Preface **xiii**

Acknowledgments **xv**

Introduction **xvii**

MAKING CONNECTIONS xviii

SHIFTING TOWARD SUSTAINABILITY xix

THE STRUCTURE OF THIS BOOK xx

Chapter 1

A Context for Sustainability

1

THE RATIONALE FOR SUSTAINABILITY 1

Sustainability Interlude 1

A Response to a Crisis 2

CONTEMPORARY CHALLENGES 5

Population and Consumption 6

Climate Change 6

Nonrenewable Resource Depletion 8

Loss of Biodiversity 9

Overfishing 10

Eutrophication 12

Desertification and Acidification 13

Poverty 14

Ecosystem Services and Quality of Life 14

THE ETHICAL CONTEXT OF SUSTAINABILITY 15

THE THREE-LEG MODEL OF SUSTAINABILITY 15

CONCLUSION 17

Chapter 2	
The Technology Challenge	21
OVERVIEW OF TECHNOLOGY	21
Defining Technology	22
A Brief History of Technology	22
THE TECHNOLOGY PARADOX	25
Technological Optimism versus Technological Pessimism	25
Developing a More Nuanced View of the Impacts of Technology	27
CONSEQUENCES OF TECHNOLOGY	28
Predicting Consequences of Technology	29
Reducing the Uncertainty of Technology	31
Technology Risk Assessment, Acceptance, and Management	32
ALTERNATIVE, APPROPRIATE, AND SUSTAINABLE TECHNOLOGY	34
THE ETHICAL IMPLICATIONS OF TECHNOLOGY	36
SUMMARY AND CONCLUSIONS	37
Chapter 3	
Introduction to Ethical Concepts	41
RELIGIOUS ETHICS	42
Common Ideals	42
Views of Human Nature	45
SECULAR AND PHILOSOPHICAL ETHICAL TRADITIONS	46
Justice	47
Deontological Ethics	47
Rights	48
Consequentialist Ethics	51
Objectivism and Ethical Relativism	52
Objectivism and Relativism in Sustainability	55
ETHICS AS A TOOL FOR MAKING DECISIONS	55
Framing Ethical Problems	56
Conflicting Values	56
THE THREE LEGS OF SUSTAINABILITY	58
Social Ethics	59
Environmental Ethics	60
Economic Ethics	61
Integrating the Three Legs	63
CONCLUSION	64

Chapter 4

Social Dimensions of Sustainability Ethics

67

JUSTICE, FAIRNESS, AND RECIPROCITY 67

The Golden Rule 68

Ethics of Care 71

DISTRIBUTIONAL PRINCIPLES 72

Distribution in a Just Society 73

Distributing Disadvantages 74

EXPLORING INTERDEPENDENCE 75

Thinking Globally, Acting Locally 76

Life on Spaceship Earth 78

Environmental Justice 80

OBLIGATIONS TO FUTURE GENERATIONS 81

Intergenerational Justice 82

A Look Back at Looking Forward 84

Future Quality of Life 85

Beyond Seven Generations 87

CONCLUSION 90

Chapter 5

Environmental Dimensions of Sustainability Ethics

95

THE EMERGENCE OF ENVIRONMENTAL ETHICS 95

The Birth of Modern Environmental Ethics 96

Environmentalism Becomes Mainstream 98

Undertones of the Sacred 99

RELIGION AND ENVIRONMENTAL ETHICS 99

Religion and Nature 99

Greening Religion 101

ECOLOGICAL PRINCIPLES IN ENVIRONMENTAL ETHICS 103

Development of Ecology 103

CARICATURES OF NATURE 104

A Closer World 105

CONTEMPORARY APPROACHES IN ENVIRONMENTAL ETHICS 107

Getting the Scale of Ethics Right 108

Deep Ecology, Ecofeminism, and Social Ecology 109

Pluralistic Approaches 111

Bioregionalism 112

The New Agrarian Movement 113

ENVIRONMENTAL ETHICS AND NONHUMAN ANIMALS	114
Making a Case for the Individual	114
Mixed Communities	115
ENVIRONMENTAL ETHICS AND THE ETHICS OF SUSTAINABILITY	116
Identifying Values	117
Emphasizing Human Priorities	117
CONCLUSION	118

