

Contents

<i>Introduction</i>	xv
Chapter 1 • Getting to Know VIZ	1
Introducing VIZ 2007 Features	1
Getting Started	2
Touring the Interface	3
The Main Menu Bar	3
The Main Toolbar	5
Docked and Floating Toolbars	6
Toolbar Flyouts	8
Tool Palettes	9
The Viewport	10
Tools for Working with the Viewport	11
Tools for Working with Time	13
Getting to Know the Command Panel	14
Understanding VIZ's Tools	15
Working with Objects	21
Selecting and Moving Objects	21
Rotating and Scaling Objects	24
Copying an Object	28
Selecting Multiple Objects	29
Naming Selection Sets	34
Editing Named Selection Sets	35
Getting the View You Want	37
Understanding the Perspective Viewing Tools	37
Using Multiple Viewports	42
Changing the Viewport Display and Configuration	45
Working with the Custom UI and Defaults Switcher	52
Summary	54
Chapter 2 • Introducing VIZ Objects	55
Understanding Standard Primitives	55
Adjusting an Object's Parameters	58
Accessing Parameters	64
Introducing the Standard Primitive Tools	64
Modeling Standard Primitives with Modifiers	68
Adding a Modifier	68
Accessing Modifier Parameters	71
Inserting Modifiers Where You Want Them	74
Using the Modifier Stack Tools	76
How VIZ Sees Objects	78

Making Clones That Share Properties 79

- Creating an Instance Clone 79
- Creating a Reference Clone 81
- Scaling and Rotating Objects with Transform Tools 84
- Making a Clone Unique 88
- Cloning a Modifier 88

Introducing Extended Primitives 91

- Modeling a Couch 91

Working with Groups 98

- Grouping the Components of the Couch 98
- Working within Groups 100
- Disassembling Groups 102

Summary 103

Chapter 3 • Creating Shapes with Splines 105

Drawing with Splines 106

- Drawing Straight-Line Segments 107
- Constraining Lines Vertically and Horizontally 108
- Drawing Curves 109
- Lathing a Spline 111

Modifying a Shape Using Subobject Levels 112

- Adjusting the Lathe Axis 113
- Flipping Surface Normals 115
- Smoothing Spline Corners 116
- Adjusting Tangent Handles 120
- Creating Thickness with a Spline 123

Outlining and Extruding Splines 127

- Drawing Accurate Line Splines 127
- Giving Walls Thickness 130
- Using Grids and Snaps to Align Objects Accurately 131
- Adjusting a Wall Location 138

Combining and Extruding Primitive Splines 140

- Combining Splines 141

Joining Closed Splines with Boolean Tools 146

Creating a Solid Form with Splines 150

Introducing the Spline Types 153

Editing Splines 157

Placing and Beveling Text 158

Summary 163

Chapter 4 • Editing Meshes and Creating Complex Objects 165

Creating Openings in a Wall with Boolean Operations 165

- Hiding Shapes That Get in the Way 166
- Creating the Shape of the Opening 168
- Subtracting the Opening from the Wall 169
- Creating Multiple Openings in a Single Wall 171
- Making Changes to the Opening 172

