## Part I: Hacking Cameras

<b>Chapter 1: Building Triggers . . . . .</b>	<b>3</b>
Making a Wired Remote Trigger . . . . .	3
How Does a Remote Trigger Work? . . . . .	5
Parts You Need . . . . .	6
Tools You Need . . . . .	11
Drilling the Case . . . . .	14
Soldering the Wires . . . . .	15
Fitting the Pieces Together . . . . .	17
Making a Delay Trigger . . . . .	17
Parts You Need . . . . .	19
Tools You Need . . . . .	22
Circuit Diagram . . . . .	22
Prototyping the Circuit . . . . .	26
Soldering the Wires . . . . .	28
Putting It Together . . . . .	29
Making an Interval Trigger . . . . .	29
Parts You Need . . . . .	30
Tools You Need . . . . .	31
Circuit Diagram . . . . .	31
Connecting the Triggers to a Point-and-Shoot Camera . . . . .	34
Parts You Need . . . . .	34
Tools You Need . . . . .	34
Taking the Camera Apart . . . . .	35
Looking for the Shutter Switch . . . . .	37
Determining the Shutter Button Pins . . . . .	39
Soldering the Trigger Interface . . . . .	40
Modifying the Camera Case . . . . .	42
Reassembling the Camera . . . . .	44
Extending the Remote Switch . . . . .	44

<b>Chapter 2: Adding a Tripod Socket to Your Camera</b> . . . . .	<b>47</b>
Parts You Need . . . . .	49
Tools You Need . . . . .	50
Assembly . . . . .	51
Making the Tripod Socket . . . . .	51
Measuring the Base of the Camera . . . . .	52
Cutting the New Base. . . . .	53
Placing the Socket Directly Under the Lens . . . . .	55
Drilling the Hole for the Socket Screw . . . . .	55
Gluing the Tripod Socket into the Wood Base . . . . .	56
Gluing the Wood Base to the Camera . . . . .	58
<b>Chapter 3: Accessing Raw Sensor Data</b> . . . . .	<b>61</b>
Understanding Unconverted Real Sensor Data . . . . .	63
Enabling Raw Mode on Nikon COOLPIX. . . . .	66
Getting the Software . . . . .	68
Setting Raw Diagnostics Mode. . . . .	70
Capturing Raw Files . . . . .	71
Watch Out for Side-Effects. . . . .	72
Enabling Raw Mode on Casio Digital Cameras . . . . .	76
Enabling Raw Mode on QV-2000UX, QV-3000EX, QV-4000, and QV-5700 Digital Cameras. . . . .	77
Enabling Raw Mode on QV-3500EX . . . . .	78
Enabling Raw Mode on Exilim P600, Exilim P700, and Exilim EX-Z55. . . . .	78
Decoding Raw Files . . . . .	79
Getting the Decoder Software . . . . .	79
Creating the Decoder Executable for DOS and Windows . . . . .	80
Compiling the Decoder for Linux . . . . .	85
Running the Decoder . . . . .	88
Automating the Decoder with Batch Processing . . . . .	90
<b>Chapter 4: Hacking Power</b> . . . . .	<b>93</b>
Interfacing to SLRs . . . . .	93
Parts You Need . . . . .	93
Tools You Need . . . . .	94
Canon DR-400 Pin-Out Diagram . . . . .	94
Cutting the Cable . . . . .	96
Wiring the Connectors . . . . .	97
Interfacing to Point-and-Shoot Digital Cameras . . . . .	98
Parts You Need . . . . .	98
Tools You Need . . . . .	98
Making the Fake Battery . . . . .	99
Building the Connector. . . . .	99
Modifying the Camera . . . . .	99

