

Contents

	<i>Introduction</i>	<i>xix</i>
Part I	Background	1
Chapter 1	Setting the Stage	3
	A Few Precious Moments...	4
	The Three Keys to Online Marketing	7
	Acquisition	8
	Conversion	13
	Retention	20
	The Myth of Perfect Conversion	22
	What's Wrong with This Picture?	24
Chapter 2	Understanding Your Landing Pages	27
	Landing Page Types	28
	What Parts of Your Site Are Mission Critical?	29
	Who Is Your Landing Page Designed For?	31
	What Is the Desired Conversion Action?	31
	What Is the Lifetime Value of the Conversion Action?	33
	The Financial Impact of Conversion Rate Improvement	34
Chapter 3	Understanding Your Audience	47
	Empathy: The Key Ingredient	48
	Covering the Complete Story	49
	Demographics and Segmentation	50
	Web Analytics	51
	Traffic Sources and Their Variability	52
	Behavioral Styles	55
	Myers-Briggs	56
	Keirsey-Bates	58
	Platinum Rule	58
	User-Centered Design	59
	Usability Testing	60
	Personas	61
	Roles	64
	Tasks	65
	The Matrix	65

Chapter 4	Understanding The Decision Process	67
	Overview of the Decision Process	68
	Awareness (Attention)	69
	Banner Ads	71
	Entry Pop-ups	71
	Exit Pop-ups	72
	Home Page Awareness	72
	Keys to Creating Awareness	75
	Interest	75
	Self-Selection	76
	Need Recognition	77
	Desire	78
	Do You Have What the Visitor Wants?	79
	Action	87
	Should the Visitor Get It from You?	87
	Transacting	94
Part II	What and How to Tune	105
Chapter 5	Why Your Site Is Not Perfect	107
	Your Baby Is Ugly	108
	Uncovering Problems	109
	Audience Role Modeling	109
	Web Analytics	111
	Onsite Search	120
	Usability Testing	122
	Usability Reviews	122
	Focus Groups	122
	Eye-Tracking Studies	123
	Customer Service Reps	124
	Surveys	124
	Forums and Blogs	125
	Welcome to Your Brain	125
	Your Three Brains	125
	Learning Modalities	127
	Constraints and Conventions	128
	Usability Basics	129
	Information Architecture	130
	Accessibility	130
	Language	132
	Visual Design	137

Chapter 6	Selecting Elements to Tune	141
	How to Think About Test Elements	142
	Breadth of Impact	142
	Granularity	145
	Sweep	147
	Coherency	148
	Audience Segmentation	150
	Longevity	150
	Baggage	151
	Selecting Elements to Tune	151
	Page Structure	152
	Information Architecture	153
	Presentation	153
	Emphasis	154
	Tuning Multiple-Page Flows	154
	Systematic	155
	Connected	155
	Flexible	156
	Timeless Testing Themes	157
	Less Is More	157
	Personalize It	161
	Test the Offer	162
	Price Testing	162
	Qualitative Methods	163
	Quantitative Methods	163
Chapter 7	The Math of Tuning	169
	Just Grin and Bear It	170
	Lies, Damn Lies, and Statistics	170
	Throwing Away Part of the Data	171
	Biased Samples	171
	Overgeneralization	173
	Loaded Questions	173
	False Causality	174
	You Are Here	175
	Probability Theory	175
	Statistical Methods	180
	Applied Statistics	181
	Have I Found Something Better?	182
	How Sure Do I Need to Be?	183
	Collecting Insufficient Data	184
	Confusing Significance with Importance	186
	Understanding the Results	187

How Much Better Is It?	187
How Long Should My Test Run?	189
Data Rate	190
Size of Improvements Found	191
Size of Your Test	191
Variable Interactions	192
Chapter 8 Tuning Methods	197
Introduction to Tuning	198
Input and Output Variables	198
Variable	198
Value	199
Branching Factor	200
Recipe	200
Search Space Size	200
Test Construction	201
Common Tuning Issues	203
Measuring and Counting	203
Audience Changes	209
Technology Changes	212
Overview of Tuning Methods	213
A-B Split Testing	214
A-B Split Testing Advantages	214
A-B Split Testing Disadvantages	215
Multivariate Testing	217
Data Collection	217
Data Analysis	218
Fractional Factorial Parametric Testing	222
Full Factorial Parametric Testing	232
Full Factorial Non-parametric Testing	234
Part III Getting It Done	237
Chapter 9 Assembling the Team and Getting Buy-in	239
The Usual Suspects	240
User Experience	241
Product Manager	242
Webmaster	243
System Administrator	244
Graphics Designer	245
Copywriter	246
Marketing Manager	247
Programmer	248
Quality Assurance Tester	249

The Company Politics of Tuning	250
Brand Guardians	250
I.T. Staff	251
Procedural Gatekeepers	253
C-whims	253
Finance	254
Strategies for Getting Started	255
Start Small	255
Stay Below the Radar	256
Sneak It Through Your Affiliate Program	256
Outsource	256
Make the Financial Case	257
Build a Coalition	257
Insource or Outsource?	258

Chapter 10 Developing Your Action Plan 263

Before You Begin.	264
Understand Your Business Objectives	265
Building the Financial Model	266
Build Support and Assemble Your Team.	267
Assembling the Team	267
Determine Your Landing Pages and Traffic Sources	269
Selecting Traffic Sources	269
Decide What Constitutes Success	271
Selecting the Right Confidence Level	272
Uncover Problems and Decide What to Test.	273
Deciding on the Tuning Elements	274
Select an Appropriate Tuning Method	279
Implement and Conduct QA	282
Implementation	282
Quality Assurance	284
Collect the Data	286
Preparing for Data Collection	286
Monitoring Data Collection	288
Analyze the Results and Verify Improvement	289

Chapter 11 Avoiding the Pitfalls 291

A Final Warning	292
Ignoring Your Baseline	292
Collecting Enough Data	293
Variable Interactions	294

Seasonality	296
Assuming That Testing Has No Costs.	297
Delayed Conversions	299
Case Study: Power Options	302
Search Engine Considerations	307
Fear	307
Technical Issues	308
Cloaking	308
PPC	309
Inaction	310
Appendix A A Closer Look at the Google Website Optimizer	311
Background	312
Requirements and Capabilities	314
Technical Requirements	314
Alternative Content Variations Stored by Google	314
Page Rendering and Scripting	315
Possible Types of Tests	316
Example Test Setup: SF Video	316
Step 1: Identify Experiment Pages	317
Step 1b: Test Page Section Planning	318
Step 2: Add Tags to the Experiment Pages	321
Step 3: Create Variations	322
Step 4: Review Experiment Settings and Launch	323
Step 5: View Reports	323
Advantages	327
Full Factorial Data Collection	327
Robust Technology	328
Ease of Implementation	328
Price Point and Staying Power	328
Drawbacks	329
No Variable Interaction Analysis	329
Does Not Support Recipe Bandwidth Changes	329
Big Brother Sees All	330
No Easy Support for Nested or Conditional Testing Elements	330
Only Works for Counting Conversion Events	330
Rough Edges	331
Requires Engagement Support	331
Lacking Enterprise-Level Features	331
Glossary	333
<i>Index</i>	341
