<i>Introduction</i>		<i>xxi</i>
<i>Assessment Test</i>		<i>xli</i>
Chapter 1	An Overview of Active Directory in Windows 2000	1
	The Purpose of Directories	4
	An Introduction to Directories	6
	Paper-Based Directories	10
	Computer-Based Directories	11
	Network Directories	12
	Active Directory as a Database	24
	The AD Schema	24
	AD as the Central Database of Network Resources	26
	Active Directory as a Service	28
	AD in the Windows 2000 Architecture	29
	AD Components	30
	The Internal Architecture of the Directory Service Module	36
	The Active Directory Structure	37
	The X.500 Recommendations	38
	General Hierarchical Structures	40
	The X.500 Hierarchical Structure	42
	Partitioning the Database	45
	Theory: Central Location	46
	Theory: All Locations	46
	Reality: A Distributed, Replicated Directory Database	47
	Summary	49
	Exam Essentials	49
	Key Terms	50
	Review Questions	51
	Answers to Review Questions	54

Chapter 2	Analyzing the Physical Environment	55
	Analyzing the Company	57
	Evaluating the Scope of a Project	58
	Gathering the Information	80
	Analyze the Bandwidth Issues	80
	Analyze Each Location	84
	Analyze the Existing Use of Technology	86
	Analyze the Future Technology Plans	87
	Summary	88
	Exam Essentials	88
	Key Terms	89
	Review Questions	90
	Answers to Review Questions	95
	Case Study: Rugged Gear	97
	Background	97
	Current System: Bozeman	97
	Current System: Butte, St. Regis, Helena	98
	Current System: The Four Other Locations	98
	Current Issues	98
	Goals	98
	Security	99
	Fault Tolerance	99
	Maintenance	99
	Performance	99
	Funding	99
	Questions	100
	Answers	102
Chapter 3	Analyzing the Business Environment	105
	Understanding Basic Business Models	108
	Understanding the Departmental Model	110
	Understanding the Project-Based Model	112
	Understanding the Product/Service-Based Model	115
	Understanding the Cost Center Model	116

Analyzing Business Relationships	117
Analyzing Vendor Relationships	118
Analyzing Partner Relationships	119
Analyzing Customer Relationships	120
Analyzing Acquisition Plans	121
Analyzing the Internal Business Processes	124
Analyzing Information Flow	125
Analyzing Communication Flow	128
Analyzing Services on the Network	130
Analyzing Product Life Cycles	131
Analyzing the Decision-Making Process	132
Summary	141
Exam Essentials	142
Key Terms	143
Review Questions	144
Answers to Review Questions	148
Case Study: Stupendous Software	149
Background	149
Problem Statement	149
Questions	151
Answers	154
Chapter 4	Analyzing the IT Environment
	157
Analyzing Administrative Considerations	159
Centralized or Decentralized IT Management	160
Funding	164
Outsourced Services	168
Decision-Making Process	169
Current Change-Management Process	171
Evaluating the Technical Environment	174
Analyzing Data and System Access Patterns	175
Analyzing Security Needs	179
Analyzing Performance Requirements	181
Analyzing IT Roles and Responsibilities	185

	The Impact of AD on the Existing Network	192
	Assess Existing Systems and Applications	193
	Identify Existing and Planned Upgrades and Rollouts	194
	Analyze Technical Support Processes	195
	Analyze System and Network Management	195
	Summary	198
	Exam Essentials	199
	Key Terms	200
	Review Questions	201
	Answers to Review Questions	205
	Case Study: Direct Mail Marketing, Inc.	206
	Background	206
	Physical Network	206
	Business Analysis	206
	IT Department Analysis	207
	Questions	209
	Answers	211
Chapter 5	AD Naming Strategies	215
	Establishing an Active Directory Naming Standard	217
	The Importance of Standard Names	218
	Directory Access Protocols	224
	DAP	225
	LDAP	226
	Active Directory and DNS	236
	What Is DNS?	236
	Why DNS?	237
	How Active Directory Uses DNS	244
	AD Integration with DNS	246
	Designing a Zone Structure for DNS	248
	Choosing and Placing DNS Servers on Your Network	252
	Naming Strategy for Both AD and DNS	254
	Naming Guidelines	256
	DNS Strategies	256
	How To Decide a Naming Strategy	259

	Summary	261
	Exam Essentials	261
	Key Terms	263
	Review Questions	264
	Answers to Review Questions	268
	Case Study: Memory Makers, LLC	270
	Background	270
	Current System	270
	Current Issues	271
	Goals	271
	Security	272
	Fault Tolerance	272
	Maintenance	272
	Performance	272
	Funding	272
	Questions	273
	Answers	276
Chapter 6	Planning a Domain and Organizational Unit Structure	279
	Organizational Units vs. Domains	281
	What Is a Domain?	281
	What Is an OU?	287
	How Do I Decide—New Domain or New OU?	293
	What Is a Forest?	295
	Designing an Active Directory Forest and Domain Structure	297
	Designing a Forest Structure	299
	Designing to Support the Schema	300
	The Effects of Trusts on Design	305
	Designing an Organizational Unit Structure	310
	What Makes a Good OU Model?	313
	Other Aspects of Planning an OU Model	323
	Planning for Management of Client Computers	327
	Summary	329
	Exam Essentials	330