Making a Portable Battery Pack . . . . .	100
Parts You Need. . . . .	100
Tools You Need . . . . .	102
Assembly. . . . .	103
Hacking the Lenmar Mach 1 Speed Charger Battery Adapter Plates. . . . .	103
Parts You Need. . . . .	103
Tools You Need . . . . .	104
Picking the Right Battery Adapter Plate . . . . .	105
Disassembling the Adapter Plate . . . . .	105
Soldering the Wires . . . . .	106
Drilling a Hole and Cutting a Slot . . . . .	106
Reassembling the Adapter Plate. . . . .	106
Powering on Your Camera . . . . .	106
<b>Chapter 5: Controlling Your Digital Camera from Afar . . . . .</b>	<b>107</b>
Basic Infrared Signal Characteristics. . . . .	108
Using a Universal Remote Control with Your Camera. . . . .	110
Searching for the Right Remote Code (Automatic Programming). . . . .	111
What Code Was Set? . . . . .	112
Manually Programming the Universal Remote . . . . .	113
Programming a Teachable Universal Remote Controller with a Camera Remote . . . . .	113
Learning Commands from a Camera Remote . . . . .	114
Using Nevo with Your Camera. . . . .	116
Programming Nevo with Your Camera's Remote . . . . .	116
Using Total Remote with Your Camera . . . . .	121
Programming Total Remote with Your Camera's Remote. . . . .	123
Using Pre-Made Remote Files from the Internet. . . . .	126
<b>Chapter 6: Improving Your Canon EOS Digital Rebel . . . . .</b>	<b>131</b>
Getting the Hacked Firmware . . . . .	132
Getting the Official Digital Rebel Firmware . . . . .	134
Updating the Camera Firmware . . . . .	134
Copy the Firmware to a CompactFlash Card . . . . .	134
Installing the Firmware onto the Digital Rebel . . . . .	136
Using the Hacked Firmware . . . . .	139
High Speed Shooting at ISO 3200 . . . . .	139
Auto-Focus Modes . . . . .	140
Flash Exposure Compensation (FEC) . . . . .	142
Review Enhancement . . . . .	147
Custom Functions . . . . .	148
Known Issues . . . . .	157
Non-Functional Custom Functions . . . . .	158
Reverting to Canon's Firmware . . . . .	162

**Part II: Hacking Lenses**

**Chapter 7: Using Accessory Lenses . . . . . 165**

- Understanding Magnification . . . . . 167
- Understanding Perspective . . . . . 170
  - Using Wide-Angle Lenses. . . . . 172
  - Using Telephoto Lenses . . . . . 174
- Filter Thread . . . . . 179
- Mounting Thread . . . . . 181
- Step-Up and Step-Down Rings . . . . . 181
- Mounting to a Point-and-Shoot Camera . . . . . 183
- Mounting to an SLR Lens . . . . . 184
- Mounting to a Camcorder . . . . . 186

**Chapter 8: Making an Accessory Lens Adapter . . . . . 187**

- Parts You Need . . . . . 187
- Tools You Need. . . . . 188
- Assembly . . . . . 189
  - Measuring and Cutting the Pipe . . . . . 189
  - Test Fitting . . . . . 190
  - Gluing Everything Together. . . . . 191
- Trying Out the Lens Adapter . . . . . 194
- Using a P&S Camera like an SLR . . . . . 195

**Chapter 9: Changing the Lens Magnification . . . . . 197**

- Understanding Lens Elements and Groups . . . . . 197
- Reconfiguring the Cokin 0.5x Wide-Angle Lens . . . . . 199
  - Disassembling the Lens . . . . . 199
  - Reconfiguring the Lens Elements . . . . . 200
  - What's Next?. . . . . 200

**Chapter 10: Making Your Own Pinhole Lens . . . . . 201**

- Why Does It Work? . . . . . 201
- Making the Pinhole Lens . . . . . 203
  - Parts and Tools You Need . . . . . 203
  - Measuring the Cap . . . . . 204
  - Drilling the Preliminary Hole . . . . . 206
  - Creating a Pinhole Using a Needle . . . . . 207
  - Trying It Out . . . . . 209
  - Lens Comparison . . . . . 209
- Shooting with the Pinhole Lens . . . . . 212
  - Focal Length. . . . . 212
  - Aperture . . . . . 212

Determining Exposure Time . . . . .	213
Tips on Shooting a Pinhole Photograph . . . . .	215
<b>Chapter 11: Extending the Lens on Canon EOS Cameras . . . . .</b>	<b>217</b>
The Problem . . . . .	217
Jury-Rigging the Lens . . . . .	220
Modifying the Lens Permanently . . . . .	220
Tools You Need . . . . .	221
Modifying the Lens Mount . . . . .	221
<b>Chapter 12: Making Reverse Macro Adapters . . . . .</b>	<b>223</b>
Parts You Need . . . . .	224
Manual Adapter . . . . .	224
Automatic Adapter . . . . .	226
Tools You Need . . . . .	228
Manual Adapter . . . . .	229
Automatic Adapter . . . . .	229
Optional Tools . . . . .	229
Making a Manual Adapter . . . . .	233
Disassembling the Sacrificial T-Mount Adapter . . . . .	235
Gluing the Reversing Ring to the T-Mount . . . . .	235
Making an Automatic Adapter . . . . .	237
Dismantling the Sacrificial Extension Tubes . . . . .	238
Modifying the Extension Tubes . . . . .	243
Threading the Ribbon Cable . . . . .	245
Soldering the Wires . . . . .	247
Putting the Reverse Macro Adapter Together . . . . .	250
Gluing the Step-Down Ring . . . . .	253
Trying Out Your Adapters . . . . .	254
Lens Selection . . . . .	255
<b>Chapter 13: Modifying the Canon EF-S Lens for Use on Canon EF Mounts . . . . .</b>	<b>257</b>
Tools You Need . . . . .	261
Hacking Away . . . . .	262
Disassembling the Lens . . . . .	262
Sawing the Plastic Mount . . . . .	264
Reassemble the Lens . . . . .	265
Trying the Lens on EOS SLRs . . . . .	267
Digital SLRs . . . . .	269
APS SLRs . . . . .	269
Full-Frame SLRs . . . . .	269

