

Contents

<i>Introduction</i>	xxi
Chapter 1 • Getting to Know VIZ	1
Introducing the New VIZ 2008 Features	1
Getting Started	2
Touring the Interface	3
The Main Menu Bar	3
The Main Toolbar	5
Docked and Floating Toolbars	6
Toolbar Flyouts	8
Tool Palettes	9
The Viewport	11
Tools for Working with the Viewport	11
Getting to Know the Command Panel	15
Understanding VIZ's Tools	15
Working with Objects	21
Selecting and Moving Objects	21
Rotating and Scaling Objects	25
Copying an Object	28
Selecting Multiple Objects	29
Naming Selection Sets	35
Editing Named Selection Sets	35
Getting the View You Want	38
Understanding the Perspective Viewing Tools	38
Using Multiple Viewports	43
Changing the Viewport Display and Configuration	45
Working with the Custom UI and Defaults Switcher	52
The Bottom Line	55
Chapter 2 • Introducing VIZ Objects	57
Understanding Standard Primitives	57
Adjusting an Object's Parameters	59
Accessing Parameters	64
Introducing the Standard Primitive Objects	65
Modeling Standard Primitives with Modifiers	68
Adding a Modifier	69
Accessing Modifier Parameters	72
Placing Modifiers Where You Want Them	75
Using the Modifier Stack Tools	77
How VIZ Sees Objects	78
Making Clones That Share Properties	79
Creating an Instance Clone	79
Creating a Reference Clone	82

Scaling and Rotating Objects with Transform Tools	84
Making a Clone Unique	88
Cloning a Modifier	89
Introducing Extended Primitives	91
Modeling a Couch	92
Working with Groups	98
Grouping the Components of the Couch	98
Working within Groups	99
Disassembling Groups	101
The Bottom Line	102
Chapter 3 • Creating Shapes with Splines	105
Drawing with Splines	106
Drawing Straight-Line Segments	107
Constraining Lines Vertically and Horizontally	108
Drawing Curves	109
Lathing a Spline	111
Modifying a Shape Using Subobject Levels	113
Adjusting the Lathe Axis	114
Flipping Surface Normals	116
Smoothing Spline Corners	117
Adjusting Tangent Handles	120
Creating Thickness with a Spline	125
Outlining and Extruding Splines	129
Drawing Accurate Line Splines	129
Giving Walls Thickness	131
Using Grids and Snaps to Align Objects Accurately	133
Adjusting a Wall Location	139
Combining and Extruding Primitive Splines	142
Combining Splines	143
Joining Closed Splines with Boolean Tools	148
Creating a Solid Form with Splines	151
Introducing the Spline Types	156
Editing Splines	159
Placing and Beveling Text	161
The Bottom Line	166
Chapter 4 • Editing Meshes and Creating Complex Objects	169
Creating Openings in a Wall with Boolean Operations	169
Hiding Shapes That Get in the Way	170
Creating the Shape of the Opening	172
Subtracting the Opening from the Wall	173
Creating Multiple Openings in a Single Wall	175
Making Changes to the Opening	176
Tracing Over a Sketch	178
Importing a Bitmap Image	178
Scaling the Image to the Model's Space	181
Tracing Over the Image	184
Building Objects from Traced Lines	186

Editing Meshes	195
Creating a Tapered Wall	195
Converting the Spline to a Mesh	198
Moving a Single Mesh Vertex	202
Tapering the Top of the Wall	208
Using Instance Clones to Create Symmetric Forms	209
Adding a User Grid to Aid Tracing	210
Building the Tower Walls	211
Adding the Vaulted Ceiling	214
Creating the Smaller Towers	221
Drawing the Remaining Walls	224
Attaching Objects to a Mesh	228
Smoothing Meshes	230
Smoothing within a Mesh	231
The Smooth Modifier	234
Creating Clones with Array and Snapshot	235
Creating a Column Grid With Array	235
Creating a Multitransform Polar Array	239
Creating Multiple Clones Using Snapshot	241
The Bottom Line	243
Chapter 5 • Creating AEC and Entourage Objects	245
Using AEC Objects	245
Creating a Parametric Wall	245
Adding Doors and Windows to Walls	248
Changing Elevations with Stairs	251
Setting Boundaries with Railings	255
Adding Foliage to a Scene	259
Creating Trees with the EASYnat Plug-in	261
Creating an EASYnat Plant	261
Modifying an EASYnat Plant	264
Adding Content with the RPC Plug-in	265
Adding a Static RPC	266
Adding an Animated RPC	269
The Bottom Line	271
Chapter 6 • Organizing and Editing Objects	273
Naming Objects	273
Organizing Objects by Layers	278
Setting Up Layers	278
Assigning Objects to Layers	279
Assigning Color to Layers	280
Controlling Object Visibility Through Layers	283
Lofting the Roof	285
Setting Up the Shapes to Form the Roof Edge	286
Lofting an Object	291
Adjusting the Loft Profile in Relation to the Loft Path	293
Fine-Tuning a Loft Object	295

