# Contents

<i>Introduction</i> .....	xxii
---------------------------	------

## **Part 1 • Fundamental C# Programming** ..... 1

### **Chapter 1 • Introduction to C#** ..... 3

Developing Your First C# Program .....	3
Understanding the Main() Method .....	5
Compiling a Program .....	7
Introducing the Microsoft Intermediate Language (MSIL) .....	8
Introducing Visual Studio .NET .....	9
Starting Visual Studio .NET and Creating a Project .....	10
Compiling and Running the Program .....	14
Using the .NET Documentation .....	15
Accessing the Documentation Using the .NET SDK .....	15
Accessing the Documentation Using VS .NET .....	17
Summary .....	18

### **Chapter 2 • Basic C# Programming** ..... 19

Using Statements, Whitespace, and Blocks .....	19
Adding Comments .....	21
Using Data Types, Variables, and Constants .....	22
Introducing Data Types .....	22
Looking at C#'s Built-in Types .....	23
Understanding Variables .....	29
Defining Constants .....	33
Introducing Strings .....	35
Understanding Enumerations .....	36
Specifying Values in an Enumeration .....	39
Specifying an Enumeration Base Type .....	40
Handling Input and Output .....	41
Reading a Single Character .....	41
Reading a String of Characters .....	42
Formatting Output .....	43
Summary .....	46

### **Chapter 3 • Expressions and Operators** ..... 47

Understanding Expressions and Operators .....	47
Assignment Operator .....	49
Arithmetic Operators .....	49
Comparison Operators .....	51
Boolean Logical Operators .....	53

Ternary Operator . . . . .	56
Bitwise Operators . . . . .	57
Shortcut Operators . . . . .	62
is Operator . . . . .	66
Operator Precedence . . . . .	67
Summary . . . . .	70

#### **Chapter 4 • Decisions, Loops, and Preprocessor Directives . . . . . 71**

Using the if Statement . . . . .	71
Replacing a Single Statement with a Block . . . . .	72
Using Nested if Statements . . . . .	74
Using Logical Operators with the if Statement . . . . .	75
Implementing the switch Statement . . . . .	76
Comparing String Values Using a switch Statement . . . . .	78
Introducing Fall-Through . . . . .	79
Using Loop Statements . . . . .	81
The while Loop . . . . .	81
The do...while Loop . . . . .	83
The for Loop . . . . .	84
The foreach Loop . . . . .	86
Understanding Jump Statements . . . . .	88
The break Statement . . . . .	88
The continue Statement . . . . .	89
The goto Statement . . . . .	90
Creating Preprocessor Directives . . . . .	92
Defining Symbols . . . . .	92
Using the #if, #elif, and #else Directives . . . . .	94
Summary . . . . .	96

#### **Chapter 5 • Object-Oriented Programming . . . . . 97**

Introducing Classes and Objects . . . . .	97
Declaring a Class . . . . .	98
Creating Objects . . . . .	99
Null Values . . . . .	101
Default Field Values and Initializers . . . . .	104
Using Methods . . . . .	106
Defining Methods . . . . .	106
Calling Methods . . . . .	108
Hiding . . . . .	110
The this Object Reference . . . . .	112
More on Parameters . . . . .	114
Method Overloading . . . . .	120
Using Access Modifiers . . . . .	122
Creating and Destroying Objects . . . . .	126
Using Constructors . . . . .	127
Using Destructors . . . . .	135

