## ***Introduction*** ..... 1

About This Book.....	1
Conventions Used in This Book .....	2
What You're Not to Read.....	3
Foolish Assumptions .....	3
How This Book Is Organized.....	3
Part I: Overview of Logic .....	4
Part II: Formal Sentential Logic (SL) .....	4
Part III: Proofs, Syntax, and Semantics in SL.....	4
Part IV: Quantifier Logic (QL) .....	5
Part V: Modern Developments in Logic.....	5
Part VI: The Part of Tens .....	5
Icons Used in This Book.....	6
Where to Go from Here.....	6

## ***Part I: Overview of Logic*** ..... 7

### **Chapter 1: What Is This Thing Called Logic?** ..... 9

Getting a Logical Perspective .....	9
Bridging the gap from here to there.....	10
Understanding cause and effect .....	10
Everything and more .....	12
Existence itself .....	12
A few logical words .....	13
Building Logical Arguments.....	13
Generating premises .....	13
Bridging the gap with intermediate steps .....	14
Forming a conclusion.....	14
Deciding whether the argument is valid.....	15
Understanding enthymemes .....	15
Making Logical Conclusions Simple with the Laws of Thought.....	15
The law of identity .....	16
The law of the excluded middle .....	16
The law of non-contradiction.....	16
Combining Logic and Math .....	17
Math is good for understanding logic.....	17
Logic is good for understanding math.....	18

**Chapter 2: Logical Developments from Aristotle to the Computer . . . 19**

- Classical Logic — from Aristotle to the Enlightenment .....20
  - Aristotle invents syllogistic logic .....20
  - Euclid’s axioms and theorems .....23
  - Chrysippus and the Stoics .....24
  - Logic takes a vacation .....24
- Modern Logic — the 17th, 18th, and 19th Centuries .....25
  - Leibniz and the Renaissance .....25
  - Working up to formal logic .....26
- Logic in the 20th Century and Beyond .....29
  - Non-classical logic .....30
  - Gödel’s proof .....30
  - The age of computers .....31
  - Searching for the final frontier .....32

**Chapter 3: Just for the Sake of Argument . . . . . 33**

- Defining Logic .....33
  - Examining argument structure .....34
  - Looking for validation .....36
- Studying Examples of Arguments .....37
  - Ice cream Sunday .....37
  - Fifi’s lament .....38
  - Escape from New York .....38
  - The case of the disgruntled employee .....39
- What Logic Isn’t .....39
  - Thinking versus logic .....40
  - Reality — what a concept! .....41
  - The sound of soundness .....42
  - Deduction and induction .....43
  - Rhetorical questions .....44
- Whose Logic Is It, Anyway? .....46
  - Pick a number (math) .....46
  - Fly me to the moon (science) .....47
  - Switch on or off (computer science) .....47
  - Tell it to the judge (law) .....48
  - Find the meaning of life (philosophy) .....48

**Part II: Formal Sentential Logic (SL) ..... 49**

**Chapter 4: Formal Affairs . . . . . 51**

- Observing the Formalities of Sentential Logic .....51
  - Statement constants .....52
  - Statement variables .....52
  - Truth value .....53
- The Five SL Operators .....53
  - Feeling negative .....54
  - Displaying a show of ands .....55

Digging for or .....57  
 Getting iffy .....59  
 Getting even iffier .....61  
 How SL Is Like Simple Arithmetic .....63  
     The ins and outs of values .....63  
     There's no substitute for substitution.....64  
     Parenthetical guidance suggested .....65  
 Lost in Translation .....65  
     The easy way — translating from SL to English .....66  
     The not-so-easy way — translating from English to SL .....68

**Chapter 5: The Value of Evaluation . . . . . 73**

Value Is the Bottom Line .....74  
     Getting started with SL evaluation.....75  
     Stacking up another method.....76  
 Making a Statement.....77  
     Identifying sub-statements.....78  
     Scoping out a statement .....79  
     The main attraction: Finding main operators .....80  
 Eight Forms of SL Statements .....82  
 Evaluation Revisited .....83

**Chapter 6: Turning the Tables: Evaluating Statements with Truth Tables . . . . . 85**

Putting It All on the Table: The Joy of Brute Force.....86  
 Baby's First Truth Table .....87  
     Setting up a truth table.....87  
     Filling in a truth table.....89  
     Reading a truth table .....92  
 Putting Truth Tables to Work .....93  
     Taking on tautologies and contradictions.....93  
     Judging semantic equivalence.....94  
     Staying consistent .....96  
     Arguing with validity .....98  
 Putting the Pieces Together.....100  
     Connecting tautologies and contradictions.....101  
     Linking semantic equivalence with tautology .....102  
     Linking inconsistency with contradiction.....103  
     Linking validity with contradiction.....105

**Chapter 7: Taking the Easy Way Out: Creating Quick Tables . . . . . 107**

Dumping the Truth Table for a New Friend: The Quick Table.....108  
 Outlining the Quick Table Process.....109  
     Making a strategic assumption.....110  
     Filling in a quick table.....110  
     Reading a quick table.....111  
     Disproving the assumption .....112

