

Contents

Acknowledgments	x
Introduction	xix
Chapter 1: Jump Start Spring 2	1
All About Spring	2
Focus on Simplicity	2
Applying Spring	2
Creating a Modularized Application	3
Using Spring to Configure a Modularized Application	8
Wiring Beans Automatically by Type	14
Understanding Spring's Inversion of Control (IoC) Container	16
Adding Aspect-Oriented Programming to the Mix	20
Adding a Logging Aspect	21
Beyond Plumbing — Spring API Libraries	25
Using Spring APIs To Facilitate Application Creation	26
Summary	27
Chapter 2: Designing Spring Applications	29
Overview of the PIX Album-Management System	30
The PIX System Requirements	31
Discovering the Domain Model	33
The PixUser POJO	33
The Affiliate POJO	35
The Picture Object	36
The Album POJO	37
The Comment POJO	38
The POJO Relationships	39
The Importance of Unit Testing	45
POJO-Based Design and Containerless Unit Testing	46
Regression Testing	46
Working with a Unit-Testing Framework	47
Summary	52

Contents

Chapter 3: Spring Persistence Using JPA	53
Java Persistence	54
JDBC Architecture	54
Traditional JDBC Approach	56
DAO — Unifying Data Access	64
Spring DAO Support	64
Spring Exception Translation	73
Spring and JPA	74
Entities	74
Spring as a JPA Container	81
About JPA APIs	81
JPA the Easy Way — Using Annotations	81
SPRING JPA Exception Translation	82
SPRING JPA DAOs	83
Spring JPA Configuration	84
Persistence and the PIX Domain Model	87
Persisting The PixUser POJO	87
Implementing PixUser Repository DAO	89
Implementing the Album Repository DAO	90
Testing the Persistence Layer	91
Spring Test Support	92
Executing the Persistence Test Suite	92
Testing the PIX Repositories	92
Summary	93
Chapter 4: Using Spring MVC to Build Web Pages	95
The MVC Architectural Pattern	95
The Sample Application's Architecture	96
Spring MVC Development	99
Processing Web Requests with Controllers	99
Presenting the Model with a View	105
Getting Data from the User with Forms	109
A Basic Form-Submission Workflow	109
Using the Form View	112
When Things Go Wrong	123
Summary	124
Chapter 5: Advanced Spring MVC	125
Submitting a Form Across Multiple Pages	126
Adding Pictures to an Album	126
Developing Wizard Form Pages	127

Contents

Implementing Wizard Form Actions	131
Validating Data Submitted Through a Wizard	132
Uploading Files	133
Getting More Stuff Done with the Same Controller	134
Creating a Different View	137
Your First View	138
Saving an Album to PDF	139
Generating an RSS Feed	142
Personalization	146
Retrieving Text Labels from a Message Source	146
Displaying Application Labels in a Different Language	148
Changing the Application's Language Settings	150
Allowing the User to Personalize the Application	151
Summary	154
Chapter 6: Spring Web Flow	155
<hr/>	
Examining a Sample Work Flow for Loan Applications	156
Introducing Spring Web Flow	157
How SWF Works with Spring MVC	158
Launching Flows	159
Implementing SWF in the PixWeb Application	161
The Login Flow	161
The Album Creation Flow	176
Implementing Actions	178
Implementing Views	181
Testing Flows	183
Architectural Overview	185
Advanced Topics	186
REST-Style URLs	187
Flow Execution Repositories	188
Flow Execution Repository Implementations	189
Subflows and Attribute Mappers	189
Flow Execution Listeners	189
Exception Handlers	190
Summary	190
Chapter 7: Ajax and Spring: Direct Web Remoting Integration	191
<hr/>	
Web 2.0: The World of Ajax	192
Ajax Basics	192
Client-Side Ajax Development with JavaScript	194
The XMLHttpRequest Object	194

