

# Contents

1	Dynamics of the reorganization behavior of organolithium compounds <b>Gideon Fraenkel</b>	1
2	Organolithiums as useful synthetic intermediates for tandem reactions <b>Alvaro J. Vázquez, Raquel G. de Waisbaum and Norma Sbarbati Nudelman</b>	63
3	The chemistry of acyllithium derivatives <b>Carmen Najera and Miguel Yus</b>	139
4	Intramolecular carbolithiation reactions <b>Francisco J. Fañanás and Roberto Sanz</b>	295
5	Structure and dynamics of chiral lithium amides <b>Göran Hilmersson and Johan Granander</b>	381
6	Chiral lithium amides in asymmetric synthesis <b>Daniel Pettersen, Mohamed Amedjkouh and Per Ahlberg</b>	411
7	The lithium metal reduction of $\pi$ -conjugated hydrocarbons and fullerenes <b>Ivan Arahamian and Mordecai Rabinovitz</b>	477
8	Aspects of the synthesis, structure and reactivity of lithium enolates <b>Jean-Yves Valnot and Jacques Maddaluno</b>	525
9	Chemistry of ketone dilithio dianions <b>Ilhyong Ryu and Hiroyuki Nakahira</b>	647
	Author index	675
