<i>Introduction</i>	<i>xix</i>
<i>Assessment Test</i>	<i>xxxv</i>
Chapter 1 Analyzing the Administrative Structure	1
Understanding the Administrative Structure:	
Business Models	2
Identifying the Departmental Model	3
Identifying a Project-Based Model	4
Identifying the Product/Service-Based Model	6
Identifying the Cost Center Model	6
Understanding the Administrative Structure:	
Administration Models	8
Identifying the Centralized Administration Model	8
Identifying the Decentralized Administration Model	11
Identifying the Hybrid Administration Model	12
Identifying the Outsourced Administration Model	13
Analyzing the Existing Administrative Structure	16
Understanding the Effect of Active Directory on the Administrative Design	18
Designing the Administrative Structure	20
Summary	23
Exam Essentials	25
Key Terms	25
Review Questions	26
Answers to Review Questions	29
Case Study	30
Background	30
Existing Environment	30
Interviews	30
Table	32
Case Study Questions	33
Answers to Case Study Questions	38
Chapter 2 Determining Business and Technical Requirements	43
Identifying the Current System Implementation	46
Determining Organizational Requirements	46
Identifying the Current Software Requirements	54
Identifying the Current Hardware Requirements	56
Network Requirements	58
Documenting Your Findings	60

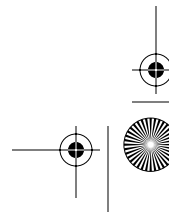

xii Contents

Examining the Current Infrastructure	63
Current Directory Service	63
Software Requirements	66
Network Requirements	68
Summary	69
Exam Essentials	69
Key Terms	70
Review Questions	71
Answers to Review Questions	73
Case Study	74
Background	74
Existing Environment	74
Interviews	74
Case Study Questions	77
Answers to Case Study Questions	80

Chapter 3 **Designing the Active Directory Forest Structure** **83**

Identifying Design Criteria	84
Identifying Service Administrators	85
Identifying Data Administrators	85
Defining Autonomy, Collaboration, and Isolation	86
Understanding Collaborative Administration	86
Understanding Autonomous Administration	88
Understanding Isolated Administration	90
Identifying Design Priorities	91
Using Reliable Solutions	91
Using High-Availability Solutions	92
Designing the Forest Structure	93
Implementing an Organization-Based Forest	95
Implementing a Resource Forest	97
Implementing a Restricted-Access Forest	97
Schema Considerations	100
Planning and Testing	101
Who Makes the Change?	101
Plan the Roll-Out Schedule	102
Where to Make the Changes	102
Summary	102
Exam Essentials	103
Key Terms	104
Review Questions	105
Answers to Review Questions	107
Case Study	108
Background	108
Existing Environment	108

	Interviews	109
	Current Infrastructure	110
	Case Study Questions	111
	Answers to Case Study Questions	112
Chapter 4	Designing the Active Directory Domain Structure	113
	Identifying the Domain Administrative Structure	115
	Using a Single Domain	116
	Using Multiple Domains	122
	Using Multiple Trees	124
	Identifying Security Concerns	126
	Identifying Domain Creation Considerations	126
	Identifying Domain Functional Levels	127
	Identifying Trust Relationship Considerations	127
	Using the Forest Trust	128
	Using Trusts between Domains	129
	Using SID Filtering	131
	Identifying Trust Authentication Allowances	132
	Interoperability and Migration Strategies	132
	Understanding Upgrade Considerations	133
	Understanding Restructuring Considerations	133
	Migrating from Windows NT 4	134
	Migrating from Windows 2000	137
	Defining Domain Names	138
	Identifying the Forest Root Domain	139
	Summary	141
	Exam Essentials	141
	Key Terms	142
	Review Questions	143
	Answers to Review Questions	145
	Case Study	146
	Background	146
	Existing Environment	146
	Interviews	147
	Current Infrastructure	148
	Case Study Questions	152
	Answers to Case Study Questions	153
Chapter 5	Designing an Organizational Unit Structure for Administrative Purposes	155
	The Basics of Organizational Units	156
	Understanding the OU Design Options	157
	Understanding OU Design Criteria	162

xiv Contents

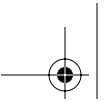

Options for Delegating Control	166
Understanding Delegation Methods	167
Understanding Account and Resource OUs	168
Understanding Inheritance	170
Migrating from NT 4.0	172
Migrating Account Domains	172
Migrating Resource Domains	173
Summary	175
Exam Essentials	176
Key Terms	177
Review Questions	178
Answers to Review Questions	180
Case Study	181
Background	181
Existing Environment	181
Interviews	182
Current Network Design	183
Case Study Questions	184
Answers to Case Study Questions	186
Chapter 6	Designing Organizational Units for Group Policy
	189
Group Policy Overview	190
Understanding the Company's Objectives	193
Creating a Simple Design	196
Creating the OU Structure	207
Identifying Administrative Requirements	208
Controlling Change Management	210
Summary	213
Exam Essentials	213
Key Terms	214
Review Questions	215
Answers to Review Questions	218
Case Study	219
Background	219
Interviews	219
Existing Infrastructure	221
Case Study Questions	223
Answers to Case Study Questions	225
Chapter 7	Designing Accounts Access and Management
	227
Planning Account Creation	228
Identifying Current Account Structure	229
Identifying a Naming Strategy	230
Identifying an Account Authentication Policy	236