Planning Your Strategy .....	113
Tautology .....	113
Contradiction .....	114
Contingent statement .....	114
Semantic equivalence and inequivalence .....	114
Consistency and inconsistency .....	115
Validity and invalidity .....	115
Working Smarter (Not Harder) with Quick Tables .....	116
Recognizing the six easiest types of statements to work with.....	117
Working with the four not-so-easy statement types .....	119
Coping with the six difficult statement types .....	122
<b>Chapter 8: Truth Grows on Trees .....</b>	<b>125</b>
Understanding How Truth Trees Work.....	125
Decomposing SL statements .....	126
Solving problems with truth trees.....	128
Showing Consistency or Inconsistency.....	128
Testing for Validity or Invalidity.....	131
Separating Tautologies, Contradictions, and Contingent Statements...	134
Tautologies .....	134
Contradictions .....	137
Contingent Statements .....	140
Checking for Semantic Equivalence or Inequivalence .....	140
 <b>Part III: Proofs, Syntax, and Semantics in SL .....</b>	 <b>145</b>
<b>Chapter 9: What Have You Got to Prove? .....</b>	<b>147</b>
Bridging the Premise-Conclusion Divide.....	148
Using Eight Implication Rules in SL .....	149
The $\rightarrow$ rules: Modus Ponens and Modus Tollens .....	150
The $\&$ rules: Conjunction and Simplification.....	153
The $\vee$ rules: Addition and Disjunctive Syllogism .....	155
The Double $\rightarrow$ Rules: Hypothetical Syllogism and Constructive Dilemma .....	158
<b>Chapter 10: Equal Opportunities: Putting Equivalence Rules to Work .....</b>	<b>161</b>
Distinguishing Implications and Equivalences.....	162
Thinking of equivalences as ambidextrous .....	162
Applying equivalences to part of the whole .....	162
Discovering the Ten Valid Equivalences .....	163
Double Negation (DN).....	163
Contraposition (Contra).....	164

Implication (Impl).....	165
Exportation (Exp).....	166
Commutation (Comm).....	167
Association (Assoc).....	168
Distribution (Dist).....	169
DeMorgan's Theorem (DeM).....	170
Tautology (Taut).....	172
Equivalence (Equiv).....	172
<b>Chapter 11: Big Assumptions with Conditional and Indirect Proofs .....</b>	<b>175</b>
Conditioning Your Premises with Conditional Proof.....	176
Understanding conditional proof.....	177
Tweaking the conclusion.....	178
Stacking assumptions.....	180
Thinking Indirectly: Proving Arguments with Indirect Proof.....	181
Introducing indirect proof.....	182
Proving short conclusions.....	183
Combining Conditional and Indirect Proofs.....	184
<b>Chapter 12: Putting It All Together: Strategic Moves to Polish Off Any Proof .....</b>	<b>187</b>
Easy Proofs: Taking a Gut Approach.....	188
Look at the problem.....	188
Jot down the easy stuff.....	189
Know when to move on.....	190
Moderate Proofs: Knowing When to Use Conditional Proof.....	191
The three friendly forms: $x \rightarrow y$ , $x \vee y$ , and $\sim(x \& y)$ .....	191
The two slightly-less-friendly forms: $x \leftrightarrow y$ and $\sim(x \leftrightarrow y)$ .....	193
The three unfriendly forms: $x \& y$ , $\sim(x \vee y)$ , and $\sim(x \rightarrow y)$ .....	194
Difficult Proofs: Knowing What to Do When the Going Gets Tough.....	195
Choose carefully between direct and indirect proof.....	195
Work backwards from the conclusion.....	196
Go deeper into SL statements.....	198
Break down long premises.....	202
Make a shrewd assumption.....	204
<b>Chapter 13: One for All and All for One .....</b>	<b>205</b>
Making Do with the Five SL Operators.....	206
Downsizing — A True Story.....	208
The tyranny of power.....	208
The blow of insurrection.....	209
The horns of dilemma.....	209
The (Sheffer's) stroke of genius.....	210
The moral of the story.....	212

## **Chapter 14: Syntactical Maneuvers and Semantic Considerations . . . . .213**

Are You WFF Us or Against Us? .....	214
Understanding WFFs (with a few strings attached).....	215
Relaxing the rules .....	216
Separating WFFs from non-WFFs .....	216
Comparing SL to Boolean Algebra .....	217
Reading the signs .....	218
Doing the math .....	220
Understanding rings and things .....	221
Exploring syntax and semantics in Boolean algebra .....	221

## ***Part IV: Quantifier Logic (QL)*.....223**

### **Chapter 15: Expressing Quantity with Quality: Introducing Quantifier Logic . . . . .225**

Taking a Quick Look at Quantifier Logic .....	226
Using individual constants and property constants.....	226
Incorporating the SL operators .....	229
Understanding individual variables .....	230
Expressing Quantity with Two New Operators .....	231
Understanding the universal quantifier .....	231
Expressing existence.....	232
Creating context with the domain of discourse .....	233
Picking out Statements and Statement Forms.....	235
Determining the scope of a quantifier .....	236
Discovering bound variables and free variables .....	236
Knowing the difference between statements and statement forms .....	237

