|---|-----------|
| <b>Preface to the first edition</b>                               | <b>ix</b> |
| <b>Preface to the second edition</b>                              | <b>xi</b> |
| <b>1 Treatments, good, bad or worthless – and how do we tell?</b> | <b>1</b>  |
| 1.1 Treatments worthless – and worse                              | 1         |
| 1.2 A brief history of treating the mentally ill                  | 5         |
| 1.3 Summary   | 11        |
| <b>2 The randomized clinical trial</b>                            | <b>13</b> |
| 2.1 Introduction  | 13        |
| 2.2 The clinical trial  | 17        |
| 2.3 Ethical issues in clinical trials                             | 29        |
| 2.4 Informed consent  | 33        |
| 2.5 Compliance  | 36        |
| 2.6 Summary   | 40        |
| <b>3 Design issues in clinical trials</b>                         | <b>43</b> |
| 3.1 Introduction  | 43        |
| 3.2 Clinical trial designs  | 44        |
| 3.3 Methods of randomization                                      | 56        |
| 3.4 Methods of masking treatments                                 | 62        |
| 3.5 The size of a clinical trial                                  | 63        |
| 3.6 Interim analysis  | 66        |
| 3.7 Summary   | 70        |
| <b>4 Special problems of trials in psychiatry</b>                 | <b>71</b> |
| 4.1 Introduction  | 71        |
| 4.2 Explanatory versus pragmatic trials                           | 72        |
| 4.3 Complex interventions   | 79        |
| 4.4 Outcome measures in psychiatry                                | 81        |
| 4.5 Summary   | 87        |

|          |  |            |
|----------|--|------------|
| <b>5</b> | <b>Some statistical issues in the analysis of psychiatric trials</b>           | <b>89</b>  |
| 5.1      | Introduction   | 89         |
| 5.2      | P-values and confidence intervals  | 90         |
| 5.3      | Using baseline data  | 91         |
| 5.4      | Longitudinal data  | 97         |
| 5.5      | Missing values and dropouts in longitudinal data                               | 103        |
| 5.6      | Multiple outcome measures  | 108        |
| 5.7      | Intention-to-treat   | 109        |
| 5.8      | Economic evaluation of trials  | 112        |
| 5.9      | Number needed to treat   | 116        |
| 5.10     | Summary  | 116        |
| <b>6</b> | <b>Analysing data from a psychiatric trial: an example</b>                     | <b>119</b> |
| 6.1      | Introduction   | 119        |
| 6.2      | Beating the Blues  | 119        |
| 6.3      | Analysis of the post-treatment BDI scores                                      | 123        |
| 6.4      | Graphical displays and summary measure analysis of longitudinal data           | 128        |
| 6.5      | Random effects models for the BtB data   | 135        |
| 6.6      | The dropout problem in the BtB data  | 142        |
| 6.7      | Summary  | 144        |
| <b>7</b> | <b>Systematic reviews and meta-analysis</b>                                    | <b>145</b> |
| 7.1      | Introduction   | 145        |
| 7.2      | Study selection  | 148        |
| 7.3      | Publication bias   | 151        |
| 7.4      | The statistics of meta-analysis  | 153        |
| 7.5      | Some examples of meta-analysis of psychiatric trials                           | 155        |
| 7.6      | Summary  | 160        |
| <b>8</b> | <b>RCTs in psychiatry: threats, challenges and the future</b>                  | <b>163</b> |
| 8.1      | Introduction   | 163        |
| 8.2      | Can randomized clinical trials in psychiatry be justified?                     | 164        |
| 8.3      | Are randomized clinical trials really necessary?                               | 169        |
| 8.4      | Conflicts of interest  | 170        |
| 8.5      | Scandals, trials and tribulations  | 171        |
| 8.6      | The future of psychiatric trials   | 173        |
| 8.7      | Defending the clinical trial   | 178        |
| 8.8      | Summary  | 179        |
|          | <b>Appendix A Issues in the management of clinical trials – ‘how to do it’</b> | <b>181</b> |
| A.1      | Introduction   | 181        |
| A.2      | Clinical trial protocols   | 182        |
| A.3      | Getting the costs right  | 185        |
| A.4      | Collecting and managing the data   | 186        |
| A.5      | Writing the patient information sheet  | 188        |
| A.6      | Getting informed consent   | 189        |

|                     |  |            |
|---------------------|--|------------|
| A.7                 | Maintaining recruitment                    | 190        |
| A.8                 | Doing the follow-up                        | 191        |
| A.9                 | Useful web sites                           | 191        |
| <b>Appendix B</b>   | <b>Writing a trial report</b>              | <b>195</b> |
| B.1                 | Introduction                               | 195        |
| <b>Appendix C</b>   | <b>Useful software for clinical trials</b> | <b>201</b> |
| C.1                 | Introduction                               | 201        |
| C.2                 | Data management                            | 201        |
| C.3                 | Design                                     | 202        |
| C.4                 | Analysis                                   | 202        |
| <b>Bibliography</b> |  | <b>205</b> |
| <b>Index</b>        |  | <b>223</b> |
