Preface	xi
Acknowledgements	xiii
Part I Testing Methodologies	1
1 Introduction	3
1.1 Important Definitions	3
<i>1.1.1 3rd-Generation Partnership Project</i>	4
<i>1.1.2 UMTS, UTRAN and GERAN</i>	4
<i>1.1.3 User Equipment</i>	4
1.2 Scope	5
1.3 Overview of the Industry	6
<i>1.3.1 Network Operators</i>	6
<i>1.3.2 UE Manufacturers</i>	7
<i>1.3.3 Component Suppliers</i>	7
<i>1.3.4 Testing Services</i>	7
<i>1.3.5 Standards Bodies and Certification Bodies</i>	7
2 Introduction to UMTS	9
2.1 The History of UMTS	9
2.2 The 3GPP	12
2.3 Organization of 3GPP	12
2.4 Goals and Achievements	13
3 Types of Testing	15
3.1 The Purposes of Testing	15
3.2 The Expectations on an Equipment Developer	17
3.3 Differences with Other Markets	18
3.4 Testing Through the Life Cycle	18

4	Integration Testing	23
4.1	Definition	23
4.2	Getting Things Working	23
4.3	Keeping Things Working	26
	4.3.1 Automation	27
5	Conformance Testing	29
5.1	History	29
	5.1.1 <i>The Importance of Different Type Approval Areas</i>	30
	5.1.2 <i>The Origins of UMTS Conformance</i>	30
5.2	Specifications	31
	5.2.1 <i>Releases</i>	31
	5.2.2 <i>Work Items</i>	32
	5.2.3 <i>Stages</i>	33
5.3	Conformance Specifications	34
	5.3.1 <i>Structure of Conformance Specifications</i>	36
5.4	RAN5 Specifications	37
	5.4.1 <i>TS 34.108</i>	38
	5.4.2 <i>Hierarchy of Test Parameters</i>	42
	5.4.3 <i>TS 34.109</i>	43
	5.4.4 <i>TS 34.121</i>	44
	5.4.5 <i>TS 34.122</i>	46
	5.4.6 <i>TS 34.123</i>	46
	5.4.7 <i>TS 34.124</i>	50
	5.4.8 <i>TS 34.171</i>	50
5.5	Other Conformance Specifications	51
	5.5.1 <i>Universal Subscriber Interface Module</i>	51
	5.5.2 <i>Codec Testing</i>	51
5.6	Main Organizations Involved and Their Aims	52
5.7	Process	53
	5.7.1 <i>Specifications, Versions and Change Control</i>	53
	5.7.2 <i>TTCN Test Cases (Signalling)</i>	54
	5.7.3 <i>The GCF and Test Case Validation</i>	55
	5.7.4 <i>The PCS Type Certification Review Board</i>	57
5.8	Certification	57
	5.8.1 <i>The R&TTE Directive and CE Marking</i>	57
	5.8.2 <i>The United States and Japan</i>	58
	5.8.3 <i>GCF Certification</i>	59
	5.8.4 <i>The PTCRB</i>	61
6	Interoperability Testing	63
6.1	What is Interoperability Testing?	63
	6.1.1 <i>Interoperability Laboratories</i>	64
	6.1.2 <i>Simulators and Interoperability</i>	65
6.2	Interoperability and Certification	65
6.3	Ways in Which Interoperability Testing is Carried Out	66
	6.3.1 <i>Live Network Testing</i>	66
	6.3.2 <i>Test Networks</i>	67

6.3.3	<i>System Simulators</i>	67
6.3.4	<i>Simulators and Network Emulators</i>	68
6.4	Typical Sources of Tests	69
7	Testing Beyond Development	71
7.1	Manufacturing Testing	71
7.1.1	<i>Radio Testing</i>	72
7.1.2	<i>Call Processing Testing</i>	73
7.2	Service Testing	73
7.2.1	<i>UE Repair</i>	74
Part II	Testing by Layer	75
8	Testing the Physical Layer	77
8.1	Overview of the UMTS WCDMA Physical Layer	77
8.1.1	<i>WCDMA and Power Control</i>	77
8.1.2	<i>Scrambling and Spreading</i>	78
8.1.3	<i>Channel Coding</i>	80
8.1.4	<i>Channels and Frames</i>	82
8.1.5	<i>Physical Channels</i>	84
8.1.6	<i>Transport Blocks and TFs</i>	85
8.1.7	<i>Modulation</i>	89
8.1.8	<i>Reference Measurement Channels</i>	90
8.2	Transmitter Testing	92
8.2.1	<i>Methods of Testing</i>	92
8.2.2	<i>Transmitter Characteristics</i>	94
8.3	Receiver Characteristics	108
8.3.1	<i>Receiver Sensitivity (Reference Sensitivity Level)</i>	108
8.3.2	<i>Maximum Input Level</i>	110
8.3.3	<i>Adjacent Channel Selectivity</i>	110
8.3.4	<i>Blocking Characteristics</i>	111
8.3.5	<i>Spurious Response</i>	112
8.3.6	<i>Intermodulation Characteristics</i>	112
8.3.7	<i>Spurious Emissions</i>	113
8.4	Interactions with GSM Technology	114
8.5	Performance Testing	115
8.6	RF Conformance Test Systems	118
8.7	Testing the Baseband in Isolation	118
9	Testing of Layer 2	121
9.1	Introduction	121
9.1.1	<i>Overview of the RAN Layers</i>	121
9.1.2	<i>Transport Channels and Logical Channels</i>	121
9.2	Testing the MAC Layer	124
9.2.1	<i>Overview of the MAC</i>	124
9.2.2	<i>MAC Test Methodology</i>	124
9.2.3	<i>The MAC-c/sh/m</i>	125
9.2.4	<i>The MAC-d</i>	127
9.2.5	<i>The MAC Header</i>	128