### **Chapter 16: QL Translations . . . . .239**

Translating the Four Basic Forms of Categorical Statements .....	239
“All” and “some” .....	240
“Not all” and “no” .....	242
Discovering Alternative Translations of Basic Forms .....	244
Translating “all” with $\exists$ .....	245
Translating “some” with $\forall$ .....	245
Translating “not all” with $\exists$ .....	246
Translating “no” with $\forall$ .....	246
Identifying Statements in Disguise.....	247
Recognizing “all” statements .....	247
Recognizing “some” statements .....	248
Recognizing “not all” statements .....	248
Recognizing “no” statements .....	249

**Chapter 17: Proving Arguments with QL .....251**

- Applying SL Rules in QL .....252
  - Comparing similar SL and QL statements .....252
  - Transferring the eight implication rules from SL into QL .....253
  - Employing the ten SL equivalence rules in QL .....255
- Transforming Statements with Quantifier Negation (QN) .....256
  - Introducing QN .....256
  - Using QN in proofs .....257
- Exploring the Four Quantifier Rules .....259
  - Easy rule #1: Universal Instantiation (UI) .....260
  - Easy rule #2: Existential Generalization (EG) .....262
  - Not-so-easy rule #1: Existential Instantiation (EI) .....265
  - Not-so-easy rule #2: Universal Generalization (UG).....270

**Chapter 18: Good Relations and Positive Identities .....275**

- Relating to Relations .....276
  - Defining and using relations .....276
  - Connecting relational expressions .....277
  - Making use of quantifiers with relations .....278
  - Working with multiple quantifiers .....279
  - Writing proofs with relations .....280
- Identifying with Identities .....283
  - Understanding identities .....284
  - Writing proofs with identities .....285

**Chapter 19: Planting a Quantity of Trees .....287**

- Applying Your Truth Tree Knowledge to QL .....287
  - Using the decomposition rules from SL .....287
  - Adding UI, EI, and QN.....289
  - Using UI more than once .....291
- Non-Terminating Trees .....295

***Part V: Modern Developments in Logic .....299***

**Chapter 20: Computer Logic .....301**

- The Early Versions of Computers .....302
  - Babbage designs the first computers .....302
  - Turing and his UTM.....302
- The Modern Age of Computers .....304
  - Hardware and logic gates .....305
  - Software and computer languages .....307

<b>Chapter 21: Sporting Propositions: Non-Classical Logic</b> . . . . .	<b>309</b>
Opening up to the Possibility .....	310
Three-valued logic .....	310
Multi-valued logic .....	311
Fuzzy logic .....	313
Getting into a New Modality .....	315
Taking Logic to a Higher Order .....	317
Moving Beyond Consistency .....	318
Making a Quantum Leap .....	320
Introducing quantum logic .....	320
Playing the shell game .....	321
<b>Chapter 22: Paradox and Axiomatic Systems</b> . . . . .	<b>323</b>
Grounding Logic in Set Theory .....	323
Setting things up .....	324
Trouble in paradox: Recognizing the problem with set theory ...	325
Developing a solution in the Principia Mathematica .....	326
Discovering the Axiomatic System for SL .....	327
Proving Consistency and Completeness .....	328
Consistency and completeness of SL and QL .....	329
Formalizing logic and mathematics with the Hilbert Program .....	329
Gödel's Incompleteness Theorem .....	330
The importance of Gödel's theorem .....	331
How he did it .....	331
Pondering the Meaning of It All .....	332
 <b>Part VI: The Part of Tens</b> .....	 <b>333</b>
<b>Chapter 23: Ten Quotes about Logic</b> . . . . .	<b>335</b>
<b>Chapter 24: Ten Big Names in Logic</b> . . . . .	<b>337</b>
Aristotle (384–322 BC) .....	337
Gottfried Leibniz (1646–1716) .....	337
George Boole (1815–1864) .....	338
Lewis Carroll (1832–1898) .....	338
Georg Cantor (1845–1918) .....	338
Gottlob Frege (1848–1925) .....	339
Bertrand Russell (1872–1970) .....	339
David Hilbert (1862–1943) .....	339
Kurt Gödel (1906–1978) .....	340
Alan Turing (1912–1954) .....	340

**Chapter 25: Ten Tips for Passing a Logic Exam . . . . .341**

- Breathe .....341
- Start by Glancing over the Whole Exam.....341
- Warm up with an Easy Problem First .....342
- Fill in Truth Tables Column by Column.....342
- If You Get Stuck, Jot Down Everything .....342
- If You REALLY Get Stuck, Move On .....342
- If Time Is Short, Finish the Tedious Stuff .....343
- Check Your Work.....343
- Admit Your Mistakes.....343
- Stay Until the Bitter End.....344

***Index*.....345**
