Contents

<i>Introduction</i>	<i>xv</i>
Chapter 1 Windows 2000 Group Policy	1
Getting Started with Group Policies	1
Accessing the Local Group Policy	2
Group Policy Entities	4
Windows 2000 Group Policy Application	4
An Example of Group Policy Application	6
Examining the Resultant Set of Policies	8
Using the Group Policy Editor in Active Directory	11
Accessing the Group Policy Editor at the Site Level	13
Accessing the Group Policy Editor at the Domain Level	16
Accessing the Group Policy Editor at the OU Level	19
Verifying Your Cumulative Changes	32
How Group Policies Are Processed	33
Initial Policy Processing	33
Background Policy Processing	33
Policy Application via Remote Access or Slow Links	37
Advanced Manipulation of Group Policy	38
Using the “Show Configured Policies Only” Option	38
Using the “Show Policies Only” Option	40
Raising or Lowering the Priority of Multiple Policies	41
Disabling Group Policies	42
Block Inheritance	44
No Override	46
Filtering Group Policy Application	48
Deleting and Unlinking Group Policies	51
Using Group Policy to Affect Group Policy	53
Affecting the User Settings of Group Policy	53
Affecting the Computer Settings of Group Policy	54
Group Policy Loopback Processing	59
Reviewing Normal Group Policy Processing	60
Group Policy Merge Mode	60

	Group Policy Replace Mode61
	The Two Default Group Policies66
	Default Domain Policy66
	Default Domain Controllers Policy69
	Things That Aren't Group Policy but Look Like Group Policy71
	Terminal Services71
	Routing and Remote Access72
	Final Thoughts73
Chapter 2	Windows 2000 ADM Templates75
	Policies vs. Preferences76
	Common ADM Templates78
	Default ADM Templates79
	Office 2000, Office XP, and Other ADM Templates80
	Creating Your Own Custom ADM Changes87
	Appending a Custom ADM Change to an Existing ADM Template88
	Final Thoughts94
Chapter 3	Troubleshooting Group Policy95
	Under the Hood of Group Policies95
	Group Policies from a Server Perspective96
	Group Policies from a Site Perspective96
	Group Policies from a Domain Perspective97
	How Group Policy Objects Are "Born"98
	Verifying That GPCs and GPTs Are in Sync108
	Group Policies from a Workstation Perspective115
	Why Isn't Group Policy Applying?120
	Reviewing the Basics120
	Advanced Inspection129
	Using Tools to Troubleshoot Group Policy134
	Utilizing the Event Viewer134
	Turning On Verbose Logging135
	GPRESULT138
	FAZAM 2000 RFV142
	FAZAM 2000 Full Version148
	BindView's bv-Control for Windows 2000 and Active Directory149

	Group Policy (GPCHM)	150
	Final Thoughts	151
Chapter 4	Security Configuration and Analysis	153
	Local Security Policy	154
	Security Templates	156
	MMC Snap-in	156
	Incremental Security Templates	157
	Your Own Security Templates	161
	The Security Configuration and Analysis Snap-In	168
	Creating a Baseline	168
	Analyzing the Current Machine	169
	Analyzing the Results	170
	Applying the Template	172
	Using Secedit to Analyze and Apply the Template	174
	Applying Security Templates with Group Policy	178
	Deploying the Template	178
	Final Thoughts	184
Chapter 5	Profiles—Local, Roaming, and Mandatory	187
	What Is a User Profile?	188
	The NTUSER.DAT File	188
	Profile Folders	189
	The Default Local User Profile	192
	The Default Domain User Profile	195
	Roaming Profiles	197
	Setting Up Roaming Profiles	198
	Migrating Local Profiles to Roaming Profiles	203
	Non-roaming Folders	205
	Affecting Roaming Profiles with Computer Group Policy	206
	The Application of Profile Flowchart	211
	Affecting Roaming Profiles with User Group Policy	213
	Mandatory Profiles	217
	Establishing Mandatory Profiles from a Local Profile	218
	Mandatory Profiles from an Established Roaming Profile	221
	Forced Mandatory Profiles	224
	Final Thoughts	226

Chapter 6	IntelliMirror, Part 1: Redirected Folders, Offline Folders, Synchronization Manager, and Disk Quotas	.227
	Overview of Change and Configuration Management and IntelliMirror	.227
	Redirected Folders	.230
	Redirected My Documents	.230
	Redirecting My Pictures	.241
	Redirecting the Start Menu and the Desktop	.242
	Redirecting the Application Data	.243
	Troubleshooting Redirected Folders	.244
	Offline Files	.245
	Making Offline Files Available	.246
	Client Configuration of Offline Folders	.251
	Synchronization Manager	.255
	Using Synchronization Manager over a Slow Link	.258
	Synchronization Manager State Transitions	.258
	Configuring Synchronization Manager with Group Policy	.259
	Disk Quotas	.269
	Understanding File Ownership	.269
	Quotas and Groups	.273
	Designing and Implementing a Quota Strategy	.273
	Import and Export Quota Entries	.276
	Using Group Policy to Affect Quotas	.277
	Final Thoughts	.280
Chapter 7	IntelliMirror, Part 2: Software Deployment via Group Policies	.281
	Software Installation and Maintenance Overview	.282
	The Windows Installer	.283
	Understanding MSI packages	.284
	Getting Ready for Software Distribution	.286
	Utilizing an Existing MSI Package	.287
	Assigning versus Publishing	.290
	Package Targeting Strategy	.292
	Creating Your Own MSI Package	.304
	Understanding ZAP files	.311
	Removing Applications	.314
	Advanced Published or Assigned	.316