9.2.6	<i>Conformance Tests for the MAC Headers</i>	130
9.2.7	<i>The RACH Procedure</i>	130
9.3	Testing the RLC Layer	132
9.3.1	<i>Overview of the RLC</i>	132
9.3.2	<i>TM-RLC</i>	133
9.3.3	<i>UM-RLC</i>	133
9.3.4	<i>AM-RLC</i>	135
9.3.5	<i>Testing the RLC</i>	141
9.4	Packet Data Convergence Protocol	143
9.4.1	<i>PDCP Testing</i>	144
9.5	Broadcast/Multicast Control	146
10	Testing of Layer 3	147
10.1	Overview of the Network Architecture	147
10.2	The RRC	150
10.2.1	<i>Main Functions</i>	150
10.2.2	<i>RRC States</i>	152
10.2.3	<i>Areas and Identities</i>	154
10.2.4	<i>Broadcast of System Information</i>	155
10.2.5	<i>RRC Connection Management</i>	156
10.2.6	<i>Radio Bearer Control Procedures</i>	157
10.2.7	<i>Mobility Control</i>	159
10.2.8	<i>RRC Measurement Procedures</i>	163
10.3	Nonaccess Stratum	168
10.3.1	<i>Network Operating Mode</i>	169
10.3.2	<i>Mobility Management</i>	169
10.3.3	<i>GPRS Mobility Management</i>	170
10.3.4	<i>Testing MM</i>	171
10.3.5	<i>Call Control</i>	171
10.3.6	<i>Session Management</i>	173
10.3.7	<i>Short Message Service</i>	175
11	Testing Protocol	179
11.1	Protocol Test Systems (System Simulators)	179
11.1.1	<i>Protocols</i>	181
11.2	Signalling Procedures	184
11.2.1	<i>Setting up Cells</i>	184
11.2.2	<i>Configuring Channels</i>	186
11.2.3	<i>Location Update</i>	186
11.2.4	<i>Mobile-Originated Circuit-Switched Call</i>	189
11.2.5	<i>GPRS Attach</i>	191
11.2.6	<i>PDP Context Activation</i>	191
11.2.7	<i>PS Session with State Transitions</i>	194
11.2.8	<i>Soft Handover (Active Set Update)</i>	195
12	Testing System Aspects	197
12.1	Idle Mode Procedures	197
12.1.1	<i>PLMN Selection</i>	197
12.1.2	<i>PLMN Types and Cell Types</i>	198
12.1.3	<i>Cell Selection and Reselection</i>	198

12.1.4	<i>Hierarchical Cell Selection</i>	200
12.1.5	<i>Testing Idle Mode</i>	200
12.2	Measurements and RRM	202
12.2.1	<i>Measurements</i>	204
12.3	Typical Test Systems	206
13	High-Speed Packet Access	207
13.1	Introduction	207
13.2	Physical Layer	208
13.2.1	<i>Hybrid ARQ</i>	210
13.3	RF Tests for HSPA	212
13.3.1	<i>Transmitter Tests</i>	212
13.3.2	<i>Receiver Tests</i>	212
Part III	The Future	213
14	Future Trends in Testing	215
14.1	Testing Earlier in the Development Cycle	215
14.1.1	<i>Virtual Testing</i>	215
14.1.2	<i>Earlier Use of Conformance Testing</i>	216
14.2	IMS and Technology Convergence	216
14.2.1	<i>Testing IMS</i>	218
14.3	Evolving Testing Technologies	219
14.3.1	<i>TTCN 3</i>	219
14.3.2	<i>Graphical Tools</i>	220
14.4	Future Cellular Network Technologies	221
Appendix	Tree and Tabular Combined Notation	223
A.1	Introduction to TTCN	223
A.1.1	<i>Basic Concepts</i>	223
A.1.2	<i>Test Methodology</i>	225
A.1.3	<i>Dynamic Behaviour</i>	227
A.1.4	<i>Constraints</i>	228
A.1.5	<i>Receive Constraints</i>	230
A.1.6	<i>Mapping to a Real Test System</i>	233
A.1.7	<i>TTCN Statements</i>	234
A.1.8	<i>TTCN Execution</i>	235
A.1.9	<i>Test Steps</i>	238
A.1.10	<i>Program Flow Control</i>	239
A.1.11	<i>TTCN and ASN.1</i>	239
A.1.12	<i>Test Suite Structure</i>	240
A.1.13	<i>Approach to Testing</i>	240