**Part III: Creative Photography Hacks**

**Chapter 14: Hacking with Filters . . . . . 273**

- Physical Characteristics . . . . . 276
  - Circular Screw-On Filters . . . . . 276
  - Square and Rectangle Filters . . . . . 278
  - Gelatin Filters . . . . . 279
- Putting a Filter Thread on an Accessory Lens . . . . . 280
  - Tools You Need . . . . . 280
  - Parts You Need. . . . . 280
  - Gluing the Step-Up Ring to the Lens. . . . . 282
- Making Filters Out of Plain Glass . . . . . 283
  - Diffusion Filters . . . . . 284
  - Fog Filter . . . . . 287
  - Color Filters . . . . . 288
  - Star Filter . . . . . 289
  - Infrared Filter . . . . . 292

**Chapter 15: Shooting Infrared Pictures with Your Digital Camera . . . . 293**

- Understanding the Light Spectrum . . . . . 294
- Can My Camera Shoot Infrared Photographs? . . . . . 296
  - Infrared Photography with Film. . . . . 296
  - Digital Infrared Photography . . . . . 299
  - How Well Does Your Digital Camera Perceive Infrared Light? . . . . . 301
- Shooting Infrared Photographs . . . . . 302
  - Enhancing Infrared Photography with Filters. . . . . 302
  - Compensating Exposure for Filters . . . . . 306
  - Bracketing Your Shots . . . . . 308
  - Focusing on the Subject . . . . . 311
  - Using a Larger Depth-of-Field . . . . . 313
  - Picking a Color Mode . . . . . 314
  - Color Infrared . . . . . 315
  - Manipulating the Resulting Photograph . . . . . 315
  - Black and White. . . . . 315

**Chapter 16: Eliminating the IR Blocking Filter from Your Digital Camera. . . . . 317**

- Exclusive IR Cameras . . . . . 317
- Understanding the IR-Blocking Filter. . . . . 318
- Modifying Your Digital Camera . . . . . 318
  - Converting the Sony DSC-P92 to Infrared . . . . . 318
  - Testing the Infrared Digital Camera . . . . . 336
- Shooting Visible Light with an IR Camera . . . . . 340

## Part IV: Building Fun Camera Tools

<b>Chapter 17: Building a Car Camera Mount</b> . . . . .	<b>345</b>
Parts You Need . . . . .	346
Tools You Need. . . . .	349
Taking Apart the Child Safety Bracket . . . . .	349
Drilling the Mounting Plate . . . . .	352
Assembling the Car Camera Mount . . . . .	353
Installing the Camera Mount in Your Car . . . . .	355
Possible Enhancement . . . . .	355
<b>Chapter 18: Building a Headrest Camera Mount</b> . . . . .	<b>357</b>
Parts You Need . . . . .	357
Tools You Need. . . . .	358
Removing the Headrest . . . . .	359
Sizing the Camera Mount . . . . .	361
Drilling the Holes . . . . .	364
Test-Fitting the Camera Mount . . . . .	369
Installing the Camera Mount in Your Car . . . . .	370
<b>Chapter 19: Building a Spycam Mount for Your Bicycle</b> . . . . .	<b>373</b>
Many Different “Bikes” Out There. . . . .	373
Security Is Key . . . . .	374
Buy or Build? . . . . .	375
Videotape, Film, and Motion Aren’t Always Compatible . . . . .	376
Commercial Camera Mount Manufacturers . . . . .	376
Do-It-Yourself Projects on the Web . . . . .	377
Adding a Spycam. . . . .	377
Parts You Need. . . . .	378
Converting the Light Mount and Mount the Camera . . . . .	378
Connecting a 9V Battery to a Wireless Camera. . . . .	379
Storing the Video Receiver and Video Recorder . . . . .	380
Plugging the Video Receiver into the Battery Pack . . . . .	381
Plugging the Video Receiver into the Video Recorder . . . . .	381
Recording . . . . .	381
<b>Chapter 20: Building a Camera Stabilizer</b> . . . . .	<b>383</b>
Build or Buy? . . . . .	383
Tripods versus Stabilizers. . . . .	384
Still Photography versus Video Stabilization. . . . .	385
Building Your Own Steady Cam Stabilizer . . . . .	386
Parts You Need . . . . .	388
Tools You Need. . . . .	389
Assembling the Handle . . . . .	389
Drilling the End Caps . . . . .	389
Building the Camera Mount . . . . .	390

