List of Tables	ix
List of Figures	xi
Preface	xv
1 Introduction: Global versus Local Statistics	1
1.1 The Consequences of Ignoring Nonlinearity	4
1.2 Power Transformations	5
1.3 Nonparametric and Semiparametric Techniques	8
1.4 Outline of the Text	12
2 Smoothing and Local Regression	13
2.1 Simple Smoothing	14
2.1.1 Local Averaging	15
2.1.2 Kernel Smoothing	21
2.2 Local Polynomial Regression	26
2.3 Nonparametric Modeling Choices	31
2.3.1 The Span	31
2.3.2 Polynomial Degree and Weight Function	34
2.3.3 A Note on Interpretation	36
2.4 Statistical Inference for Local Polynomial Regression	39
2.5 Multiple Nonparametric Regression	45
2.6 Conclusion	47
2.7 Exercises	47
3 Splines	49
3.1 Simple Regression Splines	50
3.1.1 Basis Functions	52
3.2 Other Spline Models and Bases	54
3.2.1 Quadratic and Cubic Spline Bases	55
3.2.2 Natural Splines	57

3.2.3	B-splines	58
3.2.4	Knot Placement and Numbers	59
3.2.5	Comparing Spline Models	61
3.3	Splines and Overfitting.	62
3.3.1	Smoothing Splines	64
3.3.2	Splines as Mixed Models.	69
3.3.3	Final Notes on Smoothing Splines	73
3.3.4	Thin Plate Splines.	74
3.4	Inference for Splines	75
3.5	Comparisons and Conclusions	80
3.6	Exercises	82
4	Automated Smoothing Techniques	85
4.1	Span by Cross-Validation	86
4.2	Splines and Automated Smoothing	89
4.2.1	Estimating Smoothing Through the Likelihood	90
4.2.2	Smoothing Splines and Cross-Validation	90
4.3	Automated Smoothing in Practice	93
4.4	Automated Smoothing Caveats	105
4.5	Exercises	107
5	Additive and Semiparametric Regression Models	109
5.1	Additive Models	110
5.2	Semiparametric Regression Models	112
5.3	Estimation	113
5.3.1	Backfitting	113
5.4	Inference	117
5.5	Examples	120
5.5.1	Congressional Elections.	120
5.5.2	Feminist Attitudes.	129
5.6	Discussion	133
5.7	Exercises	134
6	Generalized Additive Models	137
6.1	Generalized Linear Models.	137
6.2	Estimation of GAMS.	140
6.3	Statistical Inference	141
6.4	Examples	143
6.4.1	Logistic Regression: The Liberal Peace.	143
6.4.2	Ordered Logit: Domestic Violence	146
6.4.3	Count Models: Supreme Court Overrides	150
6.4.4	Survival Models: Race Riots	154
6.5	Discussion	157
6.6	Exercises	157

7	Extensions of the Semiparametric Regression Model	161
7.1	Mixed Models	162
7.2	Bayesian Smoothing	166
7.3	Propensity Score Matching	170
7.4	Conclusion	175
8	Bootstrapping	177
8.1	Classical Inference	178
8.2	Bootstrapping – An Overview	178
8.2.1	Bootstrapping	179
8.2.2	An Example: Bootstrapping the Mean	183
8.2.3	Bootstrapping Regression Models	185
8.2.4	An Example: Presidential Elections	187
8.3	Bootstrapping Nonparametric and Semiparametric Regression Models	189
8.3.1	Bootstrapping Nonparametric Fits	189
8.3.2	Bootstrapping Nonlinearity Tests	190
8.4	Conclusion	192
8.5	Exercises	193
9	Epilogue	195
	Appendix: Software	197
	Bibliography	203
	Author Index	209
	Subject Index	211