Introducing Structs . . . . .	137
Summary . . . . .	140
<b>Chapter 6 • More about Classes and Objects . . . . .</b>	<b>141</b>
Introducing Static Members . . . . .	141
Using Static Members . . . . .	142
Using Constant Fields . . . . .	145
Using Readonly Fields . . . . .	146
Defining Properties . . . . .	148
Introducing the “Has a” Relationship . . . . .	150
Using the “Has a” Relationship . . . . .	151
Nesting Classes . . . . .	153
Learning about Namespaces . . . . .	155
Nesting Namespaces into Hierarchies . . . . .	158
The using Statement . . . . .	161
Summary . . . . .	163
<b>Chapter 7 • Derived Classes . . . . .</b>	<b>165</b>
Introducing Inheritance . . . . .	165
Learning about Polymorphism . . . . .	170
Specifying Member Accessibility . . . . .	174
Hiding Members . . . . .	177
Versioning . . . . .	182
Using the System.Object Class . . . . .	184
Overriding the System.Object Class Methods . . . . .	188
Boxing and Unboxing . . . . .	189
Using Abstract Classes and Methods . . . . .	191
Declaring Sealed Classes and Methods . . . . .	194
Sealed Classes . . . . .	194
Sealed Methods . . . . .	194
Casting Objects . . . . .	196
Upcasting . . . . .	198
Downcasting . . . . .	198
Operator Overloading . . . . .	201
Overloading the Equal Operator . . . . .	203
Overloading the Addition Operator . . . . .	204
Overloading Other Operators . . . . .	207
Summary . . . . .	207
<b>Chapter 8 • Interfaces . . . . .</b>	<b>209</b>
Defining an Interface . . . . .	209
Implementing an Interface Using a Class . . . . .	210
Implementing Multiple Interfaces . . . . .	213
Inheriting from a Class and Implementing Interfaces . . . . .	217
Casting an Object to an Interface . . . . .	220
The is Operator and Interfaces . . . . .	220
The as Operator and Interfaces . . . . .	221

Using Derived Interfaces . . . . .	224
Deriving an Interface from One Interface . . . . .	224
Deriving an Interface from Multiple Interfaces . . . . .	227
Understanding Explicit Interface Members . . . . .	230
Implementing Explicit Interface Members . . . . .	230
Hiding Interface Members . . . . .	234
Summary . . . . .	237
<b>Chapter 9 • Strings, Dates, Times, and Time Spans . . . . .</b>	<b>239</b>
Using Strings . . . . .	239
Creating Strings . . . . .	240
Using String Properties and Methods . . . . .	240
Creating Dynamic Strings . . . . .	260
Creating StringBuilder Objects . . . . .	260
Using StringBuilder Properties and Methods . . . . .	261
Representing Dates and Times . . . . .	267
Creating DateTime Instances . . . . .	268
Introducing Time Spans . . . . .	269
Using DateTime Properties and Methods . . . . .	272
Using Time Spans . . . . .	288
Creating TimeSpan Instances . . . . .	288
Using TimeSpan Properties and Methods . . . . .	289
Summary . . . . .	299
<b>Chapter 10 • Arrays and Indexers . . . . .</b>	<b>301</b>
Declaring and Creating Arrays . . . . .	301
Using Arrays . . . . .	302
Accessing an Array Using a Loop . . . . .	303
Attempting to Access a Nonexistent Array Element . . . . .	305
Initializing Arrays . . . . .	307
Reading Command-Line Arguments . . . . .	309
Introducing Array Properties and Methods . . . . .	311
Sorting Array Elements Using the Sort() Method . . . . .	312
Searching for an Array Element Using the BinarySearch() Method . . . . .	314
Reversing the Elements of an Array Using the Reverse() Method . . . . .	315
Searching for Array Elements Using the IndexOf() and LastIndexOf() Methods . . . . .	315
Using Multidimensional Arrays . . . . .	320
Two-Dimensional Rectangular Arrays . . . . .	320
Three-Dimensional Rectangular Arrays . . . . .	325
Jagged Arrays . . . . .	327
Creating Arrays of Objects . . . . .	330
Introducing Indexers . . . . .	332
Defining an Indexer . . . . .	333
Reading from the Fields of an Object Using an Indexer . . . . .	335
Writing to the Fields of an Object Using an Indexer . . . . .	336
Summary . . . . .	338