	Key Terms	332
	Review Questions	333
	Answers to Review Questions	337
	Case Study: Memory Makers, LLC	338
	Background	338
	Current System	338
	Current issues	339
	Goals	339
	Considerations in Design	340
	Questions	341
	Answers	343
Chapter 7	Planning an Efficient Active Directory Design	345
	Understanding Replication	347
	Replication vs. Synchronization	348
	Knowledge Consistency Checker (KCC)	349
	How Replication Works	352
	Propagation Dampening	355
	Tools for Measuring Traffic	357
	Performance	357
	Network Monitor	361
	Replication Monitor	364
	Active Directory Sites	366
	Site Boundary Design Considerations	367
	Planning Domain Controller Placement	368
	Planning Site Boundaries	371
	Replication Strategy	371
	Site Links	372
	Site Link Bridges	374
	Planning Operations Master Server Placement within Sites	378
	Schema Master	379
	Domain Naming Master	379
	Primary Domain Controller Emulator	379
	Relative Identifier Master	380
	Infrastructure Master	380

	Global Catalog Servers	381
	Summary	383
	Exam Essentials	384
	Key Terms	386
	Review Questions	387
	Answers to Review Questions	391
	Case Study: University of the Mind	392
	Background	392
	Current System	392
	Environment	393
	Current Issues	393
	Security	394
	Questions	395
	Answers	398
Chapter 8	Planning for Desktop Management	401
	Desktop Management	402
	Costs of Support	404
	Group Policies Overview	405
	Policy Inheritance	412
	Intellimirror Overview	421
	Creating a Desktop-Management Policy	424
	Assess the Existing Environment	425
	Determine the Required Client Environment	427
	Determine the Level of Client Support	427
	Design Considerations for a Desktop-Management Policy	428
	Specific Configuration Considerations	429
	GPO Guidelines	431
	Summary	431
	Exam Essentials	432
	Key Terms	433
	Review Questions	434
	Answers to Review Questions	438

Case Study: King Technologies	439	
Background	439	
Environment	439	
Goals	439	
Questions	440	
Answers	443	
Chapter 9	Planning for Active Directory Connectors	445
Active Directory Connectors	447	
Managing Connectors	448	
Connector Agreements	449	
Configuring Bridgehead Servers	450	
Source and Destination Containers	451	
Synchronizing Deletions	451	
Monitoring Connectors	452	
The Exchange Server 5.5 Connector	453	
An Overview of the Exchange Server Connector	454	
Planning for the Exchange Connector	457	
Microsoft-Defined Solutions to AD Connector Implementation	471	
Model 1: A Single Windows 2000 Domain and a Single Exchange Server Site	471	
Model 2: Single Windows 2000 Domain and Multiple Exchange Server Sites	472	
Model 3: Multiple Windows 2000 Domains and a Single Exchange Server Site	473	
Model 4: Multiple Windows 2000 Domains and Multiple Exchange Server Sites	473	
The Four Models in Review	475	
Summary	476	
Exam Essentials	477	
Key Terms	478	
Review Questions	479	
Answers to Review Questions	483	

	Case Study: Persistent Image, LLC.	485
	Background	485
	Current System	485
	Current Issues	486
	Considerations in Design	486
	Questions	487
	Answers	490
Chapter 10	Customizing the AD Schema	493
	Schema Basics	495
	The Active Directory Schema	497
	Who Can Modify the Schema?	499
	What Can Be Modified?	500
	What <i>Cannot</i> Be Modified?	508
	Modifying the Schema	509
	Preparing for Schema Modifications	509
	What Happens When the Schema Is Modified?	517
	Considerations in Schema Management	517
	Summary	520
	Exam Essentials	521
	Key Terms	523
	Review Questions	524
	Answers to Review Questions	528
	Case Study: Persistent Image, LLC	530
	Background	530
	Current System	531
	Current Issues	531
	Goals	532
	Considerations in Design	532
	Questions	533
	Answers	535
Chapter 11	Designing an Effective Rollout Plan	537
	Overview of Developing an Implementation Strategy	539
	Reevaluate Reasons for Migration or Upgrade	539

xx Contents

List Migration Goals	541
Reevaluate Your AD Design	542
Mixed Mode vs. Native Mode	544
Domain Upgrade Strategies	545
Designing an Upgrade Strategy	546
Restructuring Domains	553
Designing to Reduce Impact	566
Maintaining Uninterrupted Network Services	568
Maintaining Security	572
Maintaining the Availability of Applications	573
Maintaining Acceptable Network Performance	574
Documenting Your Plan	575
Administrative Documentation	576
Technical Documentation	578
Summary	579
Exam Essentials	580
Key Terms	584
Review Questions	585
Answers to Review Questions	589
Case Study: Kodiak Wear	591
Background	591
Problem Statement	591
IT Environment	592
Network Operations Management	593
Questions	594
Answers	597

Glossary	599
