

Contents

| | |
|---|------------|
| <i>Introduction</i> | <i>xxi</i> |
| Chapter 1 Describe how a network works | 1 |
| 1.1 Describe the purpose and functions of various network devices | 2 |
| Exam Essentials | 5 |
| 1.2 Select the components required to meet a network specification | 6 |
| Exam Essentials | 8 |
| 1.3 Use the OSI and TCP/IP models and their associated protocols to explain how data flows in a network | 8 |
| Exam Essentials | 10 |
| 1.4 Describe common networked applications including web applications | 10 |
| Telnet | 11 |
| File Transfer Protocol (FTP) | 11 |
| Trivial File Transfer Protocol (TFTP) | 12 |
| Network File System (NFS) | 12 |
| Simple Mail Transfer Protocol (SMTP) | 12 |
| Line Printer Daemon (LPD) | 12 |
| X Window | 12 |
| Simple Network Management Protocol (SNMP) | 12 |
| Domain Name Service (DNS) | 13 |
| Dynamic Host Configuration Protocol (DHCP)/Bootstrap Protocol (BootP) | 13 |
| Exam Essentials | 14 |
| 1.5 Describe the purpose and basic operation of the protocols in the OSI and TCP models | 15 |
| The Layered Approach | 15 |
| Advantages of Reference Models | 16 |
| The OSI Reference Model | 16 |
| Exam Essentials | 19 |
| 1.6 Describe the impact of applications (Voice over IP and Video over IP) on a network | 19 |
| Transmission Control Protocol (TCP) | 19 |
| User Datagram Protocol (UDP) | 22 |
| Exam Essentials | 24 |
| 1.7 Interpret network diagrams | 25 |
| Getting CDP Timers and Holdtime Information | 25 |
| Gathering Neighbor Information | 26 |
| Documenting a Network Topology Using CDP | 31 |
| Exam Essentials | 33 |

xii Contents

| | |
|--|-----------|
| 1.8 Determine the path between two hosts across a network | 34 |
| Exam Essentials | 38 |
| 1.9 Describe the components required for network and Internet communications | 39 |
| Exam Essentials | 42 |
| 1.10 Identify and correct common network problems at layers 1, 2, 3, and 7 using a layered model approach | 43 |
| Determining IP Address Problems | 46 |
| Exam Essentials | 50 |
| 1.11 Differentiate between LAN/WAN operation and features | 51 |
| Ethernet Networking | 52 |
| Defining WAN Terms | 55 |
| WAN Connection Types | 56 |
| WAN Support | 57 |
| Exam Essentials | 60 |
| Review Questions | 61 |
| Answers to Review Questions | 63 |
| | |
| Chapter 2 Configure, verify, and troubleshoot a switch with VLANs and interswitch communications | 65 |
| 2.1 Select the appropriate media, cables, ports, and connectors to connect switches to other network devices and hosts | 68 |
| Straight-Through Cable | 68 |
| Crossover Cable | 68 |
| Rolled Cable | 69 |
| Exam Objectives | 72 |
| 2.2 Explain the technology and media access control method for Ethernet networks | 72 |
| Half- and Full-Duplex Ethernet | 74 |
| Ethernet at the Data Link Layer | 75 |
| Ethernet at the Physical Layer | 77 |
| Exam Objectives | 80 |
| 2.3 Explain network segmentation and basic traffic management concepts | 80 |
| Routers | 81 |
| Switches | 81 |
| Bridges | 82 |
| Exam Objectives | 82 |
| 2.4 Explain basic switching concepts and the operation of Cisco switches | 82 |
| Limitations of Layer 2 Switching | 83 |
| Bridging vs. LAN Switching | 84 |
| Three Switch Functions at Layer 2 | 84 |
| Exam Objectives | 88 |

