	PREFACE	ix
1	OBJECT-ORIENTED SIMULATION AND OPERAS	1
	<i>G. K. Yeh, K. K. Bagchi, J. B. Burr, and A. M. Peterson</i>	
1.1	Introduction	1
1.2	Features of C++	14
1.3	Design of OPERAS	29
1.4	Conclusion	46
	References	48
2	OBJECT-ORIENTED SIMULATION LANGUAGES AND ENVIRONMENTS: A FOUR-LEVEL ARCHITECTURE	53
	<i>John A. Miller, Walter D. Potter, Krys J. Kochut, and Deepa Ramesh</i>	
2.1	Introduction	54
2.2	Background	56
2.3	The Object-Oriented Paradigm and the Core Model	60
2.4	Multilevel Framework	61
2.5	Levels in a QDS System	64
2.6	Summary and Conclusions	79
2.7	Appendix: Example C++ Packages	81
	References	84
3	THE OBJECT FLOW MODEL FOR OBJECT-ORIENTED SIMULATION AND DATABASE APPLICATION MODELING	89
	<i>Lissa F. Pollacia and Lois M. L. Delcambre</i>	
3.1	Introduction	90
3.2	Background and Related Work	93

3.3	The Object Flow Model (OFM)	96	
3.4	Object Flow Model for Simulation	117	
3.5	Relationship of the OFM to Other Work	120	
3.6	Conclusions and Future Work	121	
3.7	Appendix:		
	Worked Example—Resort Reservation System	122	
	References	133	
4	REUSABLE SIMULATION MODELS IN AN OBJECT-ORIENTED FRAMEWORK		139
	<i>Tag Gon Kim and Myung Soo Ahn</i>		
4.1	Introduction	139	
4.2	Framework for Simulation Model Reuse	141	
4.3	DEVS Theory in Hierarchical Modeling/Simulation	144	
4.4	DEVSim++: Object-Oriented, Hierarchical Composition Framework	148	
4.5	Reusable Model Development in DEVSim++	153	
4.6	Conclusions	162	
	References	163	
5	OBJECT-ORIENTED FRAMEWORKS FOR MULTILEVEL SIMULATION MODELING		165
	<i>Douglas A. Popken and Atish P. Sinha</i>		
5.1	Introduction	165	
5.2	Motivations for Multilevel Modeling Techniques	166	
5.3	Simulation Time Management and World Views	171	
5.4	Multilevel Modeling in Smalltalk-80	172	
5.5	Multilevel Modeling in C++	181	
5.6	Conclusions and Future Directions	193	
	References	194	
6	DESIGN STRATEGIES FOR OBJECT-ORIENTED SIMULATION TESTBEDS THAT SUPPORT SOFTWARE INTEGRATION		197
	<i>Michael L. Hilton and Craig S. Anken</i>		
6.1	Introduction	198	
6.2	Testbed Integration Strategies	200	
6.3	The AAITT: An Environment for Building Ad Hoc Testbeds	208	
6.4	Recommendations	217	
	References	218