Using Different Shapes along the Loft Path	296
Adding a Third Shape to the Loft	300
Using the Path Clone to Edit the Loft Path	303
Creating Surfaces from Splines	306
Building the Spline Armature	307
Deforming the Armature	310
Creating Shells from Surfaces	314
Completing the Roof	315
Tracing the Border	315
Working with Booleans	318
Putting the Roofs Together	320
Extruding with the Sweep Modifier	322
Aligning Objects	325
The Bottom Line	327
Chapter 7 • Light and Shadow	329
Lighting Your Model	329
Understanding the Types of Lights	329
Adding a Spotlight to Simulate the Sun	331
Moving a Light	333
Editing a Spotlight	334
Changing the Light Type	336
Rendering a View	338
Ambient Light	340
Faking Radiosity	342
Adding a Highlight with an Omni Light	346
Looking at Omni Light Options	349
Adding Shadow Effects	352
Softening Shadow Edges	354
Understanding Shadow Maps	355
Using Ray-Traced Shadows	358
Using Advanced Ray Traced Shadows and Area Shadows	360
Playing in the Shadows	362
Using Two Suns	362
Adding a Second Sun	364
Using Invisible Objects to Cast Shadows	367
Using a Clone to Cast Shadows	368
Using the Light Lister	370
Using Scene States	372
The Bottom Line	375
Chapter 8 • Enhancing Models with Materials	377
Understanding Bitmap Texture Maps	377
Diffuse Color Maps	378
Surface Properties	382
Adding Materials to Objects	382
Adding a Map Path to Help VIZ Find Bitmaps	383
Fine-Tuning Color	391

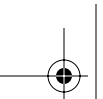

Understanding Material Libraries	392
Adding Material Mapping Coordinates	393
Understanding Mapping Coordinates	399
What Happens When You Add the Mapping Coordinates	399
Adjusting the UVW Map Gizmo	401
Editing Materials	407
Adjusting Bitmap Strength	408
Adjusting the Material Color	411
Copying Color Settings	412
Selecting Shaders	413
Map Scalar Modifiers	415
Using Bump Maps	418
Adding Entourage	420
Hiding Unwanted Surfaces with Opacity Maps	420
Adjusting an Object to a Bitmap Shape	427
Ray-Tracing Reflection and Refraction	428
Assigning Materials to Parts of an Object	429
Opening a Group	430
Creating a Multi/Sub-Object Material	430
Applying a Submaterial to an Object's Surface	433
Using the Architectural Material	437
The Physical Qualities Rollout	439
The Special Effects Rollout	440
The Material Utilities	441
The Bottom Line	446
Chapter 9 • Staging Your Design	447
Understanding the VIZ Camera	447
Adding a Camera	448
Editing the Camera Location with the Viewport Tools	452
Setting Up an Interior View	457
Creating an Environment	458
Making Adjustments to the Background	461
Immersive Environments for Animation	467
Creating a Credible Background	467
Using a Texture Map and Hemisphere for the Sky	469
Using Render Types	472
Render Elements for Compositing	474
The Bottom Line	477
Chapter 10 • Working with Files	479
Gaining Access to Materials and Objects from Other Files	479
Arranging Furniture with XRefs and the Asset Browser	486
Replacing Objects with Objects from an External File	488
Substituting Objects for Faster Viewport Performance	490
Importing Files with the Asset Browser	492
Arranging Furniture with XRef Scenes	495

