***Part I: Reviewing Basic Math for Business and Real Estate Transactions* 7**

Chapter 1: Starting from the Beginning 9

- Fracturing the Myths about Fractions, Decimals, and Percents10
- Capitalizing on Patterns in Formulas11
- Finding the Power in Exponents12
- Doing Some Serious Counting13
- Painting a Pretty Picture14

Chapter 2: Fractions, Decimals, and Percents 15

- Changing from Fractions to Decimals15
 - Considering the two types of decimals16
 - Rounding decimals up or down17
- Converting Decimals to Fractions20
 - Ending up with terminating decimals20
 - Dealing with repeating decimals22
- Understanding the Relationship between Percents and Decimals24
 - Transforming from percents to decimals25
 - Moving from decimals to percents25
 - Dealing with more than 100%26

Coming to Grips with Fractions27
 Adding and subtracting fractions27
 Multiplying and dividing fractions29

Chapter 3: Determining Percent Increase and Decrease 31

Working with Percent Increase31
 Computing new totals with increases32
 Determining the percent increase32
 Solving for the original amount33
Looking into Percent Decrease34
 Finding new totals with decreases35
 Figuring out the percent decrease35
 Restoring the original price from a decreased price36

Chapter 4: Dealing with Proportions and Basic Algebra 37

Setting Up Proportions38
Solving Proportions for Missing Values39
 Setting up and solving40
 Interpolating when necessary40
Handling Basic Linear Equations42
Comparing Values with Variation44
 Getting right to it with direct variation44
 Going the indirect route with indirect variation45

Part II: Taking Intriguing Math to Work47

Chapter 5: Working with Formulas 49

Familiarizing Yourself with a Formula50
 Identifying variables and replacing them correctly50
 Adjusting for differing units51
 Recognizing operations53
Simplifying and Solving a Formula54
 Operating according to the order of operations54
 Making sure what you have makes sense57
Computing with Technology57
 Calculators: Holding the answer in the palm of your hand58
 Repeating operations: Simplifying your work
 with a computer spreadsheet62

Chapter 6: Reading Graphs and Charts 67

Organizing Scattered Information with a Scatter Plot68
Lining Up Data with Line Graphs70
 Creating a line graph70
 Indicating gaps in graph values71

Measuring Frequency with Histograms73
 Taking a Piece of a Pie Chart76
 Dividing the circle with degrees and percents76

Chapter 7: Measuring the World around You79

 Converting from Unit to Unit80
 Using the conversion proportion80
 Lining up the linear measures81
 Spreading out with measures of area82
 Adding a third dimension: Volume86
 Making Sense of the Metric System88
 Moving from one metric unit to another89
 Converting from metric to English and vice versa91
 Discovering How to Properly Measure Lumber92
 Measuring Angles by Degrees94
 Breaking down a degree94
 Fitting angles into polygons95

Chapter 8: Analyzing Data and Statistics97

 Organizing Raw Data97
 Creating a frequency distribution98
 Grouping values together in a frequency distribution99
 Finding the Average102
 Adding and dividing to find the mean103
 Locating the middle with the median104
 Understanding how frequency affects the mode105
 Factoring in Standard Deviation106
 Computing the standard deviation106

***Part III: Discovering the Math of Finance
 and Investments 109***

Chapter 9: Computing Simple and Compound Interest111

 Understanding the Basics of Interest112
 Simply Delightful: Working with Simple Interest112
 Computing simple interest amounts the basic way113
 Stepping it up a notch: Computing it all with one formula115
 Taking time into account with simple interest116
 Surveying some special rules for simple interest119
 Looking into the future with present value120
 Getting to Know Compound Interest122
 Figuring the amount of compound interest you've earned122
 Noting the difference between effective and nominal rates124
 Finding present value when interest is compounding126

Determining How Variable Changes Affect Money Accumulation	127
Comparing rate increases to increased compounding	127
Comparing rate increases to increases in time	128
Chapter 10: Investing in the Future	131
Calculating Investments Made with Lump Sums	132
Reading interest earnings from a table	132
Doubling your money, doubling your fun	136
Going the Annuity Route	139
Preparing your financial future with a sinking fund	139
Determining the payment amount	141
Finding the present value of an annuity	141
Computing the Payout from an Annuity	143
Receiving money from day one	144
Deferring the annuity payment	146
Chapter 11: Understanding and Managing Investments	149
Interpreting the Daily Stock Market Quotations	150
Getting to know the stock quotations	150
Computing percent change	153
Using the averages to compute prices	154
Wrangling with the Ratios	157
Examining the stock yield ratio	157
Earning respect for the PE ratio	158
Working with earnings per share	159
Calculating profit ratios	159
Making Use of Your Broker	161
Buying stocks on margin	162
Paying a commission	163
Investing in the public: Buying bonds	164
Chapter 12: Using Loans and Credit to Make Purchases	165

