<b>Introduction</b>	<b>xxiii</b>
<b>Chapter 1: Apache Tomcat</b>	<b>1</b>
<b>Humble Beginnings: The Apache Project</b>	<b>2</b>
<b>The Apache Software Foundation</b>	<b>3</b>
<b>Tomcat</b>	<b>3</b>
Distributing Tomcat: The Apache License	4
Comparison with Other Licenses	5
<b>The Big Picture: Java EE</b>	<b>6</b>
Java APIs	6
The Java EE APIs	7
Java EE Application Servers	8
“Agree on Standards, Compete on Implementation”	8
Tomcat and Application Servers	9
<b>Tomcat and Web Servers</b>	<b>9</b>
<b>Summary</b>	<b>10</b>
<b>Chapter 2: Web Applications: Servlets, JSPs, and More</b>	<b>13</b>
<b>A Brief History of Web Applications</b>	<b>13</b>
CGI Scripts: The First Mechanism for Dynamic Content	13
Server Side Java: Servlets	14
JavaServer Pages	19
JSP Tag Libraries	22
JSP EL	23
MVC Architecture	24
Using Appropriate Web Technologies	25
<b>Building and Distributing Web Applications</b>	<b>26</b>
<b>Summary</b>	<b>27</b>
<b>Chapter 3: Tomcat Installation</b>	<b>29</b>
<b>Installing the Java Virtual Machine</b>	<b>29</b>
Installing the JVM on Windows	30
Installing the JVM on Linux	32

# Contents

<b>Installing Tomcat</b>	<b>34</b>
Deciding Which Distribution to Install	34
Verifying the Downloaded File	35
Tomcat Windows Installer	36
Installing Tomcat on Windows Using the ZIP File	41
Installing Tomcat on Linux	42
<b>Building Tomcat from Source</b>	<b>44</b>
Do You Need to Build Tomcat from the Source Code?	44
Downloading the Source Release	44
Subversion Repository	45
Building a Source Release	45
<b>The Tomcat Installation Directory</b>	<b>46</b>
<b>Installing APR</b>	<b>47</b>
<b>Troubleshooting and Tips</b>	<b>48</b>
Class Version Error	49
The Port Number Is in Use	49
Running Multiple Instances	49
A Proxy Is Blocking Access	49
<b>Summary</b>	<b>50</b>
<b>Chapter 4: Tomcat Architecture</b>	<b>51</b>
<b>Tomcat Directory Overview</b>	<b>51</b>
bin Directory	52
conf Directory	52
lib Directory	53
logs Directory	53
temp Directory	53
webapps Directory	53
work Directory	54
<b>An Overview of Tomcat Architecture</b>	<b>54</b>
The Server	55
The Service	56
The Remaining Classes in the Tomcat Architecture	59
<b>Connector Architecture</b>	<b>59</b>
Communication Paths	60
Connector Protocols	61
Choosing a Connector	63
<b>Lifecycle</b>	<b>64</b>
Lifecycle Interface	65
LifecycleListener Interface	65
<b>Configuration by Architecture</b>	<b>66</b>
<b>Summary</b>	<b>67</b>

