

INDEX

- aggregation, 189
aliasing, 187
almost PC random sequences, 17
almost periodic, 3
almost periodic sequences, 17
almost sure consistency of $\hat{m}_{k,N}$ and $\tilde{m}_{k,N}$, 255
almost sure consistency of $\hat{I}_{k,N,T}^1(\tau)$, 276
almost sure consistency of $\hat{H}_{k,N}^1(t - \tau, t)$, 268
amplitude modulation, 22
asymptotic covariance of shifted periodogram, ϕ -mixing sequences, 305
asymptotic covariance of shifted periodogram, Gaussian sequences, 303
asymptotic normality, 269, 277
asymptotic normality of $\hat{m}_{k,N}$ and $\tilde{m}_{k,N}$, 257
asymptotic normality of $\hat{f}_{k,N}(\lambda)$, 306
asymptotic stationarity, 11, 172
asymptotic variance of shifted periodogram, 301
autocorrelation function, 84, 120, 265
autocovariance function, 130, 141, 160, 265
autonomous, 218
band limited, 202
bandshifting, 191
bandwidth, 202
B-coeff.m, 289
blocking, 5
causal filters, 146, 177, 192
causal sequence, 217
characterization of Fourier transform, 154
Cholesky decomposition, 97, 121, 245, 247
classical periodogram, 19
complex bandshifting, 191
concordance, 90
confidence intervals for $\hat{f}_{k,N}(\lambda)$, 312
covariance function, 67, 149
cyclostationary, 4, 14–170
detecting a periodic sequence, 324

- deterministic, 76, 107, 216
- deterministic system, 218
- Durbin-Levinson, 95, 243
- effect of spectral coherence smoothing parameter M , 311
- effects of discrete spectral components, 322
- evidence of PC structure, 310
- \mathcal{F} integrable, 139
- FFT, 33, 263
- finite past prediction, 125, 237
- finite past predictor, 91
- fixest.m, 313
- Fourier frequencies, 263
- Fourier series representation, 152
- Gaussian, 14, 76, 271
- Gram-Schmidt procedure, 97, 129
- harmonizable, 141, 205
- Herglotz' theorem, 68
- Herglotz's theorem, 154
- Hilbert space, 74
- infinite moving average, 147
- infinite past prediction, 75, 107, 119, 235
- innovation, 78, 81, 109, 124, 220
- innovation algorithm, 97, 98
- Jensen, 59
- jointly stationary, 24, 80
- Kolmogorov isomorphism, 74, 89, 105
- $L^2[0, 2\pi)$, 86
- least square predictor, 80
- least-square predictor, 98
- Lebesgue decomposition, 90, 173
- linear FC sequence, 258, 266, 293, 306
- linear time invariant (LTI) filter, 116, 176, 179
- mean ergodic theorem, 72, 102, 115, 210
- mean square consistency of $\hat{\theta}_{N,N}$, 250
- mean square consistency of $\hat{\tilde{m}}_{k,N}$, 253
- mean square consistency of $\hat{B}_{k,N}^\dagger(\tau)$, 274
- mean square consistency of $\hat{R}_N^\dagger(t : \tau, t)$, 267
- mixing conditions, 259, 260, 269
- moving average coefficients, 84, 121
- moving average representation, 81, 85, 115, 117, 130, 223
- multivariate stationarity, 5
- multivariate white noise, 117
- nonnegative definite (NND), 68, 81, 153
- normal equations, 91, 125, 238
- orthogonal increment, 151
- orthogonally scattered, 8, 71, 151, 165
- oscillatory, 205
- ϕ -mixing, 259
- PAR(1), 38, 215, 336
- PAR(1)-CVS, 25, 26, 42
- PARMA, 25
- partial autocorrelation, 94, 241
- past, 75, 216
- PC random fields, 46
- PC white noise, 170
- peract.m, 285
- periodic autoregression (PAR), 25, 38, 215
- periodic moving average (PMA), 25, 27, 40, 214
- periodic time varying (PTV) filters, 192
- periodically correlated (PC), 1, 5
- periodically perturbed dynamical systems, 28
- periodically stationary, 3
- periodogram, 19
- permccoeff.m, 264
- perwest.m, 262
- persigest.m, 284
- positive definite (PD), 84
- predictand, 75
- predictor, 75
- projection, 53, 107
- purely nondeterministic, 76, 107, 216
- Radon-Nikodym, 85
- random measure, 71, 101, 141
- random periodic sequences, 20
- random spectral measure, 71, 101, 145, 187, 191, 253
- rank, 111, 121, 222
- regular, 76, 107, 216
- remote past, 107
- sample periodic mean, 1
- scoh.m, 313

- semivariation, 155
- shifted periodogram, 299
- singular, 76, 107, 216
- spectral coherence, 308
- spectral density, 85, 88, 91, 102, 103, 116, 121, 124, 260
- spectral density matrix, 261
- spectral density of PC sequence, 229
- spectral distribution function, 68, 87, 88, 90, 91, 124, 149, 171, 257
- spectral domain, 74, 102, 104
- spectral measure, 71, 121, 141
- stable filters, 177, 192
- stable linear filter, 147
- stable representation, 218
- stationarity, 4
- stationary dilation, 142, 212
- stochastic integral, 174
- stochastic or random process, 2
- strict stationarity, 3
- strongly harmonizable, 141

- time dependent spectral measure, 203
- time domain, 68, 69, 74, 100, 106, 215
- total variation, 135
- transfer function, 147, 149
- transient, 174
- translation series representation (TSR), 210

- uncorrelated multivariate sequence, 116
- uniformly mixing, 260
- unitary shift, 68, 100, 260

- variance contrast, 325
- vector measure integration, 134

- white noise, 78, 81, 118, 170
- Wold decomposition, 76, 108, 213

- Yule-Walker equations, 242
- Yule-Walker equations, 95
