Introduction, xi

Joseph S. Coselli and Scott A. LeMaire

Part I: General Principles

Chapter 1: Historical perspective – the evolution of aortic arch surgery, 3

Denton A. Cooley

Chapter 2: Surgical anatomy, 12

Thoralf M. Sundt, III and

Carl G. Clingman

Chapter 3: Natural history: evidence-based indications for operation, 19

John A. Elefteriades

Part II: Imaging Techniques

Chapter 4: Aortography, 31

Charles Trinh, Mark Skolkin, and

Richard Fisher

Chapter 5: Computed tomography, 39

Salvatore G. Viscomi, Alejandra

Duran-Mendicuti, Frank J. Rybicki, and

Stephen Ledbetter

Chapter 6: Magnetic resonance imaging, 58

Amgad N. Makaryus and

Lawrence M. Boxt

Chapter 7: Echocardiography, 73

Benjamin A. Kohl, John G. Augoustides, and

Albert T. Cheung

Part III: Strategies for Intra-operative Management and Neurologic Protection

Chapter 8: Anesthetic management, 91

John R. Cooper, Jr

Chapter 9: Options for exposure: from minimal access to total aortic replacement, 98

Lars G. Svensson

Chapter 10: Monitoring the brain: near-infrared spectroscopy, 114

Marc A.A.M. Schepens and

Frans G.J. Waanders

Chapter 11: Monitoring the brain: jugular venous oxygen saturation, 125

Jock N. McCullough

Chapter 12: Monitoring the brain: transcranial Doppler, 128

Harvey L. Edmonds, Jr, Mary H. Thomas,

Brian L. Ganzel, and Erle H. Austin, III

Chapter 13: Hypothermic circulatory arrest, 135

M. Arisan Ergin

Chapter 14: Direct antegrade cerebral perfusion, 153

Teruhisa Kazui

Chapter 15: Antegrade cerebral perfusion via the axillary artery, 159

Hitoshi Ogino

Chapter 16: Retrograde cerebral perfusion, 167

Robert S. Bonser and

Deborah K. Harrington

Chapter 17: Perfusion strategies for brain protection: rationale for a selective approach, 177

Lars G. Svensson

Part IV: Options for Aortic Repair

Chapter 18: Distal anastomosis first: the traditional approach, 187
Jean E. Bachet

Chapter 19: Alternative approaches: the arch- first technique, 199
Nicholas T. Kouchoukos and Paolo Masetti

Chapter 20: Alternative approaches: the proximal- first technique, 208
Ryuji Tominaga

Chapter 21: Alternative approaches: trifurcated graft technique, 216
David Spielvogel, James C. Halstead, and Randall B. Griep

Chapter 22: Alternative approaches: intraluminal aortic ring, 225
Rodrigo de Castro Bernardes

Chapter 23: Alternative approaches: endovascular stent-grafts, 235
Martin Czerny and Martin Grabenwoger

Chapter 24: Surgical adhesives, 241
Scott A. LeMaire, Stacey A. Carter, and Joseph S. Coselli

Part V: Surgical Treatment of Specific Problems

Chapter 25: Congenital anomalies in adults, 249
Lars G. Svensson

Chapter 26: Acute dissection, 258
John A. Elefteriades

Chapter 27: Chronic dissection, 266
Stephen Westaby and Gabriele Bertoni

Chapter 28: Degenerative aneurysms, 283
John Bozinovski, Scott A. LeMaire, and Joseph S. Coselli

Chapter 29: Trauma, 297
Matthew J. Wall, Jr, Dawn E. Jaroszewski, and Kenneth L. Mattox

Chapter 30: Atherosclerotic occlusive disease, 307
Geza Mozes, Peter Gloviczki, and Ying Huang

Chapter 31: Inflammatory diseases, 322
Motomi Ando

Chapter 32: Resection for malignancy, 328
Clemens Aigner, Marek Ehrlich, Walter Klepetko, and Ernst Wolner

Part VI: Neurological Complications

Chapter 33: Pathophysiology, 337
Christopher J. Barreiro and William A. Baumgartner

Chapter 34: Evaluation and management, 343
Eugene C. Lai

Chapter 35: Outcomes measurement: neuropsychological testing, 350
Robert A. Baker, John Murkin, and David A. Stump

Chapter 36: Outcomes measurement: biochemical markers, 371
Per Johnsson

Index, 381