| | |
|---|-----|
| 2.5 Perform and verify initial switch configuration tasks, including remote access management | 88 |
| Catalyst Switch Configuration | 89 |
| Exam Objectives | 92 |
| 2.6 Verify network status and switch operation using basic utilities (including: ping, traceroute, Telnet, SSH, arp, ipconfig), SHOW & DEBUG commands | 92 |
| Checking Network Connectivity | 93 |
| Verifying Cisco Catalyst Switches | 95 |
| Exam Objectives | 98 |
| 2.7 Identify, prescribe, and resolve common switched network media issues, configuration issues, auto negotiation, and switch hardware failures | 99 |
| Exam Objectives | 100 |
| 2.8 Describe enhanced switching technologies (including: VTP, RSTP, VLAN, PVSTP, 802.1q) | 100 |
| VTP Modes of Operation | 101 |
| Exam Objectives | 103 |
| 2.9 Describe how VLANs create logically separate networks and the need for routing between them | 103 |
| Broadcast Control | 105 |
| Security | 105 |
| Flexibility and Scalability | 106 |
| Exam Objectives | 109 |
| 2.10 Configure, verify, and troubleshoot VLANs | 109 |
| Assigning Switch Ports to VLANs | 111 |
| Exam Objectives | 112 |
| 2.11 Configure, verify, and troubleshoot trunking on Cisco switches | 112 |
| Trunking with the Cisco Catalyst 3560 Switch | 113 |
| Defining the Allowed VLANs on a Trunk | 114 |
| Changing or Modifying the Trunk Native VLAN | 115 |
| Exam Objectives | 116 |
| 2.12 Configure, verify, and troubleshoot interVLAN routing | 116 |
| Exam Objectives | 121 |
| 2.13 Configure, verify, and troubleshoot VTP | 123 |
| Troubleshooting VTP | 126 |
| Exam Objectives | 128 |
| 2.14 Configure, verify, and troubleshoot RSTP operation | 128 |
| Exam Objectives | 130 |
| 2.15 Interpret the output of various show and debug commands to verify the operational status of a Cisco switched network | 130 |

| | |
|---|-----|
| 2.16 Implement basic switch security (including: port security, trunk access, management vlan other than vlan1, etc.) | 130 |
| Configuring Trunk Ports | 132 |
| Port Security | 135 |
| Exam Objectives | 136 |
| Review Questions | 137 |
| Answers to Review Questions | 141 |

Chapter 3 Implement an IP addressing scheme and IP Services to meet network requirements in a medium-size Enterprise branch office network. 143

| | |
|--|-----|
| 3.1 Describe the operation and benefits of using private and public IP addressing | 145 |
| IP Terminology | 146 |
| Network Addresses: Special Purpose | 148 |
| Private IP Addresses | 149 |
| Exam Objectives | 150 |
| 3.2 Explain the operation and benefits of using DHCP and DNS | 150 |
| Dynamic Host Configuration Protocol (DHCP)/Bootstrap Protocol (BOOTP) | 150 |
| Exam Objectives | 152 |
| 3.3 Configure, verify, and troubleshoot DHCP and DNS operation on a router (including CLI/SDM) | 153 |
| Using DNS to Resolve Names | 154 |
| Exam Objectives | 156 |
| 3.4 Implement static and dynamic addressing services for hosts in a LAN environment | 156 |
| Bringing Up an Interface | 159 |
| Exam Objectives | 161 |
| 3.5 Calculate and apply an addressing scheme, including VLSM IP addressing design, to a network | 161 |
| VLSM Design | 162 |
| Exam Objectives | 163 |
| 3.6 Determine the appropriate classless addressing scheme using VLSM and summarization to satisfy addressing requirements in a LAN/WAN environment | 163 |
| Summarization | 170 |
| Exam Objectives | 171 |
| 3.7 Describe the technological requirements for running IPv6 in conjunction with IPv4 (including protocols, dual stack, tunneling, etc) | 171 |
| Why Do We Need IPv6? | 172 |
| The Benefits and Uses for IPv6 | 172 |

| | | |
|------------------|---|------------|
| | Dual Stacking | 173 |
| | 6to4 Tunneling | 174 |
| | Exam Objectives | 175 |
| 3.8 | Describe IPv6 addresses | 175 |
| | Shortened Expression | 176 |
| | Address Types | 177 |
| | Special Addresses | 178 |
| | Exam Objectives | 178 |
| 3.9 | Identify and correct common problems associated with IP addressing and host configurations | 179 |
| | Determining IP Address Problems | 182 |
| | Exam Objectives | 184 |
| | Review Questions | 185 |
| | Answers to Review Questions | 188 |
| Chapter 4 | Configure, verify, and troubleshoot basic router operation and routing on Cisco devices | 189 |
| 4.1 | Describe basic routing concepts (including packet forwarding, router lookup process) | 191 |
| | Using DNS to Resolve Names | 193 |
| | Exam Objectives | 195 |
| 4.2 | Describe the operation of Cisco routers (including router bootup process, POST, router components) | 195 |
| | The Router Boot Sequence | 196 |
| | Managing Configuration Register | 197 |
| | Exam Objectives | 199 |
| 4.3 | Select the appropriate media, cables, ports, and connectors to connect routers to other network devices and hosts | 199 |
| | Straight-Through Cable | 199 |
| | Crossover Cable | 200 |
| | Rolled Cable | 200 |
| | Router WAN Connections | 203 |
| | Serial Transmission | 203 |
| | Data Terminal Equipment and Data Communication Equipment | 204 |
| | Exam Objectives | 205 |
| 4.4 | Configure, verify, and troubleshoot RIPv2 | 205 |
| | Exam Objectives | 208 |
| 4.5 | Access and utilize the router to set basic parameters (including CLI/SDM) | 208 |
| | Overview of Router Modes | 209 |
| | Defining Router Terms | 210 |
| | Gathering Basic Routing Information | 210 |
| | Router and Switch Administrative Configurations | 211 |