Using the Rendered Frame Windows	499
Printing Images	501
Opening Multiple Rendered Frame Windows for Comparisons	502
Zooming, Panning, and Controlling Channels in the Rendered Frame Window	502
Obtaining Colors from External Bitmap Files	502
Using the Asset Browser on the Internet	503
Tracking and Locating a Scene's Assets	506
Publishing a DWF File	508
The Bottom Line	510
Chapter 11 • Using Radiosity	513
Adding Daylight to Your Model	513
Understanding the Radiosity Workflow	518
Refining Your Radiosity Solution	519
Setting the Material Reflectivity with Architectural Materials	520
Understanding the Radiosity Mesh	524
Creating a Finished Rendering	531
Working with Artificial Lights	537
Using Photometric Lights	539
Using a Shortcut to Generic Light Fixtures	543
Importing the Photometric Lights Using XRefs	543
Adjusting Shadows for Photometric Lights	545
Understanding Photometric Lights	550
Points Are Bulbs, Linears Are Tubes, and Areas Are Rectangles	550
Controlling the Direction of Lights	551
Understanding Web Distribution	552
Specifying the Color Temperature and Light Intensity	554
Specifying Linear and Area Light Dimensions	555
Understanding Dynamic Range	556
Assembling an Articulated Luminaire	560
Transforming Pivot Points	560
Aligning the Light Source with the Fixture	562
Using Schematic View	562
The Bottom Line	577
Chapter 12 • Using mental ray	579
Understanding mental ray	579
Setting Up mental ray	582
The Material Editor and mental ray	583
Using Photon Maps	587
Testing the Photon Map Effects	588
Final Gathering	600
Reviewing the Basic mental ray Workflow	603
Contour Renderings	603
Skylight Global Illumination	607
Image-Based Lighting and Skylight	610
Using High Dynamic Range Images	613
The Bottom Line	614

Chapter 13 • Understanding Animation.....	617
Understanding the World of Video Time	617
Creating a Quick-Study Animation	618
Adding Camera Motion	619
Adjusting the Camera Path	620
Viewing the Camera Trajectory	622
Controlling the Camera Trajectory Visibility	624
Creating a Preview Animation	625
Understanding Keyframes	626
Increasing the Number of Frames in an Animation Segment	629
Accelerating and Decelerating the Camera Motion Smoothly	630
Editing Keyframes	634
Adding More Frames for Additional Camera Motion	636
Adding Frames to the End of a Segment	636
Adjusting the Camera Motion through a Keyframe	638
Compressing and Expanding Time	643
Adjusting the Camera Trajectory Using the Track View	648
Increasing the Number of Frames between Selected Keys	655
Speeding Up the Preview Rendering Time	656
Adding Frames to the Beginning of a Segment	656
Other Options for Previewing Your Motion	659
Moving the Camera Target over Time	660
Controlling Lights over Time	662
The Bottom Line	665
Chapter 14 • Creating Animations	667
Rendering the Animation	667
Creating a Study Animation	667
Creating a Quick Overall Study Animation	670
Adding a Moving Car	671
Automating Output of Multiple Still Images	675
Setting Up a Camera for Elevations	676
Setting Up the Four Elevations	677
Rendering a Shadow Study	681
Adjusting for True North	682
Changing from IES Sun to a Standard Light	683
Creating a Walkthrough	685
Fine-Tuning the Camera's Orientation	687
Adjusting the Camera's Timing	689
Adjusting the Path	690
The Animation File Output Options	691
True Color vs. 256 Colors	693
File Naming in Animations	694
Choosing an Image Size	694
The AVI Codecs	695
The Bottom Line	696

