# Contents

<i>Introduction</i>		<i>xvii</i>
<i>Assessment Test</i>		<i>xxxiii</i>
<b>Chapter 1</b>	<b>Planning a Network Infrastructure: A Technology Primer</b>	<b>1</b>
	Defining a Network Infrastructure	2
	Network Infrastructure in Windows Server 2003	3
	Network Configuration and Connectivity Improvements	4
	Data Security Improvements	4
	Security Infrastructure Improvements	6
	High Availability Improvements	6
	Planning the Network Topology and Name Resolution Strategies	7
	Planning TCP/IP and the Network Topology Strategy	7
	Planning a Routing Strategy	9
	Planning an Internet Connectivity Strategy	9
	Planning a Name Resolution Strategy	9
	Planning for Secure Data Flow	10
	Planning a Remote Access Strategy	11
	Planning Protocol Security	12
	Planning and Implementing a Security Infrastructure	13
	Planning Policy-Based Security for Server Roles	14
	Planning a Security Update Infrastructure	14
	Enhancing Authentication through Certificate Services	15
	Planning for High Server Availability	15
	Planning Clustering and Network Load Balancing	16
	Planning Secure Methods for Remote Administration	16
	Monitoring Network Performance	17
	Planning a Disaster Recovery Strategy	17
	Summary	18
	Exam Essentials	19
	Key Terms	19
	Review Questions	20
	Answers to Review Questions	23
<b>Chapter 2</b>	<b>Planning a TCP/IP Network Infrastructure</b>	<b>25</b>
	Understanding and Choosing Network Protocols	27
	How Network Protocols Work	28
	Network Packets	28
	Protocols and Binding	29

Connectionless versus Connection-Oriented Protocols	29
Network Protocols and Windows Server 2003	30
Planning an IP Routing Strategy	32
Hardware versus Software Routing	32
Static versus Dynamic Routing	33
Understanding IP Addressing	35
The Hierarchical IP Addressing Scheme	36
Network Address Classes	37
Subnetting a Network	38
Subnetting Concepts	39
Subnetting Examples	48
Analyzing IP Addressing Requirements	55
Choosing an Address Assignment Model	56
Choosing a System for the IP Subnet Structure	59
Choosing Public or Private Addresses	60
Planning for Automatic IP Configuration	62
Introducing IPv6	63
Benefits of IPv6	64
The IPv6 Address Space	65
Automatic Configuration in IPv6	67
Troubleshooting TCP/IP Addressing	68
Identifying the TCP/IP Configuration	69
Testing IP Communications	71
Troubleshooting DHCP	76
Summary	77
Exam Essentials	78
Key Terms	79
Review Questions	81
Answers to Review Questions	86
<b>Chapter 3</b>	<b>Planning a Network Connectivity Strategy</b>
	<b>89</b>
Understanding IP Routing	91
How Routing Works	91
Types of Routing	94
Routing in Windows Server 2003	102
Managing IP Routing	103
Creating and Managing Interfaces	103
Setting IP Routing Properties	120
Managing Routing Protocols	122
Defining Static Routes	129
Filtering TCP/IP Packets	132
Creating Packet Filters	133
Creating VPN Packet Filters	135
Troubleshooting IP Routing	137

Understanding Network Connectivity	141
Understanding Private Addressing	142
NAT in Windows Server 2003	142
The Fate of the Outbound Packet	143
The Fate of the Inbound Packet	144
NAT Editors	145
ICS versus NAT	145
Installing ICS	145
Planning NAT	148
Installing NAT	148
Adding and Removing NAT Interfaces	151
Configuring NAT Properties	157
Summary	161
Exam Essentials	162
Key Terms	163
Review Questions	165
Answers to Review Questions	171

**Chapter 4 Planning a DNS Strategy 175**

Understanding DNS	176
What DNS Does	177
DNS and Windows Server 2003	179
DNS Terminology	180
How DNS Works	181
Planning a DNS Namespace	192
Understanding Domain Names	193
DNS Namespace Options	194
Planning DNS Zones	196
Selecting the Appropriate Zone Type	196
Selecting the Zone Data Location	197
Securing Zones	199
Integrating DNS and WINS	202
Planning DNS Zone Replication and Delegation	205
Creating Secondary Zones	205
Zone Transfers and Replication	205
Securing Zone Transfers	207
Delegating Zones	208
Determining DNS Caching and Forwarding	209
Caching-Only Servers	209
Stub Zones	210
Conditional Forwarders	211
Forward-Only Servers	212
Planning DNS Server Resources	212
Planning General DNS Server Requirements	213

	Planning for Server Capacity	213
	Securing DNS	214
	Troubleshooting Host Name Resolution	216
	Monitoring DNS	217
	Troubleshooting DNS	218
	Summary	224
	Exam Essentials	224
	Key Terms	225
	Review Questions	227
	Answers to Review Questions	234
<b>Chapter 5</b>	<b>Planning a WINS Strategy</b>	<b>237</b>
	Understanding NetBIOS Name Resolution	238
	How Name Resolution Works	239
	WINS in Windows Server 2003	240
	The WINS Process	241
	The WINS Database	243
	Supporting Non-WINS Clients	243
	Using LMHOSTS as an Alternative to WINS	246
	Introducing WINS Replication	249
	Designing a WINS Strategy	251
	Determining How Many WINS Servers to Install	252
	Planning for Availability and Fault Tolerance	253
	Securing the WINS Infrastructure	253
	Monitoring WINS Client Traffic	254
	Planning Replication Partnerships	255
	Comparing WINS Deployment Scenarios	261
	Implementing WINS	264
	Using the WINS Snap-In	265
	Controlling WINS Replication	270
	Monitoring WINS	278
	Using WINS Statistics	278
	Viewing WINS Records	279
	Compacting the WINS Database	281
	Deleting and Tombstoning WINS Records	281
	Configuring Inter-Forest WINS Replication	282
	Troubleshooting WINS	283
	General Considerations	283
	Using the <i>Nbtstat</i> Command	284
	Summary	286
	Exam Essentials	286
	Key Terms	287
	Review Questions	289
	Answers to Review Questions	296