| | |
|--|-----|
| Hostnames | 211 |
| Banners | 212 |
| Setting Passwords | 213 |
| Descriptions | 218 |
| Exam Objectives | 219 |
| 4.6 Connect, configure, and verify the operational status of a device interface | 219 |
| Bringing Up an Interface | 222 |
| Viewing, Saving, and Erasing Configurations | 225 |
| Verifying Your Configuration | 226 |
| Exam Objectives | 233 |
| 4.7 Verify device configuration and network connectivity using ping, traceroute, Telnet, SSH, or other utilities | 233 |
| Checking Network Connectivity | 234 |
| Exam Objectives | 238 |
| 4.8 Perform and verify routing configuration tasks for a static or default route given specific routing requirements | 238 |
| Exam Objectives | 242 |
| 4.9 Manage IOS configuration files (including save, edit, upgrade, restore) | 242 |
| Backing Up the Cisco Router Configuration | 242 |
| Restoring the Cisco Router Configuration | 244 |
| Erasing the Configuration | 245 |
| Exam Objectives | 246 |
| 4.10 Manage Cisco IOS | 246 |
| Verifying Flash Memory | 247 |
| Backing Up the Cisco IOS | 248 |
| Restoring or Upgrading the Cisco Router IOS | 249 |
| Exam Objectives | 249 |
| 4.11 Compare and contrast methods of routing and routing protocols | 250 |
| Routing Protocols | 251 |
| Exam Objectives | 252 |
| 4.12 Configure, verify, and troubleshoot OSPF | 252 |
| Configuring OSPF Areas | 254 |
| The <i>show ip ospf</i> Command | 255 |
| The <i>show ip ospf database</i> Command | 256 |
| The <i>show ip ospf interface</i> Command | 257 |
| The <i>show ip ospf neighbor</i> Command | 258 |
| Debugging OSPF | 259 |
| Exam Objectives | 261 |
| 4.13 Configure, verify, and troubleshoot EIGRP | 261 |
| Verifying EIGRP | 262 |
| Exam Objectives | 266 |

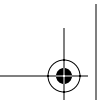

| | |
|---|-----|
| 4.14 Verify network connectivity (including: using ping, traceroute, and Telnet or SSH) | 266 |
| 4.15 Troubleshoot routing issues | 267 |
| Exam Objectives | 271 |
| 4.16 Verify router hardware and software operation using the SHOW and DEBUG commands | 271 |
| Using the ping Command | 272 |
| Using the traceroute Command | 274 |
| Debugging | 275 |
| Using the show processes Command | 277 |
| Exam Objectives | 278 |
| 4.17 Implement basic router security | 278 |
| Exam Objectives | 281 |
| Review Questions | 282 |
| Answers to Review Questions | 284 |

Chapter 5 Explain and select the appropriate administrative tasks required for a WLAN 285

| | |
|---|-----|
| 5.1 Describe standards associated with wireless media (including IEEE WI-FI Alliance, ITU/FCC) | 286 |
| The 802.11 Standards | 288 |
| Exam Objectives | 289 |
| 5.2 Identify and describe the purpose of the components in a small wireless network (including SSID, BSS, ESS) | 290 |
| 2.4GHz (802.11b) | 290 |
| 2.4GHz (802.11g) | 291 |
| 5GHz (802.11a) | 292 |
| Exam Objectives | 293 |
| 5.3 Identify the basic parameters to configure on a wireless network to ensure that devices connect to the correct access point | 293 |
| Service Sets | 294 |
| Exam Objectives | 295 |
| 5.4 Compare and contrast wireless security features and capabilities of WPA security (including open, WEP, WPA-1/2) | 296 |
| Open Access | 297 |
| WPA or WPA 2 Pre-Shared Key | 298 |
| Exam Objectives | 299 |
| 5.5 Identify common issues with implementing wireless networks (including Interface, Miss configuration) | 299 |
| Review Questions | 300 |
| Answers to Review Questions | 302 |

