<b>Introduction</b>	<b>xvii</b>
<b><u>Chapter 1: Enhancing Development with Dojo Core</u></b>	<b><u>1</u></b>
<b>Getting Dojo</b>	<b>1</b>
Using Dojo via the AOL CDN	1
Downloading the Latest Dojo Release	2
Trying Dojo Under Development	2
<b>Sampling Dojo</b>	<b>2</b>
Getting to Hello World	3
<b>Examining Dojo Core</b>	<b>8</b>
Declaring, Loading, and Providing Dependencies	8
Defining Classes and Using Inheritance	11
Declaring Objects in Markup	14
<b>Summary</b>	<b>19</b>
<b><u>Chapter 2: Manipulating the DOM</u></b>	<b><u>21</u></b>
<b>Finding DOM Elements</b>	<b>21</b>
Finding Elements with <code>dojo.byId</code>	21
Finding Elements with <code>dojo.query</code>	22
<b>Handling Lists of DOM Elements</b>	<b>25</b>
Filtering and Refining Lists of Nodes	26
Processing Lists of Nodes	35
<b>Summary</b>	<b>45</b>
<b><u>Chapter 3: Handling Events</u></b>	<b><u>47</u></b>
<b>Reacting to Page Load and Unload</b>	<b>47</b>
<b>Connecting to DOM Events</b>	<b>49</b>
Connecting Inline Handlers to Events	50
Connecting Global Functions to Events	51
Connecting Object Methods to Events	51
Disconnecting from Events	52
Special Event Handling and Event Objects	54

## Contents

---

<b>Connecting to Methods</b>	<b>55</b>
<b>Making Connections with NodeLists</b>	<b>57</b>
<b>Publishing and Subscribing to Event Topics</b>	<b>61</b>
Using Event Topics with DOM Event Handlers	61
Using Object Methods as Subscribers	64
Unsubscribing from Published Messages	65
Turning Object Methods into Publishers	65
<b>Using Dojo Behaviors</b>	<b>67</b>
Using Behaviors to Find Nodes and Make Connections	67
Using Behaviors to Connect Object Methods	69
Using Behaviors to Publish Event Topics	70
<b>Summary</b>	<b>71</b>
<b>Chapter 4: Composing Animations</b>	<b>73</b>
<b>Animating CSS Style Properties</b>	<b>73</b>
<b>Using Fade Transitions</b>	<b>76</b>
<b>Using Wipe Transitions</b>	<b>77</b>
<b>Using Slide Animations to Move Elements</b>	<b>79</b>
<b>Controlling Motion with Easings</b>	<b>80</b>
<b>Chaining Animations in Serial</b>	<b>84</b>
<b>Combining Animations in Parallel</b>	<b>85</b>
<b>Using NodeList Animation Methods</b>	<b>86</b>
<b>Examining Animation Objects</b>	<b>89</b>
<b>Summary</b>	<b>94</b>
<b>Chapter 5: Working with AJAX and Dynamic Data</b>	<b>95</b>
<b>Making Simple Web Requests</b>	<b>95</b>
Making Simple Requests and Handling Responses	96
Using a Single Handler for Both Error and Success	98
<b>Handling Web Responses with Deferred</b>	<b>99</b>
Registering Handlers for Success and Error Responses	99
Registering Error and Success Handlers in One Call	100
Registering a Single Handler for both Error and Success	101
<b>Working with Response Formats</b>	<b>102</b>
Working with Text Responses	102
Working with XML Responses	103
Working with JSON Responses	104
Working with Comment-Filtered JSON Responses	104
Working with JavaScript Responses	106
<b>Specifying Request Methods</b>	<b>107</b>

Building a Server-Side Request Echo Tool	108
Trying Out Request Methods	110
<b>Using Request Parameters and Content</b>	<b>112</b>
Making GET Requests with Query Parameters	113
Making POST Requests with Response Body Parameters	115
Making POST Requests with Raw Body Content	116
<b>Augmenting Forms with In-Place Requests</b>	<b>117</b>
<b>Using Cross-Domain JSON Feeds</b>	<b>124</b>
Loading JSON by Polling Variables	125
Loading JSON with Callbacks	128
<b>Making Requests with IFrames</b>	<b>129</b>
Using a Proxy Script to Package IFrame Data	130
Handling Response Formats with IFrames	131
Uploading Files with Forms and IFrames	133
<b>Summary</b>	<b>140</b>
<b>Chapter 6: Building User Interfaces with Widgets</b>	<b>141</b>
<b>Building and Validating Forms</b>	<b>141</b>
Instantiating Widgets with JavaScript	144
Declaring Widgets in HTML Markup	146
Validating Input with a Regular Expression	146
Enforcing Form Validation on Submit	147
Handling Numbers and Currency Values	149
Working with Date and Time Fields	150
Enhancing Radio Buttons and Checkboxes	153
Working with Selection Fields and Data Sources	155
Using Sliders to Allow Discrete Value Selection	159
Using Dynamic Textareas and Rich Text Editors	161
<b>Managing Application Layout</b>	<b>163</b>
Setting Up an Application Layout Page	164
Using ContentPanels as Layout Building Blocks	165
Managing Layout Regions with BorderLayout	166
Managing Content Visibility with StackContainer	169
Swapping Content Panes with AccordionContainer	174
Building Tabbed Content Panes with TabContainer	176
Dividing Up Layout Regions with SplitContainer	179
<b>Creating Application Controls and Dialogs</b>	<b>180</b>
Building and Scripting Clickable Buttons	183
Composing Popup Context Menus	184
Combining Buttons and Menus	188
Building Toolbars from Buttons and Menus	188

## Contents
