

TABLE OF CONTENTS

HOW TO USE THIS BOOKxii
GETTING STARED WITH EXCEL MACROS2
Introduction to Macros	2
Record a Macro	4
Run a Macro	6
Create and Launch a Keyboard Shortcut	8
Delete a Macro from a Workbook	10
Delete from the Personal Macro Workbook	12
Assign a Macro to a Toolbar Button	14
Assign a Macro to a Menu	16
Set Macro Security	18
USING THE VISUAL BASIC EDITOR20
An Introduction to the Visual Basic Editor	20
Activate the Visual Basic Editor	22
Arrange the Visual Basic Editor Windows	24
Set Properties for a Project	26
Set Display Options for the Code Window	28
Add a New Module	30
Remove a Module	32
Rename a Macro	34
Create a Startup Macro	36
Hide a Macro	38
Assign a Digital Signature to a Macro	40
Update a Recorded Macro	42
VBA PROGRAMMING BASICS44
An Introduction to VBA	44
Create a Subroutine	50
Create a Function	52
Declare a Variable	54
Perform Mathematical Calculations	56
Create a Constant	58

Comment Your Code	60
Join Two Strings	62

WORKING WITH THE EXCEL OBJECT MODEL64

An Introduction to the Excel Object Model	64
Using the Object Browser	66
Create an Object Variable	68
Change the Properties of an Object	70
Compare Object Variables	72
Using an Object Method	74
Display a Built-in Dialog Box	76

USING VARIABLES AND ARRAYS78

Assign Values to Variables	78
Using Global Variables	80
Declare an Array	82
Declare a Multidimensional Array	84
Convert a List into an Array	86
Redimension an Array	88
Create a User-Defined Data Type	90

ADDING CONTROL STATEMENTS92

Execute a Task While a Condition is True	92
Perform Multiple Tasks Until a Condition is Met	94
Execute Tasks a Specific Number of Times	96
Using the For Each Next Loop	98
Conditionally Execute a Group of Statements	100
Execute a Statement Based upon the Value	102
Jump to a Specific Location in a Macro	104
Conditionally Call a Subroutine	106

USING BUILT-IN FUNCTIONS AND STATEMENTS108

Using Excel Worksheet Functions	108
Using the MsgBox Function	110
Using the InputBox Function	112

TABLE OF CONTENTS

Retrieve Current Date and Time	114
Determine the Amount of Time between Dates	116
Format a Date Expression	118
Format a Numeric Expression	120
Remove Extra Spacing from a String	122
Return a Portion of a String	124
Compare Two Strings	126

DEBUGGING MACROS128

Debugging Basics	128
Debug a Procedure with Inserted Break Points	130
Using Watch Expressions to Debug a Procedure	132
Step through a Procedure	134
Resume Execution if an Error is Encountered	136
Process a Runtime Error	138

WORKING WITH OTHER WORKBOOKS AND FILES . . .140

Open a Workbook	140
Open a Text File as a Workbook	142
Open a File Requested by the User	144
Save a Workbook	146
Save Workbook in Format Specified by User	148
Determine if a Workbook is Open	150
Close a Workbook	152
Create a New Workbook	154
Delete a File	156
Find a File	158

WORKING WITH WORKSHEETS160

Add a Sheet	160
Delete a Sheet	162
Move a Sheet	164

Copy and Paste a Sheet	166
Hide a Sheet	168
Change the Name of a Sheet	170
Save a Sheet to Another File	172
Protect a Worksheet	174
Protect a Chart	176
Print a Sheet	178
Sort Worksheets by Name	180

DEFINING RANGES182

Using the Range Property	182
Using the Cells Property	184
Combine Multiple Ranges	186
Using the Offset Property	188
Delete a Range of Cells	190
Hide a Range of Cells	192
Specify the Name of a Range	194
Resize a Range	196
Insert a Range	198
Set the Width of Columns in a Range	200
Set the Height of Rows in a Range	202
Convert a Column of Text into Multiple Columns	204
Find the Intersection of Two Ranges	206

WORKING WITH CELLS208

Cut and Paste Ranges of Cells	208
Copy and Paste Ranges of Cells	210
Custom Paste Values in Cells	212
Add Comments to a Cell	214
Automatically Fill a Range of Cells	216
Copy a Range to Multiple Sheets	218
Place Borders around a Range of Cells	220
Find Specific Cell Values	222
Find and Replace Values in Cells	224

TABLE OF CONTENTS

CUSTOMIZING DIALOG BOXES, MENUS, AND TOOLBARS226

UserForm Basics	226
Working with CommandBars	228
Create a Custom Dialog Box	230
Call a Custom Dialog Box from a Procedure	232
Capture Input from a Custom Dialog Box	234
Validate Input from a Dialog Box	238
Create Custom UserForm Controls	240
Create a UserForm Template	242
Create a Custom Toolbar	244
Add Controls to a Toolbar	246
Create a Custom Menu	248
Add Items to a Menu	250
Create a Shortcut Menu	252
Delete Custom Toolbars and Shortcut Menus	254

WORKING WITH CHARTS256

Chart Basics	256
Create a Chart Sheet	258
Embed a Chart within a Worksheet	260
Apply Chart Wizard Settings to a Chart	262
Add a New Data Series to a Chart	264

Format Chart Text	266
Create Charts with Multiple Chart Types	268
Determine Variations in a Series of Data	270
Add a Data Table to the Chart	272
Customize the Chart Axis	274

AUTOMATING PROCEDURES WITH EXCEL EVENTS . . .276

Understanding Excel Events	276
Run a Procedure as a Workbook Opens	280
Run a Procedure before Closing a Workbook	282
Run a Procedure before Saving a Workbook	284
Run a Procedure When Excel Creates a Workbook	286
Monitor a Range of Cells for Changes	290
Execute a Procedure at a Specific Time	292
Execute a Procedure When You Press Keys	294
Run a Procedure When Right-Clicking a Chart	296

APPENDIX A: VBA QUICK REFERENCE298

VBA and Excel Object Model Quick Reference	298
--	-----

APPENDIX B: ABOUT THE CD-ROM322

What Is on the CD-ROM	322
Using the E-Version of This Book	324
Wiley Publishing, Inc. End-User License Agreement	326