Determining Group Requirements for Resource Access	240
Identifying User Access and Group Strategies	241
Identifying Group Creation Options	246
Designing a Group Creation Strategy	247
Identifying Resource Access Needs	248
Determining the Level of Access Required	248
Designing for Efficient Nesting	249
Summary	250
Exam Essentials	251
Key Terms	252
Review Questions	253
Answers to Review Questions	255
Case Study	256
Background	256
Existing Environment	256
Interviews	257
Current Infrastructure	259
Case Study Questions	262
Answers to Case Study Questions	264

Chapter 8 Designing the Site Topology 265

Determining the Site Topology	266
Understanding the Current Network Infrastructure	268
Designing Sites to Support the Active Directory Design	269
Designing Site Links and Site Link Bridges	272
Determining Domain Controller Specifications and Placement	277
Determining Domain Controller Specifications	278
Choosing Domain Controller Placement	280
Choosing Global Catalog Placement	281
Choosing Master Operations Placement	282
Determining Domain Controller Creation Options	284
Summary	286
Exam Essentials	287
Key Terms	288
Review Questions	289
Answers to Review Questions	291
Case Study	292
Background	292
Existing Environment	292
Interviews	293
Current Infrastructure	294
Case Study Questions	298
Answers to Case Study Questions	300

Chapter 9	Designing Remote Access	303
	Designing Network Access	304
	Identifying the Network Access Hierarchy	305
	Security Considerations	309
	Improving Availability	309
	Considerations for Internet Access	311
	Designing Remote User Connectivity	312
	Identifying Remote User Access Considerations	312
	Identifying Connection Options	313
	Guidelines for Remote User Authentication and Accounting	315
	Designing Remote Site Connectivity	316
	Determining Connectivity Needs	317
	Identifying Internet and Extranet Considerations	318
	Identifying Extranet Options	325
	Guideline for Server Placement	325
	Identifying IP Addressing Options	327
	Allocating IP Addresses	329
	Defining Scope Options	332
	Determining DHCP Server Locations	333
	Summary	333
	Exam Essentials	334
	Key Terms	335
	Review Questions	336
	Answers to Review Questions	338
	Case Study	339
	Background	339
	Existing Environment	339
	Interviews	340
	Current Infrastructure	341
	Case Study Questions	345
	Answers to Case Study Questions	347
Chapter 10	Analyzing Name Resolution	349
	Examining the Current Name Resolution Infrastructure	351
	Designing the DNS Namespace	353
	Determining Internal and External Namespace Requirements	354
	Identifying Naming Standards	357
	Identifying Integration Options	359
	Designing Zones	361
	Designing the Name Resolution Server Infrastructure	366
	Designing the DNS Infrastructure	366
	Designing the WINS Infrastructure	368
	Integrating Name Resolution Services	374

Contents **xvii**

Securing the Name Resolution Infrastructure	375
Identifying Security Considerations	375
Securing DNS Servers	378
Securing WINS	379
Summary	380
Exam Essentials	381
Key Terms	382
Review Questions	383
Answers to Review Questions	385
Case Study	386
Background	386
Existing Environment	386
Interviews	387
Current Infrastructure	388
Case Study Questions	392
Answers to Case Study Questions	393

Glossary **395**

Index 409

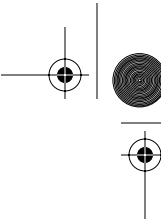

Table of Design Scenarios

Identifying Business Models	8
Identifying the Administrative Model	15
Analyzing Organizational Requirements	49
Determining Administrative Needs	52
Identifying Owners	91
Priority Identification	93
Choosing a Domain Design	125
Identifying Trust Relationships	131
Choosing the OU structure	163
Migrating from Windows NT 4	174
Defining GPOs	206
Linking GPOs	212
Determining the Authentication Requirements	240
Designing Resource Access for the Forest	247
Determining Site Topology	277
Calculating the Database Size	279
Controlling User Access.	316
Building the Firewall	321
Determining WINS Population	369
Determining WINS Replication Paths	373