Facing up to notes that have full face value	166
Discounting the value of a promissory note	167
Borrowing with a Conventional Loan	168
Computing the amount of loan payments	169
Considering time and rate	170
Determining the remaining balance	171
Paying more than required each month	172
Working with Installment Loans	174
Calculating the annual percentage rate	174
Making purchases using an installment plan	175

***Part IV: Putting Math to Use in Banking
and Payroll* 177**

Chapter 13: Managing Simple Bank Accounts179

Doing Business with Banks	179
Exploring the types of business bank accounts available	180
Understanding the importance of account management	181
Balancing Act: How You and the Bank Use Your Account Balance	184
Computing your average daily balance	184
Determining interest using your daily balance	186
Reconciling Your Account	188
Making reconciliation simple	189
Finding the errors	190

Chapter 14: Protecting Against Risk with Insurance193

Surveying the Types of Insurance Available	194
Living It Up with Life Insurance	194
Insuring with a group	195
Protecting your business with endowment insurance	198
Protecting Yourself from Loss by Insuring Your Property	200
Considering coinsurance	200
Examining multiyear contracts	202
Taking advantage of multiple building insurance coverage	203
Deferring premium payments	206

Chapter 15: Planning for Success with Budgets207

Choosing the Right Type of Budget	207
Cashing In on Cash Budgets	208
Looking at an example cash budget	209
Comparing budgeted and actual cash receipts	210
Varying with a Flexible Budget	212
Budgeting Across the Months	214
Using revenue budgets to deal with staggered income	215
Budgeting for ample inventory	216
Measuring Differences with Variance Analysis	218
Computing variance and percent variance	218
Finding a range for variance	220

Chapter 16: Dealing with Payroll223

Pay Up: Calculating Employee Earnings	224
Dividing to determine a timely paycheck	224
Part-timers: Computing the salary of seasonal and temporary workers	226
Determining an hourly wage	226
Taking care of commission payments	228

Subtracting Payroll Deductions	232
Computing federal income tax	232
Determining Social Security contributions	234

***Part V: Successfully Handling the Math Used in the World of Goods and Services*235**

Chapter 17: Pricing with Markups and Discounts237

Examining Markups and Retail Prices	237
Making sense of markups	238
Understanding how markups are a percentage of retail prices	238
Working with the retail price	240
Exploring Discount Pricing	242
Discounting once	243
Successive or multiple discounts	245
Going for a volume discount	247

Chapter 18: Calculating Profit, Revenue, and Cost251

Figuring Profit from Revenue and Cost	252
Understanding how volume affects profit, revenue, and cost	252
Seeing how price is sensitive to demand	253
Sorting out variable and fixed costs	256
What's It Gonna Be? Projecting Cost	260
Dividing up direct and indirect costs	261
Weighing historical and differential cost	263
Determining Break-Even Volume	269
Solving for break-even volume with a formula	269
Working out break-even volume from historical data	270

Chapter 19: Accounting for Overhead and Depreciation273

Keeping an Eye on Overhead Costs	274
Working with order-getting costs	274
Deciding on allocation options	277
Getting the Lowdown on Depreciation	280
The straight-line method	281
The sum-of-the-years' digits method	283
The declining balance method	285

Chapter 20: Keeping Track of Inventory291

Controlling Inventory and Turnover	291
Comparing cost inventory and retail inventory	292
Estimating turnover with an inventory ratio	295
FIFO and LIFO: Giving Order to Inventory	299
Determining Economic Order Quantity	300

***Part VI: Surviving the Math for Business Facilities
and Operations*305**

Chapter 21: Measuring Properties307

Exploring Area and Perimeter Formulas for Different Figures	308
Rectangles	308
Squares	309
Parallelograms	309
Triangles	310
Trapezoids	311
Regular polygons	311
Circles	312
Ellipses	313
Squaring Off with Square Measurements	314
Figuring total area in various measurements	315
Adjusting for increased area	317
Taking frontage into consideration	320
Calculating acreage	320
Determining Cost per Foot	321
Renting space	322
Estimating building costs	323
Measuring Irregular Spaces	324
Breaking spaces into rectangles	324
Trying out triangles	326
Tracking trapezoids	328
Describing Property with Metes and Bounds	329
Surveyors' directions	329
Measuring a boundary	330
Understanding the Rectangular Survey System	331
Basing measures on meridians	332
Subdividing the 24-mile square	332

Chapter 22: Taking Out Mortgages and Property-Related Loans . . .335

Closing In on Closing Costs	336
Dealing with down payments	337
Paying down using points	337
Considering appraisal fees	338
Prorating property tax	338
Amortizing Loans with Three Different Methods	339
Taking advantage of online calculators	339
Consulting mortgage payment tables	340
Working your brain with an old-fashioned formula	344
Going Off Schedule with Amortized Loans and Mortgages	345
Determining how much of your payment is interest	346
Altering the payments	349

Talking about Borrowing Power	354
Investigating Alternative Loans	355
Taking out a contract for deed	355
Building a construction loan	357
Part VII: The Part of Tens	359
Chapter 23: Ten Tips for Leasing and Managing Rental Property	361