Adding the Counterweight . . . . .	392
Putting It All Together . . . . .	394
Using Your Steady Cam . . . . .	394
<b>Chapter 21: Building a Flash Bracket. . . . .</b>	<b>395</b>
How Do Flashes Work? . . . . .	397
Hot Lights versus Flash Brackets . . . . .	397
Does Shutter Speed Matter with Digital Cameras? . . . . .	397
Building the Bracket . . . . .	398
Buy or Build? . . . . .	398
Parts You Need. . . . .	398
Tools You Need . . . . .	398
Cutting the Aluminum into Strips . . . . .	399
Preparing the First Aluminum Strip . . . . .	399
Preparing the Second and Third Strips . . . . .	399
Attaching Ball Sockets. . . . .	400
Attaching Bracket to Tripod. . . . .	400
Using the Bracket . . . . .	400
<b>Chapter 22: Building a Monopod . . . . .</b>	<b>403</b>
Parts You Need . . . . .	403
Tools You Need. . . . .	405
Assembly . . . . .	405
<b>Chapter 23: Making a 500-Watt Home Studio Light . . . . .</b>	<b>411</b>
Parts You Need . . . . .	411
Tools You Need. . . . .	413
Assembly . . . . .	414
Mechanical Operation . . . . .	419
Photography with a Home Studio Light. . . . .	421
White Balance . . . . .	421

## **Part V: Flash Memory Hacks**

<b>Chapter 24: Modifying the CF Type I to PC Card Type II Adapter . . . .</b>	<b>425</b>
Parts You Need . . . . .	428
Tools You Need. . . . .	428
Making the Modification. . . . .	429
Using the Adapter . . . . .	434
<b>Chapter 25: Removing the 4GB Microdrive from the Creative Nomad MuVo<sup>2</sup> MP3 Player. . . . .</b>	<b>435</b>
MuVo Models . . . . .	437
Downloading the Firmware . . . . .	437
Which Firmware Version Should I Use? . . . . .	437

Tools You Need . . . . .	438
Disassembling the MuVo <sup>2</sup> . . . . .	438
Taking the Case Apart . . . . .	438
Removing the Microdrive . . . . .	440
Putting the MuVo <sup>2</sup> Back Together . . . . .	443
Substituting CF Cards . . . . .	444
Bootting Up . . . . .	444
Using the Microdrive . . . . .	449
<b>Chapter 26: Removing the Microdrive from the Rio Carbon 5GB MP3 Player . . . . .</b>	<b>451</b>
Overview of the Rio Carbon . . . . .	451
Disassembling the Device . . . . .	452
Tools You Need . . . . .	453
Taking the Case Apart . . . . .	453
Removing the Drive . . . . .	454
Putting the Device Back Together . . . . .	456
Installing Firmware . . . . .	457
Installing a Different Microdrive . . . . .	457
Using the 5GB Microdrive in Your Digital Camera . . . . .	458
Why It Might Not Work with Your Digital Camera . . . . .	458
<b>Chapter 27: Removing the 4GB Microdrive from the Apple iPod mini . . . . .</b>	<b>459</b>
Disassembling the iPod mini . . . . .	460
Tools You Need . . . . .	460
Getting Inside the Enclosure . . . . .	460
Removing the Microdrive . . . . .	467
Putting the iPod mini Back Together . . . . .	469
Resetting the iPod mini . . . . .	470
Updating the Firmware . . . . .	471
<b>Appendix A: Soldering Basics . . . . .</b>	<b>475</b>
<b>Appendix B: Circuit Symbols . . . . .</b>	<b>483</b>
<b>Appendix C: Glass Cutting Basics . . . . .</b>	<b>485</b>
<b>Appendix D: Photographer's Glossary . . . . .</b>	<b>493</b>
Index . . . . .	495