| | | |
|------------------|--|------------|
| Chapter 6 | Identify security threats to a network and describe general methods to mitigate those threats | 303 |
| 6.1 | Describe today's increasing network security threats and explain the need to implement a comprehensive security policy to mitigate the threats | 304 |
| | Recognizing Security Threats | 305 |
| | Exam Objectives | 307 |
| 6.2 | Explain general methods to mitigate common security threats to network devices, hosts, and applications | 308 |
| | Cisco's IOS Firewall | 308 |
| | Basic and Advanced Traffic Filtering | 309 |
| | Exam Objectives | 309 |
| 6.3 | Describe the functions of common security appliances and applications | 310 |
| | Security Appliances | 310 |
| | Lock and Key (Dynamic ACLs) | 310 |
| | Reflexive ACLs | 310 |
| | Time-Based ACLs | 311 |
| | Remarks | 311 |
| | Context-Based Access Control (Cisco IOS Firewall) | 313 |
| | Authentication Proxy | 314 |
| | Exam Objectives | 314 |
| 6.4 | Describe security recommended practices, including initial steps to secure network devices | 314 |
| | Exam Objectives | 315 |
| | Review Questions | 316 |
| | Answers to Review Questions | 318 |
| Chapter 7 | Implement, verify, and troubleshoot NAT and ACLs in a medium-sized Enterprise branch office network. | 319 |
| 7.1 | Describe the purpose and types of ACLs | 320 |
| | Exam Objectives | 321 |
| 7.2 | Configure and apply ACLs based on network filtering requirements (including CLI/SDM) | 322 |
| | Standard IP Access Lists | 322 |
| | Extended Access Lists | 329 |
| | Exam Objectives | 335 |
| 7.3 | Configure and apply ACLs to limit telnet and SSH access to the router using (including: SDM/CLI) | 335 |
| | Secure Shell (SSH) | 336 |
| | Exam Objectives | 337 |
| 7.4 | Verify and monitor ACLs in a network environment | 337 |
| | Exam Objectives | 339 |

| | | |
|------------------|--|------------|
| 7.5 | Troubleshoot ACL issues | 340 |
| 7.6 | Explain the basic operation of NAT | 340 |
| | Types of Network Address Translation | 341 |
| | Exam Objectives | 342 |
| 7.7 | Configure NAT for given network requirements | |
| | using (including CLI/SDM) | 342 |
| | Static NAT Configuration | 342 |
| | Dynamic NAT Configuration | 343 |
| | PAT (Overloading) Configuration | 343 |
| | Configuring NAT using the SDM | 344 |
| | Exam Objectives | 345 |
| 7.8 | Troubleshoot NAT issues | 345 |
| | Exam Objectives | 346 |
| | Review Questions | 347 |
| | Answers to Review Questions | 349 |
| Chapter 8 | Implement and verify WAN links | 351 |
| 8.1 | Describe different methods for connecting to a WAN | 352 |
| | Exam Objectives | 355 |
| 8.2 | Configure and verify a basic WAN serial connection | 355 |
| | Serial Transmission | 355 |
| | Data Terminal Equipment and Data Communication | |
| | Equipment | 356 |
| | High-Level Data-Link Control (HDLC) Protocol | 357 |
| | Configuring HDLC on Cisco Routers | 358 |
| | Point-to-Point Protocol (PPP) | 358 |
| | Configuring PPP on Cisco Routers | 359 |
| | Exam Objectives | 360 |
| 8.3 | Configure and verify Frame Relay on Cisco routers | 360 |
| | Frame Relay Implementation and Monitoring | 360 |
| | Exam Objectives | 365 |
| 8.3 | Troubleshoot WAN implementation issues | 366 |
| | Mismatched IP Addresses | 367 |
| | Troubleshooting Frame Relay Networks | 368 |
| | Exam Objectives | 369 |
| 8.4 | Describe VPN technology (including importance, benefits, role, impact, components) | 370 |
| | Exam Objectives | 371 |
| 8.5 | Configure and verify a PPP connection between | |
| | Cisco routers | 371 |
| | Verifying PPP Encapsulation | 372 |
| | Debugging PPP Authentication | 373 |
| | Exam Objectives | 374 |
| | Review Questions | 375 |
| | Answers to Review Questions | 378 |