---

<b>Chapter 5: Basic Tomcat Configuration</b>	<b>69</b>
<b>Tomcat 6 Configuration Essentials</b>	<b>70</b>
<b>Files in \$CATALINA_HOME/conf</b>	<b>71</b>
<b>Basic Server Configuration</b>	<b>71</b>
Server Configuration via the Default server.xml	72
Operating Tomcat in Application Server Configuration	75
Web Application Context Definitions	82
The Default context.xml File	82
Authentication and the tomcat-users.xml File	86
The Default Deployment Descriptor — web.xml	86
How server.xml, Context Descriptors, and web.xml Work Together	91
Fine-Grained Access Control: catalina.policy	94
catalina.properties: Finer-Grained Control over Access Checks	97
Bootstrapping Configuration	97
A Final Word on Differentiating Between Configuration and Management	98
<b>Tomcat 6 Web-Based GUI Configurator</b>	<b>98</b>
<b>Summary</b>	<b>100</b>
<b>Chapter 6: Advanced Tomcat Features</b>	<b>103</b>
<b>Valves — Interception Tomcat-Style</b>	<b>104</b>
<b>Standard Valves</b>	<b>104</b>
<b>Access Log Implementation</b>	<b>105</b>
<b>Scope of Log Files</b>	<b>106</b>
<b>Single Sign-On Implementation</b>	<b>108</b>
Multiple Sign-On Without the Single Sign-On Valve	109
Configuring a Single Sign-On Valve	111
<b>Form Authenticator Valve</b>	<b>112</b>
<b>Restricting Access via a Request Filter</b>	<b>112</b>
Remote Address Filter	112
Remote Host Filter	113
Configuring Request Filter Valves	113
Request Dumper Valve	114
<b>Persistent Sessions</b>	<b>115</b>
The Need for Persistent Sessions	115
Configuring a Persistent Session Manager	115
<b>JNDI Resource Configuration</b>	<b>118</b>
What Is JNDI?	118
Tomcat and JNDI	119
Typical Tomcat JNDI Resources	120
Configuring Resources via JNDI	121

# Contents

Configuring a JDBC DataSource	124
Configuring Mail Sessions	126
<b>Configuring Lifecycle Listeners</b>	<b>129</b>
Lifecycle Events Sent by Tomcat Components	129
The <Listener> Element	129
Tomcat 6 Lifecycle Listeners Configuration	130
<b>Summary</b>	<b>133</b>
<b>Chapter 7: Web Application Configuration</b>	<b>135</b>
<b>Understanding the Contents of a Web Application</b>	<b>135</b>
Public Resources	136
The WEB-INF Directory	138
The META-INF Directory	139
<b>Understanding the Deployment Descriptor (web.xml)</b>	<b>140</b>
The Servlet 2.3–Style Deployment Descriptor	141
The Servlet 2.4/2.5–Style Deployment Descriptor	154
<b>Summary</b>	<b>171</b>
<b>Chapter 8: Web Application Administration</b>	<b>173</b>
<b>Sample Web Application</b>	<b>173</b>
<b>Tomcat Manager Application</b>	<b>175</b>
Enabling Access to the Manager Application	176
Manager Application Configuration	178
<b>Tomcat Manager: Web Interface</b>	<b>180</b>
Displaying Tomcat Server Status	180
Managing Web Applications	181
Deploying a Web Application	182
<b>Tomcat Manager: Managing Applications with Ant</b>	<b>182</b>
Known Issue: Failure While Undeploying Web Applications on Windows	188
<b>Tomcat Manager — Using HTTP Requests</b>	<b>189</b>
List Deployed Applications	190
Deploying a New Application	190
Installing/Deploying Applications in Tomcat 6	191
Deploying a New Application Remotely	192
Deploying a New Application from a Local Path	192
Reloading an Existing Application	194
Listing Available JNDI Resources	195
Listing OS and JVM Properties	196
Stopping an Existing Application	196
Starting a Stopped Application	197
Undeploying a Web Application	198