Tracing over a Sketch	174
Importing a Bitmap Image	175
Scaling the Image to the Model's Space	177
Tracing Over the Image	179
Building Objects from Traced Lines	182
Editing Meshes	191
Creating a Tapered Wall	191
Converting the Spline to a Mesh	194
Moving a Single Mesh Vertex	198
Tapering the Top of the Wall	204
Using Instance Clones to Create Symmetric Forms	206
Adding a User Grid to Aid Tracing	206
Building the Tower Walls	207
Adding the Vaulted Ceiling	211
Creating the Smaller Towers	217
Drawing the Remaining Walls	220
Attaching Objects to a Mesh	224
Smoothing Meshes	227
Smoothing within a Mesh	227
The Smooth Modifier	230
Creating Clones with Array and Snapshot	231
Creating a Column Grid With Array	231
Creating a Multitransform Polar Array	234
Creating Multiple Clones Using Snapshot	236
Summary	238
Chapter 5 • Creating AEC and Entourage Objects	239
Using AEC Objects	239
Creating a Parametric Wall	239
Adding Doors and Windows to Walls	242
Changing Elevations with Stairs	246
Setting Boundaries with Railings	249
Adding Foliage to a Scene	253
Creating Trees with the EASYnat Plug-in	255
Creating an EASYnat Plant	255
Modifying an EASYnat Plant	258
Adding Content with the RPC Plug-in	260
Adding a Static RPC	261
Adding an Animated RPC	263
Summary	266
Chapter 6 • Organizing and Editing Objects	267
Naming Objects	267
Organizing Objects by Layers	270
Setting Up Layers	272
Assigning Objects to Layers	273
Assigning Color to Layers	274
Controlling Object Visibility through Layers	276

Lofting the Roof	279
Setting Up the Shapes to Form the Roof Edge	280
Lofting an Object	285
Adjusting the Loft Profile in Relation to the Loft Path	287
Fine-Tuning a Loft Object	289
Using Different Shapes along the Loft Path	291
Adding a Third Shape to the Loft	295
Using the Path Clone to Edit the Loft Path	298
Creating Surfaces from Splines	301
Building the Spline Armature	302
Deforming the Armature	304
Creating Shells from Surfaces	309
Completing the Roof	310
Tracing the Border	310
Working with Booleans	312
Putting the Roofs Together	314
Extruding with the Sweep Modifier	316
Aligning Objects	319
Summary	322
Chapter 7 • Light and Shadow	323
Lighting Your Model	323
Understanding the Types of Lights	323
Adding a Spotlight to Simulate the Sun	325
Moving a Light	326
Editing a Spotlight	328
Changing the Light Type	329
Rendering a View	331
Ambient Light	334
Faking Radiosity	336
Adding a Highlight with an Omni Light	340
Looking at Omni Light Options	342
Adding Shadow Effects	346
Softening Shadow Edges	348
Understanding Shadow Maps	349
Using Ray Traced Shadows	352
Using Advanced Ray Traced Shadows and Area Shadows	354
Playing in the Shadows	357
Using Two Suns	357
Adding a Second Sun	359
Using Invisible Objects to Cast Shadows	361
Using a Clone to Cast Shadows	363
Using the Light Lister	365
Using Scene States	367
Summary	370

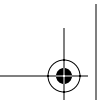

Chapter 8 • Enhancing Models with Materials	371
Understanding Bitmap Texture Maps	371
Diffuse Color Maps	372
Surface Properties	376
Adding Materials to Objects	376
Adding a Map Path to Help VIZ Find Bitmaps	377
Fine-Tuning Color	384
Understanding Material Libraries	386
Adding Material Mapping Coordinates	386
Understanding Mapping Coordinates	392
What Happens When You Add the Mapping Coordinates	392
Adjusting the UVW Map Gizmo	394
Editing Materials	401
Adjusting Bitmap Strength	401
Adjusting the Material Color	404
Copying Color Settings	405
Selecting Shaders	406
Map Scalar Modifiers	407
Using Bump Maps	410
Adding Entourage	413
Hiding Unwanted Surfaces with Opacity Maps	413
Adjusting an Object to a Bitmap Shape	420
Ray Tracing Reflection and Refraction	421
Assigning Materials to Parts of an Object	423
Opening a Group	423
Creating a Multi/Sub-Object Material	424
Applying a Sub-Material to an Object's Surface	427
Using the Architectural Material	430
The Physical Qualities Rollout	432
The Special Effects Rollout	434
The Material Utilities	434
Summary	438
Chapter 9 • Staging Your Design	439
Understanding the VIZ Camera	439
Adding a Camera	440
Editing the Camera Location with the Viewport Tools	443
Setting Up an Interior View	448
Creating an Environment	449
Making Adjustments to the Background	452
Immersive Environments for Animation	458
Creating a Credible Background	458
Using a Texture Map and Hemisphere for the Sky	460
Using Render Types	463
Render Elements for Compositing	466
Summary	468

