

# Contents

- Preface 7
- Contributors 8

## Part 1 Introduction

- 1 Milestones in neonatology 10
- 2 Epidemiology 12

## Part 2 Perinatal medicine

- 3 Perinatal medicine 14
- 4 Prepregnancy care, prenatal screening, fetal medicine and surgery 16
- 5 Maternal medical conditions 18
- 6 Intrauterine growth restriction 20
- 7 Preterm delivery and multiple births 22
- 8 Birth defects and genetic disorders 24
- 9 Maternal drugs affecting the fetus and newborn infant 26
- 10 Congenital infection 28

## Part 3 Delivery

- 11 Adaptation to extrauterine life 32
- 12 Neonatal resuscitation 34
- 13 Hypoxic–ischemic encephalopathy 38
- 14 Birth injuries 42

## Part 4 The normal newborn infant

- 15 Routine care of the newborn infant 44
- 16 Routine examination of the newborn infant 46
- 17 Neurologic examination 48
- 18 Care and support for parents 50
- 19 Feeding 52
- 20 Minor abnormalities in the first few days 54
- 21 Common problems of term infants 56

## Part 5 The sick newborn infant

- 22 Admission to the neonatal unit 58
- 23 Developmental care 60
- 24 Stabilizing the sick newborn infant 62
- 25 Respiratory support 64

## Part 6 The preterm infant

- 26 Preterm infants and their complications 68
- 27 Lung development and surfactant 70
- 28 Respiratory distress syndrome 72
- 29 Temperature control 74
- 30 Growth and nutrition 76
- 31 Intraventricular hemorrhage and periventricular leukomalacia 78
- 32 Patent ductus arteriosus (PDA) 80
- 33 Infection, jaundice, anemia, osteopenia of prematurity 82
- 34 Apnea, bradycardia and desaturations, retinopathy of prematurity 84
- 35 Necrotizing enterocolitis 86
- 36 Bronchopulmonary dysplasia 88
- 37 Outcome of very preterm infants 90

## Part 7 Neonatal problems

- 38 Respiratory distress in term infants 92
- 39 Upper airway disorders 96
- 40 Jaundice 98
- 41 Neonatal infection 102
- 42 Specific bacterial infections 104
- 43 Viral infections 106
- 44 Hypoglycemia and hyperglycemia 108
- 45 Inborn errors of metabolism 110
- 46 Gastrointestinal disorders 112
- 47 Gastrointestinal obstruction 116
- 48 Cardiac disorders 118
- 49 Renal and urinary tract anomalies diagnosed prenatally 122
- 50 Renal and urinary tract disorders 124
- 51 Genital disorders 128
- 52 Disorders of sexual differentiation 130
- 53 Anemia and polycythemia 132
- 54 Neutrophil and thrombotic disorders 134
- 55 Coagulation disorders 136
- 56 Dermatological disorders 138
- 57 Seizures and strokes 140
- 58 Neural tube defects and hydrocephalus 142
- 59 The hypotonic infant 144
- 60 Bone and joint disorders 146
- 61 Hearing and vision 148

## Part 8 Aspects of neonatal intensive care

- 62 Pain 150
- 63 Pharmacology 152
- 64 Quality assurance 154
- 65 Critical incidents 156
- 66 Evidence-based medicine 160
- 67 Ethics 162
- 68 Research and consent 164
- 69 When a baby dies 166
- 70 Discharge from hospital 168
- 71 Follow-up of high-risk infants 170

## Part 9 Global

- 72 Global overview 172

## Part 10 Transport

- 73 Transport of the sick newborn infant 176

## Part 11 Practical procedures

- 74 Intubation and chest tubes 178
- 75 Common practical procedures 180
- 76 Umbilical catheters and intraosseous cannulation 182
- 77 Central venous catheters and exchange transfusions 184
- 78 Cranial ultrasound 186
- 79 Echocardiology for the neonatologist 190
- 80 Gestational age, BP, severity of illness assessment 192

- Index 195