	Default Software Installation Properties	324
	Using Software Installation and Maintenance over Slow Links	327
	Using MSI Packages without Active Directory	328
	Affecting Windows Installer with Group Policy	331
	Fitting SMS 2.0 into Your Environment	337
	SMS Feature Rundown Comparison	338
	Software Installation and Maintenance and SMS Coexistence	340
	Final Thoughts	342
Chapter 8	Remote Installation Services	343
	RIS Theory	344
	Server Components	345
	Client Components	345
	Setting Up RIS Server	347
	Loading RIS	347
	Installing the Base Image	348
	Authorizing Your RIS Server	351
	Managing the RIS Server	351
	Installing Your First Client	353
	Creating a Remote Boot Disk	353
	Installing Your First Client	354
	The Remote Installation Prep Tool (RIPrep)	358
	How to Create Your Own Automated RIS Answer Files	361
	Creating a Sample Fully Automated Answer File	361
	Adding in the Windows 2000 Product ID	363
	Associating an Answer File with an Image	364
	Group Policy for Remote Installation Services	366
	Automatic Setup	367
	Custom Setup	368
	Restart Setup	368
	Tools	369
	Final Thoughts	370
Chapter 9	Windows 9x and NT System Policies	371
	Getting Started with System Policies	373

Accessing the System Policy Editor374
Windows NT System Policy Editor375
Windows 9x System Policy Editor380
Storing Policies387
Naming the Policies387
Storing the Policies388
ADM Templates390
Windows NT Default ADM Templates391
Windows 9x Default ADM Templates392
Appending to the Existing ADM Templates393
Adding New ADM Templates395
ADM Template Functions with 9x and NT Clients397
Custom Windows 2000 vs. Custom Windows NT/9x ADM Templates398
Migrating from 9x/NT System Policies to Windows 2000 Group Policies400
Manual Migration400
Using GPOLMIG to Migrate the System Policies405
Intermixing of System Policies and Group Policies for a Windows 2000 Client System411
User Account Contained within a Windows 2000 Domain; Computer Account Contained within a Windows NT Domain415
User Account Contained within a Windows NT Domain; Computer Account Contained within a Windows 2000 Domain417
Final Thoughts418
Appendix A Default Settings and Rights421
Default Templates and Their Rights421
Professional (Workstation)422
Server424
Domain Controller426
Upgraded Installations429

Appendix B	Intermixing Windows NT/9x System Policies and Windows 2000	
	Group Policies	.431
	Test-Case Scenarios	.432
	Considering the Options	.435
	Operating Systems	.435
	Types of Policies	.436
	Policy Configurations	.437
	Test Scenarios	.440
	Test 1: Windows 9x Client Machine; User Account in Windows NT Domain	.440
	Test 2: Windows 9x Client Machine; User Account in Windows 2000 Domain	.442
	Test 3: Windows NT Client Machine; User Account in Windows NT Domain; Computer Account in Windows NT Domain	.442
	Test 4: Windows NT Client Machine; User Account in Windows 2000 Domain; Computer Account in Windows NT Domain	.443
	Test 5: Windows NT Client Machine; User Account in Windows NT Domain; Computer Account in Windows 2000 Domain	.444
	Test 6: Windows NT Client Machine; User Account in Windows 2000 Domain; Computer Account in Windows 2000 Domain	.445
	Test 7: Windows 2000 Client Machine; User Account in Windows NT Domain; Computer Account in Windows NT Domain	.445
	Test 8: Windows 2000 Client Machine; User Account in Windows 2000 Domain; Computer Account in Windows NT Domain	.447
	Test 9: Windows 2000 Client Machine; User Account in Windows NT Domain; Computer Account in Windows 2000 Domain	.450
	Test 10: Windows 2000 Client Machine; User Account in Windows 2000 Domain; Computer Account in Windows 2000 Domain	.451
	Final Thoughts	.452

Appendix C	ADM Template Syntax	.457
	Creating a New Custom ADM Template	.457
	Variations on a Theme	.465
	Syntax Used to Update the Registry	.468
	Class	.468
	Keyname	.469
	Valuename	.469
	Syntax Used to Update the Group Policy	
	Editor Interface	.471
	STRING	.471
	CATEGORY	.473
	POLICY	.474
	PART	.475
	Additional Statements and Syntax	.487
	Comments	.487
	Expandabletext	.488
	Required	.488
	Maxlen	.488
	Explain	.489
	#if Version	.490
	Practical Application of Custom ADM	
	Templates	.491
	Example ADM Template: Custom Background	.492
	Example ADM Template: Custom Windows Explorer Options	.493
	Final Thoughts	.495
	<i>Index</i>	.497
