	193
Completing Resolution	194
Understanding Recursive and Iterative Queries	195
Maintaining a Database	197
Maintaining a DNS Server	197
Primary Name Server	198
Secondary Name Server	198
DNS Zone Transfer	198
Caching-Only Server	199
Record Types in DNS	200
Terms to Know	202
Review Questions	203

Chapter 13	Dynamic DNS	205
	What Is Dynamic DNS?	206
	Configure Windows 2000 and 2003 Server for Dynamic Update	208
	Dynamic DNS on the Internet	214
	Benefits of Dynamic DNS	214
	Terms to Know	214
	Review Questions	215
Chapter 14	Windows Internet Naming Service (WINS)	217
	NetBIOS Applications	218
	NetBIOS Name Resolution Process without WINS	218
	NetBIOS Name Resolution Process with WINS	222
	WINS Manager	226
	Terms to Know	228
	Review Questions	229
Chapter 15	IP Version 6	231
	The Need for a New Version of TCP/IP	232
	IPv6 Addressing	232
	IPv4 Addresses and IPv6 Addresses	233
	Harry—The Next Generation	233
	The New Hexadecimal IPv6 Addresses	234
	Double-Colon Notation	235
	IPv6 Special Addresses	236
	IPv6 Documentation	237
	Improvements of IPv6	237
	The Transition Plan to IPv6	238
	Terms to Know	240
	Review Questions	241
Appendix A	Answers to Review Questions	243
	Chapter 1	243
	Chapter 2	244
	Chapter 3	245
	Chapter 4	246
	Chapter 5	246
	Chapter 6	247
	Chapter 7	249
	Chapter 8	250
	Chapter 9	252
	Chapter 10	256

Chapter 11	257
Chapter 12	258
Chapter 13	259
Chapter 14	259
Chapter 15	260

Appendix B	Acronym Expansion Guide	263
-------------------	--------------------------------	------------

Glossary		267