Chapter 6

Economic Dimensions of Sustainability Ethics **123**

FROM CLASSICAL ECONOMICS TO ECOLOGICAL ECONOMICS	124
The Advent of Modern Economics	124
Ecological Economics and the Classical Economists	125
Neoclassical Economics	128
Criticisms of Neoclassical Economics	130
Physical Limitations	131
Influences of Ecology	132
THE ECOLOGICAL ECONOMIC MODEL	134
Natural Capital and Ecological Services	135
Discounting the Future	136
The Economic Value of Natural Systems	137
Feedback between Ecological and Economic Systems	139
TOOLS OF ECOLOGICAL ECONOMICS	144
The Polluter Pays Principle	144
Extended Producer Responsibility	145
Beneficiary Pays Principle	146
Full Cost Accounting, Full Cost Pricing, and Life-Cycle Costing	148
CONCLUSION	150

Chapter 7

Integrating the Three Legs of Sustainability **155**

THE PRECAUTIONARY PRINCIPLE	156
A Legal Context	157
Precaution in Practice	159
Precaution as Risk Management	160
Cost-Benefit Analysis	161
Including Stakeholders	162

Including Science	164	
Compensation for Risks	165	
The March of Progress	167	
IRRECONCILABLE DIFFERENCES	168	
Lifeboat Ethics	168	
Tragedy of the Commons	169	
Hardin's Challenge	170	
POVERTY REDUCTION VERSUS ENVIRONMENTAL PRESERVATION	170	
Linking Social and Environmental Goals	171	
Finding Synergistic Solutions	172	
The Role of Technology	174	
MANAGING THE GLOBAL COMMONS	175	
The Need for a Central Authority	176	
Moving beyond the Tragedy of the Commons	177	
International Multilateral Agreements	179	
Non-Governmental Organizations	180	
The Role of Government	181	
TRANSCENDING THE THREE-LEGGED STOOL MODEL	182	
Integrating the Three Legs	182	
Complex Adaptive Systems	183	
Integrating Behavior at Different Scales	184	
Resilience in Social-Ecological Systems	187	
Resilience and the Precautionary Principle	188	
Resilience and Technology	189	
Conflicting Values	191	
THE DISTRIBUTION OF POWER IN DECISION MAKING	192	
The Principle of Transparency	193	
Transparency in Industry	194	
Transparency and Technology	196	
The Value of Autonomy	197	
CONCLUSION	199	
Chapter 8		
Improving Our Thinking about Sustainability		209
OBSTACLES TO MAKING GOOD DECISIONS	210	
Rational Decision Making	210	
Limits of Rationality	212	
Cognitive Heuristics	214	
Discounting the Future	217	

Complexity	219
How Barriers to Rationality Affect Decisions	220
STRATEGIES FOR ADDRESSING LIMITS TO RATIONALITY	224
Becoming Environmentally Informed	224
Becoming Socially and Economically Informed	226
Systems Thinking	227
CONCLUSION	235

Chapter 9

The Process of Changing Behavior **239**

THEORY OF PLANNED BEHAVIOR	239
Attitudes	240
Subjective Norms	240
Perceived Control	241
Understanding Planned Behavior	242
OBSTACLES TO SUSTAINABLE BEHAVIOR	243
Political Obstacles to Sustainable Behavior	244
Lack of Social Capital	244
Accepting Unsustainable Outcomes	245
Individualization	246
Distancing	248
HOW CHANGE HAPPENS	251
The Five Phases of Individual Change	251
Diffusion of Innovation	253
Applying Diffusion of Innovation	254
STRATEGIES FOR EFFECTING CHANGE	257
Small Wins	257
Reasonable Person Model	258
Moving People toward Change	261
CONCLUSION	262

Chapter 10

Creating Change with Groups **267**

ADVANTAGES OF GROUP DECISION MAKING	267
Additional Insights	268
New Discoveries	270
Increased Buy-In	271

TYPES OF COLLABORATIVE PROCESSES	272
MAKING THE MULTI-STAKEHOLDER PROCESS WORK	273
Social Learning	273
Building Shared Understanding	275
Trust	281
Iterative Approach	284
LEARNING ORGANIZATIONS	287
Developing the Ideal of a Learning Organization	288
Creating Change in a Learning Organization	289
CONCLUSION	290

Chapter 11

Applying an Ethic of Sustainability **295**

MAKING ETHICAL DECISIONS FOR A SUSTAINABLE FUTURE: AN OVERVIEW	295
Social Sustainability	296
Ecological Sustainability	296
Economic Sustainability	297
Integrating the Dimensions of Sustainability	298
CONTEMPORARY SUSTAINABILITY-BASED FRAMEWORKS	298
The Natural Step	299
The Hannover Principles	300
Corporate Social Responsibility	300
PUTTING IT ALL TOGETHER	303
Sustainability Frameworks and Ethics	303
Picturing the Three-Legged Stool Model	304
A FINAL CRITIQUE	313

Index **319**
