HISTORICAL DEVELOPMENT AND PERSPECTIVES OF THE SERIES	v
PREFACE TO VOLUME 2	vii
CONTRIBUTORS TO VOLUME 2	xvii
TITLES OF VOLUMES 1–44 IN THE <i>METAL IONS IN BIOLOGICAL SYSTEMS</i> SERIES	xxi
CONTENTS OF VOLUMES IN THE <i>METAL IONS IN LIFE SCIENCES</i> SERIES	xxiii
1 BIOGEOCHEMISTRY OF NICKEL AND ITS RELEASE INTO THE ENVIRONMENT	1
<i>Tiina M. Nieminen, Liisa Ukonmaanaho, Nicole Rausch, and William Shotyk</i>	
1. Introduction	2
2. Chemistry of Nickel	2
3. Ancient and Modern Uses of Nickel	6
4. Sources of Atmospheric Nickel	6
5. Deposition and Fate of Atmospheric Nickel	7
6. Historical Records of Nickel Deposition	14
7. Bioavailability and Mobility of Nickel in Soils	17
8. Summary and Conclusions	21
Abbreviations	21
References	22

2	NICKEL IN THE ENVIRONMENT AND ITS ROLE IN THE METABOLISM OF PLANTS AND CYANOBACTERIA	31
	<i>Hendrik Küpper and Peter M. H. Kroneck</i>	
1.	Introduction	32
2.	Nickel as a Micronutrient for Plants and Cyanobacteria	37
3.	Nickel as an Environmental Pollutant and Its Effects on Plants	40
4.	Nickel Hyperaccumulation	48
5.	Outlook	53
	Acknowledgments	54
	Abbreviations	54
	References	55
3	NICKEL ION COMPLEXES OF AMINO ACIDS AND PEPTIDES	63
	<i>Teresa Kowalik-Jankowska, Henryk Kozłowski, Etelka Farkas, and Imre Sóvágó</i>	
1.	Introduction	64
2.	Complexes of Amino Acids and Derivatives	66
3.	Complexes of Peptides and Related Ligands	76
4.	Formation of Nickel(II) Complexes under Biological Conditions: Model Calculations in Multicomponent Systems	94
5.	Conclusions	96
	Abbreviations	97
	References	98
4	COMPLEX FORMATION OF NICKEL(II) AND RELATED METAL IONS WITH SUGAR RESIDUES, NUCLEOBASES, PHOSPHATES, NUCLEOTIDES, AND NUCLEIC ACIDS	109
	<i>Roland K. O. Sigel and Helmut Sigel</i>	
1.	Introduction	110
2.	Nickel(II)–Sugar Interactions	112
3.	Interactions of Nickel(II) with Nucleobase Residues	118
4.	Complexes of Nickel(II) with Phosphates	128
5.	Nickel(II) Complexes of Nucleotides	131
6.	Complexes of Some Less Common Nucleotides	144
7.	Complexes of Some Nucleotide Derivatives and Analogs	149
8.	Mixed Ligand Complexes Containing a Nucleotide	159
9.	Nickel(II) Binding in Nucleic Acids	165
10.	Concluding Remarks	168

Acknowledgments	169
Abbreviations and Definitions	169
References	172
5 SYNTHETIC MODELS FOR THE ACTIVE SITES OF NICKEL-CONTAINING ENZYMES	181
<i>Jarl Ivar van der Vlugt and Franc Meyer</i>	
1. Introduction	181
2. Models for Cofactor F ₄₃₀	182
3. Models for Sulfur-Rich Nickel Sites	191
4. Models for the Urease Active Site	214
5. Models for Acireductone Reductase	229
6. Concluding Remarks	230
Acknowledgments	230
Abbreviations	230
References	232
6 UREASE: RECENT INSIGHTS ON THE ROLE OF NICKEL	241
<i>Stefano Ciurli</i>	
1. Introduction: Urease and Its Biological Significance	242
2. The Biochemistry of Urease	243
3. Structural Studies on Bacterial Ureases	244
4. The Structure-Based Mechanism of Urease	267
5. Conclusions	273
Acknowledgments	273
Abbreviations	273
References	274
7 NICKEL IRON HYDROGENASES	279
<i>Wolfgang Lubitz, Maurice van Gastel, and Wolfgang Gärtner</i>	
1. Introduction to Hydrogenases	280
2. Biochemistry and Molecular Biology	283
3. Crystallization and X-Ray Structure Analysis	291
4. Spectroscopic Investigations	295
5. Electrochemistry	306
6. Hydrogenase Function and the Catalytic Cycle	309
7. Conclusions and Outlook	312
Acknowledgments	314
Abbreviations	314
References	315