<b>Chapter 11 • Collections</b> .....	<b>339</b>
Introducing Array Lists .....	339
Creating and Using an ArrayList .....	340
ArrayList Properties and Methods .....	342
Adding Objects to an ArrayList .....	355
Understanding Bit Arrays .....	364
Creating and Using a BitArray .....	364
BitArray Properties and Methods .....	366
Understanding Hash Tables .....	370
Creating and Using a Hashtable .....	371
Hashtable Properties and Methods .....	373
Understanding Sorted Lists .....	379
Creating and Using a SortedList .....	379
SortedList Properties and Methods .....	381
Understanding Queues .....	388
Creating and Using a Queue .....	388
Queue Properties and Methods .....	390
Understanding Stacks .....	391
Creating and Using a Stack .....	391
Stack Properties and Methods .....	393
Summary .....	394
<b>Chapter 12 • Delegates and Events</b> .....	<b>397</b>
Understanding Delegates .....	397
Declaring a Delegate Class .....	397
Creating and Using Delegate Objects .....	398
Delegate Multicasting .....	401
Calling Object Methods Using a Delegate .....	405
Understanding Events .....	409
Declaring an Event .....	409
Declaring the Delegate Class Used with an Event .....	410
Declaring the Reactor Class .....	411
Declaring the ReactorMonitor Class .....	412
Creating and Using a Reactor and ReactorMonitor Object .....	413
Summary .....	416
<b>Chapter 13 • Exceptions and Debugging</b> .....	<b>417</b>
Handling Exceptions .....	417
Using Try/Catch Blocks .....	418
Using Finally Blocks .....	418
Understanding Exception Objects .....	420
Handling Specific Exceptions .....	422
Using One catch Block .....	423
Using Multiple catch Blocks .....	425
Exploring Exception Propagation .....	427
Exception Propagation with a Nested try/catch Block .....	427

Exception Propagation with Methods .....	429
Unhandled Exceptions .....	432
Creating and Throwing Exception Objects .....	433
Declaring Custom Exceptions .....	435
Debugging .....	437
Creating the Program .....	437
Creating the New VS .NET Project .....	438
Debugging the Program .....	441
Summary .....	446

## **Part 2 • Advanced C# Programming ..... 449**

<b>Chapter 14 • Threads .....</b>	<b>451</b>
Understanding the .NET Framework Class Library .....	452
Introducing the Namespaces in the Class Library .....	452
Exploring Namespaces .....	455
Understanding Threads .....	458
Creating Threads .....	459
Setting Thread Properties and Methods .....	461
Setting Thread Priorities .....	463
Retrieving Thread States .....	465
Using Data Slots .....	468
Managing Threads .....	469
Using the Timer Class .....	470
Using the Join Method .....	471
Using Locks .....	472
Using the Interlocked Class .....	476
Using the Monitor Class .....	478
Using the Mutex Class .....	480
Dealing with Thread Problems .....	482
Avoiding Deadlocks .....	482
Avoiding Race Conditions .....	483
Thread Pooling .....	483
Summary .....	485
<b>Chapter 15 • Streams and Input/Output .....</b>	<b>487</b>
Dealing with Files and Directories .....	487
Browsing for Files .....	488
Retrieving File Information .....	491
Retrieving Directory Information .....	497
Walking the Hierarchy .....	501
Watching for Changes .....	502
Exploring Streams and Backing Stores .....	505
Stream .....	506
FileStream .....	507
NetworkStream .....	510
MemoryStream .....	515

BufferedStream . . . . .	518
CryptoStream . . . . .	521
Using Readers and Writers . . . . .	521
BinaryReader and BinaryWriter . . . . .	521
TextReader and TextWriter . . . . .	524
StreamReader and StreamWriter . . . . .	524
StringReader and StringWriter . . . . .	527
Using Asynchronous I/O . . . . .	529
Introducing Serialization . . . . .	532
Summary . . . . .	537