Chapter 10 • Working with Files	469
Gaining Access to Materials and Objects from Other Files	469
Arranging Furniture with XRefs and the Asset Browser	476
Replacing Objects with Objects from an External File	478
Substituting Objects for Faster Viewport Performance	480
Importing Files with the Asset Browser	481
Arranging Furniture with XRef Scenes	485
Using the Rendered Frame Windows	489
Printing Images	490
Opening Multiple Rendered Frame Windows for Comparisons	491
Zooming, Panning, and Controlling Channels in the Rendered Frame Window ..	491
Obtaining Colors from External Bitmap Files	492
Using the Asset Browser on the Internet	493
Tracking and Locating Scene's Assets	496
Summary	497
Chapter 11 • Using Radiosity	499
Adding Daylight to Your Model	499
Understanding the Radiosity Workflow	504
Refining Your Radiosity Solution	504
Setting the Material Reflectivity	506
Understanding the Radiosity Mesh	510
Creating a Finished Rendering	516
Working with Artificial Lights	523
Using Photometric Lights	524
Using a Shortcut to Generic Light Fixtures	528
Importing the Photometric Lights Using XRefs	528
Adjusting Shadows for Photometric Lights	530
Understanding Photometric Lights	535
Points Are Bulbs, Linears Are Tubes, and Areas Are Rectangles	535
Controlling the Direction of Lights	536
Understanding Web Distribution	536
Specifying the Color Temperature and Light Intensity	538
Specifying Linear and Area Light Dimensions	540
Understanding Dynamic Range	540
Assembling an Articulated Luminaire	544
Transforming Pivot Points	544
Aligning the Light Source with the Fixture	546
Using Schematic View	546
Summary	561
Chapter 12 • Using mental ray	563
Understanding mental ray	563
Setting Up mental ray	565
The Material Editor and mental ray	567
Using Photon Maps	570
Testing the Photon Map Effects	572

Final Gathering	583
Reviewing the Basic mental ray Workflow	585
Contour Renderings	586
Skylight Global Illumination	588
Image-Based Lighting and Skylight	592
Using High Dynamic Range Images	593
Summary	596
Chapter 13 • Understanding Animation.....	597
Understanding the World of Video Time	597
Creating a Quick Study Animation	598
Adding Camera Motion	599
Adjusting the Camera Path	602
Viewing the Camera Trajectory	604
Controlling the Camera Trajectory Visibility	605
Creating a Preview Animation	606
Understanding Keyframes	608
Increasing the Number of Frames in an Animation Segment	610
Accelerating and Decelerating the Camera Motion Smoothly	612
Editing Keyframes	615
Adding More Frames for Additional Camera Motion	618
Adding Frames to the End of a Segment	618
Adjusting the Camera Motion through a Keyframe	621
Compressing and Expanding Time	625
Adjusting the Camera Trajectory Using the Track View	630
Increasing the Number of Frames between Selected Keys	635
Speeding Up the Preview Rendering Time	637
Adding Frames to the Beginning of a Segment	637
Other Options for Previewing Your Motion	639
Moving the Camera Target over Time	641
Controlling Lights over Time	642
Summary	646
Chapter 14 • Creating Animations	647
Rendering the Animation	647
Creating a Study Animation	648
Creating a Quick Overall Study Animation	651
Adding a Moving Car	652
Automating Output of Multiple Still Images	656
Setting Up a Camera for Elevations	657
Setting Up the Four Elevations	658
Rendering a Shadow Study	662
Adjusting for True North	662
Changing from IES Sun to a Standard Light	664
Creating a Walkthrough	665
The Animation File Output Options	669
True Color versus 256 Colors	672
File Naming in Animations	672