---

Displaying Session Statistics	198
Querying Tomcat Internals Using the JMX Proxy Servlet	199
Setting Tomcat Internals Using the JMX Proxy Servlet	200
<b>Possible Errors</b>	<b>200</b>
<b>Security Considerations</b>	<b>201</b>
<b>Tomcat Deployer</b>	<b>203</b>
<b>Summary</b>	<b>203</b>
<b>Chapter 9: Class Loaders</b>	<b>205</b>
<hr/>	
<b>Class Loader Overview</b>	<b>205</b>
Standard Java SE Class Loaders	207
More on Class Loader Behavior	210
Creating a Custom Class Loader	211
Why Is a Custom Class Loader Needed for Tomcat?	211
<b>Security and Class Loaders</b>	<b>212</b>
Class Loader Delegation	212
Core Class Restriction	212
Separate Class Loader Namespaces	213
SecurityManager	213
<b>Tomcat and Class Loaders</b>	<b>214</b>
System Class Loader	215
Endorsed Standards Override Mechanism	215
Common Class Loader	215
Web Application Class Loader	216
<b>Dynamic Class Reloading</b>	<b>217</b>
<b>Common Class Loader Pitfalls</b>	<b>218</b>
Packages Split Among Different Class Loaders	218
Singletons	218
XML Parsers	219
<b>Summary</b>	<b>220</b>
<b>Chapter 10: HTTP Connectors</b>	<b>221</b>
<hr/>	
<b>HTTP Connectors</b>	<b>222</b>
Tomcat 6 HTTP/1.1 Connector	223
The Advanced NIO Connector	227
Comet Asynchronous IO Support	228
The Native APR Connector	228
<b>Configuring Tomcat for CGI Support</b>	<b>232</b>
<b>Configuring Tomcat for SSI Support</b>	<b>234</b>
Configuring the Tomcat 6 SSI Servlet	235
Configuring the Tomcat 6 SSI Filter	237

<b>The AJP Connector Architecture</b>	<b>244</b>
The Native Code Apache Modules	244
The Apache JServ Protocol	245
The AJP Connector	245
<b>Apache Web Server Frontend or Tomcat Standalone</b>	<b>246</b>
<b>Understanding Tomcat Workers</b>	<b>246</b>
Multiple Tomcat Workers	246
Configuring Apache Server to Work with Multiple Tomcat Workers — the workers.properties File	247
<b>Connecting Tomcat with Apache</b>	<b>251</b>
Tomcat 6 Configuration	251
Apache Web Server Configuration	252
Using the mod_jk Module	253
Using the mod_proxy Module	259
<b>Configuring SSL for Apache Web Server</b>	<b>263</b>
Configuring mod_ssl for Apache	264
Testing the SSL-Enabled Apache Setup	269
SSL-Enabled Apache-Tomcat Setup	271
<b>Tomcat Load Balancing with Apache</b>	<b>273</b>
Changing CATALINA_HOME in the Tomcat Startup Files	274
Setting Different AJP Connector Ports	275
Setting Different Server Ports	275
Disabling the Default HTTP/1.1 Connector	276
Setting the jvmRoute in the Standalone Engine	276
Commenting Out the Catalina Engine	277
Directives in httpd.conf	277
Workers Configuration in workers.properties	277
<b>Testing the Load Balancer</b>	<b>279</b>
Testing Sticky Sessions	280
Testing Round-Robin Behavior	281
Testing with Different Load Factors	283
<b>Summary</b>	<b>284</b>

---

<b>Chapter 12: Tomcat and IIS</b>	<b>285</b>
<b>Role of the ISAPI Plug-in</b>	<b>285</b>
<b>Connecting Tomcat with IIS</b>	<b>286</b>
Verifying Tomcat and IIS Installations	287
Configuring the JK Connector	288
Installing the ISAPI Plug-in	288
Configuring Tomcat Workers	289
Configuring the Request Forwarding Rules	291
Optionally Configure URL Rewrite Rules	292
Updating the Windows Registry for the ISAPI Plug-in	292
IIS 5 Isolation Mode (IIS 6 Only)	295
Creating a Virtual Directory Under IIS	296
Adding the ISAPI Plug-in as an IIS Filter	300
Authorizing the ISAPI Plug-in as a Web Application Extension (IIS 6 Only)	302
Testing the Final Setup	303
<b>Troubleshooting Tips</b>	<b>303</b>
<b>Using SSL</b>	<b>305</b>
<b>Scalable Architectures with IIS and Tomcat</b>	<b>305</b>
Distributing Web and Application Server Deployments	306
Multiple Tomcat Workers	307
Load-Balanced AJP Workers	307
<b>Summary</b>	<b>307</b>
<b>Chapter 13: JDBC Connectivity</b>	<b>309</b>
<b>JDBC Basics</b>	<b>310</b>
Establishing and Terminating Connections to RDBMSs	311
Evolving JDBC Versions	311
JDBC Driver Types	312
Database Connection Pooling	313
A Problem with Connection Pooling	314
Tomcat and the JDBC Evolution	315
<b>JNDI Emulation and Pooling in Tomcat 6</b>	<b>315</b>
<b>Preferred Configuration: JNDI Resources</b>	<b>317</b>
The Resource Tag	317
Hands-On JNDI Resource Configuration	319
Testing the JNDI Resource Configuration	324
<b>Alternative JDBC Configuration</b>	<b>326</b>
<b>Alternative Connection Pool Managers</b>	<b>326</b>
About the c3p0 Pool Manager	326
Deploying the c3p0 Pooling Manager	327