## **Chapter 16 • Assemblies . . . . . 539**

Looking at the Big Picture . . . . .	539
Why Use Assemblies? . . . . .	540
Enhanced Versioning . . . . .	540
Side-by-Side Execution . . . . .	541
What's in an Assembly? . . . . .	541
The Assembly Manifest . . . . .	541
Type Metadata . . . . .	542
MSIL Code . . . . .	542
Resources . . . . .	542
Building Assemblies . . . . .	542
Assembly Attributes . . . . .	542
Single-File Assemblies . . . . .	545
Multifile Assemblies . . . . .	550
Viewing Assembly Contents . . . . .	555
Understanding Strong Names and Signing . . . . .	557
Strong Names . . . . .	557
Code Signing . . . . .	559
Assembly Versioning . . . . .	561
Understanding Version Numbers . . . . .	562
Retrieving Version Numbers . . . . .	562
Version Compatibility and Policy Files . . . . .	563
Working with the Global Assembly Cache . . . . .	566
Finding an Assembly . . . . .	567
Summary . . . . .	568

## **Chapter 17 • Attributes and Reflection . . . . . 569**

Using Attributes . . . . .	569
Using Intrinsic Attributes . . . . .	570
Using Custom Attributes . . . . .	574
Discovering Types at Run-Time . . . . .	580
Building a Run-Time Library . . . . .	581
Discovering Type Information . . . . .	584
Late Binding via Reflection . . . . .	593
What You Can Find with Reflection . . . . .	595

Creating Types at Run-Time . . . . .	596
Summary . . . . .	601
<b>Chapter 18 • Remoting . . . . .</b>	<b>603</b>
Understanding Application Domains . . . . .	603
Creating an Application Domain . . . . .	604
Using an Object in an Application Domain . . . . .	606
Unloading an Application Domain . . . . .	608
Understanding Marshaling with Proxies . . . . .	609
Marshaling by Value . . . . .	610
Marshaling by Reference . . . . .	610
Understanding Contexts . . . . .	612
Understanding Channels . . . . .	613
Using Remoting . . . . .	614
Defining an Interface . . . . .	614
Building the Server . . . . .	615
Building the Client . . . . .	616
Testing the Code . . . . .	618
Summary . . . . .	618
<b>Chapter 19 • Security . . . . .</b>	<b>619</b>
Using Code-Access Security . . . . .	619
Understanding Permissions . . . . .	620
Requesting Minimum Permissions . . . . .	622
Code Groups . . . . .	623
Permission Sets . . . . .	624
Granting Permissions . . . . .	624
Computing Permissions . . . . .	626
Requesting Optional Permissions . . . . .	628
Requesting Permission Sets . . . . .	629
Refusing Permissions . . . . .	629
Demanding Permissions . . . . .	630
Using Role-Based Security . . . . .	631
Identity and Principal Objects . . . . .	632
Verifying Role Membership . . . . .	634
Using the PrincipalPermission Class . . . . .	635
Using Encryption . . . . .	636
Symmetric and Asymmetric Cryptography . . . . .	636
Encrypting a File . . . . .	637
Decrypting a File . . . . .	640
Using Asymmetric Cryptography . . . . .	642
Summary . . . . .	643
<b>Chapter 20 • XML . . . . .</b>	<b>645</b>
Understanding XML . . . . .	645
Introducing XML . . . . .	646

- Introducing XSLT . . . . . 654
- Introducing XSD . . . . . 657
- Reading and Writing XML . . . . . 659
  - Writing XML Files . . . . . 659
  - Reading XML Files . . . . . 662
- Using the Document Object Model . . . . . 663
  - Understanding the Document Object Model . . . . . 663
  - Introducing the XmlNode Class . . . . . 663
  - Introducing the XmlDocument Class . . . . . 666
  - Reading an XML Document with the XmlTextReader Class . . . . . 668
- Transforming XML . . . . . 672
- Summary . . . . . 675

