Introduction	xix
Chapter 1: What's New for Developers in Microsoft Office SharePoint Server 2007?	1
SharePoint and Office — Developer Platforms	2
Building Applications with Windows SharePoint Services	2
SharePoint and ASPNET	5
New SharePoint Developer Features	6
Portal Services	7
Enterprise Search	8
Document and Content Management	13
Web Content Management	14
Workflow Services	16
Integration with Office 2007	17
Document Formats	17
InfoPath Forms Services	19
Enterprise Content Management	20
SharePoint and Office Development in Visual Studio	22
Web Part Development	23
Business Intelligence Features	23
Integrating the Desktop with Enterprise Systems	27
Summary	28
Chapter 2: Understanding SharePoint 2007 Services and Architecture	29
SharePoint Content Services	30
Business Data Catalog	31
Page Model for Web Content Management	35
Document Converters for Content Management	36
Search Services	38
Shared Service Provider for Search	40
Query Web Service	41
SharePoint APIs and Application Services	42
Microsoft.SharePoint Namespace	42
FrontPage Server Extensions and WSS RPCs	43
Excel Services	44

Contents

Mobile Application Services	46
Architecting Your Applications with SharePoint 2007 Services	48
SharePoint Tiers	49
Service Orientation and Business Process Management in SharePoint	51
Summary	52
Chapter 3: Programming SharePoint Lists and Libraries	55
Understanding Lists and Libraries	56
Creating a SharePoint List	56
Programming SharePoint Lists	62
Adding a List Item	62
Deleting and Updating List Items	66
Programming SharePoint Document Libraries	69
Uploading a Document to a Library	70
Creating a Document Library Folder	71
Web Services for Lists and Libraries	73
WSS Web Services	74
Retrieving List Data via Web Services	76
Creating a New List via Web Services	78
Using RSS for List Data Retrieval	79
Using List Events	82
Summary	84
Chapter 4: XML, Web Services, and Extensibility in Office 2007	85
Word 2007 Customization and XML Capabilities	86
Content Controls	86
Custom XML Parts	88
Example: Creating a Word Document with a Custom XML Part and Content Controls	88
Office 2007's OpenXML File Formats	92
Open Packaging Convention	93
Exploring the Word OpenXML format (WordprocessingML)	94
Example: MS Word Report Generation with OpenXML	104
Exploring the Excel OpenXML format (SpreadsheetML)	113
PowerPoint's OpenXML File Format (PresentationML)	118
Customizing and Integrating Office Client Applications with Web Services	119
Building the Core Project with Ribbon Icons	119
Connecting to a Web Service to Load Retrieve Data to Load into Excel	122
Adding a Custom Task Pane	125
Summary	127

Contents

Chapter 5: User Interface Development in SharePoint and Office 2007	129
Web Parts in SharePoint 2007	130
Building a Web Part	130
Web Parts with Web Controls	136
Features in SharePoint	140
Master Pages in SharePoint	144
Updating a Master Page in SharePoint Designer	144
Creating a Custom Master Page in SharePoint Designer	146
Customizing the Office Ribbon	148
Document Information Panel	151
Summary	156
Chapter 6: SharePoint Application Services	157
InfoPath Forms Services	158
Deploying Forms Services	158
Creating a Custom Form	160
Extending a Custom Form	164
Publishing a Custom Form	170
Services for Reporting and Dashboards	176
Publishing a Report	176
Creating Dashboards for Reports	179
Records Management in SharePoint	185
Records Hold Scenario	185
Automation of Records Retention	188
Summary	190
Chapter 7: Building Business Intelligence Applications with SharePoint and Office	191
Excel Business Intelligence Features	193
Data Visualization in Excel 2007	193
Accessing Data Sources	194
Excel Services	207
Architecture	208
Configuring Excel Services	209
Using Excel Services	213
Excel Web Services	216
Troubleshooting Excel Services	223
Summary	224

Contents

Chapter 8: Creating Custom Workflows for Windows SharePoint Services and Office SharePoint Server	225
Windows Workflow Foundation Architecture	226
Workflow Activities	226
Workflow Markup	227
Workflow Execution	227
Workflow Fundamentals and Types	228
Windows SharePoint Services and Workflow Capability	228
Workflow Templates	229
Workflow Instances	229
Authoring and Deploying a Workflow	230
Associating a Workflow	230
Instantiating a Workflow	230
Workflow Forms	231
Office SharePoint Server and Workflow Capability	232
Predefined Templates	232
InfoPath Workflow Form Advantages	234
Creating Custom Workflows with SharePoint Designer	235
Content Approval Workflow Scenario	235
Creating the Content Approval Workflow: Exercise and Tutorial	236
Creating the Content Approval Workflow: Review	241
Quality Assurance Testing Scenario	243
Creating the Quality Assurance Testing Scenario: Exercise and Tutorial	243
Creating the Quality Assurance Testing Scenario: Review	245
Creating Custom Workflows with Visual Studio Designer	246
Content Approval Workflow Scenario	246
Creating the Content Approval Workflow: Exercise and Tutorial	247
Custom Workflow Debugging	251
Creating the Content Approval Workflow: Review	251
Summary	253
Chapter 9: Web Content Management in Office SharePoint Server	255
Content Management	255
Web Content Management	256
Key Web Content Management Features	256
Publishing Templates and Publishing Sites	257
Creating a WCM Web Portal: Exercise and Tutorial	258
Part 1 — Creating a New Web Application and a New Publishing Site Collection	259

Contents

Part 2 — Extending the Web Application into the Internet Zone and Configuring Anonymous Access	260
Part 3 — Restricting the Viewability of Specific Web Site Content from the Internet Zone	262
WCM Site Content and Structure	264
Web Content Management Architecture and Page Structure	265
Templates	265
Other Key WCM Components	267
Authoring, Approving, and Publishing New Pages	269
Authoring	269
Content Approval	270
Authoring, Approving, and Publishing: Exercise and Tutorial	270
Site Variations	278
Preparing for Implementing Variations	279
Content Publishing with Variations Enabled	280
Creating Site Variations: Exercise and Tutorial	280
Content Deployment	282
Summary	286
Chapter 10: Content Management and Workflow Scenario	287
Document Workflow for the Press Release	288
Defining the Press Release Content Type	288
Building the Initial Press Release Document Template	289
Uploading the Document Template to the Content Type Definition	290
Creating a Document Library Based on the Press Release Content Type	291
Embedding Metadata Properties in the Template Document	292
Completing the Template Document	292
Creating a Custom Document Information Panel	295
Defining Approval Workflow	297
Packaging the Content Type	298
Publishing Web Content from Documents	301
Configuring a Web Publishing Site	302
Document Converters for Web Publishing	304
Extending a Document Publishing Scenario	312
Summary	312
Index	313