# Contents

Obtaining JDBC Connections Without JNDI Lookup	327
Testing Non-JNDI Pool Access with c3p0	329
Obtaining a Connection with JNDI Mapping	330
Testing c3p0 with Tomcat 6 JNDI-Compatible Lookup	331
Deploying Third-Party Pools	332
<b>Summary</b>	<b>332</b>
<b>Chapter 14: Tomcat Security</b>	<b>335</b>
<b>Verifying Tomcat Download Integrity</b>	<b>336</b>
Verifying the MD5 DIGEST	336
Using PGP to Verify the Download	338
<b>Securing the Tomcat Server Installation</b>	<b>340</b>
Removing Default Applications	341
ROOT and tomcat-docs	341
System Applications — manager and host-manager	341
Tying Down System Application Access Security	341
Removing JSP and Servlet Examples	342
Changing the SHUTDOWN Command	342
<b>Running Tomcat with a Special Account</b>	<b>342</b>
Creating a Non-Privileged Tomcat User	343
Running Tomcat with the Tomcat User	343
<b>Securing the File System</b>	<b>344</b>
Windows File System	344
Linux File System	346
<b>Securing the Java Virtual Machine</b>	<b>346</b>
Overview of the Security Manager	347
Using the Security Manager with Tomcat	350
Recommended Security Manager Practices	353
<b>Securing Web Applications</b>	<b>355</b>
Authentication and Realms	355
Security Realms	360
<b>Encryption with SSL</b>	<b>377</b>
JSSE	378
Protecting Resources with SSL	381
<b>Securing DefaultServlet</b>	<b>383</b>
Disabling Directory Listing	383
Disabling an Invoker Servlet, SSI, and CGI Gateway	384
<b>Host Restriction</b>	<b>384</b>
<b>Summary</b>	<b>384</b>

---

<b>Chapter 15: Shared Tomcat Hosting</b>	<b>387</b>
<b>Virtual Hosting Concepts</b>	<b>387</b>
<b>Virtual Hosting in Apache</b>	<b>388</b>
Example Deployment Scenario	388
IP-Based Virtual Hosting in Apache	389
Name-Based Virtual Hosting in Apache	392
<b>Virtual Hosting in Tomcat</b>	<b>395</b>
Example Deployment Scenario	396
Tomcat as a Standalone Server	398
Tomcat with Apache	405
Configuring Apache	406
<b>The Tomcat Host-Manager Application</b>	<b>409</b>
<b>Virtual Hosting Issues: Stability, Security, and Performance</b>	<b>409</b>
<b>Tuning Virtual Hosting Settings in Tomcat</b>	<b>410</b>
Creating Separate JVMs for Each Virtual Host	410
Setting Memory Limits on the Tomcat JVM	414
Using Java Security Manager Restrictions	416
<b>Summary</b>	<b>417</b>
<b>Chapter 16: Monitoring and Managing Tomcat with JMX</b>	<b>419</b>
<b>The Requirement to Be Manageable</b>	<b>420</b>
<b>All About JMX</b>	<b>422</b>
The JMX Architecture	422
Instrumentation Level	424
Agent Level	425
Distributed Services Level	427
<b>JMX Remote API</b>	<b>428</b>
<b>An Anthology of MBeans</b>	<b>428</b>
Standard MBeans	428
Dynamic MBeans	428
Model MBeans	429
Open MBeans	429
<b>JMX Manageable Elements in Tomcat 6</b>	<b>429</b>
Manageable Tomcat 6 Architectural Components	430
Manageable Nested Components	430
Manageable Runtime Data Objects	430
Manageable Resource Object	436
<b>Accessing Tomcat 6's JMX Support via the Manager Proxy</b>	<b>441</b>
Working with the JMX Proxy	442