8 METHYL-COENZYME M REDUCTASE AND ITS NICKEL CORPHIN COENZYME F₄₃₀ IN METHANOGENIC ARCHAEA	323
<i>Bernhard Jaun and Rudolf K. Thauer</i>	
1. Introduction	324
2. Structure and Properties of Coenzyme F ₄₃₀	328
3. Molecular Properties of Methyl-Coenzyme M Reductase	335
4. Catalytic Properties of Methyl-Coenzyme M Reductase	345
Acknowledgments	350
Abbreviations	350
References	351
9 ACETYL-COENZYME A SYNTHASES AND NICKEL-CONTAINING CARBON MONOXIDE DEHYDROGENASES	357
<i>Paul A. Lindahl and David E. Graham</i>	
1. Introduction	358
2. Structure and Function of Carbon Monoxide Dehydrogenases	361
3. Sequence Analysis and Phylogeny of Carbon Monoxide Dehydrogenases	369
4. Acetyl-Coenzyme A Synthases/Carbon Monoxide Dehydrogenases	373
5. Sequence Analysis and Phylogeny of the α Subunit	381
6. Corrinoid Iron-Sulfur Proteins	382
7. Acetyl-Coenzyme A Decarbonylase/Synthases	384
8. Physiological Roles and Evolution of Acetyl-Coenzyme A Synthase/Carbon Monoxide Dehydrogenase Proteins	386
9. Origins and Evolution of ACDS, ACS/CODH, and CODH Complexes	392
Acknowledgments	393
Abbreviations	394
Appendices	395
References	411
10 NICKEL SUPEROXIDE DISMUTASE	417
<i>Peter A. Bryngelson and Michael J. Maroney</i>	
1. Introduction	418
2. Molecular Biology	422
3. Structural Biology	426
4. Mechanism	429

5. Conclusions	438
Acknowledgments	438
Abbreviations and Definitions	439
References	439
11 BIOCHEMISTRY OF THE NICKEL-DEPENDENT GLYOXALASE I ENZYMES	445
<i>Nicole Sukdeo, Elisabeth Daub, and John F. Honek</i>	
1. Introduction	446
2. Biochemical Investigations of Glyoxalase I	450
3. Biophysical and Mechanistic Studies of Glyoxalase I	453
4. Glyoxalase I Genes and Protein Sequence Comparisons	460
5. Glyoxalase I as a Member of the $\beta\alpha\beta\beta$ Superfamily of Proteins	463
6. Other Aspects of Glyoxalase I	464
7. Conclusions	465
Acknowledgments	466
Abbreviations	466
References	467
12 NICKEL IN ACIREDUCTONE DIOXYGENASE	473
<i>Thomas C. Pochapsky, Tingting Ju, Marina Dang, Rachel Beaulieu, Gina M. Pagani, and Bo OuYang</i>	
1. Introduction	474
2. The Methionine Salvage Pathway	475
3. One Protein, Two Enzymes: Acireductone Dioxygenase from <i>Klebsiella oxytoca</i>	477
4. Homologs of Acireductone Dioxygenase from Other Organisms	481
5. Known Acireductone Dioxygenase Structures	483
6. Spectroscopic Probes of Acireductone Dioxygenase Enzyme Active Sites	486
7. Enzymatic Studies of Acireductone Dioxygenase	489
8. Mechanistic Considerations: What is the Role of Ni(II) in Acireductone Dioxygenase Activity?	490
9. Structurally and Functionally Related Enzymes	493
10. Future Directions	495
Acknowledgments	497
Abbreviations	497
References	498

13	THE NICKEL-REGULATED PEPTIDYL PROLYL CIS/TRANS ISOMERASE SlyD	501
	<i>Frank Erdmann and Gunter Fischer</i>	
	1. Introduction	502
	2. SlyD Belongs to the Peptidyl Prolyl <i>cis/trans</i> Isomerases	503
	3. Insights into the Biological Role of SlyD	513
	4. Conclusions	515
	Abbreviations and Definitions	515
	References	516
14	CHAPERONES OF NICKEL METABOLISM	519
	<i>Soledad Quiroz, Jong K. Kim, Scott B. Mulrooney, and Robert P. Hausinger</i>	
	1. Introduction to Nickel Metabolism	520
	2. Nickel Metallochaperones	530
	3. Molecular Chaperones Involved in Nickel Metabolism	534
	4. Conclusions and Remaining Questions	538
	Acknowledgments	539
	Abbreviations	539
	References	540
15	THE ROLE OF NICKEL IN ENVIRONMENTAL ADAPTATION OF THE GASTRIC PATHOGEN HELICOBACTER PYLORI	545
	<i>Florian D. Ernst, Arnoud H. M. van Vliet, Manfred Kist, Johannes G. Kusters, and Stefan Bereswill</i>	
	1. Introduction	546
	2. Nickel Enzymes and Environmental Adaptation	554
	3. Nickel Uptake Systems	560
	4. Mechanisms of Nickel Regulation	562
	5. Protection of Nickel Metabolism	566
	6. Metal Metabolism as Drug Target: Therapeutic Considerations	568
	7. Conclusions	570
	Abbreviations	570
	References	571
16	NICKEL-DEPENDENT GENE EXPRESSION	581
	<i>Konstantin Salnikow and Kazimierz S. Kasprzak</i>	
	1. Introduction	582
	2. Genetic and Epigenetic Changes in Nickel-Exposed Cells	585

3. Alteration of Gene Expression Following Nickel-Induced Lung Injury	587
4. Nickel-Induced Allergy and Gene Expression	592
5. Nickel-Induced Expression of Erythropoietin	592
6. Alteration of Transcription Factors and Signaling Pathways	593
7. Changes in Gene Expression and Nickel Carcinogenesis	607
8. Conclusions	608
Acknowledgments	609
Abbreviations	609
References	610
17 NICKEL TOXICITY AND CARCINOGENESIS	619
<i>Kazimierz S. Kasprzak and Konstantin Salnikow</i>	
1. Introduction	621
2. An Overview of Nickel Toxicity	621
3. Nickel-Induced Carcinogenesis	638
4. Conclusion	645
Acknowledgments	647
Abbreviations	647
References	647
SUBJECT INDEX	661