Chapter 15 • Using Photoshop with VIZ	697
The Photoshop Interface and VIZ	697
Creating a Tree Map in Photoshop	699
Selecting Areas in an Image	699
Selecting Areas with the Lasso	703
Selecting Specific Colors	705
Creating the Opacity Map	707
Using Quick Mask to Fine-Tune Your Selection	707
Transferring a Selection to a New File	709
Changing a Color to Black	709
Softening the Edges with the Airbrush Tool	710
Saving Images with Alpha Channels	713
Using Alpha Channel Images in VIZ	714
Using Photoshop to Create a Montage	717
Adding a Tree in the Foreground	720
Creating Bump Maps for Elaborate Textures	723
Using AutoCAD for the Outline	723
Building Textures in Photoshop	727
Testing the Image in VIZ	733
Adding Irregularity and Color to the Material	735
Adding Color through Photoshop	737
Modeling with Displacement Maps	742
Using the Displace Modifier	742
Using the Material Editor to Create Displaced Geometry	745
Converting a Displacement Map into an Editable Mesh	749
Creating an Editable Mesh from a Displacement Map	751
The Bottom Line	753
 Chapter 16 • Combining Photographs with VIZ Designs	 755
Mesh Editing with a Photograph	755
Establishing the Basic Form	756
Moving Vertices	759
Adding Curvature	761
Smoothing the Surface	769
Adding Detail with Photographs	770
Creating a Material for the Car Side	770
Adding the UVW Map Modifier	771
Adding the Front to the Car	774
Smoothing the Mesh	779
Matching Your Scene to a Background Image	782
Setting Up the Model and the Image	782
Adding the Background Image	783
Adding the Camera Match Points	785
Aligning the Camera Match Points to the Background Image	787
Fine-Tuning a Camera-Matched View	791
Matching the Design Image Quality to the Background	791
The Bottom Line	793

Chapter 17 • Using Other Autodesk Applications with VIZ	795
Creating Topography with Splines	796
Updating Changes from an AutoCAD File	800
Exploring Terrain Options	801
Setting Up an AutoCAD Plan for VIZ	804
Importing AutoCAD Plans into VIZ	810
Extruding the Walls	811
Extruding Headers	813
Extruding the Mullions	814
Adding Glass	814
Creating a Floor with Openings	816
Exploring the File Link Manager	821
Editing Linked AutoCAD Files	823
Understanding the Block Node Hierarchy	824
Understanding the File Link Manager Options	827
Understanding File Link Settings	829
Using the Substitute Modifier with Linked Geometry	834
Importing a Truss	837
Importing Revit Files into VIZ	839
Export the Revit File	840
Link the Exported File in VIZ	841
The Bottom Line	843
Appendix A • The Bottom Line	845
Chapter 1: Getting to Know VIZ	845
Chapter 2: Introducing VIZ Objects	847
Chapter 3: Creating Shapes with Splines	850
Chapter 4: Editing Meshes and Creating Complex Objects	852
Chapter 5: Creating AEC and Entourage Objects	854
Chapter 6: Organizing and Editing Objects	857
Chapter 7: Light and Shadow	860
Chapter 8: Enhancing Models with Materials	861
Chapter 9: Staging Your Design	864
Chapter 10: Working with Files	866
Chapter 11: Using Radiosity	868
Chapter 12: Using mental ray	869
Chapter 13: Understanding Animation	872
Chapter 14: Creating Animations	875
Chapter 15: Using Photoshop with VIZ	879
Chapter 16: Combining Photographs with VIZ Designs	880
Chapter 17: Using Other Autodesk Applications with VIZ	882
Appendix B • Modifiers and Materials	885
Modifiers	885
Selection Modifiers	885
World-Space Modifiers	886
Object-Space Modifiers	889

Materials and Maps	904
Materials (Blue Spheres)	904
Maps (Green Parallelogram)	907
Appendix C • Patches and NURBS Surfaces	913
Understanding Patches	913
Converting a Plane into an Editable Patch	913
Converting Other Standard Primitives to Editable Patches	914
Understanding NURBS	916
Looking at NURBS Curves	916
Creating NURBS Surfaces from Standard Primitives	918
Applying a NURBS Deformation to an Object	919
Appendix D • Helpers and Effects	921
Helpers	921
Standard Helpers	921
Atmospheric Apparatus	925
Camera Match	925
Assembly Heads	925
VRML97	925
RPC Helpers	925
Effects	926
Atmospheric Effects	926
Rendering Effects	930
<i>Index</i>	937
