

1 SYSTEM REQUIREMENTS

1.1 Windows

- 133 MHz Intel Pentium processor,
- 32 MB of free available system RAM,
- CD ROM drive,
- Soundcard,
- 8-bit (256 colours) system.

Platform	Browser
	Internet Explorer 4.0 or later, Netscape Navigator 4 or later
Windows 95	Netscape 6.2 or later, with standard install defaults, AOL 7 and Opera 6
Windows 98	
Windows ME	
Windows NT	Internet Explorer 4.0 or later, Netscape Navigator 4 or later
Windows 2000	Netscape 6.2 or later, with standard install defaults, CompuServe 7 (2000 and XP only), AOL 7 and Opera 6
Windows XP	

To use the Essentials with Internet Explorer you have to activate at least the following security settings:

- Run ActiveX-Control elements and plugins
- Active scripting

1.2 UNIX

There are also Flash Web Players for UNIX systems available.

- Sun Solaris,
- Linux,
- SGI IRIX,
- HP-UX.

Please refer to the website from Macromedia® <http://www.macromedia.com> for more information about installing and system requirements.

1.3 General Information

The tutorial was designed to work with Microsoft Internet Explorer® version 4+ and with Netscape™ version 4+. It may not work properly with the AOL

browser. You may encounter other inconsistencies or incompatibilities between browsers, and what will work for one may not necessarily work for another.

This course contains animated demonstrations of procedures, for which you will need Macromedia Flash™ player version 4+. This player can be downloaded and installed at no cost from Macromedia®. Probably, you will not be able to use extended features of the tutorial if you are using Netscape version 6. If you are having difficulty with the Flash player for Unix, please check that you have the latest version of the Flash player installed and minimize the number of other applications running while you are viewing the tutorial.

You can test proper installation of the Flash player by visiting Macromedia's Flash test page.

1.4 Downloads