Choosing an Image Size	672
The AVI Codecs	673
Summary	674
Chapter 15 • Using Photoshop with VIZ	675
The Photoshop Interface and VIZ	675
Creating a Tree Map in Photoshop	676
Selecting Areas in an Image	677
Selecting Areas with the Lasso	681
Selecting Specific Colors	682
Creating an Opacity Map	684
Using Quick Mask to Fine-Tune Your Selection	685
Transferring a Selection to a New File	686
Changing a Color to Black	687
Softening the Edges with the Airbrush Tool	688
Saving Images with Alpha Channels	690
Using Alpha Channel Images in VIZ	691
Using Photoshop to Create a Montage	694
Adding a Tree in the Foreground	697
Creating Bump Maps for Elaborate Textures	699
Using AutoCAD for the Outline	700
Building Textures in Photoshop	703
Testing the Image in VIZ	708
Adding Irregularity and Color to the Material	710
Adding Color through Photoshop	712
Modeling with Displacement Maps	716
Using the Displace Modifier	717
Using the Material Editor to Create Displaced Geometry	720
Converting a Displacement Map into an Editable Mesh	724
Creating an Editable Mesh from a Displacement Map	725
Summary	727
Chapter 16 • Combining Photographs with VIZ Designs	729
Mesh Editing with a Photograph	729
Establishing the Basic Form	730
Moving Vertices	733
Adding Curvature	736
Smoothing the Surface	744
Adding Detail with Photographs	745
Creating a Material for the Car Side	745
Adding the UVW Map Modifier	747
Adding the Front to the Car	749
Smoothing the Mesh	754
Matching Your Design to a Background Image	756
Setting Up the Model and the Image	757
Adding the Background Image	758
Adding the Camera Match Points	759
Aligning the Camera Match Points to the Background Image	762

Fine-Tuning a Camera-Matched View	765
Matching the Design Image Quality to the Background	765
Summary	767
Chapter 17 • Using AutoCAD-Based Applications with VIZ	769
Creating Topography with Splines	770
Updating Changes from an AutoCAD File	774
Exploring Terrain Options	775
Setting Up an AutoCAD Plan for VIZ	778
Importing AutoCAD Plans into VIZ	783
Extruding the Walls	785
Extruding Headers	786
Extruding the Mullions	787
Adding Glass	787
Creating a Floor with Openings	789
Exploring the File Link Manager	794
Editing Linked AutoCAD Files	796
Understanding the Block Node Hierarchy	797
Understanding the File Link Manager Options	800
Understanding File Link Settings	801
Using the Substitute Modifier with Linked Geometry	806
Importing a Truss	808
Summary	811
Chapter 18 • Exporting to the Web	813
Creating Panoramas	814
Making Virtual Reality Worlds	819
Installing a VRML Client	820
Virtual Helpers	820
Building a Virtual World	822
Exporting the VRML File	830
Exploring the World	831
Exporting Shockwave 3D Content	835
Using Render to Texture for Real-Time Models	837
Calculating Advanced Lighting Data	837
Baking Lighting into Textures	840
Examining the Baked Materials and Mapping	843
Summary	846
Appendix A • Installation Notes	847
Installing VIZ	847
Moving VIZ to Another Computer	849
Visit the Autodesk Website Often	851
Appendix B • Modifiers and Materials	853
Modifiers	853
Selection Modifiers	853

World-Space Modifiers	854
Object-Space Modifiers	856
Materials and Maps	871
Materials (Blue Sphere)	872
Maps (Green Parallelogram)	875
Appendix C • Patches and NURBS Surfaces	879
Understanding Patches	879
Converting a Plane into an Editable Patch	879
Converting Other Standard Primitives to Editable Patches	880
Understanding NURBS	882
Looking at NURBS Curves	882
Creating NURBS Surfaces from Standard Primitives	884
Applying a NURBS Deformation to an Object	885
Appendix D • Helpers and Effects	887
Helpers	887
Standard Helpers	887
Atmospheric Apparatus	891
Camera Match	891
Assembly Heads	891
VRML97	891
RPC Helpers	891
Effects	891
Atmospheric Effects	892
Rendering Effects	896