**Chapter 21 • Other Classes in the Base Class Library . . . . . 677**

- Understanding the Graphics Classes . . . . . 678
  - Introducing the GDI+ . . . . . 678
  - Using Pens, Lines, and Rectangles . . . . . 678
  - Filling Shapes with a Brush . . . . . 689
  - Working with Images . . . . . 692
- Supporting Globalization . . . . . 695
  - Overview of Localization and Globalization . . . . . 695
  - Understanding Cultures . . . . . 696
  - Displaying Localized Information . . . . . 704
- Diagnostics and Debugging . . . . . 705
  - The Trace and Debug Classes . . . . . 706
  - Using Trace Listeners . . . . . 708
  - Using Trace Output After Deployment . . . . . 710
- Using Advanced Facilities . . . . . 711
  - Controlling the Garbage Collector . . . . . 712
  - Starting and Stopping Services . . . . . 713
  - Working with Active Directory . . . . . 716
- Summary . . . . . 718

**Part 3 • .NET Programming with C# . . . . . 719**

**Chapter 22 • Introduction to Databases . . . . . 721**

- Introducing Databases . . . . . 721
- Exploring the Northwind Database . . . . . 722
  - Primary Keys . . . . . 723
  - Foreign Keys . . . . . 723
  - Null Values . . . . . 724
  - The Customers Table . . . . . 724
  - The Orders Table . . . . . 726
  - The Order Details Table . . . . . 728
  - The Products Table . . . . . 728

Using the Structured Query Language (SQL) . . . . .	729
Using the Query Analyzer . . . . .	730
Understanding Data Manipulation Language (DML) Statements . . . . .	732
Introducing Stored Procedures . . . . .	751
Looking at an Example SQL Server Stored Procedure . . . . .	751
Running a SQL Server Stored Procedure . . . . .	752
Accessing a Database Using Visual Studio .NET . . . . .	752
Summary . . . . .	755
<b>Chapter 23 • Active Data Objects: ADO.NET . . . . .</b>	<b>757</b>
Overview of ADO.NET . . . . .	757
Overview of the ADO.NET Classes . . . . .	758
Generic Data Classes and Objects . . . . .	758
Managed Provider Classes and Objects . . . . .	759
Performing a SQL SELECT Statement Using ADO.NET . . . . .	760
Step 1: Formulate a String Containing the Details of the Database Connection . . . . .	761
Step 2: Create a SqlConnection Object to Connect to the Database . . . . .	761
Step 3: Formulate a String Containing the SELECT Statement . . . . .	761
Step 4: Create a SqlCommand Object to Hold the SELECT Statement . . . . .	762
Step 5: Set the CommandText Property of the SqlCommand Object to the SELECT String . . . . .	762
Step 6: Create a SqlDataAdapter Object . . . . .	762
Step 7: Set the SelectCommand Property of the SqlDataAdapter Object to the SqlCommand Object . . . . .	762
Step 8: Create a DataSet Object to Store the Results of the SELECT Statement . . . . .	762
Step 9: Open the Database Connection Using the Open() Method of the SqlConnection Object . . . . .	763
Step 10: Call the Fill() Method of the SqlDataAdapter Object to Retrieve the Rows from the Table . . . . .	763
Step 11: Get the DataTable Object from the DataSet Object . . . . .	763
Step 12: Display the Columns for Each Row in the DataTable . . . . .	764
Step 13: Close the Database Connection . . . . .	764
Connecting to a Microsoft Access Database . . . . .	767
Connecting to an Oracle Database . . . . .	768
Exploring the Details of the ADO.NET Classes . . . . .	768
SqlConnection Class . . . . .	768
SqlCommand Class . . . . .	769
SqlDataReader Class . . . . .	770
SqlDataAdapter Class . . . . .	773
SqlTransaction Class . . . . .	774
DataSet Class . . . . .	775
DataTable Class . . . . .	776
DataRow Class . . . . .	778
DataColumn Class . . . . .	779
DataRelation Class . . . . .	780
Constraint Class . . . . .	781
DataView Class . . . . .	781