Modifying MBean Attributes	444
Using jconsole GUI to Monitor Tomcat	447
Configuring Tomcat for Remote Monitoring	450
<b>Summary</b>	<b>452</b>
<b>Chapter 17: Clustering</b>	<b>455</b>
<b>Clustering Benefits</b>	<b>456</b>
Scalability and Clustering	456
The Need for High Availability	457
<b>Clustering Basics</b>	<b>457</b>
Master-Backup Topological Pattern	457
Fail-Over Behavioral Pattern	458
<b>Tomcat 6 Clustering Model</b>	<b>459</b>
Load Balancing	460
Session Sharing	461
<b>Working with Tomcat 6 Clustering</b>	<b>465</b>
Session Management in Tomcat 6	465
The Role of Cookies and Modern Browsers	466
Configuring a Tomcat 6 Cluster	466
Common Front End: Load Balancing via Apache mod_jk	471
Preparation for Using Different Session-Sharing Backends	472
Backend 1: In-Memory Replication Configuration	472
Backend 2: Persistent Session Manager with a Shared File Store	484
Backend 3: Persistent Session Manager with a JDBC Store	487
Testing a Tomcat Cluster with JDBC Persistent Session Manager Backend	490
<b>The Complexity of Clustering</b>	<b>490</b>
Clustering and Performance	490
Clustering and Response Time	491
Solving Performance Problems with Clustering	491
<b>Summary</b>	<b>491</b>
<b>Chapter 18: Embedded Tomcat</b>	<b>493</b>
<b>Importance of Embedded Tomcat in Modern System Design</b>	<b>494</b>
Typical Embedded Application Scenarios	495
Developing with Embedded Tomcat	495
<b>Summary</b>	<b>503</b>

<b>Chapter 19: Logging</b>	<b>505</b>
<b>Changes from Tomcat 5</b>	<b>505</b>
<b>log4j</b>	<b>506</b>
log4j Architecture	506
log4j Installation and Configuration	509
A Tutorial Introduction to log4j	514
More log4j Recipes	515
log4j Performance Tips	527
<b>JULI</b>	<b>527</b>
Java Logging Architecture	527
A Tutorial Introduction to JULI	529
<b>Log Files Analysis</b>	<b>531</b>
<b>Summary</b>	<b>532</b>
<b>Chapter 20: Performance Testing</b>	<b>533</b>
<b>Performance Concepts</b>	<b>533</b>
What to Measure	533
Scalability and Performance	534
Understanding the User's Perspective	535
Measuring Performance	535
<b>JMeter</b>	<b>537</b>
Installing and Running JMeter	537
Making and Understanding Test Plans with JMeter	538
JMeter Features	542
Distributed Load Testing	554
Interpreting Test Results	555
<b>Alternatives to JMeter</b>	<b>558</b>
<b>What to Do After Performance Testing</b>	<b>558</b>
<b>Summary</b>	<b>559</b>
<b>Chapter 21: Performance Tuning</b>	<b>561</b>
<b>Performance Tuning Best Practices</b>	<b>561</b>
Step 1: Set Up a Test Bed	562
Step 2: Test Performance and Identify the Baseline	563
Step 3: Diagnose Performance Bottlenecks	564
<b>Diagnosing Tomcat Performance Issues</b>	<b>564</b>
<b>Tomcat Performance Tuning Tips</b>	<b>566</b>
Tuning the JVM Parameters	567
Precompiling JSPs	569