Contents

Introducing Direct Web Remoting 2	199
Downloading DWR 2	201
Working with DWR 2	202
Integrating Spring and DWR 2	210
Summary	229
Chapter 8: Spring and JMS — Message-Driven POJOs	231
JMS Concepts	232
JMS Messaging Domains	232
Point-To-Point Messaging	232
Publish/Subscribe Messaging	233
Persistence versus Durability	234
The JMS Message	234
Message Header	234
Message Properties	235
Message Selectors	235
Message Body	235
Producing JMS Messages	236
Consuming JMS Messages	236
Synchronous Message Consumption	236
Asynchronous Message Consumption	237
The Spring JMS Framework	238
The Spring JMS Packages	238
The JmsTemplate Class	239
Message Listener Containers	240
Destinations	241
Transactions	241
Configuring Message-Driven POJOS	241
Realizing the JMS Use Case	242
Modeling Message-Driven POJOs	242
The PIX Web POJOS	242
Changing the PIX Web POJOs Into Message-Driven POJOs	245
A JMS Provider — Apache ActiveMQ	247
The JMS Template in the PIX Web Application	253
Summary	256
Chapter 9: Spring Web Services and Remoting	259
Web Service Benefits	260
Introducing Web Services	260

 Contents

Web Services Architecture	261
The Network Layer	261
XML	261
SOAP	262
WSDL	262
UDDI	264
Web Services Interactions	265
Web Services Interoperability	266
Java Web Service Technologies	266
Java Web Application Web Services	266
Spring Remoting	268
SOAP Frameworks	268
Java-to-XML Bindings	269
XFire	269
Spring Web Services with XFire	270
Realizing the PIX AffiliateManagement Use Case	270
Invoking Web Services	277
SOAP Handlers	278
Testing SOAP Handlers with XFire	278
Summary	284
Chapter 10: Web Service Consumer and Interoperation with .NET	285
Creating Web Service Consumers — Overview	286
Describing Web Services with WSDL	286
Creating a Web Service Consumer with XFire	287
The XFire Maven Plugin	287
Invoking Web Service Methods via XFire-Generated Stubs	287
Understanding the E-Mail-Validation Web Service Consumer in PIX	288
Examining a WSDL Document	290
WSDL Description of a Web Service Endpoint	291
Generating Web Service Stubs from WSDL Using XFire	292
The XFire WsGen Tool	294
Generated Interface for Invocation of Web Service	295
Creating a Web Service Consumer with XFire-Generated Stubs	295
Add a Web Service Consumer to PIX	300
Web Service Interoperability	304
WS-I and Web Service Interoperability	304
Expose PIX Service for .NET Web Service Consumers	304
Summary	313

Contents

Chapter 11: Rapid Spring Development with Spring IDE	315
Brief Feature Overview	316
Installing and Setting Up Your Eclipse Environment	317
Installing Spring IDE	317
Preparing an Eclipse Project	319
Support for Spring Beans Configuration Files	325
Viewing Spring Bean Definitions	325
Validating Spring Bean Definition Files	328
XML Editing	332
Searching for and Navigating to Bean Definitions	335
Visual Support for Spring AOP Configurations	337
Enabling AOP Support for Spring Projects	338
Working with Spring IDE's AOP Support	339
Integration with the AspectJ Development Tools	343
Web Flow Development with Spring IDE	344
Setting Up Your Spring Web Flow Project	344
Validating Spring Web Flow Definition Files	348
Editing Spring Web Flow Definition Files	350
Graphical Editor for Web Flow Definitions	351
Summary	353
Chapter 12: Spring AOP and AspectJ	355
Comparing Aspect-Oriented Programming to Object-Oriented Programming	355
What Is AOP?	357
Crosscutting Concerns	357
AOP in Spring	361
XML Schema-Based Support	362
The AOP Namespace Explored	362
Advice Parameters	367
AspectJ Support	368
@AspectJ Explored	368
@AspectJ-Style Advice	372
Performance Monitoring with AOP and JETM	376
Summary	379
References	380

Contents

Chapter 13: More AOP: Transactions	381
Understanding Transactions	382
Understanding Spring Transaction Management	383
Spring Transaction Abstraction	384
Applying AOP to Transactions	387
Adding Spring Transaction Support to PIX	38
Selecting the Transaction Manager	389
Coding Spring Transactions	397
Global Transactions	405
Summary	406
Appendix A: Maven 2 Basics	407
Appendix B: Spring and Java EE	439
Appendix C: Getting Ready for the Code Examples	451
Index	453