Performing SQL INSERT, UPDATE, and DELETE Statements Using ADO.NET . . . .	783
Step 1: Formulate a String Containing the SQL Statement . . . . .	783
Step 2: Create a SqlCommand Object to Hold the SQL Statement . . . . .	784
Step 3: Set the CommandText Property of the SqlCommand Object to the SQL String . . . . .	784
Step 4: Use the Add() Method to Add the Parameters . . . . .	784
Step 5: Set the Parameters to Specified Values Using the Value Property . . . . .	786
Step 6: Use the ExecuteNonQuery() Method to Run the SQL Statement . . . . .	786
Example Program . . . . .	787
Modifying a DataTable Object and Synchronizing the Changes with the Database . . . .	793
Adding a New Row to a DataTable Object . . . . .	793
Modifying a Row in a DataTable Object . . . . .	794
Removing a Row from a DataTable Object . . . . .	795
Examining an Example Program . . . . .	796
Using a Transaction in ADO.NET . . . . .	801
Using a DataView Object to Filter and Sort Rows . . . . .	804
Defining and Using a Relationship between Two DataTable Objects . . . . .	807
Running a SQL Server Stored Procedure Using ADO.NET . . . . .	811
Writing and Reading XML Files Using ADO.NET . . . . .	814
Using the WriteXml() Method . . . . .	814
Using the WriteXmlSchema() Method . . . . .	815
Using the ReadXml() Method . . . . .	815
Summary . . . . .	818
<b>Chapter 24 • Introduction to Windows Applications . . . . .</b>	<b>819</b>
Developing a Simple Windows Application . . . . .	820
Creating the Windows Application . . . . .	820
Examining the Form1.cs File . . . . .	824
Working with the Solution Explorer . . . . .	828
Working with the Class View . . . . .	829
Using Windows Controls . . . . .	830
Using a DataGrid Control to Access a Database . . . . .	831
Using the Data Form Wizard to Create a Windows Form . . . . .	836
Data Binding . . . . .	842
Adding Controls to the Form . . . . .	843
Adding the Main() Method . . . . .	844
Setting the pwd Property . . . . .	844
Running the Form . . . . .	845
Summary . . . . .	846
<b>Chapter 25 • Active Server Pages: ASP.NET . . . . .</b>	<b>847</b>
Creating a Simple ASP.NET Web Application . . . . .	847
The WebForm1.aspx File . . . . .	850
The WebForm1.aspx.cs File . . . . .	852
Using Web Form Controls . . . . .	854
Building a More Complex Application . . . . .	856

Using a DataGrid Control to Access a Database . . . . .	861
Creating the Web Application . . . . .	861
Customizing the DataGrid . . . . .	864
Using a DataList Control to Access a Database . . . . .	872
Summary . . . . .	879
<b>Chapter 26 • Web Services . . . . .</b>	<b>881</b>
Exploring the Architecture of Web Services . . . . .	881
Building a Simple Web Service . . . . .	883
Understanding Discovery . . . . .	884
Understanding Description . . . . .	886
Using the Web Service . . . . .	892
Watching the Conversation . . . . .	893
Looking Inside the Web Services Proxy . . . . .	895
Building a More Complex Web Service . . . . .	897
Building a Client the Easy Way . . . . .	898
Exploring Web Services Registries . . . . .	900
Summary . . . . .	901
<b>Appendices . . . . .</b>	<b>903</b>
<b>Appendix A • C# Keywords . . . . .</b>	<b>903</b>
<b>Appendix B: • C# Compiler Options . . . . .</b>	<b>909</b>
<b>Appendix C • Regular Expressions . . . . .</b>	<b>921</b>
Concepts . . . . .	921
Metacharacters . . . . .	922
The Regular Expression Classes . . . . .	925
Regular Expression Examples . . . . .	926
Groups and Captures . . . . .	930
<i>Index</i> . . . . .	935