<b>Chapter 6</b>	<b>Planning Secure Network Access</b>	<b>299</b>
	Evaluating Remote Access Security	300
	Remote Access Services	301
	Remote Access Security	305
	Planning Remote Access Policies	313
	Modifying the Default Remote Access Policies	313
	Creating a Remote Access Policy	320
	Evaluating IP Security	324
	IPSec Fundamentals	326
	IPSec in Practice	338
	Planning an IPSec Deployment	339
	Implementing IPSec	341
	Using the IP Security Policy Management Console	341
	Managing Policies	344
	Configuring IPSec Policies	351
	Configuring IPSec for Tunnel Mode	362
	Troubleshooting Security for Data Transmission	368
	Verifying Effective Results of IPSec Policies with Resultant Set of Policy (RSOP)	370
	Monitoring IPSec Status with the IP Security Monitor	371
	Viewing IPSec-Related Events in the Event Log	372
	Best Practices for Troubleshooting IPSec	374
	Summary	375
	Exam Essentials	376
	Key Terms	377
	Review Questions	378
	Answers to Review Questions	383
<b>Chapter 7</b>	<b>Planning Server-Level Security</b>	<b>385</b>
	Introducing Server Roles	386
	Using the Configure Your Server Wizard	391
	Using the Manage Your Server Tool	393
	Evaluating the Windows Server 2003 Editions	395
	Managing Server Configurations with Security Policy	401
	Understanding Group Policy and Active Directory	402
	Configuring Security Settings Options	414
	Configuring System Options	429
	Analyzing Security Configurations with the Security Configuration and Analysis Tool	433
	Specifying a Security Database	434
	Importing a Security Template	434
	Performing a Security Analysis	437
	Reviewing the Security Analysis and Resolving Discrepancies	437
	Deploying Security Policies	441

	Planning a Security Update Infrastructure	443
	Using Microsoft Software Update Services	444
	Using Microsoft Baseline Security Analyzer	447
	Summary	449
	Exam Essentials	450
	Key Terms	451
	Review Questions	452
	Answers to Review Questions	458
<b>Chapter 8</b>	<b>Planning Certificate Services</b>	<b>461</b>
	Understanding the Public Key Infrastructure	463
	Key PKI Concepts	464
	Elements of a PKI	467
	PKI Terminology	473
	Planning and Managing the Certificate Server	478
	Installing Microsoft Certificate Server	478
	Controlling the CA Service	484
	Configuring the CA	488
	Configuring Revocation and Trust	497
	Managing Certificates	505
	Introducing the Certificates Snap-In	505
	Viewing and Changing Certificate Properties	506
	Requesting New Certificates	510
	Rekeying an Existing Certificate	514
	Renewing a Certificate	514
	Importing, Exporting, and Locating Certificates	515
	Summary	519
	Exam Essentials	520
	Key Terms	522
	Review Questions	523
	Answers to Review Questions	528
<b>Chapter 9</b>	<b>Planning High Availability Services</b>	<b>531</b>
	Evaluating Availability and Scalability Solutions	532
	Identifying Threats to High Availability	534
	Evaluating Scalability Methods	535
	Evaluating Clustering Technologies	535
	Planning Server Clusters	536
	Understanding the Terminology	537
	Analyzing Business and Application Requirements	538
	Evaluating Application Deployment Considerations	539
	Determining the Cluster Model	547
	Planning Multisite Clusters	550
	Networking the Cluster	552

Planning Network Load Balancing	554	
Monitoring NLB	556	
Administering NLB Remotely	560	
Recovering from Cluster Node Failure	560	
Backing Up Cluster Data	560	
Recovering from Cluster Failure	561	
Summary	563	
Exam Essentials	564	
Key Terms	565	
Review Questions	566	
Answers to Review Questions	573	
<b>Chapter 10</b>	<b>Planning Network Monitoring, Remote Administration, and Recovery</b>	<b>575</b>
Monitoring Network Traffic	577	
Installing the Network Monitor Driver and Application	578	
Using Network Monitor	581	
Monitoring and Optimizing System Performance	589	
Understanding System Monitor	590	
Monitoring Server Performance with System Monitor	595	
Using Additional Tools to Monitor Performance	612	
Planning Secure Remote Administration Methods	620	
Planning to Remotely Administer Computers with Remote Desktop for Administration	621	
Planning to Offer Remote Assistance to Client Computers	628	
Planning a Backup and Recovery Strategy	634	
Using Windows Backup	634	
Using Volume Shadow Copy	645	
Using Automated System Recovery	647	
Summary	650	
Exam Essentials	650	
Key Terms	651	
Review Questions	652	
Answers to Review Questions	657	
<b>Glossary</b>	<b>659</b>	
<i>Index</i>	693
